"He was a good man until that designing cat got hold of him," the man said. "Now he has alimony to pay one woman and another running him ragged for new cars and this and that and he'll be lucky if he manages to keep his job. . . . I hope you're not seeing much of her. You're not her kind, thank heaven!"

"Oh, she's all right," Nan said tolerantly. "She did us one good turn, anyway. You know you always say you fell in love with me that night you came up to the apartment because I kept quiet the entire evening."

"My little mouse!" he said fondly.

Nan winced.

"But you won't have much chance to see her after we're married anyway. When we come back from abroad we'll be at the country house most of the time. Unless she comes out there. . . ."

Nan smiled. "You needn't worry, J. B. She won't come out there," she said with quiet certainty.

A Boomerang

Balzac's profound knowledge of human nature caused the great novelist to fancy himself an expert at reading character in handwriting.

One day an old woman brought him a little boy's copybook and said, "Master, what do you think of this child's possibilities?"

Balzac studied the scrawly, untidy handwriting.

"Your child?" he asked.

"No."

"Some other relative?" he ventured.

"None at all," the woman replied.

"Well," Balzac finally pontificated, "This child is slovenly and profoundly stupid. I fear he will never amount to anything."

"But, master," the woman cried, "that copybook was your very own when you were a little boy in school."

The profound judge of human nature retired in confusion.

AROUND THE HOUSE

Worn-out electric cords are highly dangerous. If it cannot be repaired, throw it away and get a new one at once.

—•—

You can save many steps by using a tray to carry dishes from the dining room to the kitchen.

—•—

If you carry stamps in your purse, fold them and slip waxed paper dividers between the gummed surface folds. Divided this way, stamps will never stick together.

—•—

Make your own belts. Make them in various colors to match your frocks. Put a layer of stiffening between two layers of ribbon. Sew through ribbon selvedges with tiny machine stitching.

—•—

An electric motor mounted on a stand or bench often is quite noisy, so much so that the vibrations can be felt in nearby rooms. The cure is a sound-deadening cushion of rubber or felt. Four or five rubber washers placed under the base will do the job.

Curtains to be stored for a season should not be starched, for the starch may attract insects and weaken the curtain fabric.

—•—

Sprinkle cornmeal on your rugs, let it remain for a short time and then sweep. This picks up dirt and particles imbedded in the nap.

Church Conflagration in 1863 Took 2,500 Lives

No building fire in modern times has taken such a toll of life as did that which destroyed the Church of La Compania in Santiago, Chile, on December 8, 1863, says Collier's.

For a festival, the church was decorated with thousands of yards of flimsy materials and 20,000 lighted oil lamps. A fire started and within three minutes the interior was an inferno and the lamps had fallen and sprayed the congregation with blazing oil.

Of the 3,000 worshipers in the building at the time, most of whom were women, 2,500 perished.

From where I sit ... by Joe Marsh

Sam Helps with the Dishwashing

Dropped in at the Abernathy's just the other evening—and there was Sam, out in the kitchen with an apron on, helping his missus wash the supper dishes. (And then I learned later he'd helped cook the supper, too.)

Of course, Sam could have settled into his favorite chair, enjoyed his evening glass of beer, and left all the messy kitchenwork to Dixie. But he kind of likes her company—and she in turn certainly appreciates his help.

In fact, sharing the housework and the mealtime chores is sort a bond between them ... like sh ing that friendly glass of beer gether, when the work is done. one of those little all-import things in marriage.

From where I sit, the time th a man and wife can spend w each other in this busy world to is all too precious. And the t things they can do together, better.

Joe Mar

Thanks!

We wish to thank the Klemme Fire Department for their quick action in reaching the scene of our fire Sunday afternoon and for the fine work they did in saving our building.

There were a lot of other people who were on the job to render any assistance needed, we do not know who they all were, but we want to thank them as well.

We feel that our entire yard would have been lost to flames if the Fire Department had not acted so quickly and efficiently and we are very greatful to you men.

rmers Study Treatment Of Seeds At Kanawha Farm

DS OF OATS NEARLY DOUBLED

xperts Show Results Of I. S. C. Experiments

eating oats seed is only par- effective in controlin hel- nosporium blight, farmers ed at the botany-plant ology field day held in Ka- a.

though seed treatmen near- doubled oat yields in the eptive Victoria derivitive ties. Tama, Boone, control others. their production is far below helminthosporium- iant Clinton, Benton and on.

C Murphy, USDA senior ologist at Iowa Statae col- told the farmers that it t not be apparent in looking a field now, but they could ct a considerably lower from the Victoria crosses year

though it is not yet known ce 45 (a type of crown rust) cut yields in Clinton, Ben- and Marion, Murphy said re- s show that helminthospori- has no effect on these 3 varie-

elminthosporium is a seed soil-borne disease which cks the roots of the oats t, the farmers learned. Di- ed plants have a stunted, un- ed look When pulled from ground, the roots lack the n. sturdy appearance of a lthy plant. The lower end the stalk looks dark and has shiny luster

lax seed treatment experi- nts showed new improved esan, applied one ounce per hel, more than doubled the mber of seeds which sprouted emerged from the soil.

Ceresan a fungicidal dust nc, protects the seeds from l parasites, increased emerg- e more than 5 times when plied to Minerva, a golden x Treated Minerva seed had 52 per cent emergence as inst only 8 per cent for un- ated.

Most brown seeded varieties sponded nearly alike. Stands re about 25 to 30 per cent m seed not treated and over per cent from treated seed.

As a result of this big im- ovement in golden varieties, S Reddy, Iowa State college ant pathologist in charge of e flax experiments, told the rmers that golden might be- me quite popular in Iowa. olden flax, generaly not grown ecause of the poor showing it ade in sprouting, produces a gh quality oil valuable for ints.

Experiments on different Cer- an dosages showed that in both olden and brown varieties, Bi- n. Redwing, Koto and others, ne ounce per bushel was the st proportion The formerly ecommended proportion of one- alf ounce per bushel, while it ore than doubled the emerg- nce over untreated seed, was nly about three-fourths as ffective as the one ounce did ot increase emergence appreci- bly

Botanist A. L. Baake demon- rated 8 different chemical weed illers for the Kanawha farm isitors. He and Botanist E. P. ylwester identified weeds that ere brought in by the farmers nd gave advice on farm control easures. Both large and small praying machines were demon- trated.

Agronomist L. C. Burnett dis- ussed oats, barley and flax, Charles Weber talked on soy- eans. Farm Economist Francis Kutish presented the agricultural outlook for today.

ANNUAL KOERNER REUNION HELD AT CLEAR LAKE

The annual Koerner reunion was held at State Park, Clear Lake Sunday, July 20th. Seventy-three people were present and enjoyed a picnic dinner A short business meeting was held and Lester Stille was elected president and Mrs. Dalores Ridder was elected secretary for the coming year A few of the young pepole went swimming while the rest spent the afternoon visiting

Relatives attending were from Charles City, Mason City, Rockford, Meservey, Goodell, Garner, Rudd, Fort Dodge, Klemme Elreno, Okalahoma and California. Those from Klemme were Mr and Mrs. A G Koerner and Kermit, Mr and Mrs. Gerald Koerner and family, Mr and Mrs L. A. Ridder and family, Mr and Mrs Glen Bridges and family, Mr. and Mrs. Orville Stokesbary and family, Mr and Mrs. Lester Stille and Lois, Mrs. C. A. Arnold; Minnie Lenz, Mrs Martha Ridder; and Mr and Mrs. Harry Gibbs and Isbelle

Returned Home From Three Weeks Visit In Canada

Mr. and Mrs Wm Waddingham returned home Thursday evening after spending the past three weeks visiting with the former's sister, Mrs. Emma Yahnke at Ditchburg, Canada, north of Calgary

During their visit in Canada a family gathering was held and Mr Waddingham's other sisters were present Mrs. La Favre of Portland, Oregon, Mrs Dora Boyd of British Columbia, and Mrs. Pete Hanson of Paynsville Minnesota. On their return trip home they visited with another sister, Mrs. Osbourne at Paynsville.

The Yahnke home at Ditchburg, an inland town is 17 miles from the railroad Mr Waddingham saw both deer and antelope while up there He reports that crops are fairly good

Klemme Girl Scouts Enjoying Camp At Clear Lake

Eight Klemme Girl Scouts are enjoying camp at Clear Lake this week The girls are at the new Girl Scout Camp located at Tanglefoot which was recently purchased by the Mason City Council of Scouts Those attending are Sharon Bridges, Elaine Neuberger, Janice Swanson, Lois Jacobs, Delores Theimann, Janice Hummel, Maxine Barz and Maralee Ridder.

Arnold Re-arranges Interior Of Implement Shop

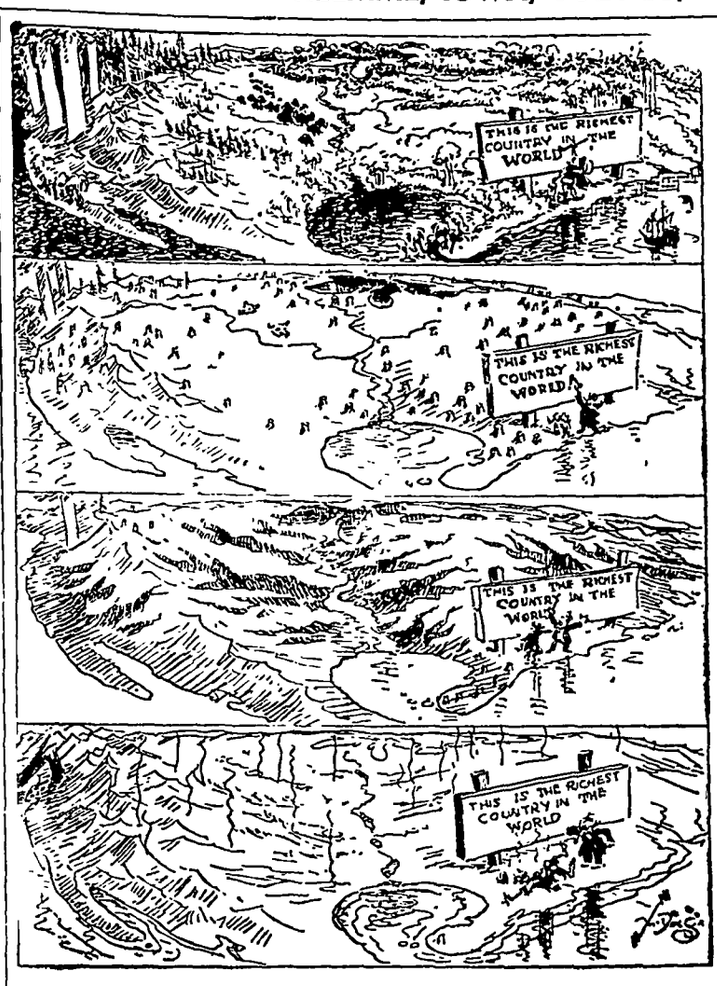
Fred J. Arnold has made some changes for improving his place of business by running a partition across his building which will divide the shop from the front store. The office is no longer in the southwest corner of the building, as the partition has been removed and the office will be behind a long counter along the north side of the store.

The new arrangement of the interior is a nice improvement and should also be more convenient in a number of ways.

Farmer Attacked By Bull

Charlie Hitt, who is employed at the R. W. Elder farm near Klemme, is recovering from injuries when he was attacked by a bull in the barn last week.

Charlie untied the bull in his stall when the animal suddenly whirled around at him and butted him against a wall and then as suddenly left Charlie who then escaped with severe bruises and a bad cut on one leg.



THIS IS THE RICHEST COUNTRY IN THE WORLD
THIS IS THE RICHEST COUNTRY IN THE WORLD
THIS IS THE RICHEST COUNTRY IN THE WORLD
THIS IS THE RICHEST COUNTRY IN THE WORLD

It Used To Be

THERE'S STILL HOPE

By Dr. Hugh H. Bennett, Chief of the Soil Conservation Service, Department of Agriculture. Dr. Bennett is recognized as one of the world's outstanding soil experts. He is the author of countless scientific and popular essays and several books on soil and soil uses.

Take a good look at Jay Darlings cartoon before you read this Ding is one of the world's best cartoonists and his drawings always are worth study. This one is no exception — in fact, I think it's one of his most effective

In this drawing, Ding compresses the history of North America's soil and other natural resources during the last 350 years into four small panels. That's why it's so effective; when you condense three and a half centuries into four little drawings it's bound to have punch And Ding's cartoon, which he calls "It Used To Be," certainly has punch

The history of our soil, water and forest resources, as Ding pictures it is not very pleasant, but there's a lot of truth in it—too much truth, in fact Of course he's had to exaggerate a little—cartoonists usually do, to get their points across—but in the main he's drawn the truth in those four panels.

When the white men they found rich land, the richest in the world everything considered Well, most of Europe had been pretty well worked over for several centuries and this new continent was an El Dorado, and our ancestors proceeded to work it for all they could get out of it

They moved from the Atlantic coast settlements back into the Piedmont country; then they crossed the Appalachian mountains and swarmed down onto the rich central valleys, cutting and burning timber — countless millions of dollars worth — as they went And they plowed up land that shouldn't have been plowed, and when it was worn out they fanned out first across the prairies and then across Great Plains — natural grasslands — and plowed and overgrazed that part of the country. And then they headed for the Pacific coast and continued their exploitation. We're still continuing it today as a matter of grim and tragic fact, and if the Pacific ocean hadn't stopped us I suppose we'd still be working our way west.

Well, Ding has drawn that story in these four panels and he's done it well, but I wish he'd gone ahead and drawn three or four more panels showing the next 350 years — or even the next 50 years — because there still is hope if we continue and intensify the effort we're making to spread our national soil and water conservation program across the land The future needn't be quite as gloomy as Ding might have you think, but we've got to work to prevent it, hope, like faith, has to be backed up with work.

Now if I were going to draw four more panels to show the next 50 or 350 years, I think they'd be something like this.

Panel No.1 would show some tree plantings being made here and there across the barren continent, and some contoured stripcropping would begin to appear on some of the worst slopes — maybe some dams in some of the gullies.

Panel No. 2 would show another development. it would show soil conservation districts being organized in various places over the United States — and more trees and shrubbery, and more farmers farming on the contour.

Panel No. 3 would show those bare, rocky mountain slopes once more covered with trees, and rivers once more clear normal streams, the woodlands of the north restored, and the great grasslands once again knee-high in forage, and conservation farming everywhere, and a glimpse of a nice farmstead here and there — because after all, all this effort is for the sake of people; we're not saving soil for the soil's sake but for the generations to come.

And the last panel, maybe, would just show a bird's eye view of the whole continent, like the others, but some contented people, some happy people, giving thanks because their ancesters — meaning us — did safeguard the land for their use And in the background, of course, there could be some contouring, and some lush pasture, and some farm woodland I think that would be about right.

As a matter of fact, I'd like to see Ding draw that cartoon—always keeping in mind, of course, that if we let up on the job, this other cartoon of his we've got might come true eventually!

But as I said, there's still hope, and that hope is strong, because it's based among other things on some 1800 soil conservation districts and on nearly a hundred million acres of farmland already protected; on the increasing interest of all Americans in wise use of our natural resources.

So of course there's still hope, if we keep working at the job.

Lincoln soybeans are proving highly successful and are widely grown. They comprised 78 per cent of the Illionois acreage in 1946, 75 of Indiana, 50 percent of Ohio and Iowa acreages.

League Schedule

Home Games:
Aug. 3, Latimer
Aug. 17, Popejoy

Games Away:
July 27, Clear Lake
Aug. 10, Rockwell
Aug. 24, Hansell

LIBERTY BOYS WIN FIRST GAME ON NEW LIGHTED FIELD

The Liberty soft ball team initated their new lighted ball diamond last Thursday evening by beating the Klemme team in see-saw game 24 to 23. There was never a dull moment for the fans and a number of home runs added to the fun.

This week Thursday evening the Liberty team plays the Garner F. F A. team and on next Monday night they again play Klemme. Next week Thursday evening they meet a team from Hayfield.

Ellington Township 4-H Boys Met

The Ellington Township 4-H Boys discussed the Achievement Show and made plans for a club tour on Friday evening, July 18 at the home of Dennis and Paul Thovson Dennis Thovson was elected club reporter to replace Gerald Beck who has moved away Harold Pueggel of Concord Township reported on his trip to Ames as a delegate to the State Boys' Short Course Bobby Quayle discussed selection, feeding and care of dairy projects. The Sports Festival and record books were discussed by Edgar Dorow, County Extension Youth Assistant.

Cool Weather In Iowa

After a week of 90 degrees and more weather the temperature dropped to 68 degrees at noon Friday and was in the low 70's on Saturday and Sunday, with a low of 55 degrees early Monday morning

Helps Manage Theatre At Webster City

Milton Paul, who operated a moving picture theatre at Eddyville and which he sold about two weeks before the flood destroyed the business section of the town, is now employed at Webster City as assistant manager of a theatre there Milton is a son of Mr and Mrs. Herman Paul.

Marriage Licenses Issued At Garner

County Clerk Ruth Hughes issued marriage licenses the past week to Royal Molander 24, Garner, and Clare Dawn Harbison, 19, Garner; to Luverene Elmer Knoke, 24, Garner, and LaVonne Jean Hammitt, 20, Garner; to Milo K. Risvold, 25, Corwith and Marjorie E. Hanson, 25, Corwith.

UP AND AROUND

Ed Beebe, of Mt. Vernon, who fell fifteen feet last week while sawing a limb off a tree, is now up and around. He is 80 years old.

Charity racketeers exposed! Read about the fake charity rackets. See "Beggers in Mink" in The American Weekly. the magazine of dramatic stories of mystery, romance, adventure, science, and colorful personalities, distributed with Sunday's CHICAGO HERALD - AMERICAN.

Mr and Mrs. Lyle Wilcox of Ames came Sunday for a visit at the parental C. G. Waterman home. Mr. Wilcox returned to Ames Monday but Mrs. Wilcox will remain here until October 1st assisting her mother who is not well.

Special Election Called To Vote On School Bus Building

Avery Hustlers Tour 4-H Projects

Seven members of the Avery Hustlers 4-H Club toured their projects Monday afternoon, July 14, in Avery and Twin Lake Townships.

They studied baby beef, dairy pig, and sheep projects. The parts of various classes of livestock were learned, and some of the points to look for in judging were given. Trimming a calf's feet for show was demonstrated. Attention was also given to the rations being fed the animals

The tour was accompanied by Ralph James, local 4-H leaders, and by Edgar Dorow, county extension youth assistant.

At the close of the tour lunch was served and a ball game was played at the home of Jimmy Harris

Other projects visited were those of Gene and Robert Ostendorf, Dean Burgess, Delwyn and Judith Brede, Roger Halfpop, and Byron Heginger

Liberty 4-H Boys Meet At Home Of Francis Zrostlik

Plans for the Achievement Show and a club tour were discussed at the Liberty Township 4-H Boys' meet at the home of Francis Zrostlik, Monday evening, July 14 The date for the tour will be set later

Paul Zrostlik told of the improved developments he saw in animal husbandry, farm crops, horticulture at Iowa State College, Ames, while he visited there as delegate to the State 4-H boys' Short Course June 30-July 2

Norman Stromer reported that his experiences at the Northern Iowa Girls' and Boys' Leadership camp, Clear Lake, June 3-5, were very interesting

Frank Hejina, J., and Vincent Buzicky asked to join the club. They plan to have projects next year.

Name Commission To Classify Ditch Land And Assess Benefits

Walter Kahl, of Britt, and William Boehnke and Engineer William Henschen of Garner, have been appointed a classification and assessment commission to classify lands and assess benefits in Hancock County drainage district No 147, on which a contract for construction was let Monday

R. C. Ball Club Split Two Games

During the past week the R. C. team split two games, they lost to Belmond on Monday night by the score of 10 to 9 and on Thursday night they downed Albert Lea in a slug-fest 23 to 10.

Household Hints By Mary Jane

Did you know when ink is spilled on a rug the spot can be removed by making a paste of starch and buttermilk and spread over the spot, when paste is dry rub it off and the ink is gone

Don't use iodized salt in making pickles as it causes them to turn soft and iodized salt will spoil meat in canning.

Instead of sewing new hems in window shades when they need it, trim off the ragged edges, place stick in right position, rub glue along the edge of curtain and fold up over stick. Tap it gently at first then press down firmly and lay it aside to dry. This lasts much longer than sewing does.

VOTERS WILL GO TO POLLS ON TUESDAY, AUG. 5

Will Vote 2 Mill Tax To Purchase Half Of Etchen's Garage

Elsewhere in this issue is a Legal Notice calling the attention of the voters in the Klemme Independent School District to a special election to be held Tuesday, August 5th at which time the following proposition will be submitted:

The Community building in Klemme is the voting place and will be open from 1 00 p. m. to 3·00 p. m.

If the proposition carries this will raise approximately $2,400 which will be spread out over a two-year period. If the voters support the proposition the school board will then purchase the north half of the Etchen Garage, now occupied by Martin Brinkman's blacksmith shop. The purchase price asked by the Etchen Garage is $2,000. With the balance of the funds available the Board will condition the building for housing the 3 buses. Mr. Etchen will also loan the school an underground gasoline tank and a pump so that the school can buy gas in large lots and save some money there.

If you are in favor of the above proposition then go to the polls and vote "Yes." If you do not think this is a good deal, then vote "No"

At present the buses are parked under trees around town and stand in the open during the year. That is not good for the buses and naturally will add to the up-keep of the same.

It is up to the voters whether or not they would rather spend $2,400 for half of the Etchen building by voting "Yes," or whether they would rather spend a larger amount of money for a new bus garage at say $5,000 or $6,000, in which case they would vote "No." If the August 5th election goes "No" the Board will probably call another special election for a larger amount for a new building

It is up to the voters to tell the Board what they want, so go to the polls and let them know how you stand by your vote, either "Yes" or "No."

Sells Business At Mitchellville

Mr and Mrs. Lyle Burr and children of Mitchellville came Friday and visited until Tuesday at the parental Mrs. Naska Bock home.

The Burrs have sold their furniture store and undertaking business at Mitchellville and will move to Ogden August 1st where they have purchased another business. Their new business is a tourist home, filling station and Norge appliance agency.

Observe 40th Wedding Anniversary

Mr. and Mrs. Roy Halfpop of near Goodell were honored at a dinner Sunday at the John Nelson home near Kanawha on the occasion of their 40th wedding anniversary.

Cooperative Filling Station Being Torn Down

A crew of men went to work Monday to tear down the brick filling station which will give way to a new super service station which will be built for the Hancock County Cooperative Oil Association here. Some of the foundation work has been put in for the new station and will on that wall be rushed along. A small shed was moved in to serve as the office while the new station is being constructed.

Little White House Made a Shrine

Story of Summer Sanctums Of U.S. Presidents Traced

By BAUKHAGE
News Analyst and Commentator.

WASHINGTON.—This summer the Warm Springs Infantile Paralysis foundation turned over a little five-room house on the mountainside to the state of Georgia, which will run it as a museum and national shrine. And so another of the "Little White Houses" goes back to the people. It is the only one in which a president spent his last days. In one of its three bedrooms President Roosevelt died. In its living room he spoke his last words.

The Warm Springs house was different from other summer hideaways of presidents because it was really a home The late President Roosevelt himself built it in 1932 at a cost of $8,700. He willed it to the infantile paralysis foundation. It was a very simple structure in which the architecture of the locality and a few Rooseveltian ideas are blended. There are the two bedrooms, a third guest room, a living room, a kitchen and that's all. But there is a view that would make a Park avenue penthouse owner jealous.

Like all of the houses which President Roosevelt occupied, this little cottage is crammed with history, much of it still unwritten.

Warm Springs was the symbol of Roosevelt's victory over disease and pain. Since then, largely because of his efforts, many hundreds of others have achieved similar victories in the community of which the "Little White House" was a part.

Baukhage

The simple cottage was also the scene of his death. He was posing for a portrait when the "terrible headache" came. He had signed his letters for the day and in his last signature, which I have seen, there is evidence that death already was "plucking at his sleeve."

Late in the war, when it was difficult to go far from Washington, another "summer White House" in Maryland was established. It was given the name "Shangri-la" The President himself named it jokingly when, because of security reasons during the war, its location had to be concealed It was discovered, thanks to a slip of the tongue on the part of Mrs. Roosevelt, and because absurd stories were written about the tremendous amount of money which had been expended on it—as a matter of fact it cost very little to convert—it was thrown open to the press.

One article described its "million dollar pool." I have seen the pool. It is less than 20 feet across. Pollywogs wiggle in it, rocks green with years of moss, surround it. It has been there a long time and I doubt if anyone ever had the temerity to bathe in it, although "Shangri-la" was a deserted boys' camp when it was taken over. It sits high on a mountain top beside a splashing trout stream surrounded by thick woods.

Today there is one overstuffed chair in the corner of the solarium that somehow always seems to get turned around at a certain angle. Turned that way, a side table is within easy reach, a push button and a hand telephone with an extension number on it. Lift it and the answer comes, "White House." It connects directly with the switchboard at 1600 Pennsylvania avenue.

It gives me a rather strange feeling to look at that chair—empty—and realize what messages went over the telephone beside it, what words were dictated while the long cigarette holder moved nervously to the ash tray on the table at its arm.

President Truman has not used "Shangri-la" very often but when he goes there next he and Mrs. Truman will find a retreat which gives them more privacy than probably any other spot on earth. Tucked away in the deep woods is a new, little cabin, just big enough for two. No guest room, no parlor, just a cozy cottage with a neat, modern kitchen, a dining room-sitting room with a fireplace There two is a company, three a crowd A sanctuary any president deserves.

Havens of Other Presidents

Ever since the days of Buchanan almost every President has seen fit to flee the banks of the Potomac when Washington weather begins to lure the mercury to the top of the tube.

Although the United States army began being hot weather host to chief executives in Buchanan's time and continued to do so into the regime of the dashing Arthur, it was because Lincoln lived at the "cottage" just within the Eagle Gate of the Soldiers' Home (now well within the city of Washington proper but once a distant suburb) that this summer White House became famous as the Lincoln Cottage.

When Grover Cleveland became president, however, and shortly thereafter took a bride, he felt that it was improper to live on the army in the summer months. So he bought a place of his own called Red Oak on a high hill in the capital now known, in honor of his short domicile there, as Cleveland Park. It was a plain farm house when he bought it but it soon blossomed into a comfortable home.

Then Washington was a town of some 175,000 people (1886) and Cleveland had an unobstructed view over the whole panorama down to the Potomac itself.

When he was defeated he sold the place. When reelected he bought another.

That effectually ended the Soldiers' Home tradition and it was really not until the time of President Taft that a "working" summer headquarters was set up. Other presidents took vacations — Theodore Roosevelt "went home" to his beloved Sagamore Hill on Oyster Bay with a secretary or two. President Taft went to Beverly, Mass.

When President Wilson went to Cornish, N. H., it was for rest and recuperation. In 1916 he chose the imposing Shadow Lawn in New Jersey and by that time war was impending and his staff went with him.

President Harding didn't want to "get away." He wanted people, lots of them, around him—also 52 cards.

President Coolidge, too, it was said, didn't know what to do with a vacation but he made as geographically varied a selection of summer White House sites as any president.

First it was Swampscott where, as one dispatch put it, he was "tethered to a telegraph wire." As a matter of fact no telegraph wires actually entered "White Court," the great colonial mansion perched on the rim of New England's rock-bound coast, but the telephone did and he made regular trips to near-by Lynn where the offices were located.

In 1926 he chose an Adirondack "camp," near Paul Smith's. One of those primitive places millionaires build in the wilderness equipped with all the comforts of a modern hotel. Kirkwood Camp, owned by Irvin Kirkwood, a newspaper publisher, was such a place,

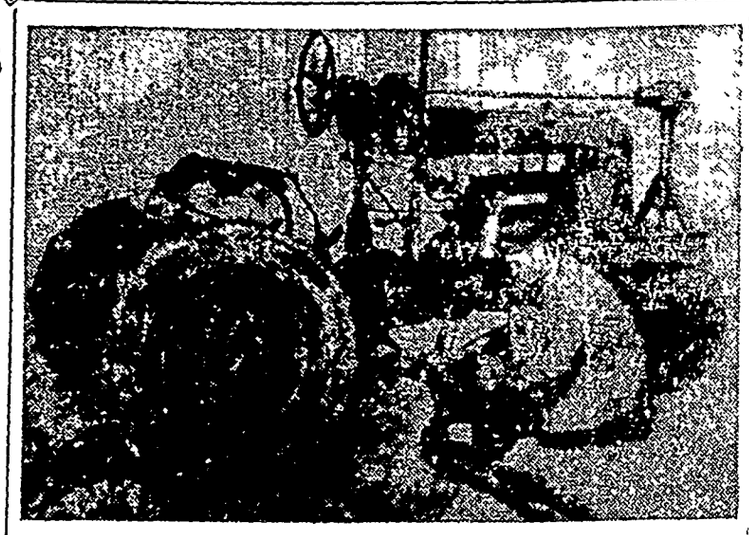
The next year Coolidge repaired to the Black Hills of South Dakota where he lived in a spacious lodge among the trout streams, guarded by a troop of cavalry and making a long, twice-weekly journey to Rapid City to attend to affairs of state and interview the press.

The next year he again went to Wisconsin and on an island in a lake 28 miles southeast of Superior, lived in Cedar Lodge, making necessary a 56-mile trip three times a week.

President Hoover, when he took office, almost immediately went down into his own well-lined jeans and for $15,000 bought "Rapidan," another mountain stronghold in the Blue Ridges. When he left office he promptly deeded the tract to the commonwealth of Virginia, hoping perhaps, other presidential campfires would burn there. But his successor chose otherwise.

Warm Springs belongs to the state of Georgia, countless thousands will visit it, as they do Hyde Park and other local monuments. "Shangri-la" is now a part of the national park system.

The next president, whoever he may be, may have it if he wishes, without extra expense to the taxpayer. But who knows? He may have a dream-house, realization of which we need hardly begrudge him.



TILLS SOIL WITH 'GADGET' . . . For a total outlay of $75 for welding and parts, James van Hyfte, 31-year-old farmer near Hillsdale, Ill., built this highly efficient, light weight tractor. A 1928 car engine is the heart of the tractor. A double transmission gives the machine six speeds forward and three reverse, making it adaptable to any kind of load, speed, field or road condition.

NEWS REVIEW

New Dust Bowl Feared; Corn Outlook Improves

Thinking men—experienced ranchers, grain men and bankers in the West—are looking worriedly ahead to a revival of the dreaded dust bowl because transient farmers are plowing up thousands of acres of virgin range to plant wheat which will bring them two dollars a bushel.

Under the stimulus of the two-dollar wheat, buffalo grass is being turned over at an unprecedented rate, and the prediction is that when it quits raining the dust bowl will stage a savage comeback.

The West again has become a paradise for speculators who are buying up land for $15 to $25 an acre and planting it in wheat. One good crop will pay for the land and leave them a good profit besides. Suitable primarily for grazing, the land normally is priced at from $2 to $10 an acre.

"Suitcase farmers" roll in with their tractors, plows and drills, put in a wheat crop and then leave until it is time to harvest the grain. No one stays to check the inevitable wind erosion.

The current world food shortage offers some justification for expanding the wheat crop, but it would be difficult to maintain that rational outlook if resulting dust storms caused a recurrence of the mass ruin and exodus from the dust bowl of the 1930s.

FAIR OUTLOOK:
Corn Prospect

As July entered the Midwest's agricultural scene with a gush of warm air and sunshine, prospects appeared reasonably good for a fair-sized crop of corn in Minnesota and South Dakota this year.

However, in those states, as in the rest of the corn belt, a long period of favorable weather conditions is most essential. The frequent, heavy rains must stop in order that saturated fields can return to normal.

Planted acreage of corn in Minnesota and South Dakota is about equal to that of last year, but heavy losses have been incurred as a result of excessive rain. Most observers agree that while the growing corn crop is two to three weeks behind last year it still has time to stage a comeback, given favorable weather.

Such a shortened growing period, however, may result in reduced yields. Also, growers in the two states are reported to have turned, in the past year, to planting corn requiring a shorter growing period than formerly. Therefore, while the corn may mature relatively earlier than formerly, it will do so at the expense of a smaller yield an acre.

DISCORD:
Paris Clash

Latest attempt to bring the opposing areas of the world into closer harmony by means of an international conference has resulted, as have all the others, in a complete, discordant, unharmonious cacophony.

It was the Paris conference of British, French and Russian representatives on Secretary of State Marshall's save-Europe proposal which went on the rocks this time, deepening the rift between Russia and the western powers.

Conflict arose over two main issues:

1. Soviet Foreign Minister V. M. Molotov opposed any plan by which the great powers could impose an economic program on the smaller nations of Europe, while British Foreign Secretary Ernest Bevin, backed by French Foreign Minister Georges Bidault, wanted to draft a broad scheme for reconstruction of all Europe.

2. Molotov placed his entire emphasis on the American aid aspect of the Marshall plan, but Britain and France primarily stressed a self-help program for Europe.

Result is that Great Britain and France probably will go ahead without Russia on a western European four-year reconstruction program of self-help, at the same time hoping for American credits and supplies.

MARSHALL ANGERED

Angered at Soviet criticism of his European recovery plan, Secretary of State George Marshall rejected as a "malicious distortion of the truth" the Russian claim that American offers to help put Europe on its feet are inspired by imperialist motives. He drew a stinging comparison between United States' efforts for world aid and Soviet aggrandizement in Europe.

Just Friends

His Excellency, the Most Reverend Dr. Mar Ivanious, archbishop of Trivandrum, India, enjoys visit with baby Claude, youngest of the prolific Dionne family which also includes quintuplets. The two met in Ottawa, Canada.

FAVORABLE FORECAST

Downward Price Trend Seen

NEW YORK.—With the postwar inflationary price rise apparently nearing an end, the probabilities seem to favor a downward movement of the price index in the next 12 months, it is predicted in a report on "The Price Level" released by Bankers Trust company.

The report, prepared by Roy L. Reierson of the bank's economic department, added that "the prices of some manufactured goods may show a further modest, and probably temporary, rise, but it is believed that any such movement will be more than offset by declines in the prices of farm and food commodities and other materials."

The bank warned, however, that a combination of contingencies such as bad weather and a substantial deterioration of domestic crop prospects could upset its forecast.

After examining the factors involved in the present rise as compared with those in the price jump following World War I, the bank said, "since the all-commodity wholesale price index has not increased as much this time as in World War I, it is likely that the decline in the price level will not be as severe during this correction period as it was in 1920-1921."

The bank cited a number of factors to support its view. A collapse in farm prices does not appear imminent in the near future, it said. Food prices, although below recent highs, are supported by a high level of employment and national income. Prices of many manufactured goods have risen only modestly despite greatly increased costs of labor and materials.

Furthermore, it is pointed out, the greatly increased supply of savings and liquid assets may provide some support for the price level. The business inventory situation, moreover, does not appear comparable to the excessive monetary speculation following World War I.

REVEL IN MOISTURE

Famed Short Grass Country Of Kansas 'Outgrows' Name

GARDEN CITY, KAN. — Famed since covered wagon days as the short grass country, the great high plains area extending roughly from central Kansas to the Colorado foothills is "outgrowing" its name this year.

"Where's the short grass?" That's a common question as mystified visitors in this western region look around this season The short grass has become long grass, the often short wheat is tall wheat and the country itself just doesn't look the same

Nature is running riot Moisture penetrates the ground to a depth of 8 to 12 feet In May, sometimes a dry month, 5.28 inches of rain fell here During the wheat growing season since September fields have been soaked by 23 29 inches of rain.

From the days when there was little but buffalo to see the plains and fatten on them, the grass, known as buffalo grass or short grass, has been famous for its succulence despite the fact that it lies close to the ground, never growing tall like bluegrass. But this year even that type of grass—what little the plows have left as virgin sod—is taller and more luxuriant than ever before.

In the sandhills, along the Arkansas river pastures are growing so fast that an extraordinarily large number of cattle can be grazed. Even the sagebrush and cactus are reveling in the moisture.

It is the wheat itself, however, which shows the most marked benefit from the soaking. Mothers are

getting afraid to let children play around the fields—if they venture far among the stalks they may be hard to find.

Many fields have wheat up to men's shoulders. Where fields have been sowed right up to narrow roads, motorists enjoy reaching out of car windows to pluck the large, perfectly filled heads. Some fields are so large that a person cannot see across them from a car. Combines in some cases make a three-mile drive without turning.

Truly it is a record-breaking year for western Kansas.

Precautions Listed For Polio Outbreak

Observance of six simple precautions may help you avoid infantile paralysis should outbreaks occur in your community this summer, according to Dr Hart E Van Riper, medical director of National Foundation for Infantile Parlysis.

These common sense rules are:

1. Wash hands thoroughly before eating.

2. Keep flies away from food.

3. Do not swim in polluted waters.

4. Avoid over-tiring.

5. Be guided by your physician's advice concerning tonsil and adenoid operations.

6. Avoid sudden chilling, such as plunging into cold water on a very hot day.

"June through September," Dr. Van Riper said, "is the time when infantile paralysis cases are on the increase in the north temperate zone. Consequently they are months in which these precautions should be especially observed."

Last year was the worst polio year in three decades, with more than 25,000 infantile paralysis cases reported. By June 7 this year, Dr. Van Riper said, 1,000 cases had been reported to the U. S. Public Health service This figure is 192 cases less than the number reported for the comparable period last year, he explained.

It is estimated that of infantile paralysis victims in this country 50 per cent recover completely, 25 to 30 per cent show slight residual paralysis, 15 to 20 per cent show marked after-effects and 5 to 10 per cent die

Never Off Duty

LYNCHBURG, VA —Although he was off duty, Randall Hudson, city fireman, pitched right in and helped extinguish a fire at 215 Lansing avenue. It was his own home.

Shoplifter Is Original, But It's Same Ending

HOLLIDAYSBURG, PA. — Although his shop lifting scheme had the merit of originality, it still wasn't good enough, James M. Butler learned He entered two stores and lifted a luncheon set, electric iron and sweater valued at $20. Later he returned and asked for refunds. The ruse worked the first time but at the second store suspicious clerks called police.

"Off We Go" AVIATION NOTES

Airport Chatter

Lorin Duemeland of Bismarck was elected president of the North Dakota Flying Farmers and Ranchers association at concluding sessions of the annual convention. The Dakota Flyer, an aviation paper edited by Geneva Show, youthful Mott, N. D., aviatrix, was named official association publication. . . . In the first annual air tour sponsored by the aviation committee of the Illinois State Chamber of Commerce, 32 planes visited 16 communities on a 731-mile flight. Most of the 16 communities will vote on establishment of a local airport authority this year, and purpose of the tour was to acquaint citizens with the need for careful and adequate air planning. . . . "It is no more unusual to have a plane than it is to have a car. In fact, this airplane is much less trouble than some of the cars we used to have." That is the assertion of Harmon Cranz, a pilot-farmer of Ira, a Summit county, Ohio, village northwest of Akron. Cranz, who uses his plane chiefly for pleasure flights, has converted part of the barn into a hangar. . . . For the first time in its history, Parks College of Aeronautical Technology at East St. Louis, Ill., is inviting its 2,000 graduates from each of the 48 states and a dozen foreign countries to return to the campus August 1-2 for a reunion and homecoming.

• • •

Mark Twain once said everyone talks about the weather but nobody does anything about it. But he didn't know Davy Crockett Jr., who has helped save an $80,000 apple crop by "warming up" the weather with a couple of personal planes. Taking off from the Hagerstown, Md., airport at 3:30 a. m., Crockett and a fellow pilot flew their Aeroncas to the 70-acre orchard threatened by frost. Cruising back and forth 50 feet above the trees, the two planes raised the temperature two degrees in 10 minutes. The pilots, warming the air by keeping it circulating, patrolled the area for 3½ hours, after which the danger of frost was past.

• • •

Air Museum

Providing a comprehensive, permanent exhibit of the air weapons used in World War II, a national air museum will be established in the mall adjacent to Smithsonian institution in Washington, according to tentative plans approved at a conference of aviation men and army air forces officers.

It is planned that historic aircraft and items of aeronautical equipment, both foreign and domestic, which already have attracted widespread public interest in temporary displays and air shows will be turned over by army air forces to the museum. A total of more than 100 aircraft and several thousand items of aeronautical equipment will be made available to the museum

Airplanes earmarked for the museum include the Enola Gay, the B-29 which dropped the first atomic bomb; Flak Bait, historic veteran of the European theater, and the Memphis Belle.

• • •

AID IN TEACHING . . . A former reconnaissance pilot, Lee A. Harper of Logan, Ohio, uses his flying experience as an aid in teaching Ohio farm veterans. Harper, now a vocational agriculture instructor, uses his own plane to fly directly to his students' farms and to his classroom at Laurelville, Ohio.

• • •

Show Postponed

Postponement of the 1947 National Aircraft show, tentatively scheduled to be held in Chicago November 1-9, has been announced by Aircraft Industries association Since personal aircraft were to constitute the major portion of the airplanes to be displayed at this year's show, council members felt that a postponement to next spring would provide more opportunity to plan a showing of new models not now in readiness for public display.

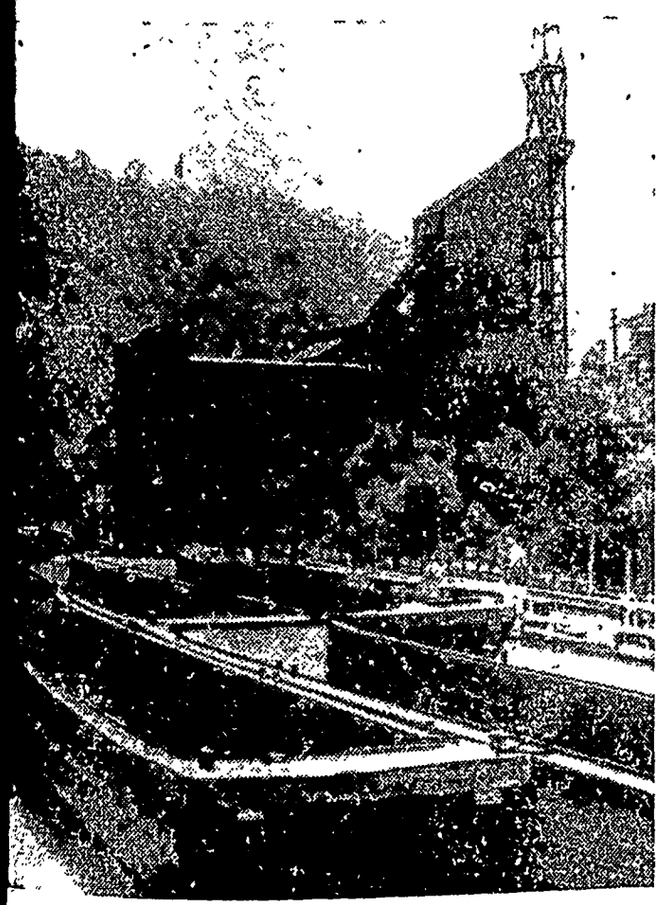
U. S. BATTLESHIPS RETIRED . . . A certain amount of pomp circumstance must accompany even the decommissioning of a vessel. Here, Adm. Thomas C. Kinkaid, commander of the ntic reserve fleet, is piped aboard U.S.S. North Carolina.

NSENDITES BACK AGAIN . . . Four thousand advocates of the nsend national prosperity plan, in Washington for the seventh an- l Townsend plan national convention, converged on Capitol Hill to e congress (for the 13th successive year) to pass their bill. Photo ws, left to right, Sen. Claude Pepper (Dem., Fla.); Dr. Francis Townsend, creator of the plan; R. C. Townsend, his son, and Rep. zer D. Angell (Rep., Ore.).



MPTY BARGES IN THE OLD CANAL . . . Coal barges lie desolate d empty along the Allegheny river at Harmarville, Pa., a mining mmunity near Pittsburgh. In background of photo is the tipple a's a coal screening plant where cars are unloaded) of Wheeling el's Harmar mine.

LEANOR EXPRESSES HER OPINION . . . Members of the press ustered around Mrs. Eleanor Roosevelt for a news conference before e addressed 2,500 delegates to the 56th annual convention of the eneral Federation of Women's Clubs in New York. Mrs. Roosevelt nfided to reporters that the Taft-Hartley labor act "will undoubtedly eate disunity in the country instead of unity—and women are vitally ncerned."

HE WAS RIGHT . . . Jack Ladinski, food corporation head, went all the way in court to prove that his sauerkraut had been mishandled on railroad and that it had not fermented and exploded by itself.

OUTMODES ATOM BOMB . . . Prof. T. D. J. Leech is leading figure in development of an American-British weapon of which he says, "by comparison the atom bomb is a clumsy method of attack." He is a New Zealander.

SPOON-FED ORPHAN . . . Too young to feed itself and having no mama or papa to take care of it in a nice, comfortable nest, this little wood thrush is fed by hand from a spoon. It was deserted by its parents in Philadelphia.

GERMAN PARTY BOSS . . . Frau Maria Von Bredow became Germany's first woman party leader when the military government licensed her "equal political rights for women" party. She is a countess in her own right.

WARNS OF COLLAPSE . . . Predicting a "collapse of our economy" unless immediate steps are taken, Emil Rieve, chairman of CIO's full employment committee, says rising living costs have not been checked.

SUNDAY SCHOOL LESSON

Wisdom, Understanding For Our Daily Living

LESSON TEXT FOR JULY 27—Proverbs 1 1-5, 3 13-18, 9 9, 10; James 1.5.

MEMORY SELECTION—Wisdom is the principal thing; therefore get wisdom, and with all thy getting get understanding.—Proverbs 4:7.

EDITOR'S NOTE: Lesson subjects and Scripture texts selected and copyrighted by International Council of Religious Education; used by permission.

By HAROLD L. LUNDQUIST, D. D.
Of The Moody Bible Institute, Chicago.

EDUCATION is so widespread in our day, and so eagerly sought after, that one might assume that the world would soon solve its problems through the cultural attainments of its people.

Why this is not true appears clearly in our lesson; for it is wisdom that the world needs, and wisdom is quite different from the understanding or memorizing of a mass of facts.

Wisdom teaches us how to use knowledge effectively for the glory of God. We see in our lesson:

I. The Meaning of Wisdom (Prov. 1:1-5).

PROVERBS are pithy, useful sayings, which gather up the wisdom of a people in easily remembered form. They are highly thought of in all nations, but reached their highest development among the Hebrews, because they rightly insisted that they must be related to God and worship of him

We learn in this passage that they are given to us that we may "know" that we have both wisdom and instruction. The growth of knowledge is always a prerequisite to growth in grace—learn more about God and his precious Word, and you will have more of his grace upon you.

Knowledge must be coupled with discernment (v. 2), which speaks of going beyond and below the surface meaning. This will not be an abstract love of the scholarly, but a practical application of truth to life (v. 3). Wisdom results in right living and proper dealing with our neighbors.

The one who has come to this place is ready to give (v. 4) help to others, especially to the young or those of "simple" thinking, who have not yet reached the place where they can get hold of such things for themselves.

Notice that the wise man does not stop at that point, but because he is wise he goes on to more and more understandings, to further receiving and giving out of "sound counsels" (v. 5).

Observe next,

II. The Value of Wisdom (Prov. 3:13-18).

THE character of a man shows up in the things he holds to be valuable. Some cannot see beyond gold and silver. Others seek comfort and convenience, and do not wish to be disturbed in their easy ways.

The wise man knows that for real pleasure of the highest type, for peace of mind and heart, for riches that will last and not bring him into either sin or sorrow, there is nothing like the cultivation of understanding and wisdom.

This scripture affords us the opportunity to say a needed word to young people who are being so sorely tempted these days to forego their opportunities for an education, and to rush out into the world to make money, more money, yes, the most possible money.

Education seems to be unnecessary, a waste of time and effort. But wait, the years will come and go, and then when it is too late, the realization will come that a golden opportunity was missed, and that doors of usefulness and effectiveness are now closed.

It pays to give time to the cultivation of the mind and of the heart in preparation for life. We are not thinking primarily of the dollars and cents value now, for that is secondary, even though it may be important.

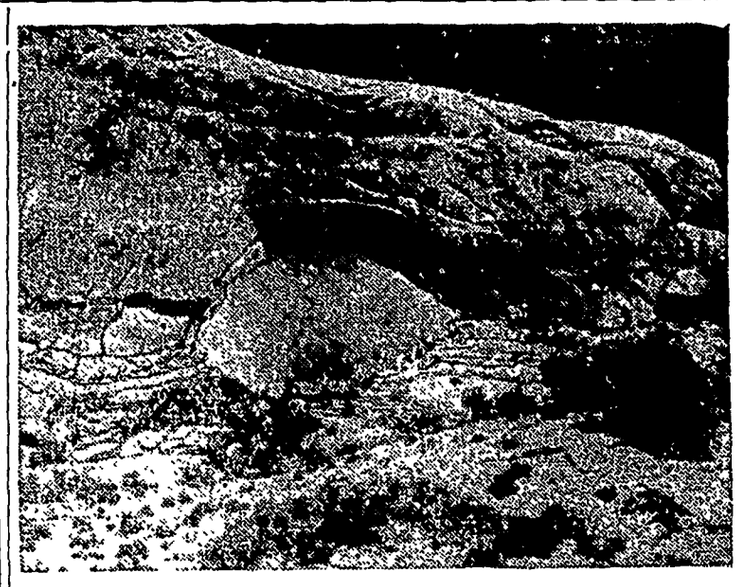
III. The Source of Wisdom (Prov. 9.9, 10; James 1:5).

GOD is the source of wisdom, and it is as a man fears him that he becomes wise. The fear of God is not a matter of fright or terror, but rather a genuine concern that one may do his will and never fail to be obedient to his guidance.

God is always more ready to give than we are to receive. He will not turn us aside, or belittle our efforts; but will, if we ask, give wisdom, and that in no little measure.

Let no man think that he can attain unto true wisdom apart from a right relationship to God. He may have knowledge, but not wisdom. On the other hand, let no man who knows God and serves him go through life lacking wisdom when all he has to do is to ask it of his heavenly Father. Why be poverty-stricken when you can be rich in wisdom and understanding?

Released by Western Newspaper Union.



STORY OF EROSION . . . Acting through the ages, wind and water have carved this masterpiece of nature—the North Window in Arches national monument, Utah.

VAST LABORATORY

National Monuments Protect Scientific, Historic Features

WNU Features.

Several months ago National Park service received an urgent appeal from a small boy. "Send me some information," he wrote, "my class is studying about it." One might assume that the little boy was revealing an overconfidence in the ability of National Park service to "come across." Actually, the youngster was not too far out of line. The 171 areas that make up the national park system of the United States cut a wide swath across the total of natural and human phenomena.

Throughout the entire country there is a genuine thirst for knowledge and from 500 to 1,500 requests for information are received daily in the central office of National Park service These requests come not only from school children, but also from mature men and women. Many more thousands of people go directly to the national parks, monuments and historic sites to seek first hand for the answers to their questions The national park system serves as a vast laboratory for the study of North American biology, geology, paleontology, history and pre-history

National Parks Eleventh In a Series

The great national parks, such as Yellowstone, Glacier, Yosemite and Grand Canyon, were established primarily for the protection of magnificent scenery, but each of these parks also contains a boundless variety of natural phenomena. The national monuments, on the other hand, have been created usually to protect a single scientific or historic feature—an extinct volcano, an ancient Indian ruin or an early American fortification.

It often has been said that a national park covers a large area, while a national monument is small. This is not true Many national monuments contain only a few acres each, but there are a number of geological exhibits in the national park system of such vast proportions that areas of considerable extent are required for their protection

• • •

THE TWO LARGEST areas in the national park system are national monuments These are Katmai and Glacier Bay in Alaska Katmai national monument containing 4,215 square miles, is a volcanic region, the scene of a violent eruption in 1912 which resulted in creation of the Valley of the Ten Thousand Smokes Glacier Bay national monument, covering 3,569 square miles of territory, embraces several huge glaciers and a bay choked with icebergs Largest national monument in the United States proper is Death Valley, covering 2,891 square miles of desert and mountains Here is located the lowest point in the country, 280 feet below the level of the sea

Katmai and Glacier Bay national monuments are undeveloped and require much preparation and planning on the part of the visitor before he can explore them, but Death Valley, in California, so forbidding to the early immigrant, now can be visited in comfort and safety by the motorist. Death Valley, however, is extremely hot in the summer and the best seasons there are late fall, winter and early spring

• • •

THE FIRST national monument was Devil's Tower in northeastern Wyoming, established by proclamation of Pres Theodore Roosevelt in 1906. This is an 865-foot column of volcanic rock, which stands high above the surrounding country and may be seen for many miles.

Muir Woods national monument in Marin county, California, just north of the Golden Gate, is another early national monument, having been created in 1908. Here is a small but fine grove of California redwood trees nestling in a deep ravine on the slopes of Mount Tamalpais The monument was named in honor of John Muir, the famous naturalist, who did much to arouse public sentiment for protection of the redwoods and sequoias.

• • •

AMONG THE BETTER known national monuments, primarily of scientific interest, are the Petrified Forest on U S. Highway 66 in eastern Arizona, the White Sands in south central New Mexico, Jackson Hole in Wyoming, adjoining Grand Teton National park, and the Badlands in South Dakota east of the Black Hills. Less well known, but accessible by highway are the Joshua Tree national monument in southern California, the Organ Pipe Cactus and Saguaro national monuments in Arizona These three areas all contain unusual exhibits of desert type flora

Capulin mountain in New Mexico, Craters of the Moon in Idaho, the Devil's Postpile and Pinnacles in California, Sunset Crater in Arizona and Wheeler in Colorado are all national monuments illustrating various forms of volcanic action.

Capulin mountain is a particularly fine example of an extinct volcano, and the highway spirals around the mountain from the base to the rim of the crater. From the summit on a clear day one has a view extending into four states.

• • •

PERSONS INTERESTED in caverns will find the following group of national monuments of interest; Jewel Cave in South Dakota, Lehman Caves in Nevada, Oregon Caves near Crater Lake National park in Oregon and Timpanogos Cave in Utah Shoshone Caverns national monument in Wyoming is not yet developed and is not open to the public

Students of extinct forms of animal and plant life will profit from a visit to Dinosaur national monument in Colorado and Fossil Cycad national monument in South Dakota

• • •

PERHAPS THE MOST interesting and unusual of all national monuments is a group in southern Utah near the Arizona border, which includes the Arches, the Natural Bridges and the Rainbow bridge national monuments. All three areas are relatively inaccessible. A road does extend fairly close to the first of the natural bridges, but from there on the traveler must proceed on foot or horseback To reach the Rainbow bridge the visitor must make a two-day trip by horse.

With an automobile with oversized tires it is possible to penetrate the Windows section of Arches national monument, but to the Devil's Garden one must go on foot or horse. The story told in these three national monuments is one of erosion by wind and water.

Other national monuments which also tell the story of erosion are. Cedar Breaks, Zion and Capital Reef in Utah, Grand Canyon and Chiricahua in Arizona, the Black Canyon of the Gunnison and Colorado in the state of Colorado

• • •

FURTHER INFORMATION pertaining to national monuments may be obtained by writing National Park Service, Washington 25, D. C., or Chicago 54, Ill.

Statue of Liberty Is a New Yorker

WASHINGTON. — Although Bedloe's island, on which the Statue of Liberty stands, is part of New York state, the water surrounding it is part of New Jersey.

Upkeep of the statue, which is now a national monument, is budgeted at about $60,000 a year. The seven families of National Park service employes, who live on the island, vote in New York City.

Weight of the statue is placed at 225 tons, including 100 tons of copper and 125 tons of wrought-iron framework. The sheet copper, which has a green patina from oxidation, is three-thirty-seconds of an inch thick, about the thickness of a silver dollar.

The head of the statue first was exhibited in Paris and the right arm and torch in Philadelphia at the centennial of American independence.

How to Successfully Make Slip Covers

PRESTO, chango! Turn drabness to freshness through the magic of slip covers! Anyone, even a beginner, can whip up a set of lovely slip covers in no time flat with the easy pin-cut-sew method.

• • •

There are no patterns to cut; the material is draped right on the chair. Then pin along the top edge and sides of the chair, and cut well outside your pin lines. The arms, back, front and other sections of the chair are made in the same easy way

Step-by-step, illustrated instructions for making many types of slip covers are given in booklet No. 35. Send 25c in coins for "Making Slip Covers Successfully" to Weekly Newspaper Service, 243 West 17th St., New York 11, N. Y. Print name, address, booklet title and No. 35.

ASK ME ANOTHER

A General Quiz

The Questions

1. When was Oliver Cromwell beheaded?
2. How many times does the word "veto" appear in the Constitution of the United States?
3. How many vocal cords has the human larynx?
4. Who said: "You shall not press down upon the brow of labor this crown of thorns, you shall not crucify mankind upon a cross of gold"?
5. Was the Suez canal ever closed to shipping?
6. Does the sun spin around on its axis?
7. Is a baby rattlesnake dangerous?
8. Where was linen first made?

The Answers

1. Not until he was dead and buried. His body was exhumed and beheaded.
2. Not once.
3. Two.
4. William Jennings Bryan.
5. Yes, once in 1882 and again in 1915 by the British.
6. Yes, once every 25 days.
7. Yes, at birth it has venomous characteristics.
8. In England by Flemish weavers.

change to CALOX for the *tonic effect* on your smile

Efficient Calox works two ways:

1 Helps remove film...bring out all the natural lustre of your smile.

2 A special ingredient in Calox encourages *regular* massage... which has a tonic effect on gums ...helps makes them firm and rosy. Tone up your smile...with Calox!

When Your Back Hurts -

And Your Strength and Energy Is Below Par

It may be caused by disorder of kidney function that permits poisonous waste to accumulate. For truly many people feel tired, weak and miserable when the kidneys fail to remove excess acids and other waste matter from the blood.

You may suffer nagging backache, rheumatic pains, headaches, dizziness, getting up nights, leg pains, swelling. Sometimes frequent and scanty urination with smarting and burning is another sign that something is wrong with the kidneys or bladder.

There should be no doubt that prompt treatment is wiser than neglect. Use *Doan's Pills*. It is better to rely on a medicine that has won countrywide approval than on something less favorably known. *Doan's* have been tried and tested many years. Are at all drug stores. Get *Doan's* today.

HANCOCK COUNTY BOARD PROCEEDINGS

3RD ADJOURNED JUNE MEETING
Garner, Iowa
July 2, 1947

The Hancock County, Iowa, Board of Supervisors met in session on above captioned date pursuant to adjournment with Supervisors F J Schoun, John A. Chambers and Geo. Th Gerdes, present.

The minutes of the last meeting were read and approved as read

On motion and second a non-residence notice is hereby ordered served on Atlanta Thompson and Donald Kiefer and family.

On motion and second the applications, bonds and permits for Sale of cigarettes are hereby approved for Hidgon Hamburger Hut, Hutchins; John S. Brcka, General Store, Duncan, Sheets Service Station, Hutchins, Pringles Grocery, Hayfield; Logans Food Market, Hayfield.

Supervisor Gerdes is appointed a committee to investigate and cause repairs to be made in Drainage District No. 46-3, DD No. 1 & 2 West Main, Laterial No. 22 DD 97, Lateral No. 39

Supervisor John Chambers is appointed a committee to investigate and cause repairs to be made in DD No. 139, Main.

Supervisor Schoun is appointed a committee to investigate and cause repairs to be made in DD No. 7, Section 5, Main and in DD No. 13, Main.

WHEREAS it is the responsibility of Hancock County through its Board of Supervisors to make due provision for the care and support of minor children found to be living withing the county in a neglected ad dependet manner or who are found, for other reasons, to be in need of sheltered care which is not available on a satisfactory basis in a normal way and.

WHEREAS is some instances it is in the best interests of the child that it be placed for such sheltered care in an institution licensed under the laws of the State of Iowa for such purposes as a children's boarding home, or as a child placing agency and,

WHEREAS the 52nd General Asembly of the State of Iowa has removed, effective April 4, 1947, the statutory limitation of $18 00 on the amount which could be paid per month by a county to such institution for the care of a child substituting, in Section 210 5 of the Code of Iowa, provision that the amount of the monthly payment hereafter be determined by the Board of Supervisors of the county of the child's residence.

NOW, THEREFORE, BE IT RESOLVED that, pursuant to the authority vested soley in it by the legislature that the Board of Supervisors of Hancock County hereby set, as a substitute for the former limitation of $18 00 per month, the sum of $24 00 per month, with the further provision that the county will assume responsibility, over and above that amount, for unusually heavy clothing expense and for unusal medical costs above and beyond costs for such examinations and curative treatment as would normally be considered incident to the operation of an institution for the care of children.

It is further provided that, in instances in which children placed in such institutions are subsequently placed by the institution in private or other homes where care is provided free of charge, or for a fee less than that paid by the county to the institution, or in return for services rendered by the child, payment by the county to the institution is limited to reimbursement for itemized costs actually incurred on behalf of the child by the institution up to the revised limitation above indicated for situations in which care in the institution is continous.

Given under our hand this 2nd day of July A D, 1947

Hancock County
By Board of Supervisors
John Chambers, Chairman

On motion and second the contract with Concrete Products Corporation for material on DD No. 116 Hancock County Iowa, is approved

On motion and second the report of the boiler inspection is approved

On motion and second the bonds of Schram Brothers, Titonka, and Concrete Products Corporation of Humbolt, are approved.

On motion and second the quarterly reports of Fred C Missal, County Auditor and Fern Peck Katter, Recorder, are approved.

In the matter of the petition of Erwin Wetterling, et al for a drainage improvement involving additional lands in DD No 13

BE AND IT IS HEREBY RESOLVED that C F Merten be and he is hereby appointed engineer to investigate and report to this board at his earliest convenience.

In the matter of the reconstruction of a part of drainage district No 101, petitioned for by Rush Gabrielson, et al

BE IT RESOLVED that Charles F Merten be and he is hereby appointed engineer to make an investigation on the feasibility and necessity of such improvement and report to this board at his earliest convenience.

In the matter of the resolution, passed by the Hancock County, Iowa, Board of Supervisors on June 9th, A D., 1947, ordering a survey of certain additional lands in Sections 15, 16 and 22, all in Township 97 N Range 25 W to be included in DD No. 144 Hancock, County, Iowa.

WHEREAS C F. Merten, was appointed engineer as commanded in Chapter 455 Code of Iowa, 1946, and laws amendatory thereto, on June 9, A D., 1947 to make a survey, investigation and report on the feastibility and necessity of including certain lands listed in the preamble hereof in drainage district No. 144 Hancock County, Iowa, and said engineer did file his report on July 2, A. D., 1947, which reports states that he has surveyed the lands of the petitioners and the land in the water shed of the proposed extension to said district No. 144 and in his opinion the proposed establishment and improvement as recommended in the resoltion of necessity, will be conducive to public health, convenience and welfare and will be of greater benefit than the cost thereof and recommends that said improvement be made as prayed.

BE AND IT IS THEREFORE RESOLVED by the Board of Supervisors of Hancock County, Iowa, acting for and in behalf of Drainage District No. 144, a sub-district of DD No. 1 and 2, Hancock County, Iowa, and the inclusion of certain additional lands to ex-tend the present district No. 144 to afford better drainage as requested in a resolution of necessity passed and adopted by this board on June 9th A. D., 1947 that the report of the engineer be and same is hereby approved as a tontative plan and may be ammended before final action thereon, and said report of the engineer and plan shall come on for further hearing at the Courthouse in Garner, Iowa, at 2:30 P M. on the 18th day of August A. D, 1947 The County auditor be and he is hereby directed to cause notice of hearing on the report of the engineer and plan of said improvement to be published in the Britt News Tribune, a newspaper of general circulation published in Britt, Iowa, ad-advising All owners, occupants lienholders and encumbrancers of record in the proposed district of the Resolution of necessity, the favorable report of the engineer thereon, the approval of the Hancock County, Iowa, Board of Supervisors of the report as a tontative plan and that same maybe ammended before final action thereon, and that all claims for damages and all objection to such establishment shall be in writing and must be filed with the county auditor at or before the time set for hearing thereon.

The foregoing resolution was offered and read by Supervisor Schoun, who moved its adoption and was seconded by Supervisor Gerdes, whereupon the chairman placed the motion of its adoption and upon roll call the vote thereon is F. J Schoun, John A. Chambers and Geo. Th Gerdes, aye. Nays None. Whereupon the chairman declared the resolution duly adopted.

BE IT RESOLVED that the claims hereinafter set out be allowed in amounts designated thereon and the county auditor be and he is hereby authorized and ordered to draw warrants on the several funds of Hancock County, Iowa, in payment of such claims in amounts set opposite each claim.

Atomic energy—radio—the wheel—airplane—electricity—automobile—steam engine—telephone—printing press—take your pick. What do *you* think is the greatest invention ever made?

Certainly each is important, and each has contributed generously to our way of life. But the American public, in Dr. Gallup's recent coast-to-coast survey, voted *electricity* the most important invention of all.

It's hard to imagine our type of civilization without electricity. We depend on it for so many things—in our homes—in business and industry—in transportation and communication. The hat on your head—the food on your table—the newspaper on your doorstep—your favorite radio show—each depends directly on electricity.

Yet American families spend just about 1¢ out of every budget dollar for their electric service. Because electricity does so much for so little is, perhaps, the main reason why Americans have voted it the most important invention of all time.

Listen to the Summer Electric Hour with Woody Herman and Peggy Lee and Dave Barbour's Orchestra, Sundays, 4:30 P.M., EDT, CBS.

5TH ADJOURNED JUNE MEETING

Garner, Iowa
July 14, 1947

The Hancock County, Iowa, Board of Supervisors met in session on above captioned date pursuant to adjournment with F. J. Schoun, Geo. Th. Gerdes and John Chambers present.

The minutes of the last meeting were read and approved as read.

Supervisor Gerdes is hereby appointed a committee to investagate and cause repairs to be made in Drainage District No. 61-1-145.

Supervisor Chambers is appointed a committee to investigate and cause repairs to be made in DD No. 7, DD No. 9, Lateral 7 and DD No. 91.

On motion and second the following cigaretto bonds are approved Logan Food Market, Elsie M. Pringle, Sheets Service Station and Martin A Bleich General Store.

WHEREAS C F Merten, County Engineer, has recommended the purchase of bridge lumber, both treated and untreated and is is deemed for the best interests of Hancock County, Iowa, that a letting be held in tho near future thereon.

BE AND IT IS THEREFORE RESOLVED by the Board of Supervisors in and for Hancock County, Iowa, that a letting on said lumber be and the same is hereby ordered held at the Courthouse in Garner, Iowa, at 1 30 P. M. on the 28 day of July A D., 1947 The county auditor be and he is hereby ordered to give notice thereof by publication in the Garner Leader and Signal, a newspaper published in Garner, Iowa, which notice shall state the time and place of letting, the approximate amount and kind of lumber to be purchased and that the board reserves the right to waive technicalities and to reject any or all bids.

This being the 14th day of July A. D., 1947, a date heretofore set for a letting on the construction of Drainage District No. 147, petitioned for by Wm S Smith et al, the hour for said letting having arrived, the proof of publication being on file and the board being fully advised, said letting was held as scheduled The chairman of the Board proceeded to open all bids on file and after duly considering all bids on file, the board does find the bid of Joe Needles to be the lowest and best bid on labor and the bid of Concrete Products Corporation as the lowest and best bid on material

BE AND IT IS THEREFORE RESOLVED by the Hancock County, Iowa, Board of Supervisors acting for and in behalf of Drainage District No. 147, Hancock County, Iowa, that the bid of Joe Needles for labor and the bid of Concrete Products Corporation on material are hereby accepted as the lowest and best bids for the construction of DD No. 147 and they are hereby awarded contracts for the contruction of DD No 147 All other bids are hereby rejected

BE IT FURTHER RESOLVED that Chairman John Chambers be and he is hereby authorized to execute said contracts in behalf of Hancock County, Iowa.

The foregoing resolution was offered and read by Supervisor Gerdes, who moved its adoption, was seconded by Supervisor Schoun, whereupon the chairman placed the motion of its adoption and upon roll call the vote thereon is F. J Schoun, Geo. Th Gerdes and John Chambers, aye Nays None.

On motion and second Wm. Henschen is appointed engineer to investigate and report to this board on the necessity and feasibility of a cleanout of Lateral No. 8 of Drainage District No 3 and 4, petitioned for by J N Sprole et al

On motion and second Wm Henschen is hereby appointed Construction Engineer on DD No 147, and his bond as such engineer is hereby fixed at $500 00

On motion and second Walter Kahl, Wm Buehnke and Engineer Wm. Henschen are appointed a classification commission to classify lands assess benefits in DD No. 147 petitioned for by Wm S. Smith et al

On motion and second the board adjourned to Monday July 21, 1947, at 9 o'clock A M
ATTEST

HANCOCK COUNTY CROPS MADE GOOD PROGRESS DURING THE PAST WEEK

All crops in the county made favorable progress during the hot weather of the past week. Oats started to ripen rapidly and a few fields were cut the last of the week, but most of the fields will be harvested during this week.

Most of the haying has been finished and corn cultivating is about over. A large percentage of the corn was laid by last week and a lot of fields are waist-high now.

The bean crop is looking good over most of the county.

Fruit trees are loaded and the prospects are good in that line. Raspberries and blackberries are now being picked and the crop is good.

However, there will be a lot of soft corn this year unless we have remarkably good corn weather from now on, as the corn in most seections of Iowa is still behind normal. North Iowa seems to have better crops than further south.

DDT is more effective if used alone— not with lime solutions.

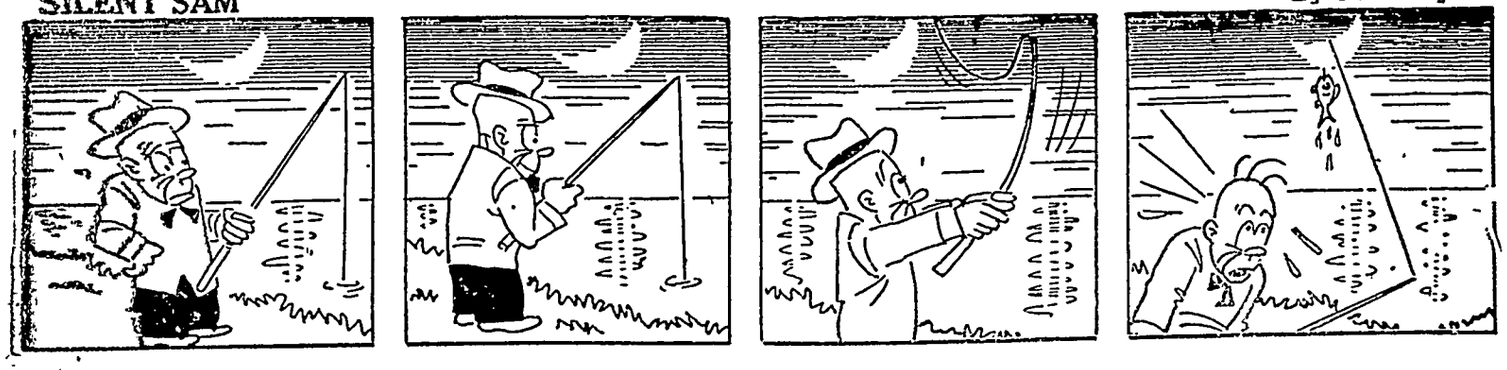
SILENT SAM — By Jeff Hayes



Sportlight by Grantland Rice

SPORT occupies a peculiar place in this country It appeals to more millions than politics, finance, the theater, motion pictures, literature art or any other single entry you might mention When you include baseball, football, boxing, bowling, basketball, golf, tennis, track and field, swimming and the rest of the sports, the combined interest of people between the ages of 6 and 90 blankets the country You can also toss in both sexes

Grantland Rice

Governors, senators, congressmen, leading bankers and lawyers, industrial leaders, heads of labor unions, can be indicted and jailed, and a good part of this is taken for granted.

It would be interesting to show you the long list of those named above who have been indicted and convicted. This means those who have been proved to be crooks, thieves, chiselers, even murderers, who held high places in public life. As a rule, or a general average, most of these convictions have been accepted with public yawns

The public trust in politicians, so-called statesmen, bankers, industrial leaders and labor leaders has never been too strong. Look at the record. Many of these were expected to go wrong. But it has been different in sport.

Sport, amateur and professional, has been the main public trust. Let the governors and the senators and the industrial leaders, plus labor's head delegates, turn crooked, as so many have. But sport must be clean, all the way through.

Crooks Muscle In

The trouble is that sport hasn't been as clean as it should be. Too many smart and crooked hangers-on have been chiseling in through the last 20 years. The crooked, stupid and cowardly underworld has been looking for the open gaps. This applies to racing, football, baseball, basketball and any sport that commands the public interest. The underworld has been looking over sport's rich pastures too long. They have seen the harvest that could be taken over. And too many of them have taken over—especially in racing and boxing. The crooks expect to have even better luck with baseball and football.

And nobody seems to know just what they can do about it. For the crooks, as a rule, are smarter than the honest people. At least they know their goal, and how to get there. And not even the government of the United States has the faintest idea of how these thieves and crooks can be handled. So they are permitting this country's major interest to take its major beating, too deeply interested in politics, which seldom has been on the level.

Boxing has been packed with crooks. So has racing. These are the two sports that need most care, and neither is getting the protection that it needs.

What Can Be Done?

Sport is the basis for handling all juvenile delinquency programs—it is the one program we have left in which the public at large has complete confidence, complete faith. And yet, here are all these thieves, crooks, chiselers and murderers moving in—the slime of creation—and no one seems to know just what to do about it.

Just what should be done about this present sport situation is quite a problem.

Starting from the president of the United States on down through various governors and their commissions, no one seems to bother much, for sport is supposed to take care of itself. Yet those who are handling sport directly find themselves faced with situations they are unable to combat. They know everything except the answers. They see the underworld moving in, and they give out statements which mean nothing.

The players so far, have been the main bulwarks that sport knows. But, who is going to take care of the thieves and the crooks?

• • •

The New Arrivals

When a star fails to give out its usual glow, there is always another to take its place It always happens that way, but rarely in such profusion as the new season has offered us

As Newhouser, Feller, Pollet and other star pitchers hover around the soapy chute, a lean, lank young fellow by the name of Ewell Blackwell of the Cincinnati Reds is stepping into the gap as the star pitcher of 1947, possibly one of the best of all time. Blackwell has completely outclassed Feller and Newhouser, Pollet, Hughson and others. The Human String Bean has no one even close.

Back of the Red Terror, we have Frank Shea of the Yankees, Warren Spahn of the Braves, Cat Brecheen of the Cardinals, Johnny Sain of the Braves, Schoolboy Rowe and Dutch Leonard of the Phillies.

"He glanced at the window, blocked by police . . . there was no escape."

was the box with the ten thousand dollars. Here was his gun, wrapped in felt. There were cartridges and stuff to clean the revolver in case it got rusty. And he had a complete change of clothes.

He could not miss! He had brains. That's why, when he got twenty-five thousand bucks from the last stick-up, he had only tried to get away with fifteen—he put the balance in the trunk with the gat and other gear. He had cached them just in case his plans went wrong, and he failed to get out of the country. Well, they did go wrong. He had trusted a guy, and gave him five grand to help his getaway. The "pal" had not only taken his money but squealed on him, and got the reward, too. But now he was in the same spot with the same amount of dough, only this time he could not fail, because he trusted nobody.

Alone in the dark, he got to thinking—and whenever it was dark, and he was alone, he thought of his mother. He liked Mom, not because of what she was to him, but because of the many favors she had done for him. He remembered how she used to battle the neighborhood hoodlums to save him from a beating She was always looking out for his good

Yes, sir, Mom was all right.

He stretched out, and fell into a peaceful sleep. Two hours later, he awoke, frightened! He shook with fear as he grabbed his gun.

A voice called hurriedly, "Eddie, Eddie!"

It was his brother. He did not answer. Dan called again, "Eddie, I must see you!"

Eddie let him in, then slammed the door and bolted it. He jabbed the revolver into his brother's ribs. "You're still playing cops and robbers. But you'll never live to collect my reward."

Dan regarded him coldly. "Mom wants to see you."

The savage tenseness faded from Eddie's face "No kiddin'? After all that bunk they printed about me?"

"She doesn't know anything about you," answered Dan "She hasn't been able to read for six years. I made up stories, instead of reading what was there "

"Thanks, Dan, I sure wish I could see her—but it's impossible right now "

"She's very sick "

"No!"

"It's your last chance to see her alive "

'I'll go."

He changed quickly into his good clothes He stuffed the gun and cartridges into his pockets, and carried the money container under his arm At the door he stopped.

"Listen, Dan, even though were brothers, we never had any love for each other If this is your trick to turn me in, I'll get you if it's the last thing I do "

Dan shook his head in sympathy "Don't you trust anybody?"

"Only me and Mom Let's go."

In Dan's car they raced for home. Midway they ran into a heavy storm Rain flooded the windshield faster than the wiper could clear it. Thunder boomed and lightning lit the countryside

The storm was at its height when they stopped in front of a little white cottage Dan jumped out of the car and ran to the house. Eddie followed A flash of lightning, and Eddie turned to see a police car skidding to the curb

Eddie pushed Dan inside and threw the door shut. He whipped out his gun, and leveled it at his brother

"I told you I'd get you."

"But Eddie," frantically pleaded Dan, "I didn't—"

A crash of thunder drowned out the revolver shots. Dan fell dead.

The officers were right outside Eddie was a caged rat. He yanked open a door. His mother was lying in bed

"Edward—Edward'" she called weakly

He glanced at the window—it was blocked by police He had no chance to escape. He held the gun behind him.

"Hello, Mom," he said.

"I'm so glad you're here," she told him. "Are you all right?'

"Sure, Mom, I'm swell."

She sighed in relief.

"I've had a dreadful feeling you were in danger," she said, "I even telephoned the police to protect you!"

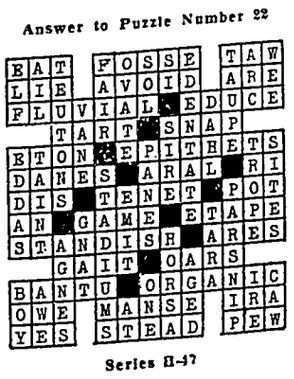
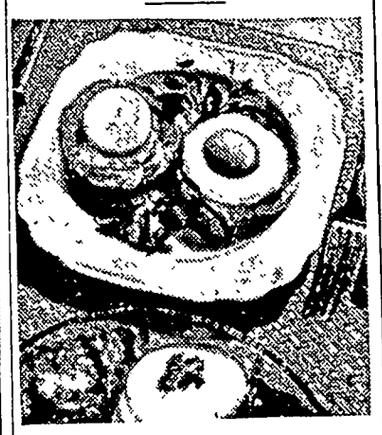
Answer to Puzzle Number 22



Series B-47

HOUSEHOLD MEMOS... by Lynn Chambers

Various Sandwiches Make Good Porch, Picnic Suppers



Sandwiches such as these "egg-burgers" are the perfect answer to summertime eating. When served with salad and relishes, beverage and fruit, you have a complete meal ready in no time.

It's estimated that sandwiches are eaten at the rate of 30 million daily here in the United States, and it's no wonder, because they are one of the simplest, most nourishing foods to serve.

Do you like to make suppers simple on hot, sweltering nights? Serve a sandwich-salad supper on the cool back porch. Do you like to whip up a picnic at a moment's notice? Then wrap together a few sandwiches, fruit and beverage to take along to beach or woods.

Simplest of all sandwiches is the slice of meat between two pieces of bread; but it tastes even better if you add some toothsome spread or accompaniment to it, such as:

1. Cover with a thin slice of cranberry jelly, especially ham or roast pork.
2. Cover with thinly sliced sweet or sour pickles or mustard.
3. Spread with horseradish mixed with mayonnaise.
4. Cover with lettuce and boiled dressing or sandwich spread.
5. Cover with chili sauce or catsup

When you have leftover meat, chop it or put it through the meat grinder and serve in any of these ways

1. Mix with mustard and season with chopped pimiento or green pepper
2. Mix with equal parts of finely shredded cabbage and serve with chopped pickle or onion
3. Season with chow-chow or pickle relish and season with enough boiled dressing or mayonnaise to mix through.
4. Mix with chopped olives, green pepper and dressing.
5. Mix with chopped hard-cooked eggs, chopped green pepper and mayonnaise.
6. Mix with chopped celery and moisten with mayonnaise.

When you plan to feed a bunch of hearty eaters and the weather is a bit on the crisp side, then serve hot sandwiches for a real treat. The barbecued type is ideal for the occasion.

Barbecued Hamburgers.
(Makes 6)

- ¼ cup milk
- ½ cup soft bread crumbs
- ½ pound ground beef
- ½ teaspoon salt
- ⅛ teaspoon pepper
- 2 tablespoons Worcestershire sauce
- 1 tablespoon cider vinegar
- ½ cup tomato catsup

Combine bread crumbs and milk Add ground meat, salt and pepper. Form meat into patties, then brown on both sides in two tablespoons of fat.

Combine seasonings and vinegar with catsup and pour over meat. Cover and simmer slowly about 10 minutes, or until sauce is very thick. Serve hot between heated or toasted bun halves.

The above sauce also may be used for sliced, cooked beef roast or for frankfurters as barbecues.

Fish Out of Place

Nicaragua contains the only fresh-water lake known to science in which big salt-water fish abound, says National Geographic society. Sawfish of more than 700 pounds, sharks up to 200 pounds, tarpon and other landlocked ocean-dwellers are caught daily in the waters of oval Lake Nicaragua, 100 miles long and 105 feet above the level of the nearby Pacific ocean. Geologists explain the oddity by saying the lake was a bay of the ocean until an earthquake lifted its basin, locking out the sea. Streams fed by the region's heavy, tropical rainfall gradually have turned the lake water fresh.

LYNN CHAMBERS' MENU

Assorted Sandwiches
Potato Salad — Cole Slaw
Sliced Tomatoes — Pickles
Celery — Carrot Sticks
Beverage — Lemon Sherbet

If you want to use ham or pork for barbecued sandwiches, use the following sauce:

Barbecued Ham or Pork Sandwiches.

- ⅛ cup chopped onion
- 1 clove garlic
- ½ cup tomato catsup
- ¼ cup Worcestershire sauce
- ¼ teaspoon pepper
- 1 cup tomato soup
- ½ cup vinegar
- 1 tablespoon butter
- 2 tablespoons sugar

Mix all ingredients together and simmer a few minutes. Use to baste meat while it is cooking. When meat is tender, slice and add to sauce in pan with 1 cup sweet pickle relish, and serve sauce as a relish on the sandwiches.

If you are having a large crowd in either for a picnic or for a porch supper, plan to have several different varieties of sandwiches on a large platter, a selection of salad, fresh fruit and cookies and beverage The sandwiches may be made in the morning and wrapped in heavy waxed paper and chilled. Here are some suggestions:

1. Beef or tongue, sliced thin and spread with mustard-horseradish on rye or pumpernickel bread.
2. Cold pork, chopped sweet pickle, salad dressing and lettuce on white bread.
3. Sardines mashed with chopped hard-cooked eggs, moistened with lemon juice and boiled dressing and Worcestershire sauce.
4. Swiss cheese, tomato slices and wafer-sliced beef with lettuce and mayonnaise on rye bread.
5. Chopped hard-cooked eggs mixed with chopped stuffed olives and salad dressing with lettuce on whole wheat bread.
6. Ground, cooked chicken mixed with an equal amount of chopped cooked ham, seasoned with chopped olives and mayonnaise on white bread.

A creamy iced beverage and slices of a simple cake, or fruit and cookies, fittingly top off a sandwich supper.

For a nourishing "burger" type of sandwich, you might like these made with eggs.

De Luxe Eggburgers.
(Serves 6)

- 6 eggs
- 2 tablespoons fat for frying
- 6 round buns
- 6 slices cheese
- 1 medium-sized onion
- Salt and pepper

Split buns. Lay halves, split side up, on baking sheet, place cheese slices on them and toast in hot oven or under broiler until cheese begins to melt and other half is toasted. Meanwhile fry eggs medium firm, turning once; season. Place eggs on toasted halves. Top with onion rings. Serve hot, open or closed. Pass chili sauce, chopped pickle relish or mustard.

For beverage at porch or picnic, use 1 rounded tablespoon of all purpose grind, decaffeinated coffee to every cup of water. Make by boiler or percolator method. Freeze coffee in ice cube tray. At serving time, heat milk but don't let it boil. Fill glasses with coffee cubes and pour on hot milk. The result will be a smooth, creamy, iced beverage.

Released by Western Newspaper Union.

LYNN SAYS:

Use These Memos

In the Kitchen

When ironing ruffled curtains, it's easier to do the ruffles first and then the body of the curtain. Start at the top of the hem and iron down. Use a moveable ironing board, or lay a clean blanket on the floor, covered with a sheet to do the best ironing.

Rub greasy containers with cornmeal if you want to clean them easily.

Place newspapers under grass and fiber rugs so they will catch the dirt. Then on cleaning day remove the newspapers and you will have caught the dirt; replace with fresh newspapers.

Shake turkish towels vigorously to raise the nap on them after washing. This also removes wrinkles.

Before washing the bathroom floor, it's a good idea to use a vacuum cleaner attachment to pick up dust and small particles of dirt which are annoying when cleaning

PRIZE WINNER TELLS JUDGE HER BAKING SECRET

QUICK METHOD BREAD

3 teaspoons sugar
¼ cup warm water
3 pkgs. Red Star Dry Yeast
½ cup sugar
5 teaspoons salt
3¼ cups lukewarm water
11½ cups sifted flour
5 tablespoons shortening

Dissolve 3 teaspoons sugar in ¼ cup water. Add 3 packages Red Star Dry Yeast. Let stand 10 minutes. Place ½ cup sugar, salt and 3¼ cups water in a large bowl. Stir yeast solution thoroughly and add to this mixture. Add half the flour and beat well. Add melted and cooled shortening, stirring vigorously. Add remainder of flour, stirring until well mixed. Place dough on lightly floured board and knead 5 to 7 minutes. Shape into smooth ball and place in greased bowl. Brush top lightly with shortening. Cover and let rise in warm place for 45 minutes. Punch dough down; shape into loaves and place in greased pans. Brush tops of loaves lightly with shortening. Cover and let rise in warm place for 45 minutes. Bake in moderately hot oven (400° F.) for 50 minutes. Makes 4 loaves.

KAY ROGERS SAYS: "You, too, can bake prize winning bread and rolls with RED STAR. This wonderful yeast gives extra rise and extra flavor. Try this RED STAR *Quick Method* bread recipe today."

619 HOGS SELL FOR $40,597.37

Hormel Company Pays Record Sum To Farmer

A check for $40,597.37 from a Minnesota packer was paid for 619 Hampshire hogs to Vet Lewis, farmers of Meadow Grove, Nebr.

The hogs weighed 192,132 pounds at Meadow Grove and by the time they had been trucked in 365 miles to the Hormel stockyards at Austin, Minnesota, they weighed 184,445 pounds. They were paid for at Meadow Grove at the rate of $21.13 a hundredweight.

The check now stands as the largest the Hormel company ever paid out to a farmer for his hogs, excelling that of a few months ago paid to Leon Oliver, a farmer near Winnebago, Minn, which was $32,747.63. This sum was for 427 hogs.

From where I sit ... by Joe Marsh

"Not Responsible For Wife's Debts"

A young man came rushing into the Marion office the other day and asked me to print an ad—"right quick"—saying he won't be responsible for his wife's debts from now on, as he's leaving her for good immediately.

I followed as how the forms were all closed up, and it was too late to take his ad. He says: "All right, Monday then"—and we agreed on Monday.

Of course, the forms weren't closed. But I had kind of an inkling of what might happen. Then Sunday he phones me, and says, kind of sheepishly: "You can forget that ad. Me and the missus have everything all patched up. And we're having a friendly glass of beer right now."

From where I sit, if you give folks time enough to think things over, those hasty quarrels that come so often from misunderstanding will give way to tolerance and common sense.

FELCO
TRADE MARK REGISTERED

QUALITY FEEDS

MADE BY YOUR COOPERATIVE

Farmers Have Paid For Many Feed Plants
They Never Owned. You Own The Felco
Plant Here

The best all around protein supplement is the 40% mixture when it is made of the proper ingredients with the blended proteins, both animal and vegetable with a minimum amount of minerals for protection and a small amount of Vitamin "D".

It is the best all purpose feed, not only because it has 40% protein, but it must have the right kind of proteins.

It is the supplement to self-feed to the shoats and growing hogs and can be hand fed to brood sows and even the smallest pigs but because of the high protein content, must be used with care for sows and pigs.

40% HOG BALANCER

The 40% Hog Balancer can be self-fed to brood sows and to pigs and will be the most efficient, the cheapest feed, but it does have to be fed with care. Brood sows must not be over-fed just before or after farrowing and young pigs of course can not handle large amounts of high protein until they are used to it. Some think our regular pig meal is too strong and if fed heavy was blamed for scours in young pigs.

A lower protein with some other adjustments makes a safer feed for sows and pigs and so we have just formulated a feed for this special purpose.

This feed has a complete variety of proteins as you can see by the ingredients listed. It contains no filler and is amply protected in the vitamins and minerals needed. We are proud to present this product.

You do not want to buy feed in bags to replace your grains, FELCO FEEDS are for Iowa Farmers to feed WITH their home grown grains.

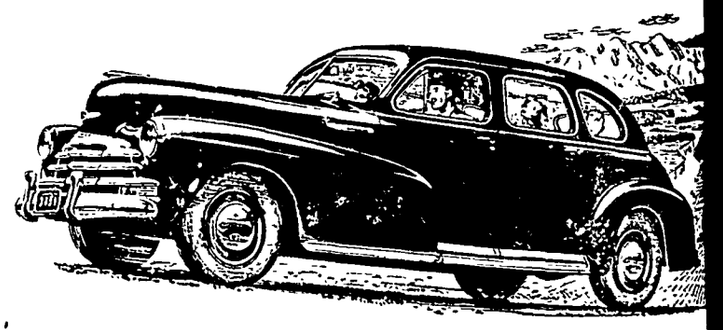
Klemme Cooperative Grain Co.

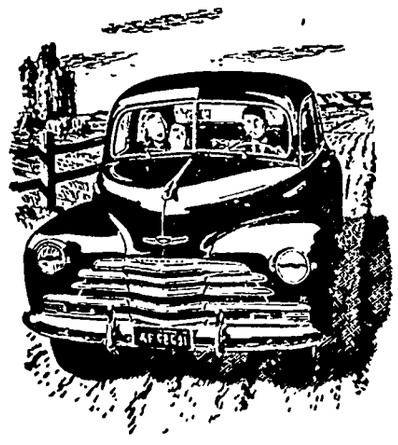
"The Farmers Elevator" Glen Bridges, Manager

Even the click of the door tells you—here's

BIG-CAR QUALITY AT LOWEST COST!

Slip behind the wheel of a new Chevrolet and listen while the door swings smoothly closed at your side. Hear that solid, satisfying, muffled "click"! That's quality talking—telling you that here is the all-steel sturdiness and safety, the quiet Big-Car comfort, of the only Body by Fisher in the low-price field!





Point the eager, shining hood of a new Chevrolet up the highest hill. Notice how you take it in stride while lesser cars labor and falter. That's power for you—the superior pep and performance of the only Valve-in-Head Engine in Chevrolet's price class.

Learn about Chevrolet's low delivered prices . . . and ask us for some typical owners' reports on operation and upkeep costs. You'll find that only Chevrolet gives you Big-Car Quality at Lowest Cost!

Give a new Chevrolet its head down the roughest road you can find. Feel how you seem to float over the bumps . . how swiftly you ease into a silken stop at a nudge of the brake pedal. Unitized Knee-Action Gliding Ride with Positive-Action Hydraulic Brakes is a comfort-safety combination that can't be beat—a pair of features that only Chevrolet provides!

QUALITY SERVICE, too! There's no place like a Chevrolet dealer's for skilled, car-saving service. Drive in soon—and regularly.

Most present included Rev. Mrs. Calvin Grosshuesch, ald and Edward and Mrs. J. Grosshuesch; Mr. and Mrs. nry Josten; Mr. and Mrs. lius Priebe, Mr. and Mrs. rman Priebe; Mr. and Mrs. rmer Priebe, Carroll and Kath- n, Mr and Mrs. Albert Sch- dt.

Mr and Mrs Paul Goll and ulah, Mr and Mrs. Emil Lau, erner, Allen, and Lois Ann; r and Mrs. Fred Becker; Mr. d Mrs. Fred Neuhring and harlotte, Mr. and Mrs. George heman, Mr. and Mrs. Edwin sten and Marcelle.

Mr and Mrs. Fred Schmidt, rene and Marvin; Wm. C. Sch- dt Mr and Mrs. Earl Neuhr- ng. Darryl and Harley; Mr. and Mrs Erwin Neuhring, Marcella, ldon and Karen; Mr. and Mrs. Cecil Katter and Lynn; Mr. and Mrs. Paul Lau and Graydon; Mr and Mrs. Eugene Kluckhohn, Shannon and David; Mr and Mrs Dean Rasmus and Judith.

Mr and Mrs. August Josten, Le Roy, La Verne, La Vohn and Le Allyn, Mr and Mrs. Raymond Barz and Leland, Mr. and Mrs. Herman Schmidt and Lu Verne, Mr and Mrs. Walter Schubert and Billie; Mr. and Mrs. Luther Schmidt and Roger; Calvin Josten, Marvin Rosendahl Romona De Werdt and Erdene Nelson, all of this community.

Mr and Mrs. Wm. Schubert and Wilbert of Rockwell; Mr and Mrs. Herbert Schubert, Roland and Althea of Garner; Mr. and Mrs. Charley Priebe and Harry of Edgeley, North Dakota.

During the past year there were three marriages in the Priebe Clan, eight births, and also Mr. and Mrs. Julius Priebe celebrated their Golden Wedding anniversary on June 8th, and Mr. and Mrs Fred Schmidt celebrated their Silver Wedding anniversary on March 13th.

The day was ideal for a picnic dinner and all enjoyed a fine time and are looking forward to their next family gathering.

WAGES UP DURING JUNE FOR IOWA FARM LABOR

Average wage paid Iowa farm workers advanced slightly during June, according to a report made this week by John R. Fitzsimmons, state farm labor supervisor.

Fitzsimmons' figures for June showed that the average wage paid per day without board was $5.80 as compared with $5.50 for the previous month.

The state farm labor office said that 600 workers were requested by 464 farmers during the month. Placements made through the farm labor offices were 373.

Demand for seasonal wrokers rose sharply early in July. June floods had held farm work, and haying, corn cultivating and other tasks had piled up. Single, experienced hired hands were eagerly sought in most counties.

The peak for seasonal labor probably won't come until early August, Fitzsimmons estimates, when some 25,000 detasselers will be needed in hybred seed corn fields. Anyone wanting to work as a detasseler should check with his county extension director.

The 1947 spring pig crop is about the same size as last year.

ACCIDENTAL FARM DEATH RATE HIGH

It's 54 per 100,000 Workers As Compared With 31 For Industry

The business of farming gets more dangerous each year.

Last year 18,500 farm people were killed in accidents, as compared with 17,000 in 1945, according to figures of the National Safety Council

In addition, a million persons were injured in farm home accidents during the year.

The over-all death rate for agriculture during the past year was 54 persons per 100,000, compared with a rate of 31 for all industries.

Industry's Job

Farm Safety Week, now in progress (July 20-26), gives us a week to think about these figures, but it will take 52 weeks of action to reduce them, says Norval J. Wardle, Iowa State College farm safety specialist.

Wardle says that reducing fram accidents in Iowa is not going to be easy. Industry cut its toll by rigidly enforced safety programs. It has supervised its workers so closely that they finally have reached the stage where they have fewer accidents while at work than they do after working hours.

Up To Farmer

Farmers will be put under no such strict safety code. Each farmer must be the judge of whether or not he is working and living safely.

There are literally hundreds of places where accidents can take place on any farm. It's almost impossible to list all of the "booby traps" which might be found. Wardle points out.

He does make three general recommendations for safe living:

1 Keep Healthy—even a slight cold or a bit of undue fatigue makes any worker more likely to have an accident.

2. Plan Your Work—always keep in mind what you are doing and why you are doing it.

3. Work Efficiently—that's the safe way Prevent undue hurrying, which leads to accidents and to lost time

FEED HOGS PART GROUND OATS INSTEAD OF CORN

Ground oats can replace 20 to 25 percent of the corn in a fattening hog ration without reducing gains materially, says Damon Catron, assistant professor of animal husbandry at Iowa State College.

Ground oats have from two-thirds to three-fourths the relative fattening value of corn depending on the test weight. Using up to 25 percent new oats in the hog ration will save high-priced corn.

Feeding dry ground oats above this level will reduce gains accordingly, however, Catron warns.

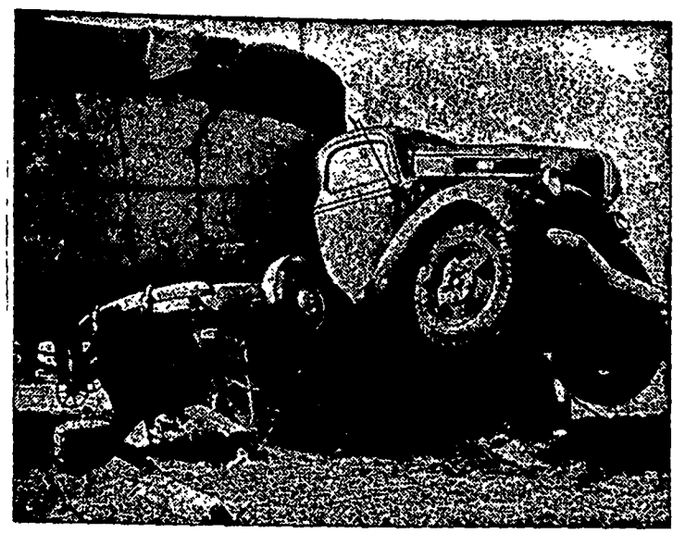
Oats can best be utilized for growing pigs by grinding and mixing them with either the total ration or in the protein supplement. They should then be self-fed.

While ground oats can be "slopped" successfully, this method of feeding requires more labor

For brood sows, oats can make up from 30 to 50 percent of the total ration. Increasing the oats content in the brood sow ration will allow more corn for growing and fattening out pigs.

Hot Weather!

North Iowa had some real good corn weather the past week. Saturday the thermometer hit a high of 92 degrees here at noon.



The driver of one of these cars was in the act of passing another motorist just as he neared the crest of a hill. He collided head-on with a driver coming over the brow of the hill, and with the terrific impact the lighter car was crushed under the heavy one. The lawbreaker in this accident was killed—so was the other driver, and a passenger was seriously injured. Passing on blind curves and on hills is simply gambling with death. Improper passing accounted for more than 35,000 highway deaths and injuries in 1946, according to the National Conservation Bureau.

Ardes Polsdofer Became Bride Of Goodell Man

LITTLE BROWN CHURCH SCENE OF WEDDING SUNDAY

Miss Ardes Polsdofer Became Bride Of Glenn W. Bier

Miss Ardes Polsdofer, daughter of Mr and Mrs Art Polsdofer of Klemme, and Glenn W. Bier, son of Mr and Mrs Henry Bier of Goodell, were united in marriage at the Little Brown Church near Nashua, Iowa, on Sunday, July 27th, 1947, at 3 00 p. m in the presence of a few close relatives Rev Hanscom, pastor of the Little Brown Church performed the double ring ceremony The couple was attended by the bride's brother, Lorence, and Miss Marvia Elefson, a close friend of the bride

The bride wore a blue street length dress and a corsage of white roses The bridesmaid wore a pink dress with a corsage of yellow roses

Mrs. Bier graduated from the Klemme high school in the spring of 1946. For several months she has been employed as a clerk in the Ben Franklin Store at Clear Lake.

Mr Bier served in the U. S Army for 2 years and had since been employed on farms. Lately he has been employed on his brother, Warren's farm southwest of Klemme

Mr and Mrs. Bier will be at home on a farm near Goodell after August first where he will be employed

SPEAK NUPTIAL VOWS

Miss Marvyl Guth, daughter of Mr and Mrs. Frank Guth of Meservey, and Everett Frink, son of Mrs. A. H Frink of Northwood, were married July 23 at the Evangelical United Brethern church in Meservey by the Rev. J Madsen of Northwood Mrs. George Grosz of Meservey was organist and accompanied vocalist, Miss Eileen Christensen of Northwood

The bride was given in marriage by her father and was attended by her sister-in-law, Mrs. Everett Guth of Klemme, matron of honor. Lewis Boer, a college roommate of the bridegroom, was bestman and the ushers were Everett and Eugene Guth, brothers of the bride

A reception was held at the home of the bride's parents following the reception and the couple left on a 2 weeks' trip to the wset.

Mr and Mrs. Frink will make their home in Northwood where Mr Frink will continue his work as vocational agricultural instructor in the public school.

Pullets should have shade on the growing range Tests show that they will eat more feed and drink more water if they can do so while in the shade.

Enjoying Trip To The West, Visit Points Of Interest

The Times has received a card from Miss Bernice Tanner mailed at Burbank, Cal Miss Tanner is on a trip with her sister, Frances, Romona Tanner of Clear Lake and Mrs W E Tanner of Goodell.

Miss Tanner further states that they arrived at Burbank last Wednesday and saw many interesting things on the way Carlsbad Caverns, Will Roger's Memorial, Painted Desert, Petrified Forests, Grand Canyon, and Boulder Dam.

They drove into Old Mexico for a short trip and spent one night in Las Vegas, Nevada. They are planning to go to Catalina Island and had tickets for the "House Party" and will have breakfast at Tom Breneman's. They drove through Beverly Hills viewing movie stars' homes. They stopped for a visit with the Milo Patet family and will visit Ethel Swanson and husband also

DOG SHIPPED FROM HERE BY AIRPLANE

V A. Stromer, proprietor of the Stromer Kennels north of town has sold and shipped dogs for several years by express, truck, automobile, wagon, sled, etc, but Thursday was the first time that any dog had been sold was transported home via airplane

Last Thursday Glenn Romp of Story City, a farmer, landed in the Stromer pasture and purchased an English Shepherd dog which was crated and placed in the plane and flown to his new home Verner later received a card from Mr. Romp saying that the dog was a good passenger and seemed to like flying.

Bond Sales Up In Hancock County

Investments in series E, F and G United States savings bonds in Hancock County during June were $110,430 bringing the county's total sales for the first six months of 1947 to $1,092,144, it was announced today by H. C. Armstrong, county chairman of the savings bonds division of the treasury department.

This six-month figure stands at 53.17 per cent of the county's annual quota of $2,053,899. The county chairman reported also that sales during the first six months of 1946 were $511,305 and the figure for June of 1946 was $42,101

State-wide sales of savings bonds during June totalled $20,252,840 while total investments in Iowa for the first half of 1947 were $159,626,828 or 53.21 per cent of the annual quota of $300,000,000.

REVEAL IOWA SCHOOL FADING OUT

The rural school is fading from the Iowa scene at an increasing rate

The extent of its disappearance was traced Thursday by Leonard Davies, research director of the Iowa State Education Association

Davis told officials at a school district reorganization conference in Ames Thursday that in 78 of Iowa's 99 counties there are 2,135 fewer rural teaching positions occupied than in 1940.

The relative importance of this shrinkage may be gauged by the fact that in the whole state there were 6,429 rural teachers in the 1946-47 school year.

Davies, in an analysis of a study in which 78 counties replied, gave the conference these figures:

There have been 41 town school reorganizations in Iowa the past two years.

In 78 counties, 712 rural schools have made adjustments and 434 rural schools, including 21 rural high schools, have been reported permanently closed

There have been 841 rural teaching positions discontinued in 78 counties in the last 2 years, 1,441 discontined since 1940, and there are 694 additional rural teaching posts which although not discontinued simply are vacant.

"It is clearly evident," Davies said, "that rural school reorganization has steadily been taking place of rural areas.

"With planned surveys in every county under the able direction of the state department of public instruction, the number and quality of school reorganizations will increase to the educational benefit of rural children and to the tax benefit of rural citizens"

He said 33 Iowa towns are involved in planned reorganizations not yet accomplished and that 12 consolidated districts have been set up in the 78 counties in 2 years. Thirty-two more consolidations are contemplated

At Wednesday's session, Doctor Ray Bryan of the Iowa State college staff said lack of knowledge in a community about school needs was a factor which has led to resistance against school reorganization

BRIDGES FAMILY ENJOYED PICNIC IN KLEMME PARK

The Bridges family enjoyed a family gathering and picnic in the Klemme Park Sunday, when the following people gathered Mr and Mrs. Jess Atchison, Mr and Mrs. George Meyer, Mr. and Mrs. Frank Fanselow, Wallace Meyers and neice and her three children, Mr and Mrs Herb Capellen, and Mrs. Wickerman and children, all of Dows

Boy Lost Eye When Struck By BB Shot

Deborah and Tony Brede of Dows spent the past 2 weeks with their cousins Judith and Delwyn Brede, while their parents were at Rochester with their older brother, Stephen, who had the misfortune of being hit in the eye with a B B from a playmate's gun He spent 9 days at the Mercy Hospital at Mason City and a week later was taken to Rochester Glucoma had set in and the eye was removed He was able to return home last Monday, with his parents, but will go back this week for more medical care

Attended Picnic At Iowa Falls

Mr and Mrs. Verner Stromer and family, Charlotte Lewis and Donna Greiman, drove to Iowa Falls Sunday where they attended the annual Cream Colored Horse Association picnic at Oak Park Members from various parts of the state attended the picnic and program, some coming from as far as Chicago, Ill.

Small Boy Injured When Hand Caught In Hay Rope

The little 3-year old son of Mr and Mrs Elmer Larson was badly injured Monday while he was playing and got his hand caught in a hay rope The fingers were badly crushed and we understand it was necessary to perform an amputation

DUST WON'T STOP NEW OAT DISEASE

Helminthosporium blight, a seed and soil-borne disease which attacks the roots, stems and leaves of oat plants, can be only partially controlled by seed treatment This disease last year caused serious damage for the first time

Experimental work by H. C. Murphy, USDA senior pathologist at Iowa State College, showed that treating seed nearly doubled oat yields in varieties susceptable to the disease But production was still far below that of resistant types.

Susceptible varieties are any of those which came from Victoria, crosses, such as Tama Control, Boone ond others.

Clinton, Benton and Mario are not affected by Helminthosporium Tests at both the Agronomy Farm, Ames, and the North Iowa Experimental Farm Kanawha, showed no traces of the disease in these three varieties..

Helminthosporium - blighted plants have a stunted, underfed look When pulled the roots come up easily and lack the clean, sturdy appearance of healthy root system. The low end of the stalk looks dark and full It does not have the whitish luster which should appear on the section of the stalk just above the ground

House Moved To Town

The house which Elwood Geary purchased some time ago from Henry Buseman, was moved to town Monday. Elwood had purchased a lot just north of the John Suckow residence where the house is now on a new foundation.

At the moment Elwood is a bachelor, but we gather the information the house is definitely not for rent!

Presidential Veto Poses Problems

Roosevelt Said, 'I Forbid' 631 Times for New Record

By BAUKHAGE
News Analyst and Commentator.

WASHINGTON.—"I forbid!" said President Truman. He said it 74 times to the 79th congress while Democrats were still in control. The score for the Republican-controlled 80th is not quite complete at this writing.

Every American president is permitted to say he forbids, but he has to say it in Latin. The word is "veto." Of course the congress can say "So what?" right back, as they did so emphatically this session in the case of the Taft-Hartley labor act, but they have to say it two-thirds strong, a strength they aren't always able to muster, as history has shown.

Why the founding fathers were so generous with presidential power, which they never conceived as expanding to its modern breadth, we don't quite know. The veto is written down in Roman law, but Latin is a dead language. In England, the crown has a veto power over parliament, but it is almost as dead as Queen Anne, since it hasn't been used since her time.

It seems to have flourished on American soil.

In fact—

"We ought to call it National Veto Week," House Majority Leader Halleck is reported to have remarked when the third presidential veto in one week of June bounced back into the lap of the 80th congress. Others studying headlines "President Nixes Tax Cut," "Truman Vetoes Labor Legislation," "Wool Bill Turned Down," shook their heads and opined that Harry S. Truman was the veto-ingest president yet.

Baukhage

Nonsense, said capitol old-timers. Harry Truman, according to the record, has been very sparing of his veto, and has a long way to go before he attains the really big-time veto statistics racked up by Pres. Franklin D. Roosevelt (who had more time than anybody else to exercise his thumbs-down power), Grover Cleveland (the veto runner-up), and Ulysses S. Grant.

"Why," the old-timers grunt, "when FDR was president, it seemed as if we had a veto on something or other almost every day." And the record shows that he said, "I forbid," or achieved the same end by the pocket method in 631 instances.

(A "pocket veto" comes about in this way: The president has 10 days, not including Sundays, to act on any bill. Congress sends a bill to him. If congress adjourns before the president's allotted 10 days are up and he still hasn't acted on the bill, it cannot become a law. That is considered a "pocket veto.")

Cleveland, during his two terms in office, used his veto power 584 times, and was overridden only twice. The majority of the Cleveland vetoes were personal pension bills, many based on utterly absurd claims growing out of the Civil war. At first, Cleveland's forthright refusal to permit these myriad, lilliputian treasury raids infuriated Civil war veterans. Later, however, the GAR came to consider him its friend.

Ulysses S. Grant, a poor third to Roosevelt and Cleveland, vetoed 92 bills, was overridden four times.

All told, the veto power has been used more than 1,833 times by presidents. George Washington started it off by killing two important acts—one having to do with legislative organization, another which would have reduced the size of the army. He was not overridden. There were eight other presidents who never experienced a veto upset by congressional action—Madison, Monroe, Jackson, Polk, Buchanan, Lincoln, McKinley and Harding.

On the other hand, there were several presidents who scorned the veto entirely: John Adams, Jefferson, John Quincy Adams, Van Buren, William Henry Harrison, Taylor, Fillmore and Garfield. Perhaps because all was harmonious between executive and legislators in those days. Perhaps because, as some students suggest today, a sustained veto is a contradiction of the principle of majority rule—a rule of a minority of one-third of either house plus one, plus the president who is not supposed to have a vote. (It takes a two-thirds vote to kill a veto.)

★ ★ ★ ★

Historic Trees Threatened

For years now I have walked back and forth to my labors under a Gothic roof of green, formed by the interlacing elm branches which, since Civil war days, have made my street one of the world's most beautiful avenues. Today there are some rude gaps in the raftered ceiling where huge branches have been ripped away by the wind and storm. But now there is a threat of greater devastation for our and other elm trees, ancient and historical, or merely beautiful, for the dreaded dutch elm disease has descended upon America—two cases of virulent infection have been discovered within the District of Columbia alone, and no cure is known.

My generation found nothing exotic in the idea of the village smithy under the spreading chestnut tree. Today the smith would have a tough job finding a chestnut tree under which to build his smithy, even if you could find the smith. For, thanks to the infamous chestnut blight, a horsechestnut tree in this country is now almost as rare as a horse.

Must the elms go that way?

I talked this question over with a member of the American Forestry Products Industries, Inc. (a private industrial association). He said: "A recent house action reduced the federal appropriation for the control and research of the European beetle and dutch elm disease to $51,000. If the cut is approved by the senate, it means the end of the dutch elm disease laboratory in Morristown, N. J., where the department of agriculture's bureau of entomology and plant quarantine has conducted extensive research into the control and possible prevention of the insect and fungus.

An elm, according to official classification, is a "prized shade tree in the northeastern and central United States." But passing over its esthetic value, consider that its "wood is used for variety of purposes—especially slack cooperage, market and bushel baskets, for heavy crating and for veneers. . . ."

But what does an economaniac care for all that?

Consider the White House grounds, for instance. In these quiet 18 acres there are something less than 350 trees comprising some 90 species. The two great magnolias planted close to the rear portico were placed there by Andrew Jackson. Nearly every president planted a tree—there is the Benjamin Harrison oak, the Harding beech, the Coolidge birch, several species set out under Hoover.

Maples predominate, but the elms are next, and many have historic memories. Just southeast of the south portico is an elm said to have been planted by John Quincy Adams. There are others planted by Lincoln and McKinley.

Under these trees history lives, but for beauty nothing surpasses the high arched cloister, thick-tapestried in summer, stark but graceful in silhouetted line in winter, which roofs my avenue.

A wilting and partly defoliated 30-foot American elm severely affected with dutch elm disease.

FIRE'S TRAGIC AFTERMATH . . . The tragedy which invariably follows in the wake of fire is typified in this picture of Mr. and Mrs. Allen Tate of Chatsworth, Calif., standing in the charred ruins that once was their home. A brush fire that swept the area destroyed many houses, including some under construction.

NEWS REVIEW

Mine Pact Draws Fire; New Aid Parley Opens

BETRAYED:
Mine Pact

Rep. Fred A. Hartley (Rep., N. J.), co-author of the Taft-Hartley labor act, has charged big business and big labor with betraying the public in negotiating the latest John L. Lewis coal mining contract.

Hartley's attack followed shortly after southern coal operators followed northern and midwestern operators in signing soft coal contracts with the 400,000-member United Mine Workers.

He told the house that "at least one clear violation of the law" was contained in the contracts, referring to the section providing for a "checkoff" from the miners' wages.

The Taft-Hartley law, he said, permits a checkoff only for union dues, but the contract calls for a checkoff of initiation fees and union assessments. Hartley added that other sections of the contract "violate the spirit and intent of the law."

Noting that the contract afforded a "prime case history of the evils of industry-wide bargaining," he said that there was evidence of "collusion between the mine operators and the UMW with the intention of violating the law."

R.S.V.P.:
Paris Parley

Pro-Communist Hungary turned down its invitation to attend the Paris conference on European reconstruction as 17 other nations lined up to participate in the talks, first step in carrying out the Marshall plan for aiding prostrate Europe.

The conference, previously boycotted by Russia on the grounds that the Marshall plan will be a foothold for American intervention in the internal affairs of Europe, will attempt to set up a scheme whereby Europe, with the aid of American dollar credits and supplies, will be able to lift itself from its economic morass by its bootstraps.

In addition to Hungary, four other Communist-inspired governments—those of Poland, Yugoslavia, Romania and Bulgaria—also refused the invitations sent out by Great Britain and France. As the deadline for replies approached, Finland and Albania had not yet been heard from.

NAVY RESIGNATIONS GROW

Higher pay and a more satisfactory home life are the two main lures which have drawn the most bright and capable young career officers from the navy and army into civilian jobs at what is called "an alarming rate" during the past year.

In the last 10 months more than 1,700 naval officers have resigned commissions won at Annapolis to take higher paying civilian jobs. During the same period, the army lost only 259 West Point officers via the resignation route, but they are men whom the service can ill afford to spare.

FARMERS PROSPER

Both farm assets and farm income have expanded tremendously since the outbreak of World War II, according to a late report released by the National Industrial Conference board.

Total assets increased about 90 per cent from 53.7 billion dollars at the beginning of 1940 to 101.5 billion dollars six years later. Gross income from agriculture shot up 124 per cent over the same period.

That income, plus government payments, totalled about 11 billion dollars in 1940 and only a little less than 25 billion dollars in 1945. Virtually all the gain was registered by income from agriculture. Government payments were not changed during the years covered by the report. Cash receipts from farm marketings rose from 8.3 billion dollars in 1940 to a very considerable 20.8 billion in 1945.

Real estate was by far the largest item among farm assets, rising from 33.6 billion dollars in 1940 to 56.6 billion in 1946.

ROMANCE:
Royal Road

Princess Elizabeth, 21-year-old heiress presumptive to the throne of England, and Lt. Philip Mountbatten, 26, former Prince Philip of Greece, are formally engaged to be married this autumn, probably in October.

King George VI and Queen Elizabeth cleared the road to royal romance by giving unqualified approval to the match and announcing the engagement in a traditional court circular.

Princess Elizabeth

Lt. Mountbatten is a second cousin to the king and a great-grandson of Queen Victoria. As the husband of Princess Elizabeth, he will be Britain's first prince consort since Queen Victoria's husband, Prince Albert of Saxe-Coburg. He cannot become king, but probably will be given a dukedom shortly after the wedding.

King George is expected to ask parliament to increase Princess Elizabeth's income and perhaps give her husband a special allowance.

OIL EXPORTS:
Supply Russia

A special export license for the shipment of petroleum products to Russia was granted by the department of commerce hours after Representative Weichel (Rep., O.), chairman of the house merchant marine committee, demanded the license be refused.

Weichel previously had telephoned William C. Foster, undersecretary of commerce, urging him to halt the movement of 248,000 barrels of petroleum being loaded aboard three tankers on the West coast.

INDEX HIGH, TOO

Gain Shown in Farm Income

WASHINGTON. — Farm income during the first six months of 1947 was 30 per cent higher than that of the corresponding period last year, it was revealed in the agriculture department's monthly review of farm income.

Farmers netted $11,700,000,000 from the sale of their products during that period, with the total increased to about 12 billion dollars through government payments, the report showed.

Largest increase was 70 per cent registered in sale of meat animals. Cash receipts from dairy products were up 30 per cent from the corresponding period last year.

Cash receipts from crops were around $3,800,000,000 in the first half, or 20 per cent above the corresponding period last year. Most of this increase was in grains and tobacco.

Preliminary estimates for June show that farmers received about two billion dollars from marketings, an increase of 30 per cent from June, 1946. Receipts from livestock and their products were up about 50 per cent on the same basis of comparison.

"Demand for meat for domestic consumption and for export continues unusually strong," the agriculture department's statement said. "Meat animal prices in mid-June were about 50 per cent higher on the average than a year before."

The declining wheat prices are expected to continue into August or September. "Because of the very large export demand, however, the price decline will be less than is usual when a very large crop is marketed."

Prices paid by farmers for their needs in June averaged 230 per cent of the 1910-14 average. Prices paid for feed advanced to the highest level since last August.

In general, the statement concluded, the index of prices paid by farmers is expected to continue at high levels in the next few months.

'FIRST AMERICANS'

Park Ruins Unfold Fascinating Story of Prehistoric Indians

WNU Features.

More than one hundred centuries ago the first immigrants set foot on the shores of North America. These early people, archeologists believe, crossed the narrow strait which divides Asia from Alaska, and from Bering sea they traveled eastward and southward. From time to time in the centuries which followed new bands of people crossed from Asia and the earlier settlers were compelled to push onward to more remote sections of the continent. It is possible that some of these people migrated down along the Pacific coastline, but the greater mass of them, it is thought, crossed the mountains and continued the southward trek along the east side of the Rockies.

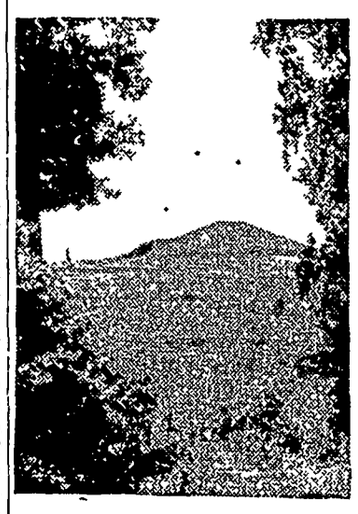
Long before the time of Columbus the copper-colored inhabitants of the Western hemisphere, whom we call "Indians," had fanned out and occupied all of North America, Mexico, Central America, South America and the islands of the West Indies.

Under the administration of National Park service are many areas connected with the life of the ancient Indians. Mesa Verde National park and 14 national monuments have been established to protect significant ruins in the states of Utah, Colorado, Arizona and New Mexico. There are also Mound City group national monument in Ohio, Ocmulgee national monument in Georgia and Old Kasaan national monument in Alaska. In addition, many other national parks and monuments, created primarily as scenic or scientific reserves, also contain evidence of Indian occupation.

National Parks Twelfth In a Series

Unfortunately, the Indians, during the long pre-Columbian period had no written history, but the records of their wanderings and the story of their cultural and political progress gradually is being put together by archeologists from the tangible remains—the campfires, the dustheaps, and the ruins these people left behind. The story as it unfolds is fascinating, the record of achievement is impressive.

Originally nomadic hunters, the first Americans, learned to cultivate the soil. To Indian farmers we owe such staples in our diet as corn, Irish potatoes, yams and cocoa. The Indians also developed tobacco and taught us the use of quinine. They learned to make pottery, woven textiles and delicate jewelry from gold and silver. They built fortresses, temples and cities, and in Central America Mayan mathematicians invented the use of "zero" before it was known to scholars of Europe and Asia.



EVOLUTION . . . Ocmulgee national monument in Georgia contains outstanding remains of Indian mounds and prehistoric towns, representative of the cultural evolution of the southern mound-builder civilization. This Council Chamber mound has been restored by National Park service.

• • •

EARLIEST EVIDENCE of man in the New World was discovered a few years ago at a site near Folsom, N. M. Here peculiar grooved stone spear points were discovered in association with the fossil bones of animals which have been extinct for thousands of years. The skeletons of the men who used these weapons have not yet been found, but similar grooved points have been discovered in many places as far east as Virginia. This earliest American has been given the name of "Folsom Man" and he lived at a time when mastodons and sabre toothed tigers roamed the forests and plains of the United States.

After the "Folsom Man" there is a long gap in our knowledge of ancient Americans, but in Central America the Mayas, who had invented a reliable calendar, were carving dates on stone monuments as early as 600 years before the beginning of the Christian Era.

• • •

IN MESA VERDE National park and in the southwestern national monuments one may obtain a fairly clear picture of the life of the Indians through a period extending back nearly two thousand years. Here, although the Indians had no calendar and carved no dates on monuments, it has been possible to assign fairly exact dates to events which transpired long before the coming of the white man. For example, it is known that from 1276 A. D. to 1299 A. D. there was a continuous drouth for 24 consecutive years, and it also is known that about the year 900 A. D., Sunset Crater, a volcano near Flagstaff, Ariz., erupted and covered the countryside with lava and ashes.

CONTRAST . . . Prehistoric Indian ruins built at the base of sheer red cliffs or in caves in canyon walls share the limelight with modern Navajo homes and farms in Canyon de Chelly national monument in Arizona. White House ruins are shown in this picture.

The system of dating Indian ruins in the Southwest is simple and ingenious and is done by using a tree ring calendar.

By starting with living trees and patiently matching pieces of wood from older and older houses, the annular ring patterns in the Southwest have been established for a period of more than a thousand years.

• • •

ONE OF THE MOST impressive ruined towns of the ancient Indians is Pueblo Bonito in Chaco Canyon national monument, New Mexico. This town, built like a huge five-story apartment house, contained in the 11th century more than 800 rooms and housed at least 1,200 people. A part of the pueblo was constructed as early as 919 A. D. Other ruined pueblos, which the visitor will find fascinating, are those built in niches in the vertical cliffs of Canyon de Chelly and Canyon del Muerto in Canyon de Chelly national monument in northwestern Arizona. The beauty of these wild canyons will live long in the memory of all who see them. Near Flagstaff, Ariz., are the stone pueblo of Wupatki and the cliff dwellings in Walnut canyon. In central Arizona are Tonto, Tuzigoot and Montezuma Castle national monuments, and in the northern part of the state near the Utah border is Navajo national monument. Aztec ruins and Bendelier national monuments are in New Mexico.

• • •

IN THE OHIO valley and in southeastern United States the Indians frequently built large earth mounds. Very often these mounds were constructed in the form of truncated pyramids and were used as platforms for temple structures or houses. One of these mound sites has been established as a national monument near Chillicothe, Ohio. At this site, known as Mound City group national monument are a large number of mounds. At Macon, Ga., Ocmulgee national monument also contains a number of interesting mounds, one of which was constructed over a subterranean council chamber.

• • •

FOR INFORMATION relating to the national monuments, write to the Director, National Park Service, Department of the Interior, Washington 25, D. C.

'Smokies' Rank as Favorite Retreat

WASHINGTON.—Ranking as one of the favorite vacation spots in the East, Great Smoky Mountain National park embraces the greatest mountain mass east of the Black Hills.

The "Smokies" derive their name from the deep blue haze hovering about the peaks that for 36 consecutive miles are more than 5,000 feet high. The park is 54 miles long and a maximum of 19 miles wide.

Highest peak is Clingman's Dome 6,642 feet above sea level and accessible by a motor highway.

Fishing is one of the main attractions for sportsmen, the 600 miles of trout streams in the park being restocked annually.

Free naturalist-guided field trips are conducted during the summer months by National Park service and campers also may explore remote sections of the park.

NERVOUS
On 'CERTAIN DAYS' Of Month—
Do female functional monthly disturbances make you feel nervous, irritable, so weak and tired out—at such times? Then do try Lydia E. Pinkham's Vegetable Compound to relieve such symptoms. It's famous for this! Taken regularly — Pinkham's Compound helps build up resistance against such distress. Also a great stomachic tonic!
LYDIA E. PINKHAM'S VEGETABLE COMPOUND
WNU—N 30—
Kidneys Must Work Well-
For You To Feel Well
24 hours every day, 7 days every week, never stopping, the kidneys filter waste matter from the blood.
If more people were aware of how the kidneys must constantly remove surplus fluid, excess acids and other waste matter that cannot stay in the blood without injury to health, there would be better understanding of why the whole system is upset when kidneys fail to function properly.
Burning, scanty or too frequent urination sometimes warns that something is wrong. You may suffer nagging backache, headaches, dizziness, rheumatic pains, getting up at nights, swelling.
Why not try Doan's Pills? You will be using a medicine recommended the country over. Doan's stimulate the function of the kidneys and help them to flush out poisonous waste from the blood. They contain nothing harmful. Get Doan's today. Use with confidence. At all drug stores.
DOAN'S PILLS

URE FOR BETSY ROSS HOME . . . Frank H. Mancill (left), senting the board of trustees of the Betsy Ross house on his- Arch street in Philadelphia, is shown accepting painting de- g Washington's visit to the house from L. J. Gunson who donated t will be hung permanently inside the little building where the rican flag was born. Mrs. Frederick Stewart impersonates y Ross and holds a duplicate of the original flag.

RUN OF THE MINE . . . John L. Lewis glances up dourly as he finishes signing new wage contract for his United Mine Workers with the mine operators. The miners returned to work after a brief strike.

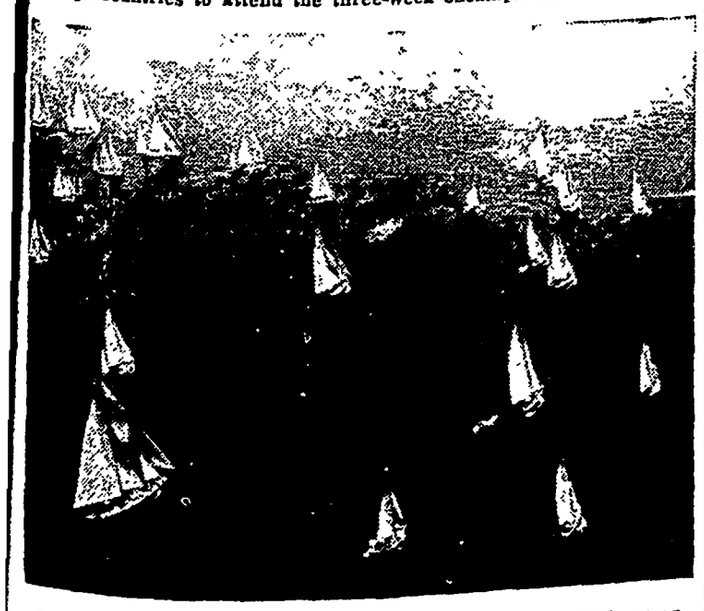
POETIC JUSTICE . . . John B. Kelly Jr., of Philadelphia, whose father was barred from diamond sculls rowing classic in 1920 because he had done menial labor, saved family honor by winning the meet this year at Henley-on-the-Thames, England.

ERE, WE DID IT AGAIN . . . Two never-say-die congressmen, eaker of the House Joseph W. Martin (Rep., Mass.) (left) and Rep. arold Knutson (Rep., Minn.) congratulate each other after the house representatives passed the income tax cut bill by a vote of 302 to 2. It marked the second time within a month that the house ap- oved the four billion dollar income tax reduction plan.

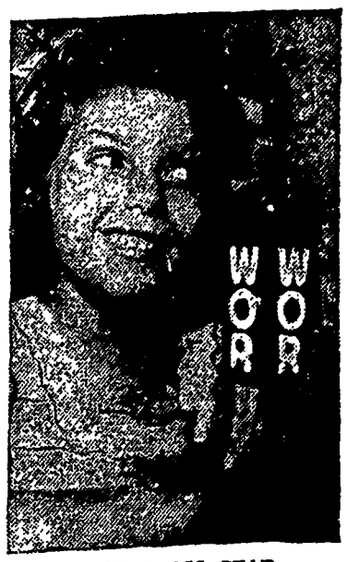
CALLS THE TUNE . . . James Caesar Petrillo, boss of the musicians' union, has issued an edict that he will prohibit broadcast of musical programs on network hook-ups after February 1, 1948.

GENUINE UNITED NATIONS SPIRIT . . . The diplomatic gentlemen who are wrangling around the peace tables at Lake Success, N. Y., might do well to drop in on the 35th anniversary encampment of the International Girl Scouts at Camp Barree, Pa., for an object lesson in how to get along with one another. Shown here are some of the Girl Scout delegates who came from all the states and a score of foreign countries to attend the three-week encampment.

HATES TAXES . . . So violently opposed to "excessive and confiscatory individual income taxes" is E. B. Tilton of Milwaukee, Wis., that he voluntarily cut his own income to lower his taxes. President of a manufacturing company, he says he will work without pay in November and December so that he may lower his tax contribution.



DOWN TO THE SEA IN SHIPS . . . Gleaming sails scudded across the outer harbor at Los Angeles as the first California-to-Honolulu yacht race in eight years got off to a perfect start with equally fine weather conditions. Thirty-three entrants caught a fresh breeze which sent the armada whipping out onto the 2,225-mile course to Hawaii.



YOUNGEST RADIO STAR . . . Self-styled "youngest story-teller in the whole world," Robin Morgan, five years old, has her own radio program over a New York station. She is the nursery set's own disc jockey.

Sauerkraut	Pack cold, add salt, no water	30		

Follow This Chart for Canning
(See recipes below.)

Canning Queries

Pressure cookers and other canning equipment will be working overtime to take care of garden produce this year, and those of you who have canned foods undoubtedly know that it's a big task, but not a thankless one when it comes to next winter's eating.

There's no other food task so gratifying as canning, for once you are finished, you have loaded shelves to look at. In order to avoid canning mistakes and failures, check over these points.

First, garden-fresh, sound ripe vegetables are the only kind worth canning. Unsound produce does not improve during the canning process, and it's a waste of time, money and food to put stale vegetables into jars.

Select all vegetables as carefully for canning as you would for your most finicky guest, and you'll be a long way toward success. Tender peas, small beets, plump, shiny corn, crisp and meaty beans, etc. all will give satisfactory results because they are prime produce to begin with.

Every vegetable should be washed thoroughly before the skin is cut or broken. Why? Because some of them have dirt and fuzz that is difficult to remove once it becomes mixed with the juicy content.

Pre-cooking and hot packing gives best results, as this method shrinks the vegetables and gives a better looking pack as well as less shrinkage in the jar.

Use Pressure Cooker

Some women can can consistently and successfully by processing vegetables in a hot water bath. Either they are very careful workers or just plain lucky. However, foolproof results are best obtained by using a steam pressure cooker. It is possible to bring food to a higher temperature in this way and kill harmful bacteria, thus avoiding spoilage.

Canning also may be done in much less time with a pressure cooker, and there is less opportunity to lose food values in this way. Fortunately, the equipment is now available, or in many communities it is obtainable on a communal basis at a canning center or such.

Boil Before Serving

One of the basic rules for home-canned vegetables is to boil the canned vegetable 10 to 15 minutes before tasting or using. Never taste a vegetable which you may suspect is spoiled. If you are certain of spoilage, discard it; if not sure, cook it first and then taste.

This boiling is best done in an open saucepan. The rule applies to all vegetables except tomatoes and red pimientoes, which are acid vegetables and hence in a somewhat different class from non-acid vegetables such as peas, beans, corn, etc.

Some questions always come up concerning particular vegetables during canning time. Typical queries are these, and here are the answers:

What causes cloudiness in canned peas? This may be caused by insufficient cooking or some mineral in the water used for canning. Proper pre-cooking or soft, distilled water eliminates the cloudiness.

How high shall I pack vegetables? Pack them to within ½ inch of the top of the jar, except peas, lima beans and corn, which are packed to within one inch of the top to allow for extra expansion.

What causes corn to turn brown in the can? Most often this is due to a high temperature used during canning, which carmelizes the corn. Sometimes a high deposit of mineral such as iron in water used for canning will cause it.

Why do beets turn white? This may be due to certain varieties or to too old beets. Use the very dark red kind, and see that they are young and freshly gathered.

Why do vegetables fall apart when home canned? This is due to overprocessing or overcooking in pressure cooker or water bath. Watch the time and check with timetable to avoid this error.

Shall I overprocess or underprocess? Neither is good, but underprocessing probably will result in spoilage while overcooking will give you wilted looking goods that do not hold their shape.

How much shall I can at one time? Unless you have help for preparing the vegetables, it is best to do it in several small batches so vegetables do not spoil. If you can get the produce from garden to kettle—or jar—within two hours you are working according to the best rule. Much depends upon your own speed and ability.

How much salt should be used? Season according to taste or not at all. Most people are satisfied if one teaspoon of salt to each quart of vegetable is added as a last measure to the jar before it is closed.

Should jar tops be wiped before cover is placed on jar? Yes, this is essential to remove any bits of vegetable, water or salt which might prevent a perfect seal.

What kind of covers should I use? There are a number of good varieties available, and each should be used according to the manufacturer's directions.

LYNN SAYS:

Glamorize Foods Before Serving

For both fruit and vegetable salads you may use the prongs of the fork for fluting such things as cucumbers and bananas.

Use vegetables prepared in molds to make vegetable platters more attractive. Carrots, peas and spinach are nice to look at when served in a ring mold. Use a contrasting colored vegetable in the center of the mold.

Ring black or green olives around the sides of a meat salad bowl to make it look attractive.

Never overcook food if you want it to look nice on the platter. Have it crisp looking even if cooked.

If vegetables lack appeal for the children, invest in a set of fancy vegetable cutters and use these for a change to add interest.

Use your gayest mats or linens when serving out on the porch or lawn. Pottery and heavy goblets are ideal for service here.

Our Responsibility in Influencing Family Life

LESSON TEXT FOR AUGUST 3—Proverbs 1:8, 9; 6:20-23; 17:6; 19:18; 22:6; 23 22-26.

MEMORY SELECTION—Train up a child in the way he should go: and when he is old, he will not depart from it.—Proverbs 22.6.

EDITOR'S NOTE: Lesson subjects and Scripture texts selected and copyrighted by International Council of Religious Education; used by permission.

By HAROLD L. LUNDQUIST, D. D.
Of The Moody Bible Institute, Chicago.

TRUTH must be translated into living, and there is no place where it can be more effective than in the home. We will want to make much of this lesson, for it is the only one during the entire year which deals directly with the home.

The book of Proverbs, to which we were introduced last Sunday, abounds in practical advice with a definitely spiritual emphasis, a combination at once wholesome and effective. This is the first of eight lessons making application of Proverbs to the problems of modern life.

Everyone in the home has a measure of responsibility for making the family life what it ought to be. No one from the small child to the great-grandmother is without influence, and each must contribute to the welfare of the home. Our lesson reaches from the young person to the grandfather rejoicing in his children's children.

It begins quite properly with

I. Youth Looking to Parents (1:8, 9; 6:20-23, 23:22-26).

YOUNG people want to be well-dressed and properly groomed. They are interested in that which adorns and improves their appearance It is right that they should have such concern. Let us remind them, however, that a young man or woman should not only be physically well-groomed, but spiritually attractive as well. If we should give as much thought to that side of our beings as we do to our bodies, there would be wonderful improvement in the life of the individual and in the home.

The child who is properly instructed, and who is responsive to that instruction, is prepared for life no matter where it may lead him (6:22) Wherever and whenever he needs guidance, night or day, it is with him Even when he sleeps, he is in the hand of God for blessing.

Let no young man or woman be betrayed into that awful folly of our day which neglects the teaching of parents and of the church. Disaster is ahead on that road—sure disaster, and swift!

But now look at the other side of the matter, where we see

II. Parents Looking After Youth (19:18; 22 6).

THERE is a foolish idea current in our day which says that the way to rear children is to let them develop according to their own interests and instincts, without discipline or definite guidance.

The fruits of that kind of child training are now being harvested in the present crop of juvenile delinquents. We have the sad and awful proof before us that children cannot be reared that way.

We are not pleading for a return to the unduly restrictive measures of some of our forefathers; children are not helped by harshness or cruelty. But there is a *proper place for definite* instruction, for discipline, yes, even for chastening when that becomes necessary.

The larger part, and the most effective part, of this matter is the training of the child (22:6) and when properly done it brings forth the finest of results in later life. The boy who has been taught and directed right may get on a sidetrack for a time, but there is always the promise of a return to the right way.

This business of rearing children calls for the best any of us can put into it, and over and above that, all the grace and wisdom that God can and will give us.

We have reserved one verse for our final point, for here we find

III. Age and Youth Working Together (17:6)

OLD men need encouragement, and they receive it in no richer or more satisfying measure than in the delight they take in their children's children. **Young people should remember that, and not fail to give to their grandparents, as well as their parents, the full measure of their interest and devotion.**

But now note that "the glory of children are their fathers," yes, and grandfathers. How sad it is when a boy has to be ashamed of his father or one of his grandparents.

That puts on each one of us who has children a truly weighty responsibility. We must walk worthily before God, and before our children, even down to old age, when our grandchildren look to us for an example of godliness and gracious living. May God help us!

Yodora checks perspiration odor

THE *SOOTHINGEST* WAY

Made with a *face cream base*. Yodora is *actually soothing* to normal skins. No harsh chemicals or irritating salts. Won't harm skin or clothing. *Stays* soft and creamy, never gets grainy.

Try *gentle* Yodora—*feel* the wonderful difference!

There is much blight in apple and pear trees this year because of wet weather.

USE DRY FEED MIX WITH SODIUM FLUORIDE

K. W. Stouder, Iowa State College veterinarian, reports a few pig losses over the state from the improper use of sodium fluoride.

Sodium fluoride, when used to destroy intestinal worms in the swine, should be mixed with dry feed and in the exact recommended proportions. The correct proportion is 1 part sodium fluoride to 100 parts of dry ground feed. Feed this mixture only 1 day.

Sodium fluoride is very effective vermifuge, and one treatment is usually all that is necessary. If more than one dose is needed, Stouder warns that it should not be given sooner than 3 or 4 weeks after the first treatment.

Stouder cautions that sodium fluoride should never be mixed with liquid feed.

Gentlemen

We your commissioners, viz C. F Merten, Engineer, Walter Kahl and Wm. Boehnke, commissioners appointed and commissioned by you in accordance with chapaer 455, section 455.51 of the Code of Iowa and all laws amendatory or additional thereto, to view and classify the lnds of Drainage District No 145, and to apportion to said lands the total costs of said Drainage District respectfully submit the following report.

C F Merten, Engineer
Walter Kahl
Wm. Boehnke

Reception Held

Mr. and Mrs. Glenn Bier were honored at a reception and dance held at the Klemme Community Hall on Tuesday evtning, July 29th. A large crowd was present.

DDT IS BEST CONTROL FOR GLADIOLUS THRIPS

Thrips, those insect pests which play havoc with the gladiolus in your garden, are best controlled by DDT.

Larry Grove, Iowa State College horticulturist, advises starting to dust the plants with 5 per cent DDT as soon as you can feel the flower in the spike This is just before the bloom emerges The dusting process should be kept up regularly every 7 days until after the plants have bloomed.

MULLINS HYBRID SERVICE

Nozzle News Releases

DDT probably saved more lives during the recent war than any other single development, according to Brigadier General James G. Simmons of the Surgeon General's office, U. S. Army.

The largest of the species of bloodsucking lice are the hog lice. They are readly controlled by DDT. Treat all hogs thoroughly, as one untreated hog may, two months from hence, reinfest the herd again. Treatments made several weeks before farrowing time will protect the new-born pigs from lice infestation. Spray pig pens as well.

The housefly (together with his lesser brothers) has been called the world's most deadly and destructive wild animal! A new generation of flies may be born every 8 days. This means that papa and mama fly could start out in the spring and have upwards of 2,000,000,000 grandchildren. Flies often carry the germs of dysentery, typhoid and certain respiratory diseases - - even tuberculosis.

Some farms are so heavily infested with thistles, bindweed (creeping Jennie) and other weeds that, in extreme cases, the farm credit agencies are refusing to grant or extend loans. Because of weeds these farms are worth from $15.00 to $25.00 an acre less than farms of equal fertility in the same community.

Your Mullins Hybrid Service operator will handle your spraying job efficiently. Call on him today.

AROUND IOWA

SCALPED

When her hair caught on the power take-off on a tractor, nine year old Barbara McCall of Boone was almost completely scalped while visiting on a farm near Corydon. She was rushed to the hospital at Iowa City.

TOO MUCH RAY

At Indianola, Frank Shannon is recovering from ultra violet ray burns received on his eyes while cleaning out a large refrigerator in his cafe He spent most of one afternoon defrosting the large box and did not realize he was getting too close to the ultra violet light which hangs in the box as a purifier. He could not see the first 24 hours but is improving now

DOLL HOUSE

At Emmetsburg, the three daughters of Mr. and Mrs. V. L. Kunz are the envy of all their playmates. Mr. Kunz built them a "Dutch Colonial" playhouse, child size, with dimensions of 8x10 feet.

MONKEY

When Finley Christian of Grinnell was in the South Pacific, he had a pet monkey, "Herman," but the Navy would not let him bring Herman home Lonesome, Finley sent to Brazil recently for another monkey. The new arrival, two months old, has been named "Filo" — after Finley's father and mother.

LASSOED FISH

W. B. Miller of Marshalltown lassoed a 16 pound carp at Clear Lake. He was trolling for pike when he felt a tug on the line When he reeled in the fish, it was fastened with a half-hitch around its body, at a point in the line about 25 feet from the hook.

INTO BOAT

A 12-inch bass jumped into the boat of a party of Waukon fisherman, while they were on the Mississippi River near Waukon Junction. Fortunately for the occupants, the Rev. George Reibert, Bethlehem church pastor, was a member of the party and vouches for the story . ..

HERE'S ONE WAY

Albert Preschel of Spencer was fined in Algona recently for carrying a pistol without a license. Preschel told the mayor he was carrying the gun to scare a girl who used to go with him but is now going with some one else. Mayor Kohlhaas failed to approve of this type of courtship, fined Preschel $50.

FERRETS

Clarinda residents got a glimpse of a new commercial enterprise recently. A stranger drove in with a car fixed up as living quarters for 40 live ferrets. They were available, he said, for hire to any one wishing to rid premises of rats. The ferrets, sleek and harmless looking, are notorious rat killers.

BEES TAKE OVER

A swarm of bees near New London solved the housing shortage in their own way recently They spotted an unused chimney on the house belonging to Marshal Drewer and moved in Eventually the chimney became crowded and they took over the room below. The chimney is now filled solid with honey.

SAVED YOUNGSTER

When a three year old child fell off a dock at Arnold's Park, Roger Ericson, 16, of Rock Rapids, raced down two flights of stairs from his cabin, out to the dock and rescued the youngster. The child suffered no ill effects.

ANNIVERSARY

Pomeroy observed recently the 54th anniversary of the famous Pomeroy cyclone of July 6, 1893. The twister, now forgotten by all but the old folks, struck suddenly on that day, killed 50 persons outright and fatally injured many others.

NARROW ESCAPE

Marian Alden, 16, of Riceville, had an unusual experience of having a windmill fall over on top of her last week—and living to tell about it. While driving a tractor through the barnyard, the girl ran the machine into the windmill with sufficient force that it toppled over. Fortunately the high tractor wheels took the force of the blow.

NOT TALKING

Fred Lageschulte of Bremer bit his tongue recently—but he's not talking about it. He can't. While feeding a calf, he reached over to pick up the pail and the calf tossed its head, resulting in Mr. Lageschulte's bitting his own tongue Five stitches were required.

FLAGGED TRAINS

When railroad officials set out to find out who was trying to flag down the trains at Tama recently, they found that John Fluty, 26, had secured some torpedoes and a red flag and was trying to flag down the trains "to keep them from running off into Lake Cherry" Placed under arrest, Fluty plead guilty to an intoxication charge.

SEWER TROUBLE

Albert Hughes, formedly of Mystic, is a sewer trouble shooter at Kansas City Recently his safety belt broke and he was washed through a sewer into the Missouri River Shortly after that, he had another close shave when a helper dropped an extension cord into a sewer, charging the water with electric current. The resulting shock paralyzed Mr Hughes' throat for several days.

BURN ANTHRAX-KILLED ANIMALS

Burning the carcass of an animal with anthrax is the only safe way of destroying anthrax germs.

While there have been only a few outbreaks in Iowa, County Extension Director Paul Henderson says there is a possibility that some of the deadly anthrax germs may show up, especially now with a hot dry spell following last spring's floods.

He cautions agaist opening the carcass of any animals which might have been killed by anthrax Anthrax germs, which could easily spill from the carcass, will live in the soil for years and could infect almost any animal at any time.

If possible, the carcass should be burned where it lies Soak the body with kerosene or crankcase oil, then cover it with a hayrack full of straw or cobs. Put two loads of heavy manure on top of the straw and set the whole thing afire. Manure should be added each day until the carcass has burned to a white ash

A carcass which cannot be burned where it lies should be loaded onto a slip, or sled, and dragged to where it can be safely burned.

Flies, dogs, crows, and rats should be kept away from the carcass. It should not be touched by humans, because the disease is dangerous to man as well as nearly all animals. Henderson says a doctor should be consulted immediately if a pimple develops on any part of the body following an outbreak of anthrax. A veterinarian should be called to check any animal suspected of having anthrax.

Henderson points out that uninfected animals can be protected by vaccination. There are several systems of protection , depending on the type of outbreak. By getting a veterinarian's diagnosis immediately, provective measures can be taken.

SOFT CORN WOULD SLOW UP FALL HOG MARKETING

Should Iowa's late 1947 corn crop result in a good deal of soft corn it probably will make some difference in the time when the spring pig crop reaches market.

More early pigs were farrowed this year than in 1946, but they may not be sold earlier Feeding hogs to heavier weights is one way to market high-moisture corn, Iowa State College agricultural economist.

In viewing the farm outlook this week, Kutish also noted that marketing cockerels early is a sound practice that likely will pay dividends again this year. Poultry prices generally drop in the fall when farmers are selling a lot of birds. Shorter supplies of red meats are lending strength to the young chicken market this summer.

Red meat supplies will continue short for the rest of the summer, but will pick up in the fall. Farmers will market about as many pigs this fall as a year ago. The Bureau of Agricultural Economics also forecasts large cattle marketings this fall.

6TH ADJOURNED JUNE MEETING

Garner, Iowa
July 21, 1947

The Hancock County Iowa Board of Supervisors met in session pursuant to adjournment on above captioned date with F J Schoun, John Chambers and Geo. Th Gerdes, present.

The minutes of the last meeting were read and approved as read

Supervisor Chambers has appointed a committee to investigate and cause repairs to be made in DD No. 139, Main.

On Motion and second the petition for extension of Drainage District No. 144 filed by Ellsworth & Jones, Inc et al is approved

On motion and second the bond of Joe Needles on Drainage District No. 147 is approved.

On motion and second the appointment of A. C. Taylor as registrar of Vital Statistics is approved.

On motion and second the contract with Clarence Stone for the construction of DD No. 138 has been extended to January 1, 1948, as recommended by Wm. Henschen, Construction Engineer

On motion and second the recommendation of Engineer Wm. Henschen for repair and cleanout of Drainage District No. 138 is approved and repair and cleanout is ordered made as recommended by the engineer

WHEREAS, Wm. Henschen, Engineer, Walter Kahl and Wm. Boehnke, were heretofore appointed commissioners to view, classify lands and assess benefits in the watershed of DD No. 146, Hancock County, Iowa, all in accordance with Chapter 455 Code of Iowa, A. D. 1946, and

WHEREAS, said commissioners did qualify as by law directed and did view said lands and did assess benefits as by law directed and did file their report on July 17th A. D., 1947, which report sets out in detail the assessment against each tract and parcel of land and highway in the district, as directed by law

BE AND IT IS THEREBY RESOLVED by the Board of Supervisors of Hancock County, acting for and in behalf of Drainage District No. 146, Hancock County, Iowa, that the report of the commissioners heretofore appointed to classify lands in the watershed of DD No. 146 Hancock County, is tentatively approved and a hearing thereon will be held at the Courthouse in Garner Iowa, on the 8th day of September A D 1947 at the hour of 10 30 A M. at which time taxpayers in said district may appear and show cause why the classification and assessment as signated shall not be accepted and assessment taxed against the lands in the watershed of DD No. 146 Hancock County Iowa All objections to such assessment of benefits shall be diled in writing in the office of the County Auditor in Garner, Iowa, at or before the time set for hearing thereon

The county auditor be and is hereby directed to cause notice of such hearing to be published in the Britt News Tribune a newspaper of general circulation, published in Britt, Iowa, setting the description of the real estate and the described assessment each tract parcel of land, highways and railways in the district is charged with

The foregoing resolution was offered and read by Supervisor Jacobs, who moved its adoption, seconded by Supervisor Schoun whereupon the chairman placed the motion of its adoption and upon the call the vote thereon is as follows Schoun, and Chambers aye None, whereupon the chairman declared the resolution duly adopted

Be it remembered that on the 21st day of July 1947, the Board of Supervisors of Hancock County, Iowa met in session for the purpose of filing and considering the estimate for the local budget of said county There was present a quorum as required by law Thereafter and on said day there was filed the following estimate

FUNDS	1 EXPENDITURES For Year For Year 1945	2 EXPENDITURES For Year For Year 1946	3 Proposed Expenditures 1948	4 Estimated Unencumbered Balance Jan 1 1948	5 Estimated Income Other Than 1948 Taxes Amount
General	$ 68,298	91,764	125,000	none	40,000

Chairman

GOOD CORN WEATHER IS NOT GOOD EGG WEATHER

Good, warm weather is needed for Iowa's corn crop, but it's a handicap to producing high quality eggs, says R. E. Phillips, head of the Poultry Husbandry Department, Iowa State College.

Hot, dry weather causes a rapid loss of interior egg quality Egg white, or albumen, becomes thin. The thin yolk membrane weakens and this permits a flattening of the yolk when an egg is broken into a pan or dish.

This lack of "stand up" qualities shows up each year as good eggs become scarce. Since the average consumer prefers the best quality product available, this creates a made-to-order situation for the conscientious producer.

Phillips points out that high quality, market-topping eggs, produced with a little extra labor, can thus greatly increase the size of the weekly egg check.

To produce quality eggs, Phillips recommends selling or separating male birds from the laying flock immediately Infertile eggs keep better Keeping laying hens partially confined in wet weather and having an abundance of litter on the floor and in the nests will help keep egg shells clean

Having one nest for each five hens minimizes shell soilage Gathering eggs four to six times daily also decreases soilage and breakage and helps hold quality up.

During this time of year eggs should be marketed at least twice a week if the most profitable return is to be realized

EW DRIVERS LICENSE REQUIRES VISION TEST

wa's new "birthday bill" ch requires renewal of driv- licenses during the 30 days r to the holder's birthday not affect the general pub- until July 5, 1948, according Clarence Shirer, Superintend- of Drivers Licenses.

hirer explained the law as ows

A 1946-48 license number- below 500,000 is automatical- extended one full year from 5. 1948 and need not be ewed until 30 days prior to holder's birthday after July 1949

A 1946-48 license numbered ner than 500,000 must be re- ed during the 30 days be- the holder's birthday after 5. 1948.

The fee for licenses num- ed above 500,000 will be 50c for licenses numbered less n 500,000 the fee will be 75c e this license has been ex- ded one full year.

This one year extension will be in effect for one renewal period only, in order to spread the renewing of over 1,000,000 licenses through a 2 year period. After all present 1946-48 licenses have been renewed, drivers will then renew their licenses every two years as their birthdays occur.

Shirer said renewals will be made by members of the Highway Patrol or their clerks, and that each applicant will be required to take a vision test.

Junior Achievement Show Scheduled For Aug. 11 and 12

The annual Junior Achievement Show will be staged at Garner August 11 and 12. This annual event for the 4-H Boys and Girls and the boys in the Smith-Hughes Agricultural classes will again be held at the Garner Sales Co barns and the Garner Opera House Premium lists and program schedules are being prepared. The annual Baby Beef sale will be held the afternoon of August 12.

The annual clean up by the 4-H leaders and their 4-H members will be held at the Sale Barn Saturday, August 9th

Edgar Dorow, Youth Assistant promises a very good showing of livestock and an increased number of demonstrations

OATS ARE FIRST CLASS SUMMER DAIRY RATION

With a supply of new oats rolling into bins, Iowa farmers now have a high-quality dairy cow feed to supplement costly corn and drying up pastures.

According to Iowa State College dairyman Lyle Jackson, standard weight oats make an excellent summer dairy ration

Oats contain less carbohydrates per 100 pounds than corn, which means less heat and energy is produced during hot summer months. They contain more fat than corn and are higher in protein. Good oats make a palatable food.

The feeding value of oats is about 90 percent that of corn because total digestable nutrients, on a hundred pounds basis, are less. Also oats are deficient in vitamin D, have only a little vitamin A, and protein quality is not as good as in some other feeds.

For summer Jackson recommends a ration of 400 pounds of corn and cobmeal and 400 pounds of ground oats plus 100 pounds of high-protein feed such as linseed or soybean oilmeal. This should be fed at the rate of 1 pound of mix to each 5 or 6 pounds of milk produced daily.

It pays to grind the oats and other grains for dairy cows because more will be digested and utilized. Hulled or rolled oats are best for summer dairy calf ration. Jackson points out that finely ground oats might cause some trouble in the digestive tract of the young calves.

A ration containing 300 pounds ground shelled corn, 300 pounds hulled or rolled oats, 300 pounds bran and 100 pounds of high protein feed is suggested for calves in the summer.

DDT KILLS FLIES, BUT ACTION ISN'T INSTANT

Flies don't fall over dead the instant they come in contact with DDT.

Some people have drenched them with this new insecticide, and have been surprised when they apparently were not affected

Harold Gunderson, Iowa State College entomologist, says it may take anywhere from several minutes to several hours for a fly to die after it comes in contact with DDT.

DDT kills by affecting the nervous system Entomologists say it is both a "contact poison" and a "stomach poison" because it is effective when touched or when swallowed It gradually paralyzes the insect.

Gunderson advises that the best way to judge the effectiveness of DDT on flies is not by the number of dead ones that are visible, but by the absence of live ones.

As DDT grows older it gradually looses its effectiveness. Some of it may be covered with dirt or may be rubbed off of treated surfaces. It will kill more slowly than when it is freshly applied

If DDT has been well sprayed over barns and livestock, and flies still appear, look for breeding places either on your own property or that of your neighbor, says Gunderson Flies have been known to travel as many as 13 miles from their original breeding spots.

Good sanitation on a community basis plus judicious use of DDT does control flies, says Gunderson, but one without the other is of little use

Twins Celebrate 5th Birthday

Mr and Mrs. Russell Hansen of near Kanawha entertained a number of relatives at their home on Sunday afternoon in honor of their twins, Roger and Rita, who were celebrating their 5th birthday. Ice cream and cake was served during the afternoon. Roger and Rita received many nice cards and gifts.

DEPUTY COUNTY ASSESSOR EXAM DATE SET

Must Be Voter And 1 Year County Resident

Examinations for deputy county assessors will be given at the county court houses throughout Iowa on September 3rd, at 9:00 o'clock a. m.

Under a new state law county auditors will take on the additional duties of county assessors at the end of this year. They will appoint their permanent deputies from persons who pass the examinations being prepared by the tax commission.

Persons who wish to apply for positions as deputy assessors and to take the examinations must have been residents of the county for one year and be qualified voters there

They can obtain application blanks by writing to the assistant director of the state tax commission at Des Moines or from the county auditor's office in their county.

The formal applications must be filled out and returned to the state tax commission by August 23rd.

An opinion on several legal questions in doubt in connection with the new law has been given by Henry Wormley, the assistant general attorney He said he believed that the new law in its provisions against political activity by the county assessor was meant to limit the deputy county assessor and the county auditor

The opinion ruled against the possibility of some county auditors taking the examination, appointing themselves deptuy assessors and then resigning the county auditorship in order to get a job not subject to election hazards Some complaint has been made because of the fact that a number of county auditors were very active in supporting the county assessor bill at the recent session of the legislature

"Such conduct would not be commendable and would do violence to the spirit and letter of the law inasmuch as the statute is so designed as to contemplate an unbiased selection of an assessor by the county auditor as ex-officio county assessor," Wormley said.

Movement of grass cattle is later this year than it was in 1946.

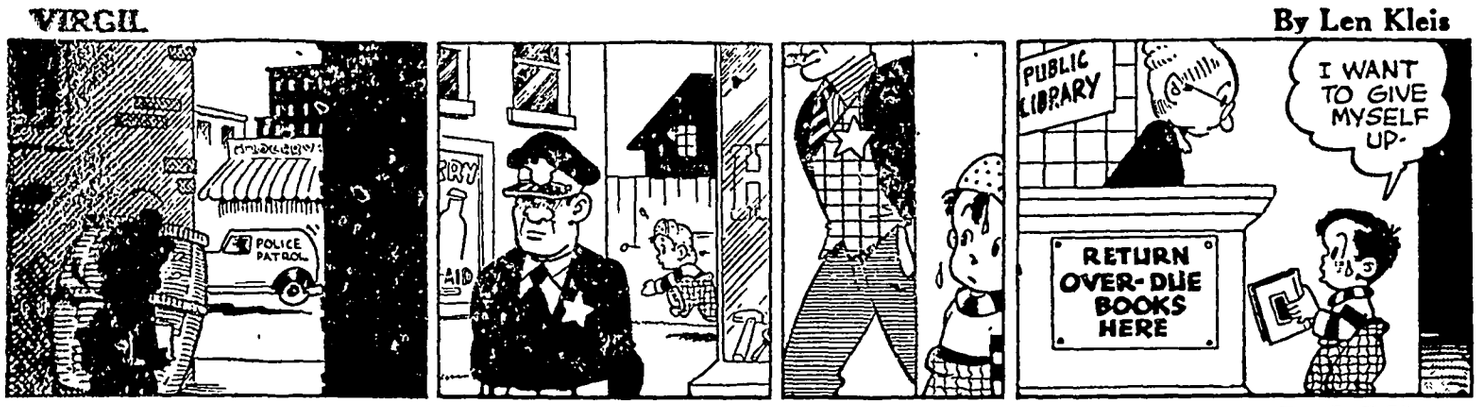
VIRGIL — By Len Kleis



SILENT SAM — By Jeff Hayes

Sportlight by Grantland Rice

BASEBALL, above all other games, has known more than its share in the way of masterpieces of eccentricity Many of these I happen to know They were true color, because they were naturals, born with oddities few could believe

Rube Waddell was one of them, one of the greatest of all pitchers who would rather go fishing or tend bar (for nothing) than win a ball game. Another was Crazy Schmidt of the old Reds, who carried a small notebook in his hip pocket, denoting the weak spots of all opposing hitters. Against Hans Wagner's name he had this one line—"A base on balls." That's what Wagner got from Schmidt.

G. Rice

Shufflin' Phil Douglas of the Giants—Dizzy Dean of the Cards—are around the head of the list. Also Flint Rhein, Babe Herman, Bobo Newsom, Germany Schaefer, Shoeless Joe Jackson, Arlie Latham—nuts, wits and half-wits—but all great ballplayers. Latham was one of the smartest. The list is too long to go into further details.

But, one of the leaders in this colorful field has been overlooked and forgotten. His name is Bugs Raymond, the pitcher John McGraw always insisted had the finest pitching motion he ever saw, including Walter Johnson, who was smooth as the west wind, and as tornadic or cyclonic. Raymond should be right around the top in this human oddity group that includes only stars.

I still remember my first meeting with Raymond, some 43 years ago. This happened to be a spring day in Atlanta around the now forgotten era of 1904.

Crackers vs. Boston

The Atlanta Crackers on that day were to play the world's champion Boston Americans, who, the fall before, had beaten Pittsburgh's great team in the first, but still unofficial world series of 1903.

This Boston team, managed by the brilliant Jimmy Collins, one of the greatest infielders of all time, was baseball's sensation. Big Bill Dineen had been a major factor in winning this series from a team that had such stars as Hans Wagner, Fred Clarke, Tommy Leach and Kitty Bransfield.

Boston, long before any Red Sox appellation, was about a 1 to 40 bet to win—champions of the world playing against a strictly bush league outfit.

By some odd chance, before starting a mile and a half walk to the ball park, I happened to be taking a drink at some wayside bar in preparation for the trip. A heavy hand fell on my shoulder and, as I looked around, there was an unkempt-looking fellow, around 200 pounds, who wore no necktie and hadn't shaved in at least two days. Here was the king of all the tramps I'd ever seen.

"How about buying me a drink, fellow?" was his opening remark. I bought him a drink. Then I had to buy him another drink.

"How do we get out to this ball park?" he asked.

"We walk," I said, "if you are going with me." Then a sudden morbid thought hit me "Isn't your name Raymond?" I asked.

"Yes," he said, "Bugs Raymond "

Shuts Out the Champs

"Do you happen to know," I suggested, "that you are pitching today against the Boston Americans, the world champions?"

"I never heard of 'em," Raymond said. "Where's Boston?"

On the walk to the ball park that afternoon, Bugs spent most of the trek throwing rocks at pigeons, telegraph poles and any target in sight. People I had known in Atlanta gave me an odd look after taking a brief glance at my unshaven, rough and rowdy-looking companion. Knowing what would happen later, I wasn't bothered about any social check-up.

Raymond started the game by insulting Jimmy Collins, Freddy Parent, George LaChance and every star on the Boston team. He would walk from the pitcher's box up towards the plate and let them know, in forcible and smoking language, what he thought they all were.

What the Boston Americans, the world's champions, didn't know, and what I didn't know, or anyone else, was this: They were facing one of the greatest spit-ball pitchers and one of the greatest natural pitchers of all time—if you could only keep him one-third sober, which even McGraw couldn't. Not even with four bodyguards. Raymond had speed, curves, control—plus an Ed Walsh spitter.

But on this particular occasion, Raymond shut out the world's champions, 3 to 0, and allowed them just three scratch singles. As we faintly recall the hazy details, Raymond had 11 strikeouts.

"Even half sober," McGraw told me once, "Raymond would have been one of the greatest."

MONEY MAN

By Gene Brockhaven

LANE MERRIT there was ore than the title of club golf pion at stake in today's match much more indeed. There for instance, the need to wipe his Donald Young's attempt to iate Lane the evening before, the semi-finals, when he called the club dining room: "How a little bet on the match to- w, Merrit? Say, $5,000 or so?" s a deliberate, and Lane it, cheap try to embarrass for Young and the others. Lane didn't have $5,000 Old Weller, sitting with Lane, had d at him to see how he was it. He hesitated and then to Young 'I'll take that bet' And the 'so' can be any- you want to make it!" Lane ocked appealingly at Pop and d "Don t do it, Mr Weller " Pop snorted "It's about time how-off was taken down a peg o " Under the circumstances was nothing for Young to do cept the bet, but Lane sensed sn't too keen about it.

then most important of all was Kay Cawley Now up to months before, to the Cawley erit families and, naturally, nd Lane the future was defi- settled for these two. Then entered the picture with his man-of the-world manners, and swank car. And he pro- to give Kay the rush of that lady's life Lane was hurt, mehow it all seemed so right at he blamed Kay. She was pretty, and bubbling with iasm for life She deserved ion and also the times Lane just making his start, nable to provide In fact, with- father's help he would have relinquish his membership in idvale Country Club. At best ld be two or more years be- could rightly ask Kay to set dding date

reakfast Lane gave thought to blems He wanted to win for n sake he wanted to taste eetness of victory over that rd, Young, he wanted to r Pop Weller, fine sport, nan and friend that he was, ost of all, he wanted to win ay Of course winning a golf wouldn t be enough for this ut it might help.

arrived at the club a good ur before the time set for the f the finals, and as he drove dest coupe into the grounds Young on the practice tee m-m " he thought, "the guy e too confident."

e made his way through the room to his alley Lane was from all sides with "good wishes. Strangely, he felt of the excitement which to fill the room He knew esides Pop Weller's large bet, money had been wagered on come of the match

ressed leisurely and he was lacing his shoes when Young entered, held out his hand and in a voice loud enough to carry, said: "Good luck, Merrit."

Lane promptly acknowledged and returned the wish in kind, but thought, "Still playing to the gallery."

There was quite a crowd at the first tee and for the first time Lane felt a bit squeamish in the stomach. On the tee itself he saw young Willie Hopper waiting with his clubs; young Willie, freckled-faced, snub-nosed and hardly a dandy in his well-worn denim pants and khaki shirt; Willie, loyal and capable at his job—the thought made Lane feel better He caught a glimpse of Kay standing in the crowd well back of the tee Lane waved, she smiled and waved back, in encouragement, he hoped

They drove off, straight and far, its members, rather than a test for top-flight pros. It did boast, however, one hole, the thirteenth, which would try the skill of the world's best. Many Midvale members had protested this hole, but the terrain was such that the committee could do little about changing it. Two hundred and fifty yards from the tee, just far enough to catch the duffer's second or third, the fairway ended and dropped abruptly into a gully about fifty feet deep. This gully, with excellent turf, stretched approximately a hundred yards along the bottom before the start of the rise back to the second section of fairway

Arriving at the thirteenth, Lane still retained his one up lead of the morning round. He had played steady golf and two or three times he had fought off brilliant play by Young which threatened his slender

He swung and hit, hard and clean.

with Young's ball stopping a few yards out in front. They halved the first hole in par figures and that's the way it went until the seventh when Lane rolled in a long, curling putt for a par to Young's bogie five, to go one up. Lane held that lead until the twelfth when Young birdied the short hole after his iron shot from the tee had stopped a scant foot from the cup. Lane went one up again at the seventeenth when Young's second found a deep trap off the green. And that's how the morning round ended.

Gallery and players trooped into the club dining room for lunch. The big room was noisy with the clatter of dishes and the chatter at the tables as shots of the round were talked over and replayed. Pop Weller sat with Lane "You played fine golf, my boy, but I think, on one or two occasions, a little too safe Don't let my bet disturb you, Lane Win, lose or draw, the dickens with it. It doesn't mean a thing to me, except the satisfaction I'll get when I collect it from that phony "

At two the second round started Now, Midvale was no heart-breaking course Tough enough and long enough, but an intelligent golf committee had pointed to make it interesting and suitable to the games of lead On the tee Lane debated the advisability of blasting for the gully or playing it safe He decided on the latter, much to Willie Hopper's visible disapproval. Willie reluctantly handed over the requested spoon and ambled off toward the brink of the gully Lane, hitting first, stepped to the tee, the murmuring of the gallery ceased. He swung and hit, hard and clean. The ball carried fairly straight as far as the two-hundred-yard marker and then hooked sharply downward and to the left. Two long bounces and it disappeared into the heavy rough.

Willie, on the other side of the fairway, groaned as he hurried across to locate the ball A member of the gallery pointed deep in to a tiny white speck at the base of a small tree Willie glanced hurriedly at the ball, his heart sinking, and took up his position nearby. It was a bad break and he was puzzled that the ball had bounded so deeply into the rough

Meanwhile, Young's drive, a tremendous clout, had carried the first fairway and gained momentum as it hit the downhill roll of the gully, rolling almost to the very center. He walked with Lane, the gallery trailing, down the fairway from the tee

Lane went into the rough and glanced down at the ball Willie was guarding It was partly buried, its markings completely hidden. It was almost an unplayable lie and Lane, berating himself for the error in playing safe, had about decided the best thing to do was to try to cut it out to the fairway.

Just then someone called: "Here's a ball, Lane. Looks like yours!" Jim Meredith, refereeing the match walked to the second ball. It was but a few feet in off the fairway, sitting up pretty as you please on a small tuft of grass, its markings clearly visible Meredith ruled it was Lane's ball and Lane, with a quick glance at the perfect lie, selected his brassie and sent the ball sailing over the gully and well onto the second section of the fairway. It was a perfect shot and the gallery gasped.

As soon as Lane had hit Young walked up to Meredith. "I protest that ruling," he said. "How do you know that was the ball Merrit hit from the tee? It could have been dropped there. I insist on examining that other ball by the tree. I'm sure it's Merrit's ball because, from the tee, I watched it bounce into the rough toward that tree!" His face was white and set, his voice shaky as the import of his words suddenly struck him.

"That's your privilege," Meredith answered. He went over to the tree and lifted the half buried ball, carrying it back to Young. "See," he said, "it's a Falcon, and you know the make ball Merrit is playing." With that he walked off.

Pop Weller, who had seen and heard, muttered to the man next to him. "There goes your ball game!"

And the ball game went. Young dubbed his second completely, the ball missing the top of the gully and rolling back to rest half way up the slope. He stood watching the ball for a few seconds then, his nerves breaking slammed the club heavily into the turf.

Yes, you've guessed it. Lane won the match. Best of all, Kay rushed onto the sixteenth green, where the match had ended, to congratulate Lane and—right smack in sight of that large audience — threw her arms around his neck and kissed him!

And — much to Pop Weller's delight — Young's $5,000 check bounced!

Series H-47

THE HOME TOWN REPORTER IN WASHINGTON

WALTER SHEAD, WNU Correspondent

No Labor for Labor

SECRETARY OF LABOR Lewis B. Schwellenbach, a sad-faced man at best, is more mournful than ever these days. For the former U S. senator, judge and law school dean finds himself heading a department of labor with little to do about labor and, as a matter of fact, with little to do about anything

The long gray stone building on Constitution avenue, which houses the cabinet agency set up to promote the welfare of the workers of the nation has been fast emptied of its agencies. First the U S. employment service was turned over to federal security The retraining and reemployment administration to help veterans also was transferred to security The Taft-Hartley bill makes the national labor relations board an independent agency and the federal conciliation service also is divorced from the department. The labor standards bureau has been made impotent by lack of appropriations.

Left for Schwellenbach to operate with an under-secretary and three assistant secretaries are the women's division and the bureau of labor statistics.

• • •

When members of congress get back to main street at the end of July they will be asked by veterans what happened to their 350 bills introduced; by housewives—what has happened to prices, by farmers—what happened to the farm program, by school teachers

—what happened to the teachers federal aid bills; by veterans and tenants —what happened to the housing programs and by the taxpayers — what happened to that six billion dollar appropriation cut.

• • •

No Uncertainty Here

Labor will not have to ask congress what happened to labor. They know The portal-to-portal pay bill and the omnibus Taft-Hartley bill are on the law books. Labor calls the measure a "slave labor bill." Industry dubs it a "Magna Charta for labor." And in the meantime, the president, who vetoed it, and the NLRB who must administer it, say they will give the measure a fair administration to make it work. It is almost certain, however, that some provisions will be declared unconstitutional.

• • •

The national council of farm cooperatives doesn't want any tinkering which will change the purpose and operation of the farm credit laws. Witnesses told a senate committee considering H.R. 3756, already passed by the house, that the bill would "seriously damage" the present system by making it a direct government lending agency.

• • •

As adjournment of congress nears, the senate civil service committee still is playing politics with appointment of some 700 postmasters which have been awaiting confirmation for six months. It may take a last-minute log-rolling to get them through, if at all, before the gavel sounds for congressional recess.

• • •

'Sneak Attack'

A PARADE of witnesses, lobbyists, attorneys and big guns of the private power industry have been testifying before the house interstate commerce committee in behalf of a seemingly innocent measure introduced by Congressman William J. Miller of Connecticut.

This bill, however, is not innocent. In effect it would take most of the huge power trusts from under control of the federal power commission by repealing important provisions of the law creating the commission. Opponents of the measure brand it a "sneak attack" at the governmental policy of power regulation.

There is no denying the fact that the private power interests are finding the 80th congress a sympathetic one in their attempts to evade the anti-trust laws, to slap down public power which is giving cheap electricity to millions of users.

• • •

Action Delayed

The first six months of the 80th congress finds nothing done on President Truman's proposals for health insurance, universal military training or river valley developments, although in this latter category the record-breaking floods along the Missouri and Mississippi rivers have given added proof of urgently needed action. Likewise, there has been no action on federal aid to the needy, anti-poll tax or anti-lynching legislation.

MILLION ACRES SOYBEANS USED FOR MARGARINE

A report just issued by V. L. Lea of the Commodity Economic Research Department, covering intensive surveys in four leading soybean producing states, shows that in 1945 the total acreage of 1,397,727 was needed to produce the soybeans used for the manufacture of margarine. This is an increase over 1936 of over 1,300,000 acres. The report also shows that in 1945 soybean oil used in the manufacture of margarine amounted to approximately 206,643,000 pounds. (Adv.)

TESTS show that Champion Farmer Renk's Firestone Champion Ground Grips will clean up to 100% more effectively, pull up to 62% more, last up to 91% longer, and roll smoother over highways than any other tractor tires.

Only Firestone Champion Ground Grips are made with connected curved traction bars. The curves . . . and the connections . . . give the bars far greater strength than those on any other tractor tires. They eliminate the excessive bending and wiping and rapid tread wear of broken center tires. The curved bars cut into the soil with a sharp, plowlike action. Mud and trash fall freely from tapered openings between these powerful traction bars. The continuous contact of the connected curved bars with the highway insures a smoother ride.

Like Champion Farmer Renk... and other cost-conscious farmers ...you will get more pulling power and longer life if you specify Firestone Champion Ground Grips for your new tractor . . . or buy Champions for your present tractors.

Listen to the Voice of Firestone every Monday evening over NBC

Copyright, 1947, The Firestone Tire & Rubber Co.

The RENKS of Sun Prairie use Firestone CHAMPION GROUND GRIPS

A FARM CORPORATION, one of the first, has enabled Champion Farmer William F. Renk, Sun Prairie, Wisconsin, and three sons, Walter, Wilbur and Robert, to build an efficient and profitable farm business. Last year, on 1053 acres in 7 farms, they produced more than 3 million pounds of grain and livestock . . . more than enough to load a freight train a mile long. Purebred Hampshire and Shropshire sheep earn top awards . . . bring highest prices. Their hybrid seed corn and certified seed grains are in demand. Soil fertility, through fertilization and an efficient cattle and hog plan, is high. Last year 50 acres of Forvic oats yielded 102 bushels per acre. Farm work is mechanized to the limit. The Renks, shown below, l. to r., William F., Wilbur, Robert, John (Walter's son), and Walter.

Write to The Firestone Tire & Rubber Co., Akron, Ohio, for more information about Champion Farmer William F. Renk.

A Statement To Our Customers About Resale

PRICES of PRODUCTS

Built by International Harvester Company

Here at Harvester we are concerned over the fact that a growing number of our products are appearing on the resale market at greatly inflated prices.

As manufacturers, we try to produce the lowest possible cost. We cannot set the prices at which our products—tractors, motor trucks, farm implements, refrigeration, and industrial power equipment—are sold. We can and do suggest list prices which the great majority of our dealers adopt as their retail prices.

$20,000,000 Price Reduction

Our basic price policy was publicly stated in March, 1947, when we announced price reductions at the rate of approximately $20,000,000 per year on our products. At that time, Fowler McCormick, Chairman of the Board, said: "ANY PRICE IS TOO HIGH IF IT CAN BE REDUCED."

Practically all of our dealers cooperated with this policy and passed on the savings to their customers.

The objective of the price reductions was to make it possible for customers to buy our products, which they need so badly, at lower prices. Naturally, this purpose is defeated when our products are sold by anybody at inflated prices.

IH Production at All-Time Peak

Inflated prices are caused by the difference between supply and demand. To increase supply, we now have the greatest number of employes in history on our payrolls—almost 90,000 in the United States, as against about 60,000 prewar. Large new plants are getting into production in Louisville, Evansville, and Melrose Park. A fourth will soon be in operation in Memphis. The men and women now employed are turning out the greatest quantities of IH products of all kinds that we have ever made. These are also the finest products we have ever made, and recognition of that fact is an important contributing factor to the demand for them.

Distribution to Dealers

But even record-breaking production is not sufficient to give your dealer—and other IH dealers—enough products to meet today's demand. We have tried to make the fairest possible geographical allocation of our products so that every dealer would get a fair share, and we know that dealers, in most cases, have tried earnestly to make the fairest possible distribution to their customers.

But we also know that many of our products—far too many—are being resold at inflated prices. The public criticism and resentment of these resales are of real concern to us, as we know they must be to our dealers, because such reactions endanger the good will of both the dealer and the Company in any community.

Distribution to Customers

Experience shows that many IH new products are being resold by users who decide they can continue to make out with their old equipment after they have had an inflated offer for their new equipment. To eliminate this, many dealers are taking measures to be sure that equipment purchased is for their customers' own use and is not to be resold.

Nearly all IH dealers, we believe, are now using the basis of PRESENT NEED as their primary guide for the sale of scarce products. The customer whose need is real and urgent is not likely to resell.

What Price Should You Pay?

While it may take a little more time to get delivery, we urge our customers to consider all of the factors mentioned here, before paying more than the list price for any IH product. Any IH dealer or branch can furnish the suggested list price for any IH product.

We know that the overwhelming majority of IH dealers are as much opposed to inflated prices as we are. In the public interest, we have already asked their cooperation—and are now asking the cooperation of customers—in correcting this situation.

INTERNATIONAL HARVESTER

From where I sit ... *by* Joe Mars

Jane Cupper's "Daring" Bathing Suit

The Cuppers showed me some tin-types of their nineteen-ten vacation—picnicking on the beach with beer and pretzels, in bathing suits that made them look like they were dressed in street-wear.

Dee was smothered in a long-sleeved pull-over with knee length shorts, and looking embarrassed—as if he thought Jane's costume of a heavy blouse, two copious skirts, and long black stockings was a little daring.

We laughed a lot at those costumes . . . but come to think of it, as Dee says, we'll probably look as funny twenty years from in what we call our "Mod clothes. Only thing that change in the picture is that low, wholesome glass of beer.

From where I sit, tolerance lets us wear sensible, decent cl —to give us sun and air and dom—will keep that whole glass of beer a part of the A can tradition.

Joe Mars

Stille , Mrs. Frank Grutzmacher and Mrs. John Terhufen. She also had 16 grand children and 15 great grandchildren.

The obituary will be published next week.

'Human Projectile' at Iowa Fair

Des Moines, Ia., Special A new thrill feature was added today to the three-ring open-air circus scheduled for two appearances daily at the Iowa State Fair, Aug 22-29. The new thriller is "Miss Victory", the Human Projectile, who will be shot from the mouth of a huge cannon every day—hurtling 250 feet through space. This sensational act was booked for the 1946 Fair, but was cancelled at the last minute because the cannon exploded at a showing in the south. This season, a new cannon is being used, and "Miss Victory" has been thrilling the crowds at some of the biggest shows in the country. Her real name is Victoria Zacchini.

Wava Schoenwetter Bride Of Elwood Geary, Klemme

CANDLELIGHT CEREMONY HELD AT THE KLEMME METHODIST CHURCH

Couple Will Live In Klemme Following Their Honeymoon Trip

The Klemme Methodist Church was the scene of a candlelight ceremony Friday evening at eight o'clock when Miss Wava Schoenwetter, daughter of Mr and Mrs. Edd Schoenwetter of Garner, became the bride of Elwood Geary, son of Mr Wallie Geary of Fonda, Iowa

The alter was beautifully decorated with gladiolus and mums centered around dahlias.

Nuptial music was played by Miss Mildred Busse and Rev. H E. Harvey sang "The Lord's Prayer, and "I love You Truly," accompained on the piano by his daughter, Miss LaNelle Harvey

Rev Harvey, who preformed the wedding, read the double ring ceremony The bride wore a grey suit with white assessories, her only jewelry being a bracelet which her mother wore when she was married.

The bride's bouquet was of gardenias.

Miss Verna Pringnitz, cousin of the bride, was bridesmaid and wore a grey suit with a rose corasage.

Wayne Schoenwetter, twin brother of the bride, was best man

Following the ceremony a reception was held at the Schoenwetter home in Garner for members of the immediate families.

Mrs. Geary was graduated from the Klemme High School in 1944 and since then has taught rural school in District No. 5 of Twin Lake Mr. Geary graduated from Claremont, Minnesota high school in 1942 and then served three years in the U. S. Navy. For the past year and a half he has been employed by the Klemme Times.

After a short wedding trip the couple will be at home to their many friends in Klemme.

Mr. and Mrs. Ernest Jante of Clairmont Minnesota, and Mr. and Mrs. Ed Jante of Garner, were callers at the Lloyd Lau home Saturday evening. Ernest Jante is a twin brother of Mrs. Lau.

COZETTE LAU HONORED AT BIRTHDAY PARTY

Cozette Lau, daughter or Mr and Mrs Lloyd Lau, celebrated her sixth birthday Friday, August first. In honor of this event her mother invited Cozy's kindergarten classmates and some other friends to a surprise birthday party Judging from the expression on Cozette's face when she saw all her little friends, the party was indeed a surprise The twenty one little folks spent the afternoon in the park playing games under the direction of Novella Bredbenner. At the close of the afternoon Mrs. Lau decorated some of the picnic tables in the park and served a delicious lunch to the children. Cozette was quite excited and happy to receive so many lovely birthday gifts and will undoubtedly remember her sixth birthday as a very delightful day. That evening Carman Ramsey of Waterloo telephoned to wish Cozette a happy birthday.

COUNTY WORKER HURT WHILE REMOVING TREE

Louis Knoke, Hancock county highway maintenance patrolman met with a painful injury Wednesday while removing trees from a highway. Alarge branch to which the tractor was hitched, broke and hit him in the back of the neck and shoulders, knocking him unconscious, He was taken to a doctor's office and later to his home. Complete extent of his injuries had not been determined Wednesday evening.

Aug. 10, Rockwell
Aug 24, Hansell

CREAMERIES EMPLOY FIELD MAN

The Hancock County Dairy Products Improvement Assocation board employed Nick A. Venechuk of Clear Lake as fieldman for the association starting September first. Mr. Venechuk is an experienced dairyman, knowing the problems of the producer and the demands of the customer as well as the federal and state standards for quality

This association is made up of the six cooperative creameries in Hancock County. Its organization and purpose is to improve the quality of dairy products. Its officers and directors are Pres, Jens Jensen of the Britt Creamery Vice-Pres., C J Wille of the Klemme Creamery; Sec-Treas., Norman Hanson of the Woden Creamery; and 3 additional directors are Bill Riemer, Garner creamery; Olaf C. Eliason, Kanawha creamery, and Clarence Atig, Woden creamery

The fieldman's job is to help the producer with the quality problems. He is not employed to criticize, his contacts with producers, haulers, and operators will have one purpose and that is to improve quality Any producer wanting help may call on him for his help. One of the big motivating forces in immediate need for improved quality is the activity of the Federal Food and Drug inspectors checking creameries and dairy plants in the middlewest

SPITLER PICNIC ATTRACTED LARGE CROWD SUNDAY

A family gathering and picnic dinner held at the Howard Spitler home northwest of Klemme, Sunday, August 3rd, attracted a large number of relatives.

Those present included, besides the Howard Spitler family, the following Mr and Mrs. Lee Floy, Mr and Mrs August Hartwig, Tom and Irene Hartwig, LaVohn and Mitchel Hartwig, Mr and Mrs. Marius Womsmos and Joice, all of Thornton.

Mr and Mrs. Ned Howard and children of Ventura; Mr and Mrs Henry Nagel, Mr and Mrs. Clifford Damn, Mr and Mrs. Gerald Nagel; Mr and Mrs. Herb Nagel, Mr and Mrs. Wayne Goodrich, all of Waterloo

Mr and Mrs Lincoln Goll and sons of Garner; Mr and Mrs. John Decker and daughter of Mason City; Mrs. Esther Howard, Barbara, Richard and Jacqueline of Ventura, Mr and Mrs. Ed Coyle, Judy and Larry of Forest City; Mr. and Mrs. John Spitler of Belmond; Mr. and Mrs. John Graham of Searsboro; and Rev. and Mrs. Ben Chocient of Alexis, Ill.

Birthdays Honored

The picnic was held in honor of those who have birthdays in August. They are: Doris Floy, Aug 13; Lee Floy, Aug. 5; Arthur Swomley, Aug 15; Joice Swomley, Aug. 20; Larry Coyle, Aug 4, Mrs. Marius Womswos, Aug 15 and Melvin Howard, Aug 5.

MADONNA LILY SHOULD BE TRANSPLANTED NOW

If you want your Madonna lilies to flourish, August is the best time to plant or transplant them, according to Larry Grove, Iowa State College horticulturist.

Planting the lilies now means they can put on growth in the fall, develop a tough leaf and get set for winter.

Most important thing is the planting of the Madonna lilies at the proper depth, Grove says. They are planted shallow about 2 inches of soil covering them. Place them in clumps of six to eight or more.

Madonna lilies work well in a garden scheme when set near clumps of delphiniums.

4-H Boys And Girls Plan For Annual Achievement Day

FAMILY GATHERING AND PICNIC HELD SUNDAY IN KLEMME PARK

Event Held in Honor of John Nueberger And Family of Brownsville, Texas

A family gathering and reunion was held in the Klemme park Sunday in honor of Mr. and Mrs. John Neuberger, son and daughter of Brownsville, Texas, who came here last week on a visit.

Those present were Mr and Mrs. Art Schoenwetter; Mr. and Mrs George Schoenwetter; Mr. and Mrs. Leslie De Merritt and Children, Mr and Mrs. John Neuberger and Ruth; Mr and Mrs. Walter Blumer, and family; Mr and Mrs. Merlin Neuberger and Dean, and Mr. and Mrs. Clarence Neuberger, all of Klemme.

Mr and Mrs. Ralph Leudeke, Stanley and Mariyln, and Mr. and Mrs. Jack Domoni and children of Clear Lake.

Mr. and Mrs. Elmer Ludeke and Clearence; Mr. anr Mrs. A. C Lloyd and two children of Britt, Elmer Ax of Chicago.

Mr and Mrs. Henry Ludeke and Mr and Mrs. Paul Ludeke of Meservey; Mrs. Howard Schoenwetter of Alexander; Marlene and Maynard Weisbrod of Fenton, and Mr. and Mrs. Wm Ax of Klemme

Marie Billy and David Neuberger of Ventura; Mr. and Mrs. Raymond Wille of Garner, Mr. and Mr Leo Blumer of Ames; Mr and Mrs. Asa Gibbs and son of Garner

Mr and Mrs. John Neuberger, son and daughter of Brownsville Texas, Miss Gladys Schlichting of Mason City, and Miss Dorothy Ellingson of Des Moines.

Mrs H E Harvey and La Nelle and Mrs. Fred Schlicting.

All enjoyed a fine dinner and the afternoon was spent visiting and getting acquainted with the new members of the clan

Quandts Purchased Trailer For Northern Trip

Mr. and Mrs Conrad Quandt have sold their sleeping trailer which they used last year on their trip north and have purchased a new, larger sleeper trailer for their trip this year.

Mr. Quandt suffers with hay fever and it is necessary for him to go north every year about the 10th of August.

The Quandts have a nice cabin on the shore of Lake Superior at Two Harbors, Minnesota, where they make their headquarters. They use the trailer for making side trips to points of interest in Northern Minnesota

SET DATE FOR HEARING OF DITCH ASSESMENTS

Hancock county supervisors Monday fixed the date for the hearing on the report of classification and assessment commission on drainage district No. 145, as September 8, at 1:30 p m The hearing will be held at the courthouse. The district is a new one now being constructed in Avery township and was petitioned for by Virgil Cook, et al.

Softball Team Splits

The Liberty Athletic club, which was recently organized, split 2 games last week. Thursday evening the Garner F. F. A. team defeated them 19-14 and Monday evening the Liberty boys took count of Klemme in a softball game 10-9.

SAUCERS

Residents of Storm Lake saw plenty of flying saucers recently. A publicity stunt, some of the saucers had tickets to the local entertainment attached.

ACHIEVEMENT SHOW DATE SET FOR AUGUST 19 AT GARNER, IOWA

The Hancock County Junior Achievement Show will be held in Garner on Monday and Tuesday, August 11 and 12 The entries will represent the efforts of about 300 4-H boys and girls and F. F. A Members. Approximately 190 entries in livestock are expected They will include about 100 baby beeves, 30 dairy heifers, 10 colts and horses, 40 pigs, and 5 purebred beef heifers.

Poultry exhibitors must furnish certificates and comply with disease control measures specified by the State Department of Agriculture Exhibitors should contact the county extension directed for particulars.

Rabbits will be opened in a newly opened class this year.

All livestock exhibits are to be in place at 8:00 a m. Monday August 11, at the Garner Sales Barn. The tentative judging schedule is as follows: Monday, 10 a m ,Pigs and sheep, 11 a. m. colts and horses; 1 p m, dairy heifers and purebred beef heifers; Tuesday, 9 a. m Poultry and rabbits, 9 30 a m, baby beef 2 p. m baby beef and market pig sale

The 4-H boys' demonstration team contest will be held in the sales pavillion on Monday at 2:30 p. m. Four or five entries are expected for this feature.

The following have been appointed superintendents, baby beef, Addis Greiman and Clarence Chizek, dairy, Jack Dethmers and Fern Huling; horses and colts, H A Greiman and Emery Schaefer; swine, Imko Huisinga and Floyd Friedow; entries and record books, Adala Bailey; weighing and tagging calves, Buster Cooper and Nobert Dorow.

The annual baby beef and market pig sale will be staged at the Garner Sales Barn at 2 p. m. Tuesday August 12 announced Paul Henderson, county extension director

A night watchman will be hired to watch the livestock both nights and all boys are expected to stay at home or whatever their parents arrange for them No boys are to stay at the barn Each exhibitor should bring his own feed, feed pans, halters, pails, forks, straw ,hay, brushes, and combs. Each swine showman should have a hand hurdle

The 4-H girls' show will be at the opera house in Garner. Their booths will exhibit home furnishing projects carried on by the clubs. Club demonstration teams will use the home furnishing theme in their contest.

Exhibits will be on display from 11 a m Monday to 4 p. m. Tuesday, beginning at 8:0 a. m. Three clug teams are working demonstrations. The demomstration contest will be judged Tuesday morning, August 12 as follows: Violette Eisberg and Charolotte Brown will demomstrate, "A Garden in a Vase"; Madison team, Eleanor Jakoubek and Mary Ann Wellik will demonstrate "Are You Closet Concious?"; the Boone—Magor Pals team, Phyllis Jurgensen and Carol Lawson will demomstrate flower arrangements.

Mrs Ed Judd of Thompson will judge the exhibits and demomstrations.

Mrs. C J. Wille, county girls club chairman will be in charge of the show and will be assisted by the following: Mrs. Lyal Fox, Mrs. Oscar Greiman, Mrs. Percy Bailey and Ruby Schram.

BLAST

Near Coggon, power company workmen were blasting in order to set a pole in quicksand. A piece of the pole flew off, hit James O'Brien, 20, of Independence, and killed him instantly.

by GRANTLAND RICE

IN VIEW of a number of some what sombre events that have taken place lately, it is now a simple matter to announce Joe Louis' next defense of his heavy weight championship.

In the new program, Louis will meet Joe Baksi, Ollie Tandberg Ezzard Charles Violent Ray and Jersey Joe Wal cott, under the fol lowing conditions—he is to knock out each one in a single round, for which the price of admission will be $2.

Joe Louis

As usual, being a quick thinker, it remained for Louis to call the turn on a September fight in these words—"I don't believe anybody would pay 15 cents to see me against either Baksi or Tandberg"

The price for Ezzard Charles or Violent Ray might be lifted to 50 cents

All of this is fun for everyone—except Joe Louis. Here is one of the great heavyweight champions of all time—a 10-year holder of the ring's big crown—a fighter who can't defy the challenging years much longer—with no one to fight.

No one knows this better than Joe Louis, with a purse ranging from $500,000 to $1,000,000 waiting if only one fair challenger had emerged from the morass while he was in the army for four years.

If you picked out the five leading challengers today, I believe Louis given 20 rounds, could stop them all in a single September evening. Provided no motorcycles were allowed in the ring.

Boxing's Oddest Turn

The second Louis - Conn fight looked to be a natural. It turned out to be the greatest of all heavyweight flops. The Mauriello affair wasn't even a work-out And yet today, Mauriello is a better fighter than most of those suggested for a September massacre

It is only natural that Joe Louis would like one more fight before bowing out. But it so happens that in the last five years no heavyweight has come along who could even tie his shoes. There were earlier predictions that, with thousands, perhaps millions of soldiers taking boxing lessons in the army and navy, at least one or two could be developed.

The first shock I got came from Jack Dempsey, who worked 10 hours a day with 10,000 men for many months. "The best fellow I've seen," he told me, "can't even chin himself twice."

Here's a target—or a goal—the heavyweight championship—worth one million dollars. The defending champion has been knocking around for over 10 years. And yet, with sport's richest prize at stake, there hasn't been even a good second-rater developed in the last five years

Baksi — Mauriello — Walcott — Ray — Tandberg — Woodcock — two middleweights of the past, Mickey Walker or Harry Greb, could take them all apart without any extra effort.

Just why this happens to be, we wouldn't know

Golf has Hogan, Nelson and a flock of others. Tennis has Kramer and Riggs Racing has Assault, Armed and Stymie Baseball is packed with high-class talent, DiMaggio, Feller, Blackwell, Shea, Mize, Cooper, Williams—on and on. The middleweights are packed with good fighters Ray Robinson is certainly an able welterweight.

But, outside of Louis, the best you can say for the other heavyweights is that they can breathe and eat Especially eat.

• • •

Attendance Surprises

The number of human feet that find their way through various turnstiles is always the main tip on public interest. It is also one of the main arguments among camp followers. Each rabid fanatic is a hot rooter for his own game.

There was an early report that baseball, racing and boxing, three of the major sports, would take a dip this season. The pessimists were only partly right. In the check-up to date, the answer is that baseball is still the national game, with lengths to spare.

Racing has taken its only important dip in New York. It is setting new records in California It is O.K in New Jersey, where Monmouth has more than made good in public comfort

Boxing is well down for the simple reason there are not enough good fighters left to fill out a card Or half a card Louis, the heavyweight champion, has no opponent in sight. Only the middleweights have any combined class with Zale Graziano, Cerdan and La Motta The lightweights are a drab lot, as far as any public appeal is concerned

The major surprise has hit baseball Few figured that 1947 would approach the more than 18 million who visited big league parks in 946 But, despite the worst spring in history plus a wet, cold June there is a good chance this 19 million mark will be broken.

Glacier Striped With Bands Containing Grasshoppers

Millions of grasshoppers fill Grasshopper Glacier, near Cook, Mont. Swarms of insects were carried by the wind to a great height. Frigid breezes over the glacier cooled the insects and they fell into the pit. Snows covered the grasshoppers. Other swarms met the same fate.

In time the glacier became striped with black bands of frozen insects, some of them 60 feet deep, and the dark stripes may still be seen there today.

Can Your Most Luscious Fruit

(See recipe below.)

Fruit Preserving

is the year many women waited for—the year when could obtain unlimited quantit- sugar to put up all the fruit eir orchards, and berries in patches

many of us, it has been so ince we put up fruit in any ity that a brush-up of ds is essen- s in all big takings the lying organ- al work is important his can be the day before.

day before you begin actual g, check on equipment to be that it works properly. For and berry canning you will a water bath, which may be ge kettle or broiler, fitted rack, and a tightly fitting Or, you also may use a pres- cooker for processing, but this as essential for fruits as it vegetables

will need several large pans ettles for preparing the fruit r making the syrup. You also eed to prepare jars, checking for cracks and imperfections, washing them in hot soapy Make certain you have enough or lids.

ating Amounts

ough fruits and berries vary e and moisture content, it is ossible to make some sort of ule as to how much syrup and umber of jars you will need.

sweet fruits, you will use a made of 2 cups of sugar to of water, for slightly acid use 2 cups of sugar to 3 cups ter, for acid fruit, 2 cups of to 2 cups of water is ample. fruit is very acid, 2 cups of to 1 cup of water is essential.

syrup is made simply by add- e sugar to the water and boil- gether for 5 minutes.

ou are canning large fruits s peaches and pears, allow 1 pint of syrup to a quart jar of fruit. For small fruit, or berries, you will need only a half pint of syrup to the quart.

The amount of fruit usually de- upon the size, but ordinarily unt 2 pounds of fruit for the jar This will aid in estimat- our yield.

d of Packing

e fruits and berries are hot- , but most women prefer us- e cold pack method for pre- fruit for canning as it takes me. If the fruit is carefully , there will be little floating. and clean the fruit, peeling ring, slicing and stoning when ary Pack into sterile jars tach the lid, using manufac- directions.

ess by placing the fruits in ng water bath, making cer- at the water comes to two inches above the jars. If the water tends to boil away during the processing time, it's a good idea to have a kettle of boiling water near by from which the supply can be readily replenished.

Count the processing time from the time the water starts boiling.

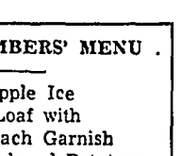
When processing time is finished, remove jars (with a jar lifter to prevent burning the fingers) and place on thick layers of newspaper to cool.

For many of the new type lids, the manufacturer does not approve inverting the jar to test for leaks. This is one reason for not inverting certain types of jars

When the jars are cool, wipe them off, label and store in a cool, dark place.

Use This Time Table

If you are using the water bath, which is recommended by most experts, you will want to observe the processing time very carefully. The following fruits are processed for 20 minutes: apricots, blackberries, blueberries, cherries, currants, gooseberries, peaches, pears, plums, raspberries, rhubarb and strawberries.



Apples and pineapple, processed in the same type of water bath, will require 30 minutes, while quinces require 35 minutes.

If you are using the pressure cooker for processing, keep the indicator between 5 and 10 pounds pressure and process all fruits, except pineapple and quinces, for 10 minutes The two exceptions will require 15 minutes processing.

Queries Answered

How high should fruit be packed for canning? Pack fruit and syrup to within one inch of the top.

How much salt should be added to water in which peeled fruit is placed to prevent discoloration? Add one teaspoon of salt to each quart of water used.

What makes fruit and tomatoes float? Too much processing, too heavy a syrup or too loose a pack may be the causes.

Why should fruit for canning be uniform in size and ripeness? Fruit should be evenly ripe and about the same size so that processing will be equal.

Can I can over-ripe fruit? No, it's too difficult to get a good product. Use over-ripe fruit and berries for fruit butters, as the fruit will have to be mashed and there is enough sugar to act as a preservative.

hese Hints

ice leaves tossed into soup bsorb fat and give you less soup to serve. Remove as soon as they take up fat.

e you broil bacon, steaks or cut gashes in the fat. This s the meat from curling t is cooked.

of soap make nice jelly which y to use for shampoo, or for lingerie, gloves, hose and elicate things.

To prevent mold from forming on smoked meats such as bacon, ham and sausage, dip a cloth in vinegar and wrap around the meat. Store in the refrigerator.

Use fruit juices for soaking and cooking dried fruits. It will give them better flavor as well as more food value.

Cheese stays moist if it is covered with a thin coating of butter before being stored in the refrigerator. Cheese which has hardened and cannot be sliced should be ground and used in grated form.

THE FICTION CORNER

KEEPERS FINDER

By CHARLES PALMER

The chauffeur pulled the long black car over to the side of the dusty road, and the elderly gentleman in the tonneau leaned forward to open the door for the two hitchhikers The slim, nervous one with the beady black eyes sat on one side of the elderly gentleman; the large, sleepy one on the other.

The elderly gentleman's hands were folded benignly in his lap. His friendly, rather vague eyes peered at first one, then the other. He broke the silence "My name is Vandermoor, gentlemen. And you?"

The slim, nervous one sat up sharply "Any relation to the Vandermoor bank family?"

"Yes," said the elderly gentleman, stroking his gray goatee. "I have that honor, if you call it one"

This Week's Best Fiction

"Then," said the slim one, "this is your lucky day Ain't it, George?" The big one took his hungry gaze from the passing orange trees long enough to grunt agreement, and turned back to contemplating the luscious fruit.

The slim one fixed the elderly gentleman with a gimlet eye, and rocked a taut finger confidently in his lapel.

"Have you ever neglected the birthday of a loved one, and spent sleepless nights of regret?" he probed intensely. "Have you ever slipped up on remembering an anniversary and gone to the doghouse as a result—or failed to congratulate a friend on a promotion and gotten the fishy eye the next time you met? Have you?"

"Well, yes" apologized the elderly gentleman. "I have I am a trifle forgetful at times," adding defensively, "but then most people are."

"Ah," pressed the slim one, giving the lapel an impressive shake, "my point exactly Most people are, like you forgetful and they suffer for it They suffer because they know the slight or omission was not intended and realize too, that the neglected one is certain to wrongly interpret it. Maybe a long friendship will be strained, or a wife or daughter hurt.

"But suppose you were to suddenly find yourself in a position where those slights and omissions never happened any more! Wouldn't you be delighted—especially if it meant no effort on your part, no strain, no time, in fact, nothing beyond the payment of a very small fee?"

The elderly gentleman nodded. "I imagine most people would be as delighted as I"

"My point again!" cried the slim one "Now, George and I are at this moment on our way to Los Angeles to initiate just such a service We plan to call it The Tell-You-When Co., Inc.

"All you have to do is give us the names of the people whose anniversaries you want to remember; with the dates if you have them, otherwise we will look them up for you.

"Give us too, the names of people whose promotions, marriages, births, deaths and so on you want to mark with a gift or note; and our clipping service will watch the papers and other sources of information When an item pops up on the calendar we keep in your name, we notify you—and for a small additional fee we will even write an appropriate note, or purchase and forward a gift. Now, tell me: Does that fill a long-felt need?"

The elderly gentleman's eyes were bright with interest "Amazing, young man! Exactly what I need. Put me down as your first subscriber."

"'Okay,' he said, 'I bit.' Then he kissed the check regretfully and tore it up."

"You see!" said the slim one "You snapped at it. So will others. Which brings us to the heart of the matter, doesn't it, George?" George turned from the oranges long enough to grunt a second agreement, and turned back to his contemplation. An orange would go very, very good just now. The slim one grasped the elderly gentleman's lapel again.

"Mr Vandermoor, I called this your lucky day It is. You, being a Vandermoor, have money which you are probably willing to treble on a proposition that can't miss. George and I have such a proposition, but no money Now, why can't we get together on this thing?"

"Hmm," remarked the elderly gentleman. "How much capital do you estimate your venture will require?"

The slim one inspected him with covert calculation. "Well, there's advertising—office rent, telephones and help—livings for George and me—all only until the golden flood begins to roll in. Say; oh say, five thousand dollars. That should be sufficient to launch the business."

The elderly gentleman drew a checkbook from his pocket, and unlimbered his fountain pen. The beady eyes glistened. The elderly gentleman turned to the back of a check and began to figure. The slim one exhaled sharply, opened his mouth to speak, but thought better of it.

In a few moments, the elderly gentleman stopped figuring, and looked out the car window, stroking his goatee reflectively. He shook his head slowly.

"No," he said. "I believe your calculations to be in error. You will need at least ten thousand dollars to get your proposition under way."

The blood slowly flowed back into the slim one's cheeks Mr Vandermoor turned his checkbook over and poised his pen.

"I am a man of quick decisions," he told the slim one. "I am convinced of the worth of your idea and of your ability to carry it through Your name?" The slim one supplied it, and the elderly gentleman wrote out the check, tore it from the book, and handed it to him.

"And now, I see we are almost home. If you young men will come in with me, we can draw up some informal papers to cover the matter, and then I will have my driver take you on to the city to start your company."

The car swung from the highway and stopped smoothly A uniformed attendant hobbled from the gate house to unlock the ponderous iron grilles which effectively barred the driveway.

Suddenly the slim one bent forward. His eyes rested on a small bronze plate set in the stone pillar "Sunnyside Home for the Mentally Diseased," he read slowly, choking as the words sunk in. He turned toward George, flicking a rather hopeless glance in his direction George turned away sadly—to again appraise the oranges. The slim one's eyes dropped to the flourishing signature on the check he still held in his hands "Napoleon Vandermoor," he quoted.

His lips tightened murderously for a moment, then he grinned sheepishly.

"Okay, Napoleon," he said. "I bit. Your name ain't Vandermoor, but just to even it up, George and me ain't starting any Tell-You-When Service, either! Because somebody else beat us to it a year ago, see, and all we wanted your dough for was to skip the country before the dicks caught up to us." He kissed the check regretfully, then tore it into little pieces and tossed them in the air, watching them flutter down.

"Come on, George," he said, "oranges for breakfast."

"The elderly gentleman watched them trudge down the road, and stroked his goatee contemplatively as the car rolled up the drive. It stopped in front of a brick building with barred windows, and he stood beside the car for a moment.

"Harvey," he said to the waiting driver, "wait here for me. I'll be only a moment."

The chauffeur touched his cap respectfully.

"Yes, Doctor Vandermoor," he said.

Early Day Painting

In the days when paint recipes were kept in the family cook book, our colonial ancestors knew about making paint out of skimmed milk, which is basically the same idea as the modern casein paint of today which has a milk base. Colonial dames mixed skimmed milk with salt, boiled rice, coffee and egg-white when they wanted a batch of paint for freshening up their houses. And a painted house was a matter of social prestige. It was considered presumptuous for a tradesman to paint his dwelling. Gradually, though, as the idea of equality penetrated, the butcher and the baker and the candlestick maker decided they had as much right to paint their houses as the doctor, lawyer and ship owner.

DRAINAGE ASSESSMENT NOTICE

TO ALL OWNERS OF REAL ESTATE IN DRAINAGE DISTRICT NO. 145, HANCOCK COUNTY, IOWA AS NAMED HEREIN, AND TO ALL PERSONS IN ACTUAL OCCUPANCY OF ANY LANDS DESCRIBED HEREIN AND TO WHOM IT MAY CONCERN:

Public notice is hereby given that the commissioners heretofore appointed to classify lands and assess benefits in Drainage District No. 145, Hancock County, Iowa, did complete their task and did file their report on the 25th day of July A. D., 1947, in the office of the County Auditor in Garner, Iowa, Hancock County, Iowa, as follows:

DRAINAGE DISTRICT NO. 145

Report of commissioners on assessements of benefits.

To the Board of Supervisors of Hancock County, Iowa.

Gentlemen:

We your commissioners, viz C F. Merten, Engineer, Walter Kahl and Wm. Boehnke, commissioners appointed and commissioned by you in accordance with chapaer 455, section 455.51 of the Code of Iowa and all laws amendatory or additional thereto, to view and classify the lnds of Drainage District No. 145, and to apportion to said lands the total costs of said Drainage District respectfully submit the following report.

The best of forage will spoil in the silo if air leaks in. Tight packing and air-proofing are essential to silage making

MARKETING HOGS SOONER WILL SAVE MATURE CORN

To save matured corn, don't feed heavy hogs, says Damno Catron of the Iowa State College animal husbandry department.

Hogs weighing over 242 pounds require more corn, proportionately, per 100 pounds gain. Thus, marketing hogs at lighter weights below 250 pounds—will save precious corn for feeding next spring and summer.

Diseased and parasite-infected pigs should not be kept on the farm because feed is wasted in feeding them. Pigs should be wormed if necessary. Mange can be controlled by spraying.

Equipment should be checked and kept in good working condition Leavy, poorly adjusted feeders waste feed. Plenty of clean water and shade will produce economical gains and thus cut feed consumption.

Household Hints By Mary Jane

Do you know you can take a piece of cloth, moisten it with olive oil and wipe the dust off your philadandrum leaves and it leaves them like wax.

How to buy grapefruit: judge grapefruit by the weight, the heavier ones are the juiciest.

Heat a bowl in hot water, and turn the bowl upside down over a plate of hard butter and it will soon be soft enougt to spread evenly.

ELECTION OF THE NEW HANCOCK COUNTY BOARD OF EDUCATION

The Fifty—Second General Assembly charged the county board education with reponsponsibility of dividing the county in 4 election districts approximately the same area.

The Hancock County Board of Education on July 9, 1947, approved the division of Hancock County into four election districts as follows.

DISTRICT ONE

Ellington Township School District
Madison Township School District
Concord Township School District
Garfield Township School District
Garner Indepedent School District
Miller Independent School District
Hayfield Consolidated School District

DISTRICT TWO

Crystal Township School District
Bingham Township School District
Britt Township School District
Orthel Township School District
Crystal Lake Consolidated School District
Woden Independent School District
Britt Indepenedent School District

DISTRICT THREE

Boone Township School District
Erin Township School District
Magor Township School District
Amsterdan Township School District
Kanawha Independent School District
Corwith Consolidated School District (Hancock and Kossuth counties)

DISTRICT FOUR

Liberty Township School District
Ell Township School District
Avery Township School District
Twin Lake Township School District
Goodell Independent School District
Klemme Independent School District

This division crosses township and county lines as described below:

(1) That part of the Corwith Consolidated District in Prairie and Luverne Townships of Kossuth County is made up a part of District Three in Hancock County.

(2) The area in Ell and Concord Townships which is a part of the Ventura Consolidated School District in Hancock Co., but will be a part of and included in the districts set up in Cerro Gordo County embracing the entire Ventura Consolidated School District.

(3) The area in Avery Township which is a part of the Meservey Consolidated School District is not included in any of the four districts of Hancock County.

(4) The Hayfield Consolidated School District in District One embraces a small portion of both Britt and Crystal Townships.

At the regular election next March each of the four Districts will elect one member to the County Board of Education from its respective district and the fifth member of the board will be elected at large in the county, but must be a resident of one of the sixteen township districts. The candidates at large cannot be of residents independent or consolidated school districts in the county. This provision assurse membership on the board to at least one representative from the rural or township areas

The members will be elected for a term of three years and their terms will be staggered by drawing after the members are sworn in.

The electon of board members will be held at the time of the regular school election and at the regular polling place in each and every school district.

If one could live on ball point pens, the cost of living would be down. They are selling now for as low as 29c.

Picnic Held At Clear Lake

Mr and Mrs. James Fredin came to Klemme Saturday evening from Fort Dodge for an over Sunday visit with Mrs. Fredin's parents, Mr. and Mrs. Herman Gast and other relatives. Sunday morning they called on Kenneth Zwald and Loren Gast. At noon the Gast families enjoyed a picnic dinner at the Clear Lake State Park.

Mr. and Mrs. Fredin are both employed in Fort Dodge. Jim is working at the Standard Oil Station and Lola is clerking in a department store.

Mr. and Mrs. James Fredin called on the Ronald Gibbs and Mrs. C. A. Arnold home on Saturday evening

ELL 4-H BOYS MEET WITH CLAUDE ACKARMAN

The Ell Township 4-H boys discussed the County Sports Festival on Monday evening at July 28, at the home of Claude Ackarman. Another meeting will be called to make the final arrangements of club entries in the County Sports Festival, which will be held August 19 at Kanahwa.

A discussion on the control of swine lice and mange was led by Edgar Dorow, county extension youth assistant.

The regluar meeting was set for Tuesday evening August 26, at the home of Verle Lenz.

ARE YOU READY FOR THE COUNTY FARM SPORTS SCHEDULED FOR AUG. 19, 1947

Every farm family should be preparing for the annual Farm Sports Festival to be staged at Kanawha August 19. The events are:

Softball, horseshoe, clock golf, bait casting, baseball throwing, basketball ball free throw, football kicking and passing, darts chair quoits, foot races, nail driving, 4-H relays, and tug-o-war for each township.

Prizes are being awarded in each event by the Hancock County Farm Bureau according to Clark Lacore, Sports Festival Committee chairman.

Picnic dinners will be the order of the day. Each family will take care of its own needs.

The Kanawha Commerical Club is planning to assist the Farm Bureau committee with the days activities. The soft ball games will start at 8:00 a. m. and will continue until the winners are determined. The other sports will follow a schedule to be set up at the next committee meeting.

SYNTHETIC FIBERS USED WITH COTTON AND WOOL

No longer is rayon the only commercially accepted synthetic fiber. Glass, Vinyon, nylon Aralac all have proved their values as textile fibers. Because of their increasing use, often in combination with cotton and wool, it is important to read labels to see what kind of materials you are buying and how they should be cared for, says Lucville Rea, extension specialist in clothing, Iowa State College.

Since the production of rayon began (in 1911) it has increased so that rayon now ranks second only to cotton in the amount produced. Before 1940 the total consumption of all synthetic fibers other than rayon was so small as to be scarcely considered. But by 1946 more than 53 million pounds were being used.

Oldest of the man made fibers other than rayon is glass. Its production began in 1936. Vinyon, made of Vinylite synthetic resin, was the first produced about 2 years later. The nylon story began in 1939, and Aralac came into the commerical picture soon after.

Saran, another fiber made from synthetic resin, was introduced commerically in 1940. Because it has thus far been made only in a monofilament form, while textile yarns are generally made up of many fibers of filaments, it might be considered a "borderline" case as a textile fiber. It is frequently woven and used for textile purposes, however.

Certain other synthetic fibers, such as those made from acrylate resins and from soybeans, are also being developed.

Nearly 60 percent of the farms in the Uuited States have electricity.

POISON IVY CUTS FARM LABOR TIME

Safety Council Has Added Plant To Its List Of Farm Hazards

The National Farm Safety Council, pointing out that many farmers are poisoned annually by poison ivy with the loss of thousands or hours of man labor, has this year added the plant to its list of farm hazards.

Iowa State College extension botonist E. P Sylwester and research professor A. L. Bakke join the council in advocating the destruction of the pest. They list the following steps for successful eradication of poison ivy Only a person who more or less immune to the poison should do the eradication job

Spray Plants

Spray poison ivy plants in cool weather Work slowly and avoid prespiration. Spraying in the early morning or evening is suggested.

In burning dead ivy plants, keep out of the poisonous smoke. Avoid contact with pets that may roam through patches of ivy. Very sensitive persons should not stand where a hot breeze blowing across a poison ivy patch can hit them.

Do not pick white waxy berries of beautiful red foliage unless the plant is positively idenified, All parts of poison ivy are poisonous.

To kill plants use Ammate or 2, 4-D

Ammate

Dissolve a pound of Ammate in a gallon of water and spray until plants are dripping wet Keep spray off desirable plants, Usually one application is enough, but if plants reappear the botanists recommend a second treatment.

Follow directions on the package when using 2, 4-D Spray with low pressure and only when here is no wind, to avoid spray drift. This chemical will severly injure all plants and bent and buffalo grass. Although 2,4-D is less expensive than Ammate it usually requires more than one treatment to completly kill out poison ivy.

MORE EGGS FROM FEWER HENS IN IOWA IN JUNE

Iowa poultrymen gathered more eggs from fewer hens during June helped put the nation's egg production ahead of last year, Francis Kutish, Iowa State College agricultural economist said this week

Kutish quoted figures that showed farm flocks of the nation laid 2 percent more eggs in June than they did last year. They beat the ten year average by 17 percent.

There were 1 percent fewer layers, but the hens did a better job. The rate of lay was up 4 percent over 1946. In fact, egg production per layer set a new record for June.

In Iowa, poultrymen also gathered 4 percent more eggs during June than the same month last year. Yet there were 2 percent fewer hens in the state.

June is the first month this year that U. S. egg production has been above a year age. Output had been running from 2 to 9 percent under 1946, Kutish said.

More chichs were hatched in May and June this year than last. As of July 1 the number of young chickens in United States farms was about the same as a year ago. Hatchings during February March and April are below 1946.

CAUGHT FOXES

Harry Rasmussen and Donald Todd, Ida Grove farm youths are smarter than a fox. They found a trail apparently made by a fox enroute to the Todd chicken house and followed it to the point where the animal had jumped the fence. They set traps at the point where the fox would "land" if he jumped the fence again. On sucessive mornings, they caught two foxes.

FELL FROM A BOAT

Linda Allen, 9, of Austin Minnesota was the first drowning vistim of the year at Clear Lake. Linda was a passenger in a speed boat, which was being "broken in" with alternate periods of running and idling. Apparently, when the boat started up after idling Linda fell into the water and was not missed by her companions until later.

ORCHARDISTS WARNED OF BUFFALO TREE HOPPERS

Warning went out this week to Iowa orchardists with young trees to be on the lookout for the buffalo tree hopper.

In a young orchard the buffalo tree hopper will lay eggs in slits in the bark of new growth. These egglaying punctures cause deformation of twigs, and set back the tree growth, explain Horticulturist H. E. Nichols, and Entomologist Harold Gunderson of Iowa State College.

The hopper is a wedge-shaped green insect, three-eighths of an inch long when full grown. It ordinarily lives in legumes, but will move into trees of young orchards on occasion.

To help control the ravages of the insect, the college specialists advise keeping legume cover in orchards and fence rows well mowed Spray the trees and the cover crop with a spray composed of 2 pounds of 50 percent DDT wettable powder in 100 gallons of water. The same spray treatment will control the leaf hopper, an insect which sometimes defoliates and weakens a tree.

MULLINS HYBRID SERVICE

NOZZLE NEWS

Many interesting things have developed. With DDT, plant stay green longer Leaf hoppers are exterminated 100% for the first time. Small amounts of dust drift into "untreated" areas killing insects there, too. It's now the time to spray your clover and alfalfa for seed production Consult your Mullins spray operator.

2,-4-D works differently than the old type weed eradicator It is well to remember that (1) it works best during the active growing stages of the weed and (2) it works best in hot weather. Your Mullins service man will tell you that re-growth of weeds should be sprayed soon.

Your Mullins Hybrid Service man is equipped to handle your weed and insect control work efficiently-econommically. Call on him.

ACKERS SNAPPING UP FEEDER CATTLE

ey're Taking Cattle That Are Showing Any Flesh

Kutish Reports

ackers have been taking feed cattle away from feedlot rators in recent weeks, accord to a recent report made by ncis Kutish, Iowa State Col e agricultural economist.

Kutish said that cattle showing least bit of flesh are being pped up by the packers.

n issuing his outlook on the estock situation he noted:

lovement of grass cattle is r this year than in 1946.

Big Cattle Short

umbers of big cattle will be rt and high priced. Range ditions are good, and most vy cattle will carry enough h to interest killers. Pack will be bidding against feed for them

Calves and yearlings will be st plentiful Feeders won't e as much packer competition them as for big cattle. Heavy of calves and yearlings will e later in the fall.

The Federal Bureau of Agri tural Economics is still pre ting that prices of grass-fed tle will decline seasonally points out that a "10 to 15 per t drop from the spring peak the low of September or Oct. coming."

Feed costs this fall will be high. en though we have a good fall, n will cost more than a year o.

Anthracnose disease is show up in clover fields this year. aves blacken and fall off, re rts E. P Sylwester of Iowa te College

SHOULD HARVEST BROME SEED AT CORRECT TIME

Bromegrass seed is ready to harvest when most of the stems on the seed head have a straw-colored appearance down to the lower branches.

Take a handful of bromegrass and whip it over your wrist. If a good deal of the seed shatters off, it's about right, says Maurice Heath, manager of the U S. Soil Conservation Nursery located at Iowa State College.

When combining, a high lift on the combine may be necessary. If your combine does not have a high lift, it may be possible to borrow one It is best to take in only the head zone, with as little green brome and alfalfa as possible

In case of lodging Heath says to cut the bromegrass, windrow it and run it through the combine, even though this does increase the volume which must be handled by the machine

When setting the combine, check the directions given by the manufacturer Sometimes it may be necessary to take off a couple of fan blades on the combine to reduce the fanning to a minimum If the grain is not coming out of the heads, increase the spead of the cylinder or cut down concave clearance

Drying the grain before sacking is important, Heath warns. He says to spread it out in a cornerib floor or some other flat, dry surface Don't pile the grain more than a foot and one-half in depth Stir twice daily for three days, and once daily for three days before putting it into sacks

EXPLORER

At Sac City, 2 year old John Johnson decided to explore an 12-inch open tile, used for draining surface water into an outlet below Once into the tile, he found he couldn't get out. Some boys passing by heard his cries. Fireman found it necessary to break the tile to extricate John.

SHOCK

At Rockwell City, Mrs. E C Stevenson, Jr was found dead in a partly filled tub Death apparently resulted from an electric shock from a heating unit which was found in the tub

ANOTHER USE FOR DDT IS CONTROLLING FLEAS

Fleas, now especially numerous in southern Iowa, point to another use for DDT.

The fleas are appearing in house basements, barns and barn lots in considerable numbers because of recent favorable weather conditions, according to Harold Gunderson, Iowa State entomologist.

He advises controlling them in the home with 5 percent DDT oil solution sprayed lightly on basement floors at the rate of a gallon of spray for every 1,000 square feet of surface.

In the farm yard, the recommendation is 2 pounds of 50 percent DDT wettable powder in 5 gallons of water sprayed on barn floors and around barn lots, using a gallon of spray to 1,000 square feet of surface Livestock can be sprayed with a mixture of 1 pound of 50 percent DDT wettable powder in 10 gallons of water A quart or two of spray should be enough for each animal

Cats and dogs are the concentration places for fleas and are the ones really responsible for flea plagues To keep them free of the pests, use a 10 percent DDT dust, says Gunderson. A level teaspoonful for a full grown cat should be rubbed into the hair of the back from the top of the head to the tip of the tail. Brush out the excess.

A tablespoonful, used in the same manner, will treat a large dog Applications should be made about once a month.

Gunderson says to spray the beds of cats and dogs when spraying floors in the house.

TOMATO IS EASY TO CAN IN BOILING WATER BATH

Tomatoes are one food which can be processed in a boiling water bath.

For the greatest efficiency in canning tomatoes, Jewel Graham, extension nutritionist, Iowa State College advises working with one canner load at a time.

If canning tomatoes whole, wash, scald and peel only the perfect ones Remove the stem ends and cut in quarters. Bring them to a boil in their own juice, just heating enough Pack hot and process for ten minutes in the boiling water bath. A teaspoon of salt may be added to each quart before processing if salt in tomatoes is desired

Tomatoes may be cold-packed, if preferred Just peel them, leave whole and pack in the jar. Cover with tomato juice made from the less perfect tomatoes strained. Process for 25 minutes.

To make tomato juice, remove stems and all green of bad spots of soft but sound tomatoes Cut into pieces and simmer until softened Put through a fine seive and reheat at once just to the boiling point. Pour into hot jars leaving ¼ inch head space and process for 15 minutes in a boiling water bath.

Read it first in The Times.

School Aid Checks Distributed By County Supt.

Standard aid checks totaling $983.55 have been received in the county superintendent's office in Garner and have been forwarded to the deserving school districts in Hancock County, according to a recent announcement by County Supt. Chas. S Whitney. The state of Iowa grants aid each year to schools which meet the requirements for standardization and during the 1946-47 school year seventeen Hancock County rural schools met those requirements.

The standard schools, the teachers, and the amount each school received are as follows·

Highway Patrol Making Drive On Drunk Drivers

Drunk drivers are on the increase in Iowa and convictions for that violation are up almost 100 percent for the first six months of this year as compared to the first half of last year according to Clarence Shirer, head of driver's licensing for the Iowa Department of Public Safety.

Shirer said today that at the end of June, 1124 Iowans had lost their licenses for driving while intoxicated as compared to 580 for the first six months of last year In the full 12 months last year, 1410 were convicted on this charge

The increase in convictions is not due to special enforcement according to S. N Jespersen, Chief of the Iowa Highway Patroll Jespersen said that although the highway patrol has made 523 of the drunk driver arrests by the end of June, only "regular, and continous enforcement is going on against that type driver"

A fine of $300 is assessed for the first drunk driving conviction, $500 for the second and $1000 and one year in the state penitentiary for the third offense In each case the driver's license is revoked According to Shirer, a few drivers have been sent to Fort Madison this year, and second offenders are on the increase

The driver's license division has been keeping drunk driver record since 1942 From that date up to the end of June 1947, a total of 5606 convictions have been made in Iowa

DRIVERS WARNED ABOUT CHILDREN

July And August Are Peak Months For Child Traffic Deaths

A special warning to motorists to watch out for children during the summer months has been issued by Julien H. Harvey, manager of the National Conservation Bureau He pointed out that traffic accidents in which children up to the age of 14 are killed and injured are at their peak during July and August.

Well over 4,000 youngsters 14 years old and under were killed in traffic accidents last year, most of them during the summer months

There are several reasons for this, Mr. Harvey said. Warm weather brings more children to play on lawns and in the streets rather than indoors More bicycles are abroad during the good weather Vacation games in vacant lots and on sidewalks cause more children to dart into or across streets. Too, more children are travelling in motor vehicles during the summer when they accompany their parents on vacation or week-end trips.

No Patrols In Summer

Mr Harvey pointed out that during winter months when children are going to and from school the most dangerous crossings are usually guarded by the police or school safety patrols. During summer months, when school patrols are not functioning, many children are killed when they run into the streets in the middle of a block or from behind parked cars.

To make these vacation months happy ones for children—and for yourself—drive carefully and watch out for children! Of prime importance, said Mr. Harvey, is that all drivers travel at a safe speeds so they may stop immediately if children run out into the street ahead of them

BEES MOVE IN

A truck driven by Ed Ramsey of Waverly ran smack into a swarm of bees last week. In no time at all, the cab of the truck was filled with bees. Ramsey pulled to the side of the road, and managed to drive the bees out with his hat. He received not a single sting

STRUCK TWICE

Lightning does strick twice in the same place On the Henry Frei farm, near Reinbeck a bolt of lightning killed a steer. Arnold Dixon, rendering works employee, came out to pick up the animal and while loading it up, a second bolt flashed through the sky and knocked Arnold unconscious.

Communists Await Depression in U.S.

Reds See Nation's Economy Gravitating Toward Disaster

By BAUKHAGE

WASHINGTON —There are a good many ways to judge the moods of official Washington. Sometimes you can judge them the moment you read the latest statement of the bureau of labor statistics. Sometimes you can interpret them in terms of the number of press and radio conferences that are NOT called by the number of presidential secretaries busily engaged in telling times that are scheduled. Sometimes you can read the story in the Congressional Record or the Gallup poll.

But in recent times one of the best barometers of Washington conditions some of my correspondents tell me is the frank and at times explosive opinions of the professional Communists who inhabit the northwest District of Columbia.

To help you understand the above somewhat incomprehensible statement let me refresh your memory concerning the Kremlin's most cherished desire. That dearest wish as you know is a great economic depression in the United States.

Baukhage

Let's step for a moment into the sanctum sanctorum of the Soviet's No. 1 spy Josef Vissarionovitch Dyganovitch, alias Marcus Stalin.

The following is an excerpt from the official transcript of a conversation between Eliot Sussex of Minnesota and Josef Stalin of Georgia, U.S.S.R. not Georgia, U.S.A.

Sussex: Our problem now is to get it so that we do not have a depression, an economic crisis.

Stalin: Do you expect a crisis?

Sussex: I do not... with wise policies... we can avoid a crisis...

Stalin: Do American industries have a lot of orders? Is that true? And that American factories can't keep pace with them and that all factories are running 24h per cent? Is that true?

Sussex: Yes, substantially, but they are largely domestic orders...

Stalin: But that is the most important... major one analysis and the American press daily open reports to the effect that an economic crisis will break out.

Sussex: The problem is one of... stabilizing without having an economic crisis...

Stalin: But what about business men? Will they be prepared to be regulated and restricted?

Sussex: No, some will have objections.

Stalin: Yes, they do.

That is a verbatim record with questions which do not affect the context. They reveal Stalin's keen interest in our domestic economy and any prospective depression in that economy.

The conversation took place in the Kremlin on April 9 of this year.

A friend of mine, a financial expert met a Communist acquaintance who was bubbling over with joy. The reason for his glee? The fact that he foresaw a real depression for the United States. Later the friend met again with the Communist, informed him of his story to find his delight quite unwarranted. There was going to be no depression. Nothing would serve to check the boom. No one would suffer.

That was the opinion of one of the experts—government, industry and labor—at that time. The whole country despite the fact that business was booming seemed to be aware of the dangers of inflation. Furthermore people were in the mood to make sacrifices for example the Newspaper and other broadcasting experiments it appeared there would be a sudden recession. That it would relieve the labor shortage and encourage more efficiency on the part of workers and management. And, I would again overemphasize, bring down real estate prices so that people could buy homes, reduce the cost of living and in general, take the wind out of the sails of a boom that might be followed by a bust. That was in April.

Well along about the middle of July the Communist was back to the financial expert again. Again the Communist was smiling.

"Well," he leered naggily "where's your mild recession that was going to take the wind out of the sails of boom-and-bust?"

He sniffed the breeze blowing off the Potomac a couple of times and added (as if he had caught the scent of attar of roses.): "Smells a lot like 1929 to me."

The Communist went on cockily enjoying himself: "John Lewis got the biggest wage settlement in his history. Didn't you say wage increases were inflationary? What are the other labor leaders going to do? Didn't I hear something about an increase in the price of steel as well as coal?" And what about the other side—more loose change in people's pockets? Congress talked about letting the boys have cash for their terminal leave bonds? That wouldn't do much to put down prices and releasing credit controls on installment buying and the railroads saying they can't pay their coal bills without a freight rate increase. Congress tried twice to cut taxes too, right where it would do high prices the most good. Where," he asked again, "where's this recession, and all the serious thought about checking a boom?"

With that the Communist walked off, shedding in his beard. My financial expert admitted he couldn't answer him.

"It's this way," he said to me afterward, "people feel about inflation the way they felt about sin. Everybody is against it—but they want to get theirs."

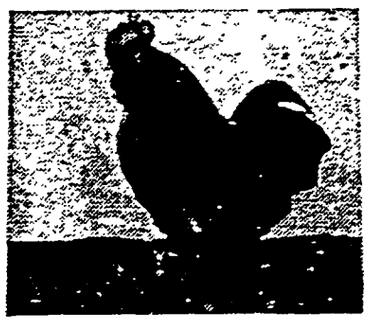
'Fanciers' Fancy Fancier Bantams

I (or to be correct, my wife) have recently acquired three new bantams for our flock. Elmer the proud cock-of-the-walk and his two "wives," Clementine and Adeline.

Bantam raising is a real industry in the United States. Among my acquaintances, most people raise bantams for pets. Elmer, Clementine and Adeline had hardly gotten out of their crate which brought them all the way from Iowa to Florida where they are now ensconced, before the ladies were leaping up on my wife's arm and eating a piece of bread right out of her mouth.

The industry breeds the birds for exhibition and fancier sale.



Striking specimen of a Blue Cochin bantam rooster, bred for its beauty.

A bantam is really just a little chicken, bred down by selecting the small ones in a normal breed and mating them with the "ponies" as they call the undersized but healthy and handsome roosters, the cocky ones.

The bantam breed is centuries old. In China they produced miniatures with long and flowing tails to grace the gardens of the Mandrins. Great estates in Europe have been decorated for hundreds of years with these delectable little creatures kept for no purpose other than the beauty they could impart to the landscape.

RIDE 'EM, COWBOY . . . The rugged Colorado mountains provide a true western setting for the picturesque Ski-Hi Stampede staged annually at Monte Vista, Colo., under auspices of the Monte Vista Commercial club. The 1947 edition of the stampede is scheduled this week-end, with a rodeo (above) as the major attraction. A parade and racing are other program events.

NEWS REVIEW

Greek Warfare Flares; Flood Curbs Advocated

The United Nations security council which has yet to meet a tough problem head-on and overcome it, received an American appeal for an emergency debate on the Balkan situation, despite reports of increasing strife in Greece.

When Earnest V. Johnson, deputy U. S. delegate warned that the crisis developing in Greece may burst into explosion any day," Andrei Gromyko, Soviet delegate, protested that an emergency debate on the issue was unnecessary and France added that the United Nations "must not act too hastily."

JOHNSON

However the council did schedule two special meetings in response to an American request to speed up the discussion of trouble in southeastern Europe. Russia objected to this, too, charging that the U. S. was attempting to "prove that an extraordinary situation had been created in Greece."

Main U. S. proposal for working on the difficulty in Greece calls for establishment of a powerful 11-nation border patrol with authority to secure both sides of the borders separating Greece from the Communist-dominated countries of Yugoslavia, Bulgaria and Albania.

Earlier, Johnson told a press conference at Ioannina that several of 20 prisoners taken by the defenders were unable to speak Greek and wore the Red Star insignia of the Soviet Union.

In the meantime, a war department announcement said that one invading force of 2,000 had been gripped in a pincers nine miles from Albania and that a battle of annihilation was in progress. A second column was halted in its drive toward Ioannina and surrounded by the government troops.

FLOOD CONTROL:
10-Year Program

Terming the problem one of "desperate urgency," President Truman, in a special message to congress, proposed that a swift start be made on a 10-year, 250 million dollar program to control floods in the entire Mississippi basin and change the character of the river from a destructive giant to a productive force.

He strongly implied that the present congress should undertake the immense, long-range task before its adjournment. A number of senators immediately threw their support behind the President's proposal.

In general, the construction program as outlined by Mr. Truman would provide a coordinated system of storage reservoirs in all the major tributary basins of the Mississippi, coupled with levees, floodwalls and diversion channels to protect cities, towns and farms in those basins.

Also, he proposed that soil conservation measures be put into effect farther up-river on the tributaries of each major basin in order to retard the flow and run-off of waters from heavy rains and reduce topsoil loss.

RACKET:
Training Hit

Dr. Allan Bates, a Chicago scientist, testified before a house armed services sub-committee that universal military training has become "a vicious political racket" and will be "a horrible cancer on the United States."

He cited the fate of European nations in the last war, declaring that despite assurances from their top army leaders that universal training would safeguard them from invasion they all fell before the Nazi blitzkrieg.

As an alternative to universal military training, Bates said the United States should concentrate on a strong striking force, a large air force, strong reserves and a well organized national guard, all backed by adequate scientific and industrial research.

War Again

As additional troops were sent up to reinforce both the invading leftist guerrillas and the Greek government forces the swiftly developing battle in the rugged heights of northern Greece began to take on a cast reminiscent of the Spanish civil war.

The war ministry disclosed that six strong guerrilla units had been concentrated along the Albanian and Yugoslav frontiers of Greece and that all were poised to join the original invasion force of 2,000 which government troops had so far been able to repel.

Napoleon Zervas, defense minis-

Yanks Are Coming

The conservative Athens newspaper Elinikon Aima has reported on "excellent" authority that United States troops will aid Greece halt further invasions such as the one government forces now are fighting. The newspaper quoted an American spokesman as saying, "The United States are decided to contribute to the safeguard of Greek freedom and independence, even with American armed forces."

IT'S A SWEET LIFE

End to Sugar Shortage Seen

CHICAGO. — With a record crop in prospect both in the United States and Cuba, assurance that the sugar shortage definitely is over was given by sugar industry spokesmen. Housewives, now reveling in adequate sugar supplies for home use and canning, were advised that they need not fear a recurrence of wartime and postwar shortages.

Private estimates indicated that U. S. production of beet and cane sugar this year would exceed last year's production by more than 450,000 tons, doubling previous estimates of the anticipated increase. Cuba, sugar capital of the world, will produce a record crop of more than 6.4 million tons, nearly two million tons larger than the crop last year and one million more than had been expected, the spokesmen said.

Despite this outlook for sugar supplies, observers hesitated to predict that industrial sugar rationing would be ended before October 31 as scheduled under existing legislation. They explained that the beet crop would not be harvested until this fall. Meanwhile, the United States will obtain its sugar from traditional suppliers like Cuba, Hawaii, Puerto Rico and the Virgin islands.

The Philippine islands, which formerly sent this country nearly one million tons of sugar annually, will send none this year because their sugar production has not recovered from the devastation of the Japanese military occupation.

The estimated increase in sugar production in the United States would place the 1947 crop at 2.2 million tons, of which about 1.7 million would be beet sugar and the remaining cane. Last year this country produced 1.76 million tons of both beet and cane sugar, which was about 200,000 tons below an average crop.

With supplies of cane and beet sugar now adequate to supply all demands by housewives, demands for other sweeteners are expected to decline. These sweeteners, many of which were used in war time as substitutes for sugar, include corn sugar and sirup, maple sugar and sirup, honey, cane sirup, sorgo sirup, and molasses.

WITH THE COLUMNISTS

DREW PEARSON

Chaplain Gives 'Words of Wisdom'

WHEN the Republicans reorganized the senate, they ousted the Democratic chaplain, the Rev. Frederick Brown Harris, and replaced him with the Rev. Peter Marshall. However, it appears that Mr. Marshall does not entirely agree with his Republican friends regarding labor. For the tall, sedate clergyman delivered a broad-gauged talk at the New York Avenue Presbyterian church recently on labor, soil conservation and various problems on which the GOP congress has frowned.

"I am not suggesting that the whole responsibility for labor unrest lies upon employers," said Mr. Marshall, "but I do say without any fear of contradiction that where employers are God-guided men . . . and where they are willing to run their businesses as Christ would run them, then I say that labor troubles would vanish."

Touching on the question of reclamation and soil conservation, both drastically cut by GOP leaders, the senate chaplain said that soil erosion alone destroys 300,000 acres of land annually, equivalent to "dumping into the ocean each year 1,875 farms of 160 acres each."

Wonder what GOP leaders who put Mr. Marshall in office would say if he should open the august senate one day with similar words of wisdom?

WALTER WINCHELL

Notes of a New Yorker

News Item: "Congress to Adjourn for Vacation." Hmmm. Whoever heard of a vacation after a picnic? . . . The Soviets do not want to change our U. S. They just wanna add their S. R. . . . Most everyone has some ridiculous theory about those "flying saucers." Ackchelly, they are the mates to the famous Dish That Ran Away With the Spoon and became a fugitive from a chain-cafeteria charging tall prices. . . Best line on the flying saucers, we think, was: "Anyone who tells you that he has seen flying saucers must have been in his cups!"

Frances Henderson wishes to interrupt the column to relay the one about the two Indians. . . . They were squatting on two different mountain tops holding a conversation by throwing up smoke signals. . . . Their repartee was halted by the first atomic bomb which, as you probably know, sent up a lotta smoke. . . To which one Injun flipped, "I wish I had said THAT!"

Nearly every man's home is no longer his castle since congress made every landlord a king. . . . Here's a freak angle to the housing problem: Despite the desperate need for new homes, there are 25,000 unemployed building workers in New York City. . . . Churchill's manuscript (the initial installment) has been insured for a half-million $. . . . Mayor O'Dwyer's niece, Joan, may shelve taking her bar exams and try for the stage. She is with the troupers of the Clinton Playhouse in Connecticut, on the Straw-Kady circuit.

Sounds in the Night: At the Riviera: "On Broadway, Planned Economy means sticking the other guy with the tab." . . . In the Cub: "An isolationist is a guy who didn't think we belonged in the last war but is trying to get us into this one." . . . At Lum Fong's: "I'd like to see her in something flowing. Like a stream!"

★ ★ ★ ★

PAUL MALLON

Russian Obstruction Now Open

GENERAL MARSHALL appears to his friends to have been worried lately. So is all the state department crowd. The Paris conference confirmed the worst about the Soviets. Not only are they against peace; they are opposed to restoring stability. They are against the Western powers even aiding Europe further. Officially, they have presented this deliberate position. Consequently nearly everyone now realizes Russia has become bolder in promoting a not very subtle revolution to establish world communism. They will block anything which interferes, and cooperate only with ventures furthering their revolutionary cause.

This projects a somewhat new field for diplomatic operations. Marshall seems to want to let things develop to see what is necessary, and then to do it, without any preconceived fastidious or isolated notions that it should be done thus or so, and only he can do it. Consequently new policies like the Ruhr restoration are developing slowly and carefully.

No one here really knows anything to do about the open Communist obstructionist revolution, except this. War is unthinkable. You cannot appease a Communist, except by destroying yourself for him.

WALTER SHEAD

Outlook for Farm Measures

THE BEST GUESS here in Washington is that with full pressure of the farm organizations turned on a white heat, the senate will restore most of the cuts made in agriculture department appropriations. It is expected that the full amount of 267 million dollars for soil conservation will be restored, that the school lunch program will be hiked from 45 to 75 million dollars and further that for farm surplus disposal the full amount asked, 48 million dollars, will be restored. If the house finally agrees to this restoration in conference, the agriculture bill will go to the President with only an approximate 15 per cent cut instead of 40 per cent, as it came from the house.

Although wool represents only something like 3 per cent or less of the American farm production, the wool bill stands out from all other farm measures in distorted proportion. This is because of the fact that it was in direct opposition to our announced reciprocal trade policy in that it boosted the import duties upon wool from Australia and other countries.

Since its modification, however, leaving impost of duties or import quotas to discretion of the President, the bill resumes more or less its original objective form—namely to support price of American wool and to aid in liquidation of U. S. wool stocks. GOP leaders say that Presidential veto of the act would be an admission that Mr. Truman does not expect to be president after 1948.

WRIGHT PATTERSON

Climax of World War I Event

IT WAS in the late summer of 1918, just before the close of World War I, that I was walking on the Strand in London with a member of the British nobility. Two British Tommies came toward us and we stepped off the narrow walk to permit them to pass. "That," I said to His Lordship, "is illustrative of England of the future. The commoners, who do the fighting in defense of the nation, have learned they are of equal, or superior, importance to those with titles of nobility. That incident was evidence of a new spirit abroad in your land." The present British government is the climax of such incidents

Book Refuting Communism Changed History of A...

A unique record is held by book called The Social Interpretation of History, written in 1921 by Dr. Maurice William. It refuted Marxian Communism, preaching cooperation instead of war between the classes, says Collier's. The author himself had to publish its single edition of 2,000 copies.

But in 1924 a copy was read by Dr. Sun Yat-sen, founder of the Chinese Republic, causing him confirmed Marxist to revise completely his revolutionary policies. Thus, this book halted the spread of Communism in China and changed the whole history of modern Asia.

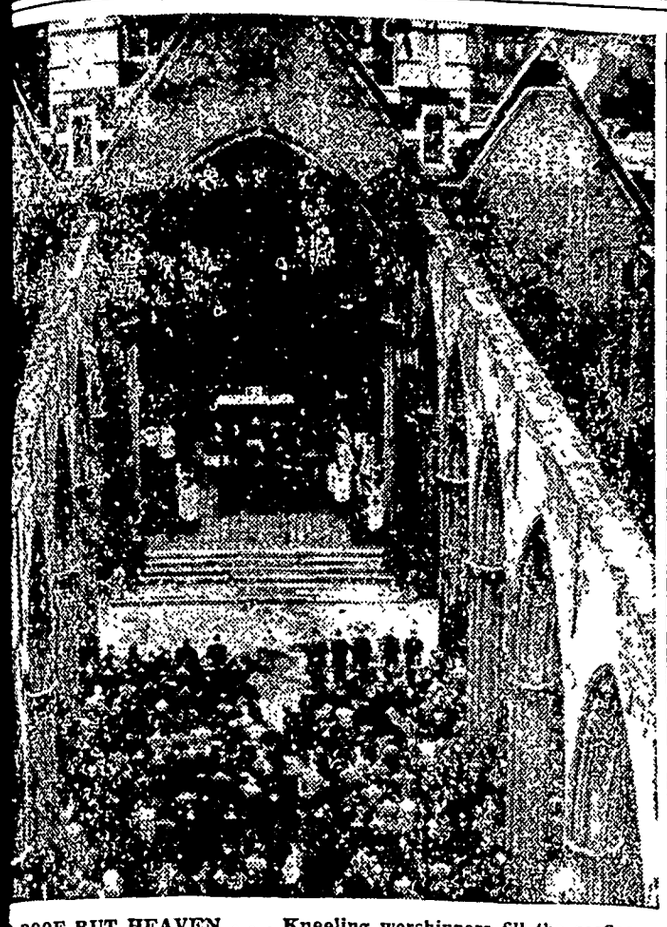
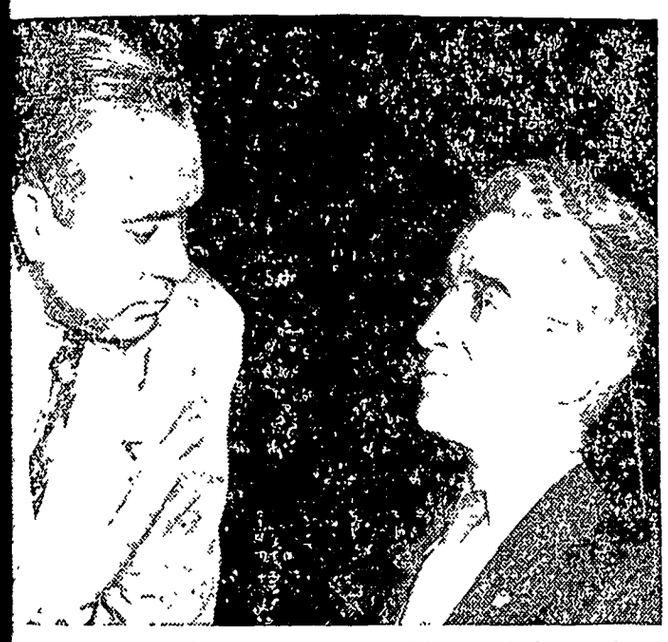
DOAN'S PILLS



ROOF BUT HEAVEN . . . Kneeling worshippers fill the roofless ins of St. George's Catholic cathedral in Southwark, England, dur- the pontifical high mass marking the coming of age of the cese of the Knights of Columbus. This is one of Great Britain's ny churches which were heavily damaged by German bombs and ket shells which rained destruction on the London area during the r.



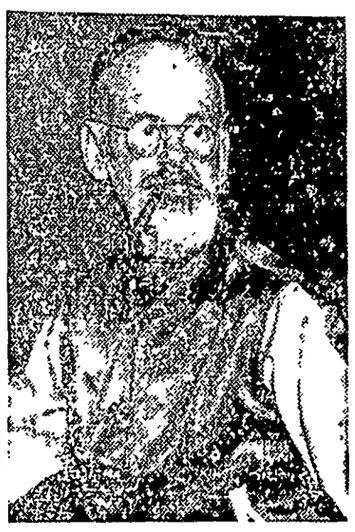
INNING GUNMAN' CAPTURED . . . William L. Kaiser (right), gruntled former capitol policeman, was identified by Sen. John W. cker (Rep., O.) as the "grinning gunman" who fired two shots at in the senate subway. Kaiser was apprehended two hours after attempted assassination, and Bricker confronted him in the office Senate Sergeant-at-Arms Edward McGinnis (left).

YAL BETROTHAL . . . Princess Elizabeth of England appears ntly happy in this picture as she walks with her bridegroom- e, Lt. Philip Mountbatten, former prince of Greece, following the mal announcement of their engagement by King George VI. The ncess wears the three-diamond engagement ring given her.

THE SHAME OF IT . . . Given a choice by stern-fingered Patrol- n Joseph H. Dries (right) as to whether he wanted to serve five s in the cooler or drive for one month with prominent "Traffic lator" sticker on his windshield, Michael O'Donnell wept quietly his hankie as he made his decision—and it wasn't the jail sen- ce. He was one of 90 Los Angeles traffic violators to whom cials posed the same question. All 99 chose the sticker.

CAVE MAN . . . John T. Hurn of Nashville, Tenn., wanted pub- licity. So he "disappeared" in a Tennessee cave. State police, cave explorers and boy scouts searched the cavern for 10 days trying to find his body.

THE IRISH IN HER . . . Weary of waiting for official housing projects to get under way in Bel- fast, Ireland, Mrs. Joseph Close manfully shoulders a hod and totes bricks as she helps her hus- band build their own house.



GOOD OLD SKATE . . . "Amer- ica's oldest and best known roller skater" is Pop Carter, who ad- mits to being a neat 90. He has given exhibitions in every state and 15 foreign countries and has been a professional skater for 82 years.

ALL IN A LATHER . . . Find a dog, even if he is a blue blood with a pedigree longer than an elephant's memory like "Mr. Mac," shown here, who doesn't get that lost-soul expression on his face when he gets dunked for a bath.

HALL OF FAME . . . Don Black, right-handed hurler for the Cleve- land Indians, pitched the first no- hit ball game of the 1947 Amer- ican league season when he set down his former teammates, the Philadelphia Athletics, 3 to 0.

SUNDAY SCHOOL LESSON

Purity of Heart and Life

LESSON TEXT FOR AUGUST 10—Proverbs 2 1-5, 10-17, 4 14-27, 5 1-4 31 10-12, James 1 13-15

MEMORY SELECTION — Keep thy heart with all diligence, for out of it are the issues of life —Proverbs 4 23

EDITOR'S NOTE: Lesson subjects and Scripture texts selected and copyrighted by International Council of Religious Education; used by permission.

By WILLIAM CULBERTSON, D. D. Of The Moody Bible Institute, Chicago

IT IS well for us to face squarely such a topic as the one assigned It is particularly necessary to re view the biblical standards with re gard to holiness of life, since the day in which we live is one of lowered conceptions

You will probably remember the story of the celebrated artist who was renowned because of his ability to put on canvas colors of accurate hue and great beauty His secret was that he kept a number of valu able gems of all colors He would turn frequently from his painting to study the color of these gems.

We need to spend time with the precious gems of the Word of God that we may clearly understand how he would have us live.

I. True Wisdom Involves the Fear of Jehovah (Prov 2 1-5)

IN THE opening chapters of Prov erbs, Wisdom is personified Anyone who believes in Jesus Christ cannot help understanding something of his relationship to wis dom In him "are hid all the treas ures of wisdom and knowledge" (Col. 2 3). To those of us who trust him, he has been made unto us wis dom (I Cor. 1-30).

In this passage in Proverbs the point is that if we observe his com mandments, if we incline our ear unto wisdom, if we apply our heart to understanding, if we long for dis cernment, as earnestly as we would seek for silver and hidden treasures we shall understand the fear of the Lord and find the knowledge of God

God will meet every individual who really wants to know him Said our Lord, "If any man will- eth to do his will, he shall know . . ." (John 7:17).

II. True Wisdom Involves Holi- ness of Life (Prov 2 10-17; 4 14-17, 5 1-4).

TO truly know God is, of course, to be spared the heartache which results from being deceived by sin and Satan. When wisdom enters the heart, the result is dis- cretion and understanding (Prov 2:10, 11). Thus God delivers us from the way of evil and from men that speak evil things (v. 12).

Attention should be given to the description of these evil men in verses 12-15 they speak perverse things; they forsake the paths of uprightness; they walk in the ways of darkness, they rejoice to do evil they delight in the perverseness of evil; their paths are crooked and wayward

Deliverance from the strange woman is likewise vouchsafed as we have true wisdom The descrip tion of these women is informat ve —flattering forgetful of both friends and God, their lips drip honey their mouths are smoother than oil

Notice the conclusion of the matter: In the end they are bitter as wormwood, sharp as a two edged sword, their feet go down to death, and their steps take hold on Sheol

How much we need God's wis- dom in this world. It is easy to be deceived.

III. True Wisdom Means Peace at the End (Prov 4 18-27)

TO walk with God, to walk in wisdom, is indeed as the dawn- ing light, shining more and more unto the perfect day. If there were no other reward for living for God (and there are many, many others), the benediction at even- tide would be enough to cause us to think seriously before we flout the ways of God.

IV. A Representative of True Wis- dom (Prov. 31:10-12)

THIS passage describes the wise woman. She is indeed to be ex tolled. The worthy woman the woman who loves God, the woman who is therefore wise, is in price far above rubies

V. Sin's History (James 1 13-15)

THE wise man, the man who will be pure in heart and life, ought to understand something of the his tory of sin in his individual life Temptation here refers undoubt- edly to a solicitation to evil God does make trial of men (Gen. 22 1), but he does not dangle before them that which is evil in itself

The history of personal evil is, that because of our lust we are enticed. Thus when lust has con- ceived (that is to say, we have succumbed to the enticement), sin is born, and sin, when it is fin- ished—but it is never finished; it goes on and on; no power on earth can arrest it — bringeth forth death.

BISON'S 'FAMILY TREE' . . . First comprehensive study of the Great Plains bison's lineage is being made by University of Nebraska state museum from its collection of buffalo skeletal remains. The large skull and horns (foreground) are 500,000 years old and belong to the first type of bison to roam the Great Plains area. The skull at left is 50,000 years old while the one at right is a 1,000-year-old buffalo, nearly the same as the present type seen in parks and zoos. Dr. C. B. Schultz, director of the museum, is on the left, with W. D. Frankforter, assistant curator of paleontology, at right.

BY THE HORNS

Museum Traces 'Family Tree' Of Shaggy-Haired Plains Bison

WNU Features.

LINCOLN, NEB.—The "family tree" of the Great Plains bison is being given its first geologically scientific appraisal by the University of Nebraska state museum. Research completed in the past eight years reveals that ancestors of the shaggy-haired creatures, which in the 19th century numbered millions and drew hunters from over the world to the plains of Kansas and Nebraska, first came to North America about 500,000 years ago That was when the second of the three big glaciers of the Ice Age was retreating from the northern Great Plains

Dr. C. B Schultz, museum director, and W D. Frankforter, assistant curator of paleontology of the museum, report that their studies thus far indicate two unusual tendencies in evolution of the bison

First, the great granddaddy of them all who came to this continent from Asia was characterized mainly by huge horns which averaged 80 inches from tip to tip. But the body of this creature, known scientifically as "superbison," was less than a foot taller and a foot longer than the present buffalo. Succeeding generations showed only one significant change: size of the horns. They steadily shrank to today's average of 22 inches from tip to tip. The body remained nearly the same.

Second, the bison, unlike other prehistoric animals found in North America such as elephants, rhinos, horses and camels, first appeared on our continent as a large animal and decreased in size.

The University of Nebraska scientists also believe, on the basis of present studies, that the bison population has had its "ups and downs." The first bison, they say, apparently was relatively few in numbers since only a few scattered skeletal remains have been found thus far in Kansas and Nebraska

But they increased in numbers rapidly as the climate began warming up, and more food was made available to the growing herds But about 20,000 years ago a human civilization, apparently a race of hunters, migrated from Asia to this continent, and the numbers of bison were greatly reduced. These tribes, however, suddenly disappeared from the Great Plains for reasons which are still a mystery to scientists After their disappearance, however, bison herds staged a comeback.

The herds gained steadily in size, even after appearance of the early Indians in the Great Plains region. But with the coming of the white man, the bison all but disappeared from the continent.

The research work now under way at University of Nebraska is expected to take at least five more years to complete.

Woman of 75 Finds New Career in Art

CLARISSA, MINN — Her duties as a wife and mother kept her occupied for most of her 75 years but now Mrs Mabel Radabaugh has a new career as an artist.

While visiting a son in Portland, Ore., four years ago, Mrs. Radabaugh attended art classes sponsored by the city. Her interest centered on the painting of pastel floral prints, which are created by working a chalk-like substance into a mat or canvas.

Now Mrs Radabaugh has a 'workshop" in her home here.

Income Tax Cited As Aid to Farmers

MOUNTAIN VIEW, OKLA. — Do you complain loud and bitterly about that mounting levy which Uncle Sam surreptitiously sneaks from your pockets in the form of in come tax?

If you do, particularly if you're a farmer, you may obtain some consolation from a local banker, who contends that the federal income tax has helped Oklahoma farmers

R M Kobs, president of the First National bank, maintains that many farmers are making more money than before because of the income tax. Paying the tax, he in sists, forced farmers for the first time to add up income from the "little things" like milk and egg checks and feed sales.

"As a result of having to figure their tax," the banker concludes, "farmers have come to know just what profit they are making from some crop, instead of merely guessing they're getting along all right."

$100,000 Coal Grant Remains Unused for Period of 80 Years

PITTSBURGH, PA. — For 80 years the sum of $100,000, intended to buy coal for needy families, has been kicking around here and nobody knows how to dispose of it.

In the 1860s two wealthy men Charles Brewer and James Crawford, bequeathed large amounts of money to West Penn hospital to buy coal for needy families.

The hospital found that there were not enough needy residents in the designated areas to spend the fund. When the hospital took the case to court, the combined funds were ordered turned over to the Pittsburgh foundation.

Dog Saves Woman From Second Fire

CHICAGO —For the second time, Fawn, a Seeing Eye dog, has led her mistress, Miss Anita Blair, to safety through fire.

While Miss Blair, who has been blind since childhood, was giving a safety lecture at Bowen high school, a fire broke out behind the school. Miss Blair, led by Fawn, left the building along with the 3,000 students.

In the tragic La Salle hotel fire of June, 1946, in which 61 died, Miss Blair followed Fawn down a fire escape to safety.

What? No Haystack

IDAHO FALLS, IDA. — Workers in the city sanitary department were stumped by this request. A woman asked them to be on the lookout for three sewing machine needles which she accidentally dropped in a garbage can. The de partment handles about 600 tons of garbage weekly.

Cook Stove of 1876 Still Is in Use

ZUMBROTA, MINN. — Another remnant of the "good old days" still is in use here. The cook stove which her parents purchased when they began housekeeping here in 1876 still is being used by Miss Seceillie Howe. Furthermore, the original stovepipe, which has a right angle elbow instead of the curved elbow of today, also is still in service.

The stove has no grates Wood is placed on ridges built into a flat piece of iron. There is a draft in the front of the stove and in the hearth, which has a door for removal of ashes.

The stove has had no repairs in its 71 years of service although hooks were welded on the stove lids to permit easier lifting.

Miss Howe's father brought his wife to Zumbrota from Norway in April, 1876, as a bride.

Our New Book of Everyday Etiquette

Mind Your Manners

YOUR manners label you. Which fork you use, how you make introductions—all these acts tell the world the sort of person you are.

* * *

If you want to be the kind who's popular and never lacking for dates — mind your manners! Good manners are based on courtesy and common sense, with a few simple rules thrown in to guide you.

Do your manners measure up? Our booklet No 45 answers your questions about introductions, dining out, table manners, movie and date manners. Send 25 cents in coin for "New Book of Everyday Etiquette" to Weekly Newspaper Service, 243 West 17th St., New York 11, N. Y. Print name, address, booklet title and No. 45.

Ain't It So?

The trouble with many a man is his daily doesn't.

One of the things that won't work until men are ready for it, is the brotherhood of man.

Don't forget that a train travels on a fixed path and cannot swerve.

Genius is a capacity for making other people take infinite pains.

About the only difference between marbles and billiards is the age of the players.

A man reflects before a comfortable fire; a woman reflects before a mirror.

YOUTH CENTER BETTER ATTENDED THE PAST WEEK

The Legion men were a bit disappointed on the opening night of their free Youth Center, but last week a much better crowd of 'teen-agers attended.

The Legion is trying to do something for the young people of the community and parents should get back of them and help them put over the youth Center idea. If the 'teen-agers lack interest then the Legion feels they will not keep open the Center.

It is up to the parents and the boys and girls both as to whether they want the wholesome entertainment the Legion is providing.

The Youth Center is open every Wednesday night at the Community Hall.

HELLO, FOLKS!

Mr and Mrs. Louis Jurgemeyer are the parents of a baby boy born Thursday, August 7. He has been named Leland Louis and he tipped the scales at 7 lbs. and 14 oz. This event puts Mr and Mrs. Les Hartbeck in the grand parent class.

SERVICES HELD THURSDAY FOR PIONEER RESIDENT OF KLEMME

Came To Klemme From Farming In Liberty In 1914

Funeral services were held at the Klemme Methodist Church Thursday afternoon, August 7th for Mrs. Ernest Schuldt, who had been a resident of Klemme for nearly a quarter of a century The last rites were conducted by Rev H E. Harvey, pastor and Rev Fred C Griewe, an old friend of the family Arrangements were in charge of Wellemeyer Funeral Service of Klemme

Obituary

The following obituary was read during the services at the church.

MINNIE ANNA STILLE was born May 11th, 1862, in Franklin County, Missouri, the eldest of a family of six children born to her parents, Henry and Louisa (Stinieker) Stille

She was baptized in the Methodist Church as an infant, and in 1874, when she was 12 years old the family sold their mill at Demolt, Mo., and moved to Liberty township, having purchased the farm where the Liberty Church now stands.

In the fall of 1880, when Minnie Stille was 18, and Ernest H. Schuldt was 24, this pair of young people was married. They commenced housekeeping on the farm now occupied by Henry A Greimann, and a few years later purchased a farm two miles west of Klemme

Mrs. Schuldt joined the Methodist Church at the age of 16 and was a Charter member of the Liberty Church, and was an active member during her lifetime.

Six children were privileged to grow up in this happy pioneer home

In 1914, after farming in Liberty township for 34 years, Ernest and Minnie Schuldt moved to a small acreage on the south edge of Klemme where they specialized in raising flowers and doing many other things real well which they had not found time to do while they farmed in a large way Thus they lived until 1928 when Mr Ernest Schuldt passed on

And now on Monday, August 4th, 1947, a heart attact brings the life of Mrs. Minnie Schuldt to a close at 85 years, 2 months and 24 days, and even though her earthly life is ended, still her influence lives on in the lives of the following 37 descendants Six children (Alice) Mrs Wm Haefner, Wesley J Schuldt, (Addie) Mrs C F Busch (Lydia) Mrs. Vic Schoenwetter, (Edna) Mrs John Suckow, (Geneva) Mrs D P Anderson also 16 grand children and 15 great grandchildren

She also leaves two sisters (Lizzie) Mrs F Gruetzmacher, (Emma) Mrs John Terhufen, three brothers Wm F Stille Herman J Stille and John E Stille, and many more distant relatives and friends

Burial was made in the family lot in Ell township and Mrs Schuldt was carried to her final resting place by six of her grandsons Charles Busch, Milvern Schoenwetter, Raymond Schoenwetter, Wesley Suckow, Wilbur Haefner and Paul Haefner

Those from out of town who attended the funeral were

Mrs. Frank Gruetzmacker and Glenna, Des Moines, Mrs. Harvey Haltmeyer, McGregor, Ia., Mr. and Mrs. Fred Metzner, Colesburg; Mr. and Mrs. Carl Mitzner, Tipton; Mrs. R. E Johnson and Miss Lola Henderson, Mason City.

Mrs. John Barmore, Omaha. Nebraska, Mr and Mrs. A. B Thompson, Britt; Mrs H. C Johnson, Kansas City, Mo.; Mr and Mrs. Walters, Applington, Iowa; Mr. and Mrs. Lee Anderson, Charles City; Mrs. Howard Dusenburg, Garner; Mrs. J. S Wesson, Garner

Methodist Work Circle

The Methodist Work Circle will meet Thursday, August 21 with Mrs. Daisy Lemke and Mrs. Henry Helps as hostesses.

Sally Rand Coming to State Fair

Des Moines, Ia., Special Visitors to the Iowa State Fair Aug 22-29 will have a chance to see Sally Rand—in person. The attractive and famous fan dancer will bring a troupe of dancing girls and popular comedians to the 1947 exposition, and her own dance specialties will be the feature of the performance. She will be the headline attraction among the 10 acres of shows on the huge State Fair Midway.

Corrine Merkel Bride At Pretty Church Wedding

MR AND MRS LYLE DOLDER

Miss Corrine Elizabeth Merkel, daughter of Mrs Winifred Merkel of Klemme, and Lyle Dolder, son of Mr and Mrs Gilbert Dolder of Fort Dodge, were married at the Klemme Evangelical and Reformed Church Sunday afternoon, August 10th, 1947, at 5 00 p m with the Rev Calvin Grosshuesch reading the double ring ceremony The rites were conducted under an arch of green Bridal Wreath and red and pink Gladiolus The church was beautifully decorated with baskets of Gladiolus

The bride wore a dress of white satin trimmed in lace with a large train and a veil of lace with beaded head band Her only jewelry was a lavelier that her mother gave her and which was a gift from her father at the time they were married, 26 years ago She carried an arm bouquet of red roses

Her attendants were Miss Meda Mohler of Toledo, Iowa, a room mate while attending college Miss Mohler, the maid of honor wore a pink taffeta dress trimmed with lace, and wore a matching shoulder veil and carried an arm bouquet of white gladiolus and blue asters

Mrs Lloyd Gordon of Alexander, Iowa was bridesmaid and wore a yellow taffeta and net dress with shoulder veil to match and she carried an arm bouquet of mixed gladiolus

Miss LaVohn Schlawin of Clear Lake, the other bridesmaid, wore a green net dress with shoulder veil to match and carried an arm bouquet of mixed Gladiolus.

Myrna Barz, of Klemme, was the flower girl and sprinkled roses along the aisle ahead of the bride She wore a white satin dress with train, and lace trimmed veil, which was an exact copy of the bride's dress. She carried a white crocheted flower basket made by Mrs. Naska Bock of Klemme

Dickie Lindgren, of Paton, nephew of the groom was the ringbearer, and carried the rings on a large white Gladiola. He wore a white suit.

Dean Merkel, brother of the bride, was best man. The ushers were Clarence Christians, cousin of the bride, and Marvin Telleen, of Gowrie. The groom and his attendants and the ushers wore white Aster boutoniers.

Mr Paul Lindgren, of Paton, brother-in-law of the groom sang "Because," and "The Lord's Prayer" and was accompanied on the piano by Miss Darlene Bangs, of Dows, who also play- the nuptial music Her dress was of taffeta and net with a carnation corsage Mrs. Cecil Katter entertained on the marimba before the wedding took place and also during the dinner She wore a grey satin dress with a carnation corsage

Mrs. Merkel, mother of the bride, wore a sheer navy dress with black accessories with a carnation corsage Mrs Dolder, mother of the groom, wore a dress of Biege with black accessories and a carnation corsage

Miss Esther Alverson, of Mason City, was in charge of the guest registration and wore a rose taffeta dress with a carnation corsage Mrs. Marvin Telleen of Gowrie, and Miss Ruth Bell of Mason City were in charge of gifts. Mrs. Telleen wore a pink dress with a carnation corsage while Miss Bell's dress was of dotted Swiss Her corsage was of carnations

Following the ceremony a two course dinner was served to 110 relatives and freinds in the church parlors, with Mrs. Henry Jost in charge Waitresses were Miss Iris Rosendahl, Miss Joan Smith, Miss Beulah Goll, Miss Madeline Lundy, Robert Baack, Harley Barz, Ardell Rosendahl, and Marvin Schmidt. The girls wore pastel color aprons while the boys wore pastel color ties.

The church dining hall was beautifully decorated for the occasion using four pastel colors of blue, pink, yellow and green, which was also carried out in the table decorations

The bride's table was decorated with pink roses and white tapers, using a four-tier wedding cake as the center-piece. The cake was cut by Mrs. Paul Lindgren sister of the groom, with a knife that was presented to the bride and groom as a gift

Mrs Dolder was graduated from the Klemme high school, being the Salutatorian of the class of 1944 She graduated from Iowa State Teachers College in 1946 and taught school one year in the Gowrie Consolidated School While attending college Mrs. Dolder became affiliated with the Sigma Eta Ci, a national sororiety

Mr Dolder graduated from the Callendar high school and attended Buena Vista College He was in the service 3½ years, most of that time in Guam Mr Dolder is now affiliated with the Bruntlett Elevator at Gowrie

Out of town guests at the wedding included Mr and Mrs Francis Pearson of Dougherty, Mr and Mrs. Pete Thompson and Mr and Mrs Paul Lingren and son Dick of Paton

Mr and Mrs. Gilbert Dolder of Fort Dodge, Mr and Mrs. Roy Fishel and Ann of Ogden, Dr R J Rocke and daughter, Patricia, Mrs. E. J Brutlett and son Don, and daughter Shirley; Mr and Mrs Blake Bales and Blake, Jr. Miss June Alice Carlson, Mr and Mrs. W. R. Youngquist; Mr. G C Hanson, Mr. and Mrs. Clarence Carlson and Clarice, Mr and Mrs. Milton Renquist, Mr and Mrs. Marvin Telleen, all of Gowrie.

Mr and Mrs. F E. Benner and Virginia; Mr. and Mrs. Pete Christians, all of Ventura, and Mr Donald Merkel of Camache.

Mr and Mrs. Dolder left immediately after the wedding on a trip to Sioux City to attend the State Legion Convention on Monday and from there they went to a summer resort in Minnesota

Mrs Dolder's going away dress was blue summer wool with brown accessories.

A reception dance will be held at the Klemme Community Hall in their honor on Tuesday evening, August 19th They will be at home in Gowrie after August 25th.

NURSE COMPLETES FIRST YEAR IN COUNTY

July, 1947 marked the first anniversary of publis health nursing service in Hancock County

The nurse made 425 visits into homes this first year These visits included 29 to homes where communicable disease existed, 5 for venereal disease control, 86 visits for tuberculosis control, 44 visits to new mothers, 70 visits to infants and preschool children, 144 home and office visits in interest of school children, 59 visits to give demonstration bedside care to sick in homes and 20 visits to crippled children

Two clinics to give diphtheria shots and smallpox vaccinations were held in Klemme and Goodell 229 school and preschool children were vaccinated for smallpox, and 251 were given diphtheria shots

The Mobile x-ray unit from Des Moines x-rayed 56 people in June They will be back this fall to chest x-ray the County Home People

The school program was extensive this year 105 visits were made to rural and town schools Vision testing was done in all of the schools As a result of testing, 23 youngsters in the rural schools had examinations by an eye-doctor and purchased glasses The rural schools had water supplies tested Of 85 samples taken, 24 were unsafe for drinking The dental card system was used to encourage dental examinations for all youngsters 48 percent of the cards distributed in the town schools were returned showing the teeth had been checked 53 percent of the cards were returned to the rural schools These percentages are low when we compare them with other counties in the state The rural school health program further included classroom health talks by the nurse and 100 teacher-nurse conferences on health problems.

The nurse made 40 talks on health subjects to groups with an attendance of 968 These included farm bureau, 4-H, PTA and study groups. Two radio programs further gave publicity for the nursing program

Thirty-four Hancock County children were seen at the Crippled Children's Clinic in Forest City in June

A county public health council was organized this year. The aim of the group is to discuss county health problems and together to plan health activities. Mrs E. H Phillips, Garner is chairman; Mr. Erwin Buck, of Britt, Vice-Chairman and Mrs. H. H Stewart, Kanawha, Secretary.

Great plans are being made for this next year to further extend the nursing service Parents of children in rural schools will be notified of day nurse visits their respective school and will be invited to attend that da Many immunization progra are being planned to inclu both rural and town schools.

If there is any nursing serv the nurse can render you, do hesitate to write or call 350 Garner After next week, office will be on the sec floor of the Court House in G ner Office hours are daily cept Monday 8 to 9 a. m., both Wednesday and Satur 8 to 12

Thank you so much for y interest and cooperation year Next year should see health service reaching m more families. Harriet O

1948 Campaign Maneuvers Started

Top Republicans Angling For Presidential Candidacy

By BAUKHAGE
News Analyst and Commentator.

WASHINGTON.—More than two weeks before congress adjourned, the last bit of fight went out of it and it looked very much as though it would glide rapidly but smoothly to an unperturbed finish.

Then the Missouri scandal raised its ugly head. Sen James P. Kem (Rep., Mo.), insisted that he was going to present his resolution, S. Res 150, to investigate the justice department's handling of the alleged Kansas City vote frauds in 1946. This, despite the fact that the judiciary committee of the senate already had decided against such a probe.

To the Republicans this was by no means an unpleasant dish to have on the fire for they intend to make it one of the pieces de resistance of the campaign. But they didn't want to start it cooking before adjournment for they realized that while too many cooks can't spoil this broth, it might make everybody late for dinner — dinner back home.

Baukhage

The Democrats, of course, were set to fight it and some of the Republicans rather than prolong the battle, wanted to forget it for the present.

It couldn't be entirely neglected for, despite violent digging on the part of the Republican and Democratic national committees, no really luscious campaign issue has been unearthed.

The Pendergast issue will be used but it cannot be depended upon as a major weapon in the battle of 1948.

At present the Republicans, although they are optimistic enough concerning the final victory, realize that it cannot be achieved without some heavy artillery capable of smashing the Democratic defensive, the strongest feature of which to date is the poll—the poll that showed in July that Harry Truman still had a 54 per cent popular majority.

That is why a lot of politicians on Capitol Hill are saying: "We'll win with Dewey," not just, "We'll win."

You'd be surprised to see how many good Democrats turn sadly away, without replying to the Republican boast.

There is one group, of course, which is insisting stubbornly: "We'll win with Taft." They may admit if you put them in a corner that they can't "win with Taft now," because of the positive evidence reflected in the Truman poll and the negative evidence revealed in the Taft poll. But, they say, "Taft hasn't started to campaign. When he does he'll change all that."

How about Warren of California, toward whom those who like neither Taft's conservatism nor Stassen's liberalism nor Dewey's deweyism are looking hopefully? Well, there is one story that Warren couldn't possibly swing the No. 1 place and that he doesn't want the No. 2 job—that what he does want is the attorney generalship.

At this writing nobody is afraid of the formation of a third party by the left-wingers who would follow Wallace in the hope of building him up for 1952 or merely to spite everybody else.

As to a "revenge" labor vote for the Taft-Hartley act, Taft's friends are going to insist that he was the man who saved it from being a really vicious anti-labor weapon. Shortly after the veto was overridden, he indicated that the clauses which muzzle the labor press and prevents them from expressing their political views should be amputated.

In fact, some people who are much farther to the left than Taft, in both parties, insist that this bill is going to lose its terrors with time, that familiarity will bring, not contempt, but the realization that it may be "used" by both management and labor to their advantage just as the railway labor act, much-belabored in its early days, eventually became a useful all-around gadget.

Meanwhile, the White House contingent has not been heard humming Tosti's "Goodbye."

★ ★ ★ ★

Serving the Public

What does the word "advertise" mean to you? Does it mean "to warn, to give notice to, to inform, to notify, to make known to"?

Or does it mean some sort of high-powered skull-duggery involving sky-scrapers, Hollywood blondes, billboards and singing commercials?

The first definition was written by Webster (not the senator, the gentleman who wrote a dictionary). The other concepts are the result of a rash of lampoonery of advertising which, while some of it may contain a grain of truth, looks to me like biting the hand that is not feeding you.

The big, bad novel about advertising at its blooming worst was called "The Hucksters," a best seller highly salted with erotica which has been turned into a movie. There is no accounting for tastes, and I won't object if you see the picture and like it. All I ask: "Don't accept the advertising sequences as the literal truth.

There is much about advertising I could loudly decry (and often do) at the risk of biting the hand that is not feeding me. But there are "hucksters" who are undertaking projects of a very decent sort of which you may not be aware.

Maybe in these past few months you've asked yourself: Why doesn't somebody DO something about a lot of things.

Something about the people killed or injured in automobile accidents every year.

Something about housing. The war ended two years ago. Yet the land of the free still isn't providing homes for the brave. Shame on all of us!

Something about the shortage of medical services. Patients are neglected, hospital wards closed because the nation desperately needs nurses. Training them is a long-range, national job.

Something about world trade. Our economic future depends on unhampered world trade. Yet pressure groups make our world trade a football for selfish interests.

Something about the nation's health. Between the ages of 15 and 34, tuberculosis is our greatest killer. At any given time. 500,000 people have it. But they don't know it. Alarming? You bet it is.

Something about our kids. Your children are getting a rough deal in school. Too few teachers. Too antiquated equipment, old textbooks or none at all. Make you mad? It should.

What has all this to do with advertising? Just this: The above words were copied from an advertisement, a full-page advertisement in a recent New York Times, and perhaps other papers by this time

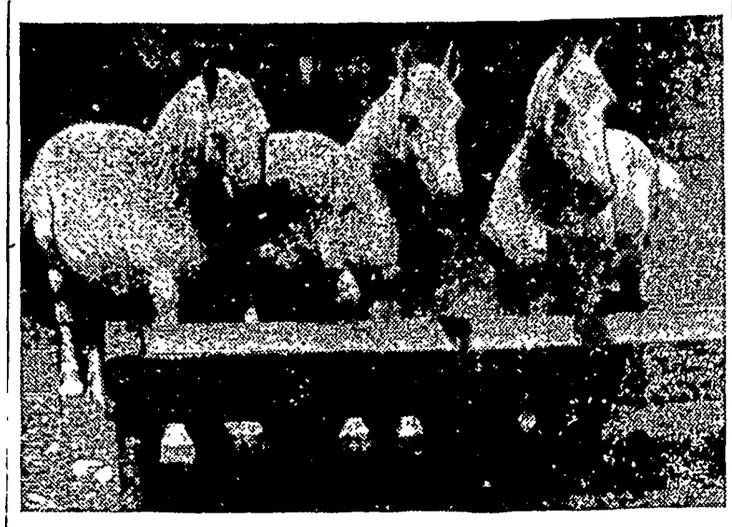
It isn't an ordinary ad. It is not directed primarily to the people without homes, without nurses, it is directed to the persons and organizations who can help bring these facts home to the general public—to you. It is an ad written by and about the Advertising Council, concerning an operation of which almost everybody is conscious but about which few people know the details.

It is an operation based on giving away what the givers ordinarily sell—advertising space, advertising ideas, advertising copy. It answers the question: "Why doesn't somebody DO something?" The reply is—it's given in works as well as words—"Somebody IS."

The council grinds nobody's axe except yours, the public's, seeks no profits, asks no expense account, has only one objective: To make America a still better place than it already is.

The Advertising Council was born a week after Pearl Harbor when Donald Nelson, about to take over chairmanship of the war production board, called in a group of advertising executives and discussed with them what the average citizen could do to help victory—and incidentally, what would make him do it.

Now you are reading and hearing the results of the council's peacetime efforts—they are embodied in the various forms of advertising of many firms, as spots on the radio, many other places. The council is providing suggestions, ideas, radio fact sheets and other material to members of business firms, unions, civic groups and other citizens who can put that tremendous power, advertising, to work personalizing big national problems.



NOSTALGIC SCENE . . . A scene dear to the hearts of old-timers is that of mares at the watering trough. These three Percherons are typical of the many blue-bloods who will be rounded up from farms throughout the U. S. to compete at the National Percheron show August 23-29 at the Ohio state fair in Columbus.

NEWS REVIEW

Aid to Poland Cancelled; Reds Delay Jap Treaty

POLAND AID:
Canceled

Following a report by a U. S. survey mission that Poland has enough food to meet her minimum requirements at least for this year, the state department canceled Poland's share of the 350 million dollar American relief program.

In its announcement, the state department said that special items, such as medical supplies and supplementary foodstuffs for particular groups, could be supplied Poland through private relief agencies and other organizations.

The announcement added:

"In view of the above and of the fact that funds available are sufficient to meet only the most urgent relief needs, it has been decided not to undertake a relief program for Poland."

Next on the list, according to indications, might be Hungary, where better crop prospects are in sight.

The state department said that the decision to cut off relief to Poland was based entirely on the relative needs of European countries. No official comment was made on the fact that Poland is well within the Soviet sphere of influence and that Hungary is definitely Communist-dominated.

NEW SPLIT:
Peace Treaty

Russia's rejection of the United States proposal for drafting a Japanese peace treaty is showing up as another breach in the already badly weakened structure of American-Soviet unity.

In addition, it may delay indefinitely work on a peace treaty for Japan which, the United States contends, is an absolute necessity if the conquered nation is to get back on its economic feet.

American proposals for beginning the task of writing a treaty on August 19 were turned down by Moscow on the grounds that the U. S. was attempting to act unilaterally and without having made any previous agreements with Great Britain, China or Russia.

Major question now facing the United States and other nations interested in making progress on a Far East peace settlement is whether to go ahead with the writing of the Japanese peace treaty without Russia.

GUN TOTER:
Coincidence

For a few minutes Washington police thought they might have a would-be assassin on their hands when they picked up a man carrying a gun inside the capitol just after President Truman had made a visit to the senate chamber.

But Clifton R. H. Spires, 39, of Augusta, Ga., arrested on a charge of carrying concealed weapons, appeared more confused than anyone else about the affair. He seemed to think that he had a grudge against "the big shots in Washington," but apparently held no animosity toward the President.

Later, he was sent to a Washington hospital for observation.

The coincidental appearance of President Truman in the senate chamber was the result of a dare which he took while having lunch with some of his former colleagues from the senate. He spoke for five minutes from the seat he held as the senator from Missouri, dwelling largely on the "auld lang syne" theme.

READING PUBLIC:
49 Per Cent Heard

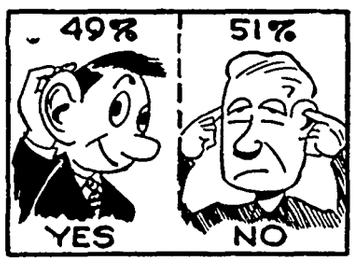
It is probably a safe surmise that Secretary of State George Marshall was shocked clear down to the bottom of his briefcase when a Gallup poll revealed that only about 49 per cent of America's voting population had heard or read of his celebrated plan for repairing and rebuilding Europe's shattered economy.

On the other hand, he could take some consolation from the fact 57 per cent of those who were aware of the Marshall plan also approved of it.

(The plan, in simple terms, was a suggestion to the European nations that they get together to work out their economic salvation on a cooperative, self-help basis. Playing a major role in financing the recovery would be American money—obtained through taxation of both the 49 per cent who had heard of the plan and the 51 per cent who hadn't.)

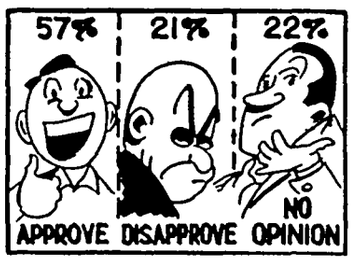
Here is the first question which Gallup pollsters asked:

"Have you heard or read about the Marshall plan for helping Europe get back on its feet?"



Those who had heard of the plan were asked:

"What is your opinion of the plan?"



As a footnote, the poll disclosed that while public opinion was generally in favor of Marshall's proposal, support would decline sharply if taxes had to be raised in order to put it through.

NOT ALL OUTGO

Peak Foreign Income Reported

WASHINGTON.—Compensating in an infinitesimal degree for the vast sums of United States money which have flowed abroad during the post-war era for relief of devastated countries, earnings on American investments in foreign countries reached a new peak of 520 million dollars last year, it is revealed in a department of commerce survey.

The return, highest in history, surpassed by 18 per cent the best year of the 1930s and was well above the preceding peak of 474 million dollars earned in 1928. For 1938, top year of the '30s, the figure was 440 million dollars.

The higher return was largely attributed to an increase of direct investments abroad.

These are direct private business investments—not government loans. They include principally foreign branches and subsidiaries of American enterprises and foreign companies in which Americans own more than 25 per cent of the voting stock.

About one-half of the 1946 income, or 273 million dollars, was received from Latin America, and one-fourth, 126 million dollars, from Canada. The remaining fourth was divided between Europe, Asia, Africa and Oceania.

Among the countries involved, Canada has consistently occupied first place. Countries next in importance in providing income on American direct investments were Venezuela, Chile, the United Kingdom, Cuba, Argentina, Brazil and Mexico.

Largest single income producer was the petroleum industry, which accounted for 170 million dollars in 1946. Manufacturing was second with returns approximating 130 million dollars.

Mining and smelting produced 65 million dollars; public utilities, 50 million; agriculture, 45 million; distribution industries, 40 million, and other industries, 20 million.

Motive Behind Greek Revolt

ACCORDING to the diplomatic grapevine from Athens, the so-called Communist uprisings inside Greece were carefully timed—not by the Communists, but by the Tsaldaris-Maximos government—to coincide with the departure from the U. S. of former Gov. Dwight Griswold, Greek aid administrator for Athens.

The Greek government's motive is to convince Griswold that the Tsaldaris-Maximos regime is essential to the security of the country and must remain in power

Actually, what happened was that the E A M., or so-called Communist group, was holding conferences with Prof Alexander Svolos of Athens university just a few days previously with a view to a political compromise by which they could resume participation in Greek political affairs under U. S. protection, when, suddenly, about 4,000 of them were arrested.

U. S. diplomats are pretty well convinced that there can be no political stability in Greece and no success for the American aid program if the present reactionary Greek regime remains in power. Even patient Ambassador Lincoln MacVeagh is reported to have come to this conclusion. To counteract this, Tsaldaris is doing his best to convince Griswold that there would only be more chaos if the present Greek government resigned.

WALTER WINCHELL

Notes of a Bystander

The Late Watch: Many of the women up at the Columbia university faculty section are reported soooo fluttery over General Eisenhower's appointment. They're all getting perms, new fall outfits, etc. . . . Observation: In the papers a photo of Harry Truman's birthplace disclosed that it now is occupied by a loan firm!

The Keeley institute of Illinois (where drunks are dried up) explodes the cinematic legend that newspaper men are rumpots. Out of 12,012 palcoholics treated there (between 1930 and '46) only 95 were newspaper men. The others were architects, brokers, bankers. But topping the list for worst tipplers (hold 'er, Newt!) were farmers.

The Show Folks: The hat-check lass named Helen Westcott started playing in "The Drunkard" 13 years ago as the baby. As understudy to all the femmes in the cast (although she rarely goes on) she is the troupe's most useful member. Helen can play all the roles, and has.

Quotation Marksmanship: M. K. Johnson: She nagged him into another woman's life. . . . Hecht-O'Rourke: He's the vice of experience. . . . Percy Faith: Her eyes lit up like two vamps. . . . Corey Ford: She learned to say things with her eyes that others waste time putting into words.

PAUL MALLON

1948 Race Is Like a Pretzel

THE political situation is shaping up like an unterminated pretzel. You can see the curves up to now plainly enough. But where the dough maze will wind up, nobody knows.

Dewey went out to make character in the West. From New York with 96 convention delegates, he went out to the six delegate states, not to gather party votes, as popularly supposed, but chiefly to gather a 10-gallon political disposition. Candidates often make the same trek for the same purpose at this stage.

If Dewey went after delegates, he should have come down to Washington to see the Republicans in both houses of congress. This is where the delegates are. Senator Martin has the 76 or so from Pennsylvania in an inside pocket. Senators Taft and Bricker could tell Dewey about Ohio, and probably also Indiana and Illinois, although it might not be anything Dewey wants to hear. Speaker Martin could issue Massachusetts and probably all New England like script. Harold Stassen could tell him about Minnesota and perhaps Iowa; Wherry about Nebraska; Baldwin about Connecticut, and so on.

Dewey could take a pencil and paper, come to Washington at much less railroad fare and ascertain he lacks a majority of delegates without favorite son support. He might win a few primaries next spring and show some strength (this is what he is figuring on, they say) in which case the boys might come up to his backroom at Albany.

So while Dewey is supposed to be making a runaway race out of it, no one will predict where he goes from here. Taft is going west himself, and will identify himself while there as the only prominent opponent of Dewey to date.

Comments on the Day's News

VANISHING AMERICANISMS
"Remember, we have to hold our customers!"

—•—

"One overcharged patron is a lost patron."

—•—

"Our job is to make the customer feel he got his money's worth."

• • •

Rationing is coming back, it is freely predicted, there being no other way that we can send to Europe the things required. Everything "POINTS," as it were, that way.

• • •

One nice thing about war in the old days was that you could almost always tell when it was over.

J. Caesar Petrillo admits before a house committee that he draws down about $60,000 a year, which we assume helps immeasurably to sustain his love of music.

• • •

"I don't think the cause of atomic energy has been served by this disclosure of the theft of certain data." —Senator Hickenlooper.

—•—

The cause, we take it, is better served by just letting the secrets be stolen and saying nothing about it whatever. In short, the senator believes that whether the bomb should be dropped or not, the matter of its proper protection should be.

WALTER SHEAD

Congress Plays Good Samaritan

THE senate was about to convene for a political discussion of export controls. The Rev. Peter Marshall, chaplain, asked Divine Guidance and said:

"May freedom be seen not as the right to do as we please, but as the opportunity to please to do what is right. May it ever be understood that our liberty is under God and can be found nowhere else. Let us, as a nation, not be afraid of standing alone for the rights of men, since we were born that way, as the only nation on earth that came into being 'for the Glory of God and the advancement of the Christian faith.'"

And in answer to an objection by Senator Taft over continuing export controls on fats and oils as "illogical," Sen. Alexander Wiley of Wisconsin said:

"There is such a thing as the higher logic of the mind and soul. Our responsibility is to keep our own economy healthy and at the same time attempt to perform the function of the Good Samaritan in helping to make other peoples adequate."

In debate over farm price supports, Sen. Milton Young of North Dakota said price of wheat in the Argentine without controls was between $5 and $6 per bushel. Arguing for continuing controls, Senator Young said American farmers would be tickled to sign a contract for five years at $1.50 a bushel rather than face the possibility of $5 wheat this year and probably 30-cent wheat in a couple of years.

WRIGHT PATTERSON

Military Training Will Aid Youth

UNIVERSAL military training would instill in young men the two essentials of the soldier's life—discipline and endurance.

These two essentials come from training, and with that training comes a physical hardening that adds stamina. Universal military training would give to our young men those two first essentials, and, temporarily, the physical hardening.

We may not, we hope we do not, have to fight another war, but war or no war, military training for all the young men of America will make for a better and more successful citizenship. It will give to that large percentage that needed training they have not had.

in Money Making ans for Your Club arly in the Season

is luscious combination of pkin and pastry with a prune whipped cream topping es a good combination that plenty of sales appeal.

rhaps many of you who are of- of clubs already have planned programs the whole . Undoubted- ey include a ber of fund ng schemes h are de- ed to take of worthy es.

e of the most successful cam- ns of many groups includes sales goods baked by members. In of course, cakes, cookies, et ra are donated by the women purchased by the club mem- , so all profit is clear.

ow that sugar, fats and flour back again on a prewar basis in ly, at least, it's possible to plan akery goods sale of this type. case there's a problem about t to include, I've lined up sev- sure-fire recipes which can e as the nucleus of the sale. s them out to those who don't w just "what to make."

Prune Spice Cake.
(Using oblong pan)

½ cups sifted cake flour
teaspoon baking powder
teaspoon soda
¼ teaspoon salt
teaspoon cloves
teaspoon allspice
teaspoon cinnamon
½ cup shortening
1½ cups sugar
eggs, well beaten
cup cooked prunes, seeded and chopped
cup sour cream

ift the dry ingredients together ice. Cream shortening, add sugar adually, and beat until light and ffy Fold in eggs and prunes. Add ingredients alternately with ur cream and beat well after each dition. Bake in a greased oblong n in a moderate oven for 45 min- es. Let cool and frost with:

Mocha Frosting.

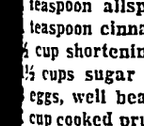
4 cups sifted powdered sugar
⅓ cup cocoa
¼ teaspoon salt
¼ cup butter or substitute
cup strong coffee
1½ teaspoons vanilla

Sift dry ingredients together and eam with butter. Add coffee and nilla to make of a smoothly preading consistency.

***Graham Cracker Torte.**

½ cup butter
cup sugar
eggs, separated
teaspoon vanilla
Grated rind of an orange
½ cup flour
teaspoons baking powder
½ pound graham crackers, rolled
cup milk
½ cup shredded coconut

Cream butter and sugar. Add well eaten yolks, vanilla and orange rind. Add sifted dry ingredients and cracker crumbs alternately with milk.



old in coconut and stiffly beaten gg whites. Bake in two layers in moderate (375 degree) oven for minutes. Let cool, then place ustard filling between layers and rost with orange icing.

Custard Filling.

½ cup sugar
1 tablespoon cornstarch
⅛ teaspoon salt
2 egg yolks

LYNN SAYS:

elp Yourself and Solve our Kitchen Problems

If potatoes don't seem as white as ey should be when you are mash- g them, beat a small amount of aking powder into them.

Use a hot blade for slicing fresh read, a wet blade for cutting resh cake, and a very thin, sharp lade for slicing cookie dough.

Keep the inside of your coffee pot lean by boiling a solution of soda nd water in it at least once a week. his removes stains.

LYNN CHAMBERS' MENU

Veal Roast with
Sour Cream Gravy
Buttered Noodles
Fried Tomatoes
Green Beans with Mushrooms
Cinnamon Rolls
*Graham Cracker Torte
Beverage
*Recipe given.

1 cup scalded milk
½ teaspoon vanilla

Mix dry ingredients, add egg yolks, slightly beaten. Pour in milk gradually. Cook in double boiler until smooth and thick, stirring constantly. Cool and fold in flavor

Orange Icing.

2 cups powdered sugar
4 tablespoons butter
4 tablespoons milk or orange juice
1½ teaspoons orange flavoring
Grated rind of an orange

Cream sugar and butter, add remaining ingredients.

Peanut Butter Cookies.
(Makes 3 dozen)

½ cup shortening
½ cup peanut butter
½ cup granulated sugar
½ cup brown sugar
1 egg
1¼ cups flour
¼ teaspoon salt
¾ teaspoon soda

Cream peanut butter with shortening. Add remaining ingredients in order given. Shape chilled dough into small balls and place on a baking sheet. Flatten with a fork dipped in flour, making a criss-cross design on the cookie Bake in a quick, moderate (375-degree) oven for 10 to 12 minutes Let cool slightly before removing from tin.

Prune Pumpkin Pudding Pie.

2⅔ cups cooked or canned pumpkin
1⅓ cups milk
4 eggs
¾ cup granulated sugar
¼ cup light molasses
1 teaspoon salt
1 teaspoon cloves
3 teaspoons ginger
3 teaspoons cinnamon
1 teaspoon allspice

Have as much variety as possible when you plan such money-raising activities as a sale of baked goods. A plan of some kind made up ahead of time will eliminate too much duplication.

Pastry

1½ cups cooked prunes
⅓ cup granulated sugar
⅓ cup light corn syrup
1 teaspoon cinnamon
¼ teaspoon salt
2 teaspoons plain gelatin
2 tablespoons cold water
1 cup whipping cream

Combine pumpkin, milk and unbeaten eggs; beat until well blended. Combine sugar, molasses, salt and spices; mix well and stir into pumpkin mixture. Pour into pastry-lined pan and bake in a very hot (450-degree) oven; reduce heat to moderate and continue baking 45 to 50 minutes or until custard is set. Cool.

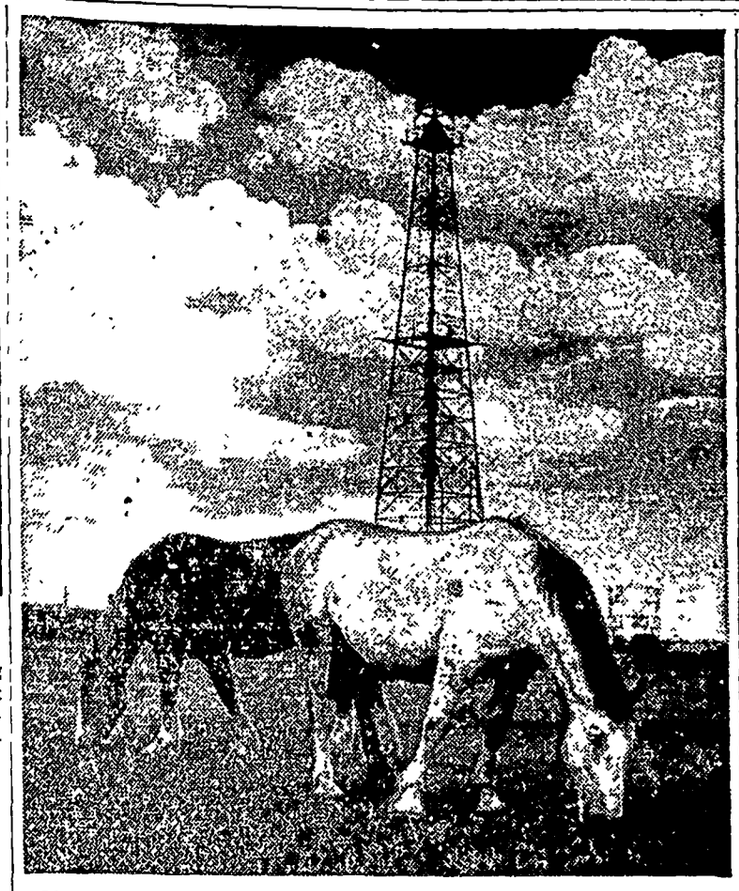
Measure prunes, remove pits and cut prunes into small pieces. Combine with sugar, syrup, spice and salt and heat to boiling. Remove from heat, add gelatin moistened in cold water and stir to dissolve. Cool. Whip cream and fold into prune mixture. Spread over baked pumpkin pastry. Chill.

Released by Western Newspaper Union.

Place paper or paper toweling on table when paring vegetables and fruits, breaking eggs and measuring so that you can just fold it up and have a clean working surface when finished.

Keep seasoned flour in a bag already for seasoning chops, vegetables, chicken, et cetera.

Greased muffin cups are ideal when baking tomatoes, apples, green peppers and stuffed onions. These cups may be set in a large pan or cookie sheet to make them easy to move in oven



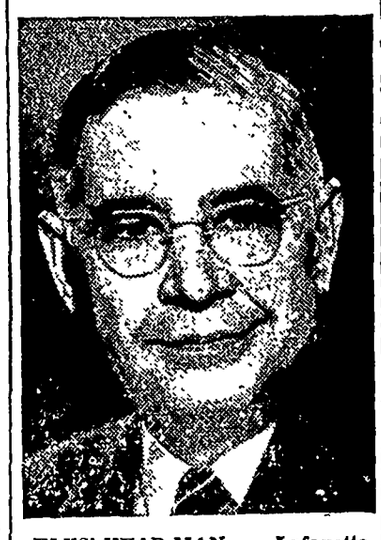
OIL AND HORSEPOWER . . . It is a sure indication that progress is under way across the land when old ways and new ways exist side by side for a time in the same bailiwick. At Leduc, Alberta, Canada, these days horses are grazing in the skeleton shadows of oil derricks because what was once an important agricultural area recently has come to be an even more vital source of petroleum. Ten oil companies already have launched major operations near Leduc and five wells have been brought in. First oil strike in the region was made in February.

EISLERS AT COURT . . . Gerhardt Eisler, described as the No. 1 Communist in the United States, and his wife leave U. S. district court in Washington, D. C., where Eisler is being tried on passport fraud charges. The government is scheduled to present further evidence that Eisler made several trips to this country to whip the American Communist party into the Moscow line. Eisler previously heard an admitted former Communist testify that every American Communist is an agent of the Communist Internationale.

LABEL FOR GIFTS TO GREECE . . . Rep. Leo E. Allen (Rep., Ill.) and John Baer, cartoonist and former congressman from North Dakota, display the emblem submitted by Baer for house approval in connection with a bill introduced by Allen for the labeling of all goods donated by the U. S. to the relief of war-torn countries. The measure would provide that indelible markings on all such gifts tell their origin, destination and unsalability.

STACKS OF MONEY—ALL BAD . . . Deputy United States Marshal Doris Brown embraces the mountain of bogus $10 bills found on highway south of St. George, Utah, and brought to Los Angeles by secret service agents. The pile of counterfeit bills was estimated to represent about $150,000 at face value.

SEEK WORLD'S OPINION . . . Eugene Pulliam, Indianapolis, Ind., newspaper publisher, and his wife scan world atlas preparatory to leaving on world tour to find out what the plain people all over think of the United States.



ELKS' HEAD MAN . . . Lafayette A. Lewis, Los Angeles attorney, has been elected grand exalted ruler of Benevolent and Protective Order of Elks.

LEADS DUTCH FORCES . . . Lt. Gen. S. H. Spoor issued an order of the day announcing opening of hostilities between Dutch forces and Indonesian troops, following collapse of negotiations between Dutch and Indonesian governments.

CINDERELLA MAN . . . Ross Lockridge Jr., professor of English, father of four children, was down to his last $100 when he heard that his first novel, "Raintree County," had won Metro-Goldwyn-Mayer novel award — worth $150,000.

NEW SECRETARY . . . Kenneth Royall was appointed by President Truman as secretary of war to succeed Robert Patterson, who resigned after seven years in the war department. Royall was undersecretary of war.

THE HOME TOWN REPORTER IN WASHINGTON

WALTER SHEAD, WNU Correspondent

Deserted Midway

WASHINGTON resembles somewhat a county seat town the morning after closing the annual street fair. Tents are still up, the booths are all there but the exhibits have been removed and there remain a few stragglers poking amid the debris and the rubbish. But the star performers along the midway have long since departed since the 80th congress adjourned its first session

to meet again January 1 unless called into special session by the President.

Measured by the results of other congresses, the accomplishments of this first session of the 80th congress on major legislation are puny.

It slashed some appropriations, not enough to boast about but sufficient to cripple government services, it passed what has been termed a "bootleg" labor law which is as full of loopholes as a sieve, some parts of it are unconstitutional, and the predictions are from both labor and industry that it will not remain long on the statute books in its present form.

• • •

For the Record

Twice congress passed a tax reduction bill conceded even by its proponents to be political and inequitable and twice it was vetoed by the President. It passed a presidential succession resolution providing that the speaker of the house shall succeed next in line to the vice-president; this, however, is a constitutional amendment which must be ratified by two-thirds of the state legislatures It did nothing about high prices and it virtually ended rent controls, and as a result prices of everything the consumer buys have soared to unprecedented heights and rents already are up.

• • •

Congress left unheeded among the debris strewn in its wake such vital measures as the anti-monopoly bill, several measures to aid veterans of World War II, the minimum wage bill, measures to aid education and to increase pay of school teachers, a national health bill, the extension of benefits of social security legislation to include all the people, the various regional river authority bills to create TVA set-ups in the Missouri, Columbia and other river basins, and adequate housing legislation.

• • •

In addition, despite specific provisions of the 1946 congressional reorganization act, congress failed or refused to conduct the affairs of the government on a business basis in setting up minimum of expenditures and then cutting the tax cloth to fit. It even has failed to follow its own reorganization act.

• • •

Sen. Robert A. Taft of Ohio and Rep. Fred A. Hartley Jr., of New Jersey are joint authors of the Taft-Hartley labor bill.

Said Taft of the John Lewis coal contract: "I don't think it is in any way a violation of the law."

Said Hartley about the John Lewis coal contract: "The new contract looks like collusion between the operators and the union to force small companies out of business."

• • •

Control—But Not Floods

Cost of the disastrous flood on the Missouri river alone has been estimated at 500 million dollars in loss of topsoil and erosion, and more than 250 million dollars in property damage, a total of 750 million dollars. For as long as records have been kept, the average annual loss of flood and drouth damage in the Missouri valley has been 100 million dollars. Total cost of TVA to date has been 782 million dollars.

Yet an indifferent congress and greedy private enterprise so far have effectively dammed up any action to create an MVA to harness the Missouri.

• • •

Rising Costs

Even the cost of enshrining legislative hot air in the pages of the Congressional Record has soared somewhat in the past year, members of the 80th congress learned. Twelve months ago the priceless words of a congressman or senator could fill one page of the Record for approximately $60. Now, according to A. E. Gigengack, public printer, it costs $71 to print a single page of the always bulky legislative record

Touch Typewriting Can Be Self-Taught

A Valuable Asset

IT PAYS to know how to type—whether you're at home, on the job or going back to school. There are accounts to keep, letters to write, recipes to copy—dozens of times when the typewriter would come in handy.

* * *

You can easily teach yourself to type at home. A keyboard chart shows you how to place your fingers on the machine. Exercises and drills give you speed.

Send 25 cents (coin) for "Touch Typewriting Self-Taught" to Weekly Newspaper Service, 243 West 17th St., New York 11, N. Y. Print name, address, booklet title and No. 13.

Hollow Earth Theory Had An Entrance at North Pole

John Cleves Symmes, in hundreds of lectures between 1818 and 1829, attracted world-wide attention with his claim that the earth was a hollow sphere whose interior was inhabited and could be reached through a large opening at the North Pole, since known as Symmes' Hole, says Collier's.

Of several globes made to illustrate his theory, one is preserved in the Academy of Natural Sciences in Philadelphia.

HIGH-SCHOOL GRADUATES!

NURSING IS A PROUD PROFESSION!

—many opportunities for graduates in fine hospitals, public health, etc.
—leads to R. N.
—a well-prepared nurse need never be without a job or an income.
—open to girls under 35, high-school graduates and college girls.
—ask for more information at the hospital where you would like to enter nursing.

Watch Your Kidneys!

Help Them Cleanse the Blood of Harmful Body Waste

Your kidneys are constantly filtering waste matter from the blood stream. But kidneys sometimes lag in their work—do not act as Nature intended—fail to remove impurities that, if retained, may poison the system and upset the whole body machinery.

Symptoms may be nagging backache, persistent headache, attacks of dizziness, getting up nights, swelling, puffiness under the eyes—a feeling of nervous anxiety and loss of pep and strength.

Other signs of kidney or bladder disorder are sometimes burning, scanty or too frequent urination.

There should be no doubt that prompt treatment is wiser than neglect. Use *Doan's Pills*. *Doan's* have been winning new friends for more than forty years. They have a nation-wide reputation. Are recommended by grateful people the country over. *Ask your neighbor!*

DOAN'S PILLS

HANCOCK COUNTY BOARD PROCEEDINGS

THE ADJOURNED JUNE MEETING

Garner, Iowa
July 28, 1947

The Hancock County, Iowa, Board of Supervisors met in session on above captioned date pursuant to adjournment with F J Schoun, John Chambers, and Geo. Th Gerdes, present

The minutes of the last meeting were read and approved as read

WHEREAS, the actual cost of same and travel for such service shall be designated by the County Director of Social Welfare and such items to be paid for by the county

BE AND IT IS THEREFORE RESOLVED BY THE Board of Supervisors of Hancock County, Iowa, that an agreement be entered into, with the State Department of Social Welfare, whereby the County Director of Social Welfare shall devote a part of his time as service to veterans the actual time and travel so devoted to be designated by him and paid for by Hancock County, Iowa.

WHEREAS, C F Merten has to report that Bill Heller of Carter Lake, Iowa, has completed his contract for the cleanout of Lateral No. DD No. 3 and 4, Hancock County, Iowa, to his entire satisfaction, and

WHEREAS there is due on said contract a final payment in the sum of $193 20

Be and it is therefore RESOLVED by the Board of Supervsors, acting for and in behalf of Lateral No. 3 and 4, Hancock County, Iowa that the report of the Engineer be and the same is hereby tentatively approved and further hearing thereon will be held at the courthouse in Garner, Iowa, at 1 P. M. on the 16th day of August A. D., 1947

The County Auditor be and he is hereby directed to cause notice of such hearing to be given as by law directed

On motion and second the contract with the State Highway Commission on Hancock F A 892 is approved and Chairman John Chambers is authorized to execute said contract in behalf of Hancock County, Iowa.

On motion and second the contract for purchase of real estate with Edna M Schlick and Fred Schlick is approved and Chairman J A Chambers is hereby authorized and ordered to execute said contract in behalf of Hancock County, Iowa.

On motion and second the bond of Concrete Products Corporation, Humbolt, Iowa, on DD No. 147 is approved.

This being the 28th day of July A. D., 1947, a date heretofore set for a letting having purchase of two carloads of bridge lumber, the hour for said letting having arrived, the proof of publication being on file and the Board being fully advised said letting was held as scheduled The Chairman proceeded to open all bids on file and after duly considering all bids on file the Board finds the bid of the Wheeler Lumber Bridge & Supply Company of Des Moines, Iowa, was found to be the lowest and best bid therefore.

BE AND IT IS THEREFORE RESOLVED by the Board of Supervisors in and for Hancock County, Iowa, that the bid of the Wheeler Lumber & Supply Company of Des Moines, be accepted as the lowest and best bid for two carloads of bridge lumber - - one carload treated and one untreated and they are hereby awarded a contract therefor All other bids are hereby rejected

Chairman J A. Chambers is hereby authorized to execute said contract in behalf of Hancock County, Iowa.

WHEREAS, the Superintendent of the hospital at Woodward, Iowa, has certified to the County Auditor of Hancock County, Iowa, claims in the aggregate amount of $1529 61 on account of the case and support of Gladys Irene Brogan, and whereas it appears that said mount is not collectible,

And, WHEREAS, Kenneth F Boughton has offered the sum of $200 00 in full settlement and compromise of said claim

And, WHEREAS, it is deemed to the best interest of Hancock County, Iowa, and to its best welfare that said offer be accepted

NOW THEREFOR BE AND IT IS HEREBY RESOLVED that said offer of $200.00 be and same is accepted and upon payment of said amount to Fred C Missal, County Auditor, he is directed to issue full receipt thereof and is directed to correct his records accordingly and show on his records full release and satisfaction of aid claim as of this date, and any purported lien on any real estate owned by Vera B. Boughton is hereby released and declared free of any lien created by said claim

The foregoing resolution was read and offered by Supervisor Geo. Th. Gerdes and second by Supervisor Frank J Schoun and John A. Chambers, Chairman, put the motion upon its adoption and upon the roll, the vote was as follows Geo. Th Gerdes, John A. Chambers, Frank J Schoun, aye - nays - none.

Whereupon the Chairman declared the resolution duly adopted.

WHEREAS, C F. Merten, Engineer, Walter Kahl and Wm. Boehnke, were heretofore appointed Commissioners to view, classify lands and assess benefits in the watershed of DD No. 145, Hancock County, Iowa, all in accordance with Chapter 455 Code of Iowa, A. D., 1946, and laws amendatory thereto.

WHEREAS, said commissioners did qualify as by law directed and did view said lands and did access benefits as by law directed and did file their report on the 25th day of July, A. D., 1947, which report ets out in detail the assessement against each tract and parcel of land and highway in the district, as directed by law

BE AND IT IS THEREFORE RESOLVED by the Board of Supervisors of Hancock County Iowa acting for and in behalf of Drainage District No. 146 Hancock County, Iowa, that the report of the Commissioners heretofore appointed to classify lands in the watershed of DD No. 145, Hancock County, Iowa, is tentatively approved and a hearing thereon will be held at the Courthouse in Garner, Iowa, and the 8th day of September, A. D., 1947, at the hour of 1 30 P M., at which time taxpayers in said district will appear and show cause why said classification and assessment designated shall not be accepted and assessment taxed against the lands in the watershed of DD No. 145, Hancock County, Iowa. All objections to such assessment of benefits shall be filed in writing in the office of the County Auditor in Garner, Iowa, at or before the time set for hearing thereon.

The County Auditor be and he is hereby directed to cause notice of such hearing to be published in the Klemme Times, a newspaper of general circulation published at Klemme, Iowa, setting out the names of owners of lands in DD No. 145, Hancock County, Iowa, together with the description of the real estate and the designated assessment, each tract, parcel of land, highway and railways in the district is charged with.

In the matter of the reconstruction of DD No. 101, petitioned for by the Trustees of Ellsworth College, Rush Gabrielson, et al.

WHEREAS, C. F Merten was appointed Engineer as commanded in Chapter 455 Code of Iowa, A. D., 1946, and laws amendatory thereto, on July 2, 1947, to make a survey, investigation and report on the feasibility and necessity of the reconstruction petitioned for in DD No 101, a sub-district of Hancock County Drainage District No. 1 and 2, and said Engineer did file his report on July 26, A D., 1947, which report states that he has investigated and surveyed the lands in DD No. 101 and finds the present system of drainage is inadequate and recommends that District No. 101, a sub Drainage District of DD No. 1 and 2, Hancock County, Iowa, be reconstructed as requested in the prayer of the petitioners and that such improvement will be conducive to public health, convenience and welfare and will be of greater benefit than the cost thereof

BE AND IT IS THEREFORE RESOLVED by the Board of Supervisors of Hancock County, Iowa, acting for and in behalf of Drainage District No. 101, a sub-district of Hancock County Drainage District No. 1 and 2, that the report of the Engineer be and the same is hereby approved as a tentative plan and my be amended before final action thereon and said report of the Engineer and plan shall come on for further hearing at the Courthouse in Garner, Iowa, at 10 30 A. M on the 15th day of September A D. 1947

BE IT FURTHER RESOLVED that the County Auditor be and he is hereby directed to cause notice of hearing on the report of the Engineer and plan of said improvement to be published in the Britt News Tribune, a newspaper of general circulation, published in Britt Iowa, advising all owners, occupants, lienholders and encumbrancers of record in the proposed district of the petition on file for reconstruction, the favorable report of the Engineer thereon the approval of the Hancock County, Iowa, Board of Supervisors of the report of the Engineer as a tentative plan and that same may be amended before final action thereon and that all claims for damages and all objections to such reconstruction shall be in writing and must be filed with the County Auditor at or before the time set for the hearing thereon

The foregoing resolution was offered and read by Supervisor Schoun who moved its adoption and was seconded by Supervisor Gerdes, whereupon the Chairman placed the motion of its adoption and upon roll call the vote thereon is F. J. Schoun, Geo. Th Gerdes and John A Chambers, aye Nays None Whereupon the Chairman declared the resolution duly adopted.

On motion and second the Board adjourned to August 4, A D., 1947 at 9 o'cloc.

LAST CALL FOR SPORTS FESTIVAL CONTESTANTS!

Remember the County Sports Festival, Tuesday, August 19 at the school grounds in Kanawha To make this festival a real sucess, there must be lots of entries, and people with lots of enthusiam.

Clark Lackore, committee for the festival, announces the different divisions, and hopes there will be a good number of entries in each division. They are as follows baseball throwing for distance, basketball free throw contest, chair quoits, clock golf; dart throwing, dashes; horse shoe pitching, nail driving; 4-H boys 440 yard relay; softball, tug o'war; football passing and kicking for distance; bait casting, 4-H relay--girls shuttle

Bring a picnic lunch and plan to stay for a whole day of fun and excitement.

PREDICT REAL TEST FOR LAMB FEEDERS

This year will be a real test for Iowa lamb feeders says Francis Kutish, Iowa State College agricultural economist.

Feeding efficiency, and ability to hold down death losses will be especially important Feed costs are to be sharply higher, and margins of profit closer

Recent reports show Western lambs 11 percent fewer than last year It's the smallest crop since 1925

Range conditions have been good and there will be a high percentage of fat lambs, too

Kutish thinks demand for feeder lambs is likely to be strong this year Profits from lamb feeding have been good for several years Last year's profits were exceptional Usually this means a good demand for breeder lambs the following year

One factor which tempers this outlook is the uncertain corn situation

Demand for fat lambs next winter is largely hooked up with general business conditions. Much of the lamb is consumed in the east If the factory worker's check is high there, demand for lamb will be good

There won't be so many lambs going to market this winter, and that should strengthen the price.

Lambs do have two advantages over feeding cattle at times like these They can use more high quality roughage, and the turnover is faster because you can finish lambs in 90 days

THIS MONTH'S TIME TO TRANSPLANT IRIS

It's a long time until iris bloom again next spring, but Iowa flower gardeners this month are doing planting and transplanting work

Established clumps should be lifted and divided when they have run together, advises Larry Grove, Iowa State College horticulturist. The divided clumps should then be transplanted.

Break the rhizomes apart into serveral medium sections.

A cupful of bone meal or superphosphate should be worked into the bottom of each hole along with two cupfulls of dusting gypsum or lime

The rhizomes should also be dusted.

Economists say there'll be more livestock to feed next fall. With a small crop likely this year, means using high-priced 1946 grain

WASH CREAM CANS JUST BEFORE THEY ARE USED

Putting milk and cream into cans which have not been washed just before using is a costly farm practice, says Iowa State College extension dairyman A. W Rudnick.

Milk and cream cans even though washed at the creamery are seldom clean enough to use without a rewashing. They may pick up dirt on the trip back from the plant and get dirtier still sitting outdoors or in some dusty building.

Even in a good milkhouse there is an accumulation of dust which makes washing before using a necessity

Hot water, containing a wetting agent, should be used to wash the cans Scrub the can with a soft bottle brush and then empty the water out while it is still in motion No further rinsing is necessary

After milk or cream is placed in the can the lid should be jammed down tight. A light 27-pound parchment paper, 15 inches across, forced down by the lid will act as a gasket and keep out much dirt. Smaller-sized paper is of no value and should not be used, Rudnick warns.

Tilting the lid should never be practiced Leaving the lid loose lets dust and dirt fall in more easily Animal heat will pass out in the cooling tank through the walls of the can

Adding warm milk to that already cooled should be avoided Rudnick explained that raising and lowering the temperature, even when the milk or cream is kept below 50 degrees, increases rancidity. Also, cream stored in the average cooling tank recools slowly after warm cream is added Adding the warm milk thus allows bacteria to multiply and increase

WEATHER IS CAUSE OF BLAST IN OATS

Results From Extremes In Light, Temperature And Moisture

Blast in oats is not a disease It is not a blight, nor is it caused by a parasite

Oats affected by blast fail to fill all kernels in the head Kernels, usually those on the lower one-third or one-half of the head either fail to form or are shriveled and small However, the rest of the kernels generally compensate for this to some extent by growing larger and filling out better

H C Murphy, senior USDA pathologist at Iowa State College, reports considerable misunderstanding of farmers over the state as to what blast is and what effect it has on oats.

Snow, Cold

Blast, according to Murphy, is a physiological condition which develops in the oat head as a result of extremes in light, temperature or moisture while the plants are growing The blast showing up this year is probably due to the snow and cold weather which blanketed the state late last May.

Seed from oats affected by blast can safely be used for planting, Murphy says. Since blast is caused by weather extremes and not from some internal parasitic disease, there is no danger of recurrence of the condition the following year from planting seed coming from blast-affected oats.

Squirrel And Rabbit Season Set

The Conservation Commission announces the opening of the squirrel and rabbit hunting seasons for September 1, with the opening of rabbits to continue through February 29, and squirrels being legal game through November 30 The dates, recommended by Commission biologists, were set by the Commission under provisions of the, law passed by the Fifty-second General Assembly, which authorizes setting open season dates for any period between September 1 and March 1.

The daily bag limit on squirrels was set at six with possession limit of twelve. The daily bag limit on rabbits is set at ten with no possession limit. The squirrel season was lengthened 30 days, the rabbit season shortened 31 days by the Commission action.

The season for quail and pheasant hunting will not be named by the Conservation Commission until fall and after the quail and pheasant censuses have been taken.

SPRAYING CATTLE WITH DDT MEANS MORE MILK

When Allen Powers sprays his Guernseys with DDT, milk production goes up

Powers, who lives south of Hampton, is now milking 20 cows. His herd has been sprayed twice this summer Recently he told Harold Gunderson, Iowa State College enomologist, that 2 days after each spraying, milk production went up from 5 to 6 gallons per milking It stayed up for 7 days or more, and then dropped back.

Gunderson did a little figuring One day's increased production from the Powers herd will almost pay for the spraying of the herd by a commercial spray operator, he estimated The remainder of the milk is pure profit

In checking livestock recently, Gunderson found that stable flies are beginning to show up Stable flies are resistant to DDT A solution of 1 pound of 50 percent wettable DDT powder in 10 gallons of water failed to get control in tests conducted both this year and last year

Gunderson advises a three—point program to help rid of this tough customer

1 Clean up the breeding spots of stable flies This means eliminating old stack bottoms and weed piles, and hauling away manure piles

2 Use a stronger spray From 2 to four pounds of 50 percent wettagle DDT powder in 10 gallons of water is suggested Even this won't keep cattle entirely free of the stable fly

3 Spray cattle at milking time with a commercial fly spray which acts as a repellent Such repellents won't kill flies, and their effects won't last long, but they will help keep cows quiet during milking

LIVE IN FORD

Housing conditions have been so scarce in Spencer recently that for the past month, Mr and Mrs Ray Felkhecher and two children have been keeping house in their 1938 Ford sedan

DROWNS IN CROCK

Tiny Raymond Martin, 13 months old son of Mr and Mrs. Russell Martin of Newell lost his life recently when he fell into a three-gallon crock full of lard Due to the warm weather, the lard was in liquid state The mother pulled him out in a matter of seconds but he was unconscious and could not be revived

FARMER BADLY INJURED IN FALL FROM LOAD OF HAY TUESDAY

Pete Christians, farmer living northeast of Klemme was taken to a Mason City hospital Tuesday afternoon after he had fallen from a truck piled high with baled hay

Mr. Chrisians was brushed off the load as the truck went under a tree and fell on his head, causing possible skull fractures, injured back and fractured ribs.

As The Times went to press the extent of his injuries had not been determined fully.

Protein is the most valuable substance in hay

SUNDAY SCHOOL LESSON

Straight Thinking About Drinking

LESSON TEXT FOR AUGUST 17—Proverbs 20 1, 23 19 21 29 35, Ecclesiastes 10 17

MEMORY SELECTION—Be not drunk with wine wherein is excess; but be filled with the Spirit.—Ephesians 5 18

EDITOR'S NOTE: Lesson subjects and Scripture texts selected and copyrighted by International Council of Religious Education, used by permission.

By WILLIAM GUILD TILSON, D D Of The Moody Bible Institute, Chicago

THE increase in the drinking habits of our nation is a source of concern, not only to the forces of morality, but to the liquor interests themselves. How strange it is to see the purveyors of a commodity urge moderation in its use!

Undoubtedly the Bible's answer to this whole problem is the only right one. The Word of God has many strong things to say concerning alcoholic beverages. Wise is the man who heeds the injunctions of Scripture.

I. Liquor—a Description (Prov 20 1)

WHAT a striking text this is! Think of its implications. "Wine is a mocker." It grasps its victim in a veselike grip and then lures him in his inability to release himself. The drunkard is a victim of his own appetite, helpless to resist the temptation which enslaves him.

The young person who takes his first drink for sociability is indeed deceived, in that alcoholic liquor never reveals the possible cost which it exacts from the one who takes that first drink. The better part of valor is to leave the stuff alone.

The Word of God says further that "strong drink is a brawler" (ASV). All of us have probably seen how the drunkard enters into conflict entirely without reason. Liquor seems to make a man senseless to danger and quick to express anger.

II. Liquor—a Warning (Prov 23 29-21)

THE admonition of this passage is that we should not be found among drunkards and gluttonous men.

Solomon here tells us of one of the results of drunkenness and gluttony—poverty. The drowsiness which is the result of both of these sins does indeed clothe a man with rags.

If, therefore, we have no higher motive than that of self-respect, than that of having enough of this world's goods to make a presentable appearance, we should avoid company with those who will lead us into the same excess that characterizes them. How important it is that we guide our hearts in God's way.

Let us understand, of course, that there are far higher motives for right living than those involved here. However, if we can come to the conclusion to avoid drinking on the basis of a lower motive, how much more important it is to come to the same conclusion on the basis of a higher one. As Christians, that higher motive concerns our testimony before men, our living a life that will cause others to want to know Christ, in short, our living for the glory of God.

III. Liquor—a Mystery (Prov 23 29-35, Eccles 10 17)

IN THE first of these Scripture passages we have what may be called a history of drunkenness. It sets forth leads to woe, to sorrow, to contentions, to wounds without a cause.

But that is not the end. Look carefully at Proverbs 23 32 and stress the first three words, "At the last." At the last, it does indeed bite like a serpent and sting like an adder.

Such poison is injected into one's body and soul that it seems as though there is no remedy. Thank God, there is a remedy, there is power in the blood of Christ to make the foulest clean.

In verses 33 to 35 we read some of the results of drunkenness. Beholding of strange things (v. 33), utterance of perverse things (v. 33), insensibility which is the result of drinking (v. 35), and inability to avoid succumbing to the same temptation all over again (v. 35).

Is it any wonder that the admonition is "Look not thou upon the wine when it is red, when it sparkleth in the cup, when it goeth down smoothly." Although man still has a semblance of right thinking the temptation is great enough to deceive him as to the consequences.

In view of such results, is it any wonder this same Preacher says in Ecclesiastes 10:17 that the land is blessed when its rulers eat and drink for strength and not for drunkenness.

It still is true that righteousness exalteth a nation, but that sin is a reproach to any people. And since the princes of the land as the leaders will frequently personify the people of the land as the followers, happy is that nation where [illegible] governors.

Crocheted rug is so durable. Pattern 7146 has directions for a rug 20 by 30 inches or any larger size desired.

It Always Happens

Smithers was packing to take a solo jaunt into the mountains when Jake, the old camp guide, stopped him to check his supplies.

"You gotta map an' a compass?" asked Jake.

"Certainly," replied Smithers.

"Have you got a deck of playing kerds?"

"Why, no," rejoined Smithers, "what do I need with playing cards?"

"It might save your life, son," old Jake replied. "I always carry a pack with me. If you get lost, son, jest set down and begin playin' a game of solitaire. Next thing you know some fool will pop up behind you and begin telling you what to do next."

QUICK RISING
Dry Yeast
QUICKER · EASIER FOR EATING · FOR BAKING

QUICK METHOD HARVEST TIME PAN ROLLS

2 teaspoons sugar	3 tablespoons sugar
½ cup warm water	2 teaspoons salt
2 packages Red Star Dry Yeast	½ teaspoon soda
1½ cups sour cream	5 cups sifted flour

Dissolve 2 teaspoons sugar in ½ cup water. Add 2 packages Red Star Dry Yeast. Let stand 10 minutes. Scald cream. Add 3 tablespoons sugar, salt and soda. Cool to lukewarm. Stir yeast solution thoroughly and add to this mixture. Add half the flour and beat well. Add remaining flour and mix well. Turn out on lightly floured board and knead for 3 minutes. Shape into smooth ball and place in greased bowl. Brush top lightly with shortening. Cover and let rise in warm place for 30 minutes. Punch dough down. Shape into round biscuits and place closely together in a greased pan. Cover and let rise in a warm place for 45 minutes. Bake in a moderately hot oven (400° F.) 18 to 22 minutes. Makes 2 dozen biscuits.

The FICTION Corner

HAS BEEN

By GENE BROCKHAVEN

Jeff's eyes found Helene's and to him the world was young and warm again.

"WHAT'S the matter with you, Jeff? You never acted like this before. Show some interest. Snap out of it!"

Good old faithful Jerry, thought Jeff. Always worried . . . nerves crazy. During the endless training days and the torturous moments before the bell, fluttering about Jeff like a hen mothering a lone chick. Eight years he and Jerry had been together. Eight years, during which they had often faced hunger and of late a few of the good things of life

Maybe Jerry was right . . . maybe there was something the matter with him. The old fire, the zest for battle, the impatience for action, the exhilaration of the blood racing through his veins. The doubts . . . yes, and that little stab of fear in a corner of his heart. Looking back now, as he sat on the little stool in the rang corner, Jeff realized he had felt none of them.

Jeff roused from his reverie. He glanced around the ringside. Big crowd. Announcer Ballard busy at the banging microphone. A few more minutes to go to broadcast time.

Jeff relaxed on his stool . . . his mind blotted out the chaotic scene about him . . . filled with memories again. Eight years . . . eight years of hard work, of sacrifice, of punishment, of patience and the giving up of many of the things that youth loves. But there had been a driving purpose then . . . a goal to attain . . . riches! Fame hadn't meant much in the early days, but it came and in the last few years the money came, too. Champion! The thought of that year as champion brought a glow to his heart. And then he met Helene Forsythe.

It was at a charity bazaar on Long Island, one of the "appearances" Jeff, as champion, was frequently called upon to make.

Again, as he sat on his stool, completely oblivious to everything but his memories, Jeff felt his heart pound as it had that afternoon. She was rich, society—and he a nobody, a prizefighter They talked for a while and then others had taken her away He didn't get to see her again that afternoon. but did several weeks later That was the beginning. They saw more and more of each other and soon they were deeply in love. Jeff had realized the hopelessness of it all . . . to him she was unattainable . . . but Helene saw no hopelessness in the situation at all.

Jeff shivered on his stool as he recalled again that memorable night when she called upon her father. He'd never been so scared in his life, except maybe that night when he entered the ring for his first fight, his heart empty and his spindly legs unsteady . . . but there had been absolute necessity then . . . that had buoyed his lagging courage. But this night the stake was bigger.

"Hello, Mr. Stoddard." Mr. Forsythe's words were stamped indelibly in Jeff's mind. "Helene's told me of you. I don't like the business you're in, but my daughter and you are in love, she says, so the business doesn't matter. But what does matter is, what sort of a life can you offer her?"

Jeff felt the warm blood rise to his face and ears as it had done that night at his blurted, idiotic, "She won't starve." Mr. Forsythe had answered, "I'll see to that. That will always be my responsibility. She's my daughter."

"I'm sorry, Mr. Forsythe," Jeff had managed, and then the words had started to flow . . . senseless, jumbled, one into the other . . . "a few more fights . . . a $250,000 trust fund . . . I love her . . ."

Heartsick, feeling his cause had been irretrievably lost, he had stumbled from the room and out of the house. It was midnight before he got enough courage to call her. He told her it was hopeless . . . They would have to wait a bit . . . he'd make more money, plenty of money . . . Helene had interrupted . . . "Dad didn't say no, did he?" . . . "No," "Oh, you . . ." a sob and the click of the phone.

His frantic phone calls were fruitless . . . and then "Miss Forsythe has gone abroad." That was a year ago. He toured the country . . . theatres . . . exhibitions . . "appearances" . . . the money piled up but Jeff has lost interest. Then a match for the championship and his title gone, because one man . . . the referee . . . raised another man's hand.

And then this . . . Sam Abrams had sought him out . . . Sam had a young chap, up and coming, but he "needed a win over a name" before he could challenge for the title. "There'll be maybe ten grand in it for you," Sam had said. "And, maybe . . ." Sam paused meaningly . . . "more if we can do business. You're through, Jeff, you know. A has-been." Jeff still wondered why he hadn't chased Sam then. "No business," he'd said.

And here he was, sitting in a ring corner as he had sat in other ring corners a hundred or more times . . . a has-been . . . at twenty-eight!

". . . and in this corner, the former middleweight champion of the world, Jeff Stoddard!"

Jeff roused . . . dreams faded . . . he rose and bowed, Jerry fluttered about him. They walked to ring center for instructions. Jeff sized up his opponent. A likely looking youngster, husky and obviously well-trained. He shook hands and turned back to his own corner. The bell. Jeff slid cautiously to ring center. Yancey came forward to meet him, left hand extended slightly, chin buried behind a bulging shoulder. Jeff tried a long left and landed, lightly. They came together and Jeff felt a jar on his chin, another and yet another. Stinging blows they were, delivered with amazing speed and with deception. The boy had something. They exchanged blows and again that short, jolting left found Jeff's face. He'd have to do something about that. Jeff turned to his corner at the bell. A trickle of blood flowed from the corner of his mouth and over his chin.

"You gotta do something about that left, Jeff," whispered Jerry. "He'll claw you to ribbons."

Jeff stepped forward briskly at the bell for round two. He boxed, he slugged, but that tearing left kept reaching his face. Something warm streamed down his cheek. Jeff realized his eye was cut. He brushed the eye with his right glove and gave ground slowly, drawing Yancey toward him. Jeff's right dropped into position at his chest, he feinted with his left and there was the opening he sought. His right fist shot out, the weight of his powerful shoulders driving it home. It landed and at the impact Jeff felt a searing pain shoot up his arm to the shoulder. For a fraction of a second he felt dizzy and then a nauseous feeling hit the middle of his stomach. His eyes cleared and he saw Yancey getting off the floor. The punch must have landed high, thought Jeff. His only hope now was a quick left hook. He stepped forward, ignoring the pain in his right hand, feinted for an opening, saw it and punched. He missed. His last chance gone. The bell. He sank heavily on the stool.

"Did you bust it?" Jerry whispered.

"I don't know," Jeff answered. "But don't touch it, others might see"

"Yeah, but you can't go on with a busted right," argued Jerry.

"Keep quiet," said Jeff, and as the bell rang for round three he rose to meet Yancey.

* * *

Earlier that evening, at the Forsythe home, Helene faced her father across the dinner table.

"Dad," she said, "take me to the Arena tonight, please. Jeff is . . ."

"Still in love with that boy?"

"I've never stopped loving him, Dad. But . . ."

Now, a short distance from ringside, they sat. The girl, white-faced, tense, as she watched the stark drama unfolding in that brilliantly-white square ahead.

It seemed hours to the girl—tortuous hours—that they had been sitting there, when her father leaned toward her.

"I'm sold, Helene," he said tersely. "And I thought that boy lacked courage. Let's get out."

* * *

Later, in the dressing room, Jeff sat hunched on the rubbing table. Jerry, striving mightily to hold back the tears, was gently removing the tape and bandages from Jeff's swollen right hand. The room was empty, but through the walls came the rumble of voices and laughter. "Nobody has time for a loser," thought Jeff.

Mr. Forsythe walked into the room.

"Hello Jeff," he said. He laid his hand on Jeff's shoulder. "That was a magnificent stand you made out there. Mighty few men have that courage — and, more important, Helene says you're the only man for her and who am I to . . ."

Jeff glanced past Mr. Forsythe and his eyes found Helene's. She nodded and smiled . . . and to him the world was young and warm again.

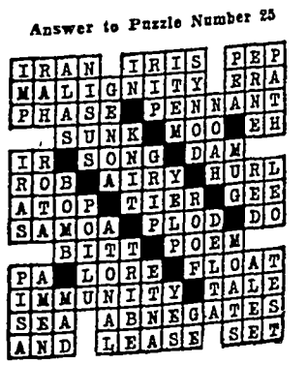
Answer to Puzzle Number 25



Series H-47

Sportlight

by GRANTLAND RICE

WITH the Boston Braves of 1947 making threatening pennant gestures for the first time since 1914, a somewhat inside story of the old Stallings outfit might be worth telling.

In 1914, the Braves, under the fiery Miracle Man, George Stallings, were 15 games off the pace, as late as July 4, and they were still last on July 18. Then the miracle of baseball's miracles took place, as they went on to win the pennant and beat the Athletics 4 straight.

B. Southworth

But part of the story of the Braves of 1914 goes back to the spring-training program of that year in the South—to a pair of great competitors, possibly the greatest that ever wore spiked shoes. Their names were Maranville and Evers, the Rabbit and the Crab.

Heading north that year, I stopped off for a few days at the Braves camp in March. The main idea was to call on a few old friends, such as Hank Gowdy, Johnny Evers and Rabbit Maranville. Intending to spend only a day or so, I hung around longer, for it was the most interesting camp I had run across.

In an exhibition game that afternoon, Evers and Maranville collided at second base, each trying to cover the bag. Both seemed to be badly jolted, but neither gave any sign of being hurt.

I noticed Maranville, a few minutes later, looking for some lost object around second base.

"What were you looking for?" I asked the Rabbit in the dugout later.

"Two of my teeth," he said, "where my mouth collided with Johnny's head. He's got a tough head."

A short while later, Evers was hit on the arm with a fast ball. He gave no sign of being hurt, as he grinned and started for first base.

They Could Take It

Another member of the Braves was hit, and he also showed no sign of any trouble, although he carried a lump above his elbow.

Here, outside of the genial Hank Gowdy, was a rather snarling, tough group, without too much ability.

The team had Dick Rudolph, George Tyler and Bill James pitching, but they had never looked like Johnson, Alexander and Mathewson, or Feller, Newhouse, Shea and Blackwell.

As far as one could see here was a ball club that might finish sixth or seventh—or even eighth. The squad, that week, had shown no power at all. Only some pretty fair pitching.

That night, Maranville told me what was taking place.

"I lost two teeth," he said, "and I never blinked. Two men were hit, and they never rubbed their arms. We've made a rule on this club that nobody can show he has been hurt, not even if he gets a concussion, not even if he gets his block knocked off. Don't think losing two teeth was any fun. It hurt. But I never let anyone know it. I like that brand of baseball. Don't ever let 'em know you've been hurt."

The Victory Drive

I lost considerable interest in this Maranville philosophy when the Braves were last on July 4, 15 games away from the first place.

"What about it now?" I said to the Rabbit, about that time.

"Just warming up," he said. "Just warming up. Watch us in the stretch."

It was from late July on that the Braves, headed by the driving force of George Stallings, a great manager, a fighter from every known angle, plus Rudolph, Tyler and James, went to work.

Stallings told me later he lost four pairs of trousers sliding up and down the bench. "I was full of bench splinters," he said.

Dick Rudolph was one of the best, and one of the smartest pitchers in baseball history. Tyler and James came to his help. Day after day you got this refrain—"Rudolph, Tyler and James."

They caught the Giants in the stretch, picked up 15 games on one of McGraw's good teams, and then wrecked the Athletics in four straight in the world series.

And all the Athletics had was Bender and Plank and Bush, Collins, McInnis, Baker, Barry and what looked to be one of the great teams of all time—a team that had won four pennants in five years. It wasn't even a contest.

Southworth's Team

Now the Braves of 1947, just 33 years later, under the able direction of Billy Southworth, another great manager, are among the teams to beat. These Braves are a much better ball club than the Braves of 1914. But, whether or not they can show the same amount of iron in their systems as this miracle squad offered against a forlorn hope, is another guess.

It isn't often that any team has a Maranville and an Evers on the same squad, two blazing spots of flame.

SEWING CIRCLE PATTERNS

Button Fronter for Matrons
Little Girl's Two-Piece Dress

Matronly Frock

BEAUTIFULLY easy to wear—and such a joy to care for is the flattering button front frock. This one, created for the matron, has a soft, face-framing sweetheart neckline, nicely shaped sleeves and a perky bow tie.

* * *

Pattern No 1660 comes in sizes 34, 36, 38, 40, 42, 44, 46 and 48. Size 36, 4⅛ yards of 35 or 39-inch.

Household Hints

To remove a strong odor from a jar or bottle, use dry mustard. Wash the receptacle with soap and water after the mustard has been used.

—•—

If a sewing machine is left idle for a considerable time, oil it occasionally to prevent the old oil in the machine from drying and becoming gummy.

—•—

Remove the wrapper from a bar of soap and let the bar dry and harden before you use it. Hard soap lasts longer than does soft, moist soap.

—•—

Spread an old sheet over the floor when small children are cutting pictures from magazines or making paper dolls. It will save their clothes, keep cuttings off the rug and can be rinsed out when soiled.

—•—

To freshen a shabby gilt picture frame, apply the white of an egg with a soft brush.

—•—

Split awnings often can be neatly patched with a piece of matching canvas and the rubber cement commonly used to repair inner tubes.

—•—

To protect your hands from steel wool, cut a small rubber ball in half and stuff the half with steel wool.

—•—

If your feet are tired, you will look tired. Soak your feet and baby them.

JUST FUN

Practicing

"Why did they evict the medical student from the library?"

"They caught him removing the appendix from the book he was reading."

The Test

"Harry," said the fellow next door, "do you think I'm crazy because sometimes I talk to myself?"

For a moment Harry soberly pondered the question.

"No," he finally decided, "but you are if you ever listen."

Reserved Section

The movie usher was in the dentist's chair.

"Now, Miss," asked the dentist, "which tooth is giving you all the trouble?"

"Second from the left in the balcony," she replied.

She never wears slacks or riding pants—so one can't laugh at her "expanse."

Yeah, Why?

Son—Daddy, what are ancestors?

Daddy—I'm one of your ancestors and so is grandpa.

Son—Then why do people brag about them?

Smart

"Have you got anything put away for a rainy day?"

"Yeah—an umbrella."

Washington, D. C.—June 23, 1947—Bubble Gum is not to blame for junior's upset stomachs or any of his other pains except maybe aching jaws, the Food and Drug Administration said today. (Adv.)

Mr. and Mrs. Art Polsdofer attended the wedding and reception of their nephew, Richard Wonsmos at the Thornton Lutheran Church Sunday afternoon, August 10th.

Miss Marie Blank, accompanied by Mrs. Clint Daniels and Mary Mildred of Garner, attended the Eastern Star picnic at the Eastern Star Home at Boone, Sunday.

Mr and Mrs. R. A. Jorgenson accompanied Mr. and Mrs. Gordon Aasgaard and daughter Betty to Eagle Grove Saturday evening. The Aasgaards operate a dress shop at Eagle Grove.

Mrs. R. M. Van Winkle of Aberdeen, South Dakota, came Friday to spend several weeks visiting with her son-in-law and daughter, Mr. and Mrs. L. A. Jennings and son.

Mrs. Enid Murray and son Michael, of Chicago, left last week for their home after spending about a week visiting with the former's grandmother, Mrs. Frances Ridder and other relatives.

Mrs. L. A. Schulze, a sister of Mrs. L. A. Jennings, and daughter Sue Van, left Saturday for their home at Rochester, Minnesota, after visiting for 3 weeks at the Jennings home. Mr. Schulze drove down for the week end and took his family home.

Mrs. Ben Katter and Mrs. R. W. Elder drove to Mason City Tuesday to attend a 1:00 o'clock luncheon at the R. J. McEwen home in honor of her sister, Mrs. Frank Barber of Washington state, who is visiting at Mason City. The occasion also honored the birthday of Mrs. McEwen.

On Friday Mr. and Mrs. Emil Beier; Miss Minnie Lenz; Mrs. C. A. Arnold; Donnie Fredin, Mrs. E. J. Arnold, and Miss Novella Bredbenner went to the Methodist Camp at Lake Okoboji Bible Conference. They joined Mrs Vivian Mace and Reverdy who were at Okoboji for the entire week. All of the Klemme group returned home Sunday

Mr and Mrs. Art Wellemeyer, accompanied by Mr and Mrs. Donald Bacon and children of Leland, left Friday for Glen Flora, Wisconsin, for a week end visit at the James Carlson home The Carlsons were right in the midst of cutting grain and Art got a good work-out demonstrating to his young grand sons the proper procedure for setting up a shock of grain.

Mr and Mrs. C. R. Elder and Miss Condence Hurley of Iowa State College visited at the R. W Elder home Saturday evening on their return home from Minneapolis where they attended the All-American College Editors' Convention, of which C. R. Elder is the president.

Lyle Wilcox drove up from Ames Saturday and his wife accompanied him home for a few days.

Recommended Plowing In Aug. To Kill Weeds

"Annual weeds are costing northwest farmers close to a billion dollars annually," according to Dr. W. W. Brookins, well known agronomist and weed authority. "Furthermore," he states, "the cool, moist weather of last spring has made the weed menace on most farms more serious than ever before."

August plowing is the most simple, yet effective means of controlling annual weeds, states Brookins. "Although August plowing is not a new practice by any means," he pointed out, "only in recent years has its true value been generally recognized."

To explain the success of August plowing, Brookins calls attention to the fact that weeds, like grain, thrive best when provided with a good seedbed. Immediately after plowing, therefore, the land should be dragged or disked in order to provide conditions more favorable for prompt germination of weed seeds. Weeds thus sprouted will normally be killed by fall frosts before going to seed.

"When properly done, August plowing is a sound soil conservation practice," explained Brookins. "An abundant fall growth of weeds and volunteer grain tends to hold down soil and eliminates much of the loss from erosion that occurs on late-plowed fields which lack such protection. When worked into the soil the following spring, these same weeds continue to hold the soil until the new crop takes over."

Fields prepared in this manner should be worked shallow in the spring in order to preserve the comparatively clean surface and avoid bringing up deep laying weed seeds which would then be exposed to conditions favorable to spring germination.

Dr. Brookins, who has conducted numerous tests on Minnesota farms to show the effect of weeds on flax yields, has found that annual weeds, more often than anything else, appear to be responsible for low flax yields.

ANNOUNCE PROGRAM ON ELECTRIC ENERGY USE

A new program to demonstrate the best known methods of using electric energy on the farm, and to study new and more efficient ways of putting it to work, was announced this week at Iowa State College.

Harold Beaty, of the agricultural engineering department, is leader of the project which is sponsored by the college in cooperation with the Iowa Utilities Association. The new program is also open to cooperation by REA and other mediums serving farms with electricity. The Utilities Association has pledged $49,300 toward the expense of the project Payments will be made over the next 5 years.

Assistants

Assisting Beaty in the leadership of the project is Naomi Shank college home specialist, and Sherwood S. DeForest, who began his duties August 1, as extension associate in agricultural engineering. DeForest will devote his entire time to rural electrification work.

Later, it is planned to appoint a research agricultural engineer to examine the angle of rural electrical service.

Beaty pointed out this week that about 68 percent of Iowa farms now have central station electric service. Number of farms in the state having this type of service grew from 31,000 in 1935 to 142,000 in 1946. Consumption of electrical energy per farm increased from an average of about 50 killowatt-hours per month in 1935 to more than 150 killowatt-hours in 1946. Representatives of the electrical industry have estimated that the majority of Iowa farms now without electric service will have it available within the next 3 to 5 years.

Practical Information

The Iowa State College program of utilization of electric service in rural areas was established, Beaty announced, with the idea that farm people now have a need for practical information on the efficient use of electricity.

It is proposed to set up 10 farms as demonstrations of rural electrification practices. Two of these farms are to be located in each of the five general farming areas of Iowa. These sections are classified as the northeast dairy section, eastern livestock, western livestock, central cash grain, and southern pasture areas.

In addition to demonstration work, research will be conducted in certain selected projects, both at the farms and at the Iowa State laboratories.

It is planned to study such things as the use of germicidal lamps, mechanical venilation, of farm buildings, processing, freezing and storing foods, processing and storing of grain and hay, and reduction of labor in farm chores. Beaty pointed out this week that even though Iowa State College has been conducting research and education in farm electricity for more than twenty years the new propect will expand slowly. Farms to be used in the work have not yet been selected, and other details of the program must be worked out as the project progresses.

How Co-ops Benefit Our People

No other single factor has been of greater help in a contribution to our agricultural prosperity than cooperatives. By organizing and patronizing their own co-ops, Iowa farmers have not only saved millions of dollars, but kept millions in Iowa, to help all Iowans.

By organizing and patronizing their own marketing co-ops, our farmers have saved additional millions, with a one-way ticket to Iowa.

Co-ops are an important part of our economy. Our growth, and our contribution to the growth of others, comes about because we are organized to operate for service — service to our membership, service to the community. Let us tell you more about co-ops.

COOP. MEN MADE TRIP TO SEE FERTILIZER PLOT EXPERIMENT

Several men connected with the Coop. Grain made a trip to Ralston, Iowa last Thursday to see the fertilizer experiment plot. The men who made the trip were greatly impressed with the work done and enjoyed the trip.

Those who made the trip were Gerald Janssen, Raymond Barz, Cecil Bridges, Wm. Janssen, Ben F. Greiman, Mike Lemke, Pete Kilgore, Joe Burgess and Manager Glen Bridges.

Another trip is being planned for this week Friday, and anyone interested in going to Ralston to see this plot, should contact Manager Bridges.

CAN CONTROL DISEASE ATTACKING CHERRY TREE

Cherry trees throughout the entire state have been hard hit by both brown rot and "shot hole" disease this year, says Iowa State College extension plant pathologist E. P. Sylwester.

Brown rot took a heavy toll on edible fruit harvested, while the "shot hole" disease is even now wrecking havoc with trees. Some trees are being completely and prematurely defoliated.

Sylwester says this premature defoliation materially weakens the tree, makes it more susceptable to winter injury and means a smaller and lower quality fruit crop next year.

Both brown rot and "shot hole" disease can be controlled by a thorough and timely program of sanitation and spraying

Rake up all mummied fruits and diseased leaves and either burn or bury them 6 inches deep. Be sure all the mummies are knocked off the tree to stop the spreading of the brown rot.

Cultivate under trees, where possible, to destroy mummies, weeds and other plant debris.

Doing this now and following it with a good spraying program next spring will effectively control both diseases.

Although frequent heavy rains this past spring made a good spraying program difficult to follow, Sylwester says trees which were sprayed suffered little damage. Despite a cool, wet season, sprayed trees are still in full leaf at the present time.

As a result these trees have more vigore, are in less danger of winter killing and will produce more fruit next year.

"Cherry tree owners who suffered severe losses this year and whose cherry trees are defoliated now should resolve to undertake a good spraying program next spring," Sylwester believes. He points out that with another cool, wet spring, both disease may be even more severe.

Klemme Youth Stationed In Alaska

Harold Schwartz S 2-c, son of Mr. and Mrs. Pearl Schwartz, of Klemme, is confined to a Navy hospital at Adak, Alaska, where he is receiving treatment for neuraligia.

In addition, this year's State Fair headlines over 6,000 animals in a National Stock Show, grain exhibits farm equipment, and over 100 acres of other farm features.

County Officials Continue Drive On Traffic Violators

SHERIFF LISTS TRAFFIC VIOLATORS FOR PAST WEEK

Will Continue Drive On Reckless Drivers in Hancock County

Deputy Sheriff Jim Cooper brought another list of traffic violators to the Times Tuesday for publication If you don't want your name to appear in the newspapers of Hancock County, better observe all traffic rules and courtesies of the highway, was the warning Cooper gave· You might get by for a time, but eventually the Sheriff's men and the Highway Patrol will catch up with you

Here are the arrests made by Sheriff and his Deputy since the last publication

Norman Lyle Stromer, Garner, was arrested August 11th for speeding in a restricted zone He was fined $25 00 and costs, of which $10.00 was suspended

Carroll L. Etchen, Goodell, was arrested August 14th for careless driving He was fined $25.00 and costs. $15.00 was suspended during good behavior

Wilbur Broeckholt, Buffalo Center, was arrested August 13 for failure to stop for Stop sign. He was fined $25 00 and costs.

WHICH FARM LEASE?

Sharply changing farm price levels in the years ahead point to the need for very carefully drawn-up farm leases and farm business agreements, I W. Arthur, Iowa State College economist, said last week.

While farm prices are at their peak, tenants should avoid high cash rental contracts which are to run for several years, Arthur feels.

He suggests that tenants use the share leases and the flexible cash lease to avoid commitments now which may be embarrassing later.

Even in the crop share plan a cash rent for pasture and hay, if based on present prices of livestock products, may prove to be too high if the lease runs for several years. Under the livestock share lease where no cash rent is involved, a longer lease period can safely be used

Before a farm is leased under a share plan it is important that both parties know the farm and know what it can be expected to produce Both parties should understand that they have a personal stake in maintaining productivity of the farm and in the welfare of the rural community in which it lies

A clear understanding in essential between landlord and tenant regarding what each party is to do, how the products of the farm will be shared and the expenses each is to pay

A flexible cash lease works well during such changing price periods as this, Arthur says It provides that cash rent fluctuate accordingly as the index of farm products prices goes up or down The flexible cash lease contains a provision for crop failure so that a tenant would not have to pay extra high rent in a year of crop failure

The price index used in this lease is based on local market prices received by farmers for farm products in Iowa

Additional information, as well as forms for either of the above leases, can be supplied through the county extension director's office

Corn Borer Resistant Varieties Do Not Exist

County extension director Paul Henderson has had word that some seed corn salesman in Iowa are claiming their seed is resistant to corn borer Henderson warns that this is, for the most part, a false claim.

There are no really resistant varieties of corn. Date of planting and fertility of the fields can cause some variation in infestation, in fact Henderson points out, this causes a greater variation than inherent resistance or susceptibility of seed can account for

It is recommended that farmers buy and plant strong-stalked, strong-shanked varieties. The 1946 Iowa Corn Yield Test bulletin will give the necessary information for the seed varieties best adapted to Hancock County.

HANCOCK 4-H BOYS STUDY LIVESTOCK JUDGING

About 45 4-H boys of Hancock County participated in two judging tours on Friday and Saturday July 18 and 19 Classes of dairy cattle beef cattle, swine horses and sheep were judged

The first tour was conducted in the area between Britt and Kanawha and the other between Klemme and Garner Instruction and practice was given in selecting desirable types of animals

From the boys on this tour five will be selected for further judging practice to be given at Iowa State College, Ames on Saturday August 2

The tours are planned and conducted by Edgar Dorow, County Extension Youth Assistant

Hancock County plans to send a livestock judging team to the Iowa State Fair, Des Moines.

Phone your news to 12.

Funeral Service Friday For John N. Day, 67

SERVICES WILL BE CONDUCTED AT METHODIST CHURCH

Was Prominent In Business Here For Many Years

Funeral services will be held Friday afternoon at 2 00 o'clock at the Klemme Methodist Church for John N Day, 66, who died at his home here after an illness of more than a year.

Mr Day, who would have been 67 years of age September 9th, was born on the farm southeast of Klemme now owned by R. W. Elder.

He was in business most of his life time being with the Northern Lumber Co at Buffalo Center 4 years before coming to Klemme to operate a general store For the past 13 years he has been postmaster in Klemme.

Burial will be in the Memorial Park Cemetery at Mason City.

Jolly Workers Club Meets

The Jolly Workers club met at the home of Alvin Helps on Wednesday, August 13 with 19 members present Maxine Nettifee and Stephen Dale of McAllen, Texas were visitors

Lily Pearson took charge of our meeting We planned to send a Christmas box to our family in Holland Mildred Gruis was appointed chairman of a committee to buy the gifts. Pictures were taken so we can send our family a picture as we have received several pictures of them Luella Boelman read the minutes of the July meeting After the social hour a lovely lunch was served by Alvina Helps and Irene Waddingham as co-hostess

The September meeting will be at the home of Lula Duthridge with Maude Bachman as co-hostess

SWINE ERYSIPELAS SERIOUS IN STATE

Keep Disease Off Your Farm

If Possible Is Advice Of Dr. Stouder

You may establish swine erysipelas on your farm if you bring in hogs without knowing their past history, warns Dr. K. W. Stouder, extension veterinarian of Iowa State College

Swine erysipelas, sometimes called "diamond skin disease," has definitely been know to exist in this country since 1921 and is present in many sections of Iowa now

Hog raisers in uninfected areas can afford to go to great lengths and to some expense to keep the disease off their farms It may reduce the rate of gain, increase the cost of gain and interfere generally with hog production.

Danger To Man

In addition to the hog losses from stunted growth and death, swine erysipelas may be transmitted to man Erysipeloid infection, as the disease is called in man is serious and may result in chronic complications such as joint or heart lesions Immediate medical attention should be received if erysipeloid infection is suspected.

Swine erysipelas may occur in three forms:

(1) Acute or "blood poison" type. Here the animals suddenly sicken, show very red skin and die Young pigs are particularly susceptible.

(2) Chronic type Death loss may be high but the disease lingers in the herd longer. Some animals show arthritis or stiff joints, purple or very red skin and sometimes pneumonia.

(3) Milder type In this form skin eruptions on back, chest and neck are especially noticeable on light skinned hogs. The red spots are diamond-shaped Slow loss of tails and portions of ears, chronic sores on various parts of the body are common in this form.

Treatment

Hogs can be given several months immunity to erysipelas by injections of pure cultures of the organism along with a dose of the anti-erysipelas serum, followed 2 weeks later by a second injection of the pure culture alone

This process has been used sucessfully in Nebraska and, according to Stouder, it is now available to swine growers in those parts of Iowa where swine erysipelas has become established.

Herd owners who wish to try this treatment should have a veterinarian diagnose the disease Owners may then sign application forms for pure culture. These are forwarded to the State Department of Agriculture for approval and then to a labratory producing the pure culture. There is no charge for the culture. Treatment is administered by a veterinarian at the expense of the herd owner.

De Weerdt Sisters Brides At Double Ceremony Sun.

MRS ALLEN LAU MRS ORVIN ANDERSON
(Photo by Kiefer Studio)

RAMONA DE WEERDT IS BRIDE OF ALLEN LAU, KLEMME

Will Reside On Farm Southeast Of Klemme After Sept· 1st

A double wedding ceremony was held at the St Boniface parsonage in Garner Sunday morning, August 17, 1947 at 10 30 A M when Miss Ramona De Weerdt became the bride of Allen Lau of Klemme, and Miss Betty De Weerdt became the bride of Orvin Anderson of Chicago The Rev. M. Manternach performed the ceremonies, using the single ring rites· The brides are the daughters of Mr and Mrs Henry De Werdt, who reside on a farm northeast of Klemme Allen Lau is a son of Mr and Mrs Emil Lau south of Klemme, while Orvin Anderson is the son of Mr. Ole Anderson, of Chicago·

The couples were attended at the altar by Miss Anna Lou De Weerdt, sister of the brides, and Glenn Wille

Ramona, bride of Allen Lau, wore a white satin bodice with peplum net over satin skirt with train. Her jewelry was a blue pendant necklace and she carried a bouquet of mixed flowers.

Betty, bride of Orvin Anderson, wore a princess style white satin lace insertion front with back train and leg 'o mutton sleeves, capped with lace, a finger-tip veil with coronation crown and a pearl necklace She carried a bouquet of mixed flowers.

The men in the wedding party all wore white rose boutoniers.

Mrs De Weerdt, mother of the two brides, wore a bemberg sheer grey print dress, and Mrs. Emil Lau wore a black crepe dress Both wore pink rosebud corsages

After the ceremony a wedding dinner was served at the De Weerdt home which was folowed by a reception in the afternoon,

After a honeymoon trip of about a week, Mr and Mrs Lau will return to Klemme· About September 1st they will move to the Lau farm south of Klemme

Out-of-town guests at the wedding included the following Mrs R. Marchland and Mr and Mrs Clem Weiss of Mason City; Mrs. Nick Peters of Kansas City, Mo., Mrs Mary Heavevilin of Vice, Oklahoma.

Mr and Mrs Frank Marchland and Judy, and Mr and Mrs Art De Weerdt, Bobby and Raymond, and Mr and Mrs Vyril Vervaeake Maurice, Voet Mary and Bertha of St. Ansgar

Mrs. Roger Jensen and Nancy and the Misses Mildred and Gladys Anderson of Chicago; Mr and Mrs. Charles Frisbee of Garner, Mr. and Mrs· Carl Peterson and Alice of Britt.

Dewey Weltzheimer and family of Kanawha, Mr and Mrs. George Baker and family of Britt, Mr and Mrs. Eugene Grieman, Mr and Mrs Curtis Grieman and Mr and Mrs Leighton Zoebel, all of Garner; Mr and Mrs. Paul Lau and Graydon and Mr. and Mrs. Emil Lau, Lois and Verner of Klemme·

ROCKY GRAZIANO, the Dead End kid from Brooklyn, is now middleweight champion of the world.

Rocky is not what you would call a lovable or a likeable character, packed with intelligence and charm. But, he is still the middleweight champion of the toughest division we have. The only active division we have left.

Graziano

His profession is prize fighting, which is the lowest form of making a living. And the toughest. But, it is still his profession. And it is a profession that demands certain important qualities before you reach the top.

As we understand the case, Braziano was barred in New York by the district attorney's office, with Eddie Eagan of the boxing commission forced into a position he was never too keen about. Graziano's main offense was a matter of politics. Too many were looking for headlines. This is a normal situation.

As we have said before, Graziano is not a likeable or a lovable character. But he has proved that he can fight. He doesn't wear a tie and his manners leave much to be desired. But, he can nail you and hurt you, and that happens to be his trade.

The main answer is that right now Graziano is the middleweight champion of the world. There is no one even close to Joe Louis in the heavyweights. There is no one even close to Gus Lesnevich or Ray Robinson in their class. They are three Robinson Crusoes on a desert island.

But, outside of Tony Zale, Graziano still has LaMotta and Cerdan left, and one or two others. He happens to be in the fistic land flowing with milk and honey. And, I believe, he has earned his place to make one of the big killings of his game.

He proved both his ability and his gameness against Zale. He had to hurdle the handicap of their first fight, where he was accused of taking a quick powder. He was being beaten again when he came from behind to win. He had to show double courage here.

* * *

Hans Wagner's Successor

In lining up baseball's all-time stars, you run across one spot that has only one guardsman.

Back of the bat you have Mickey Cochrane, Bill Dickey, Gabby Hartnett, Johnny Kling and back in the dim past a great catcher remembered as Buck Ewing, a master.

In the box we have Cy Young, Walter Johnson, Christy Mathewson, Old Pete Alexander, Carl Hubbell, Rube Waddell, Lefty Grove and others.

At first we have George Sisler, Lou Gehrig, Hal Chase and Bill Terry.

At second there are Eddie Collins, Pie Traynor, Art Devlin and Bill Bradley.

In the outfield we have Ty Cobb, Babe Ruth, Tris Speaker, Joe Jackson and Joe DiMaggio.

But at shortstop we come to a big, shuffling, bowlegged wonder by the name of Honus Wagner. Wagner has been so far in front of all other shortstops as an all-around star—fielder, hitter and base runner—that no one else has been offered in comparison. Such names as Herman Long, Hughey Jennings, Travis Jackson, Dave Bancroft and Marty Marion have been given their share of acclaim. But none of these has been even close to Wagner.

The Flying Dutchman led his league seven years. He was a .350 hitter. He could steal from 45 to 55 bases a season. According to John McGraw and Ed Barrow, two of baseball's smartest, Hans is the greatest ballplayer of all time.

Who Comes Second?

As both put it, "Wagner was a great shortstop—a great third baseman—a star outfielder—a good catcher—one of the greatest of all hitters and base runners."

Wagner still stands alone at short. But who is the second choice? Who belongs closer to Pittsburgh's brilliant star?

Our guess is Lou Boudreau of Cleveland. Boudreau has had to carry the extra burden of handling a losing ball club. In this respect, he has done everything you could ask with indifferent material.

Year after year, he has been a brilliant infielder. And this season he has been among the leaders of the American league at bat.

For some odd reason, outside of Wagner, few shortstops are .300 hitters.

Boudreau isn't Wagner, but he is at least close to a grip on the No. 2 spot, at the agile art of shortstopping.

He was born in 1917, and entered baseball in 1938, with the Three Eye League, after two seasons at the U. of Illinois. Before the year was up, Cleveland grabbed him. He has been hitting around .335.

BEST LOOKING GIRL IN TOWN

By THYRA SAMTER WINSLOW

time she was thirteen Mabry had been ashamed urance. It was then that shooting up higher than girls. She was awkward all and she was too thin. time she was twenty she convinced that her ap- was really something ter- of the other girls seemed style and attractive. No Rilla wore it seemed e was too much of her tered clothes. And thin g around her in folds. boys and girls in the Rilla. She was a fine girl

—if you could for- get the way she looked. Even her hair was wrong—sort of stringy—but she had a pleasant and rather attractive face.

In spite of her looks Rilla had a boy friend. He was ding and his father kept store. Pat wasn't any —but then you really expect Rilla, with her any better. Folks felt ght to be well satisfied. ice looking boy, and he sn't to be sneezed at. 't sneeze at Pat. She to him for being nice was as jolly and as she could be. As a mat- she liked Pat a lot. He with. She'd have been tisfied except for the was in love with Shane Which did her a lot of Shane was the catch of Shane's father was a l rich. His mother was der of the town. Shane ch taller than Rilla— e, besides.

into the grocery with Shane went into the the way sons do in unless they have defi- bout law or one of the sions. Rilla didn't do folks had just enough didn't have to work. parties with Patrick— Shane from a dis- town folks felt that she Pat, that he'd take ther's grocery store and ettle down.

have happened if it for Leslie Durant. Les- was—and still is—a well rator. And he came to visit an aunt. And got all of the parties, of social lion of the sea- ed in town three days— s long enough for a lot

Rilla Mabry! Rilla was ear the door—and she at Shane Tennant. She how much her face at she was thinking ce else noticed—but g new, took in the situation. He saw Rilla, standing not quite straight because she didn't feel quite as tall that way, in a badly fitted dress and her hair not quite smooth—and he saw Shane, perfectly groomed—for Morriville—self-confident, good looking. And then Pat came to ask Rilla to dance.

On the second day of his visit Durant made his remarkable statement. He declared, to anyone who would listen to him, that Rilla Mabry was by far and away the best looking girl in town. One of the best looking girls he'd ever seen.

Rilla had never had a compliment about her looks before. She had always been shy, self-conscious and often miserable about her appearance. And here, the first authority on beauty who had ever been in town, acclaimed her as the prize.

That night, for the first time in her uneventful life, Rilla Mabry was belle of the ball.

When Durant, himself, told her what he thought of her she was filled with confusion. She managed to stammer her thanks. And later, very shyly, she went up to him.

"I do wish you'd tell me how I can look better," she said.

"I'm not suited for the task of lily-gilding," he told her, "but maybe if we got together—"

They got together the next morning. Durant came to Rilla's house, and, with Rilla's mother acting as helper, they did things to Rilla and Rilla's clothes. Durant made her stand up straight And rearranged her hair. And told her what was wrong with the clothes she wore.

That night there was a dance for Durant—his last evening in town. And, as he had thought when he started things, Rilla was, for the first time in her life, the belle of the ball. Toward the end of the evening Durant had the satisfaction of seeing Shane Tennant dancing attention. Shane Tennant, whom Rilla had looked at with longing eyes—and who had paid no attention to her.

Durant went back to his home in New York. And forgot all about the whole thing. And years passed. And the sequel happened just the other day.

Durant was lunching alone at a restaurant when an attractive, tall woman, past her first youth, came up to him.

"You don't remember me," she said.

Durant didn't remember her.

"I'm Rilla Tennant—I was Rilla Mabry when you knew me. You came to my home town and—and sort of made my life over. Remember now?"

"Of course I do," said Durant. "I remember very well."

"You did a wonderful job!" said Rilla. There was a curious note in her voice he didn't understand.

"You married the boy you were in love with, I see His name was Tennant, wasn t it?"

"Why, yes," said Rilla. "But how did you remember the name? And how did you know I was in love with him?"

"I'm good at names. And I saw you looking at him. Simplicity itself! And to think that I was the cause!" He preened a little.

"Yes, you were," said Rilla. "It was very funny, now, when you look back on it. There I was, going with Pat Redding and in love with Shane. And terribly ill at ease and awkward. And you came down and said I was a beauty—so automatically I became a beauty. And the boys all rushed me. And I married Shane."

"Wonderful!" said Durant. And he beamed. "How are you getting along, now?" he asked, as an afterthought.

"That's the catch," said Rilla. "You shouldn't have asked.

"Shane and I married—and didn't get along any too well. Though I was awfully happy in the beginning. The Tennants lost all of their money in the depression—and my family had its money in the Tennant bank by that time, so our money went, too. Then Shane fell in love with a chorus girl. I got a divorce, of course. I've been teaching in a girl's school for the past three years."

"That's too bad!" said Durant, and began to feel inflated. "But maybe that was better than marrying that other boy whom you didn't love."

"Maybe," said Rilla. "You can never tell. Love goes . . . Patrick Redding took over his father's grocery store—and married the cutest girl in town. They have three children and are very happy. And, oh yes, he developed an ambitious streak and started a chain of grocery stores. Now he's the richest and most important man in town."

Alchemists Knew Zinc

"Nix Alba" was the name by which zinc oxide, now widely used as a paint pigment, was known to skilled alchemists, who also called it "philosophers' wool." It was first suggested for use in paint by the French chemist, Guidon de Morveau, in the late 18th century. Early in the 19th century, the pigment became commercially available, and at about that time a French naval vessel was painted with zinc oxide paint. Today, zinc oxide is produced by two processes, the American and the French. The American process produces the oxide direct from zinc ore, while in the French process it is produced by vaporization and oxidation of metallic zinc in an open fireplace and collection of the oxide in a series of chambers. The bulk of the zinc oxide pigment now is produced by the American process.

THE HOME TOWN REPORTER IN WASHINGTON

WALTER SNEAD, WNU Correspondent

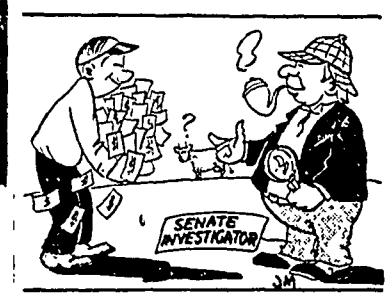
Digging Deep

THE 80th congress may have set a record for investigations of various kinds, for during this past session more than 120 resolutions were brought up in both houses calling for probes ranging from the system of operating cafeterias in government buildings to the security of atom bomb secrets.

Already congressional investigating committees have spent thousands of dollars in these probes. For instance, the special committee investigating national defense has spent $74,495; the senate sub-committee on privileges and elections has spent $53,000, and the senate special committee to study problems of small business has spent $29,416. Probably $50,000 has been spent by other lesser sub-committees

Many of these probes are expected to continue during the congressional recess.

For instance, a senate committee to make a survey of the hoof and mouth disease is authorized to spend $50 000, a banking and currency committee has $50,000 for a recess investigation of reconstruction finance corporation; the senate civil service committee has $35,000 for a probe of postmaster appointments; the foreign relations committees of both house and senate have been authorized to investigate the state department foreign information and



cultural relations program at a cost of $100,000, the house interstate and foreign commerce committee has $25,000 to study transportation; the house public lands committee has $25,000 for a general investigation of public land usage, and a joint committee was voted $100,000 to inquire into high prices.

A senate sub-committee investigating military occupation currency policies was voted $60,000; the veterans affairs committee has $25,000 to probe Veterans' administration; a special committee on newsprint was voted $25,000, and the un-American activities committee was voted $100,000 in extra funds.

* * *

Sen. Arthur Capper of Kansas is the oldest member of the senate. He recently celebrated his 82nd birthday anniversary. The senator, a slight, stooped figure of a man, sits in the senate chamber, hand cupped to his ear in an effort to miss nothing going on. Friends say he misses nothing he wants to hear. Despite his age, the Kansan is a dapper dresser and seldom fails to attend the periodic national press club dances where he is a long-time member. He is a lifetime teetotaler and celebrated his birthday with a grape juice party in his office.

* * *

Canceled Cuts

WHILE controversy goes on over the actual cut from the President's 37½ billion dollar budget estimate, one thing is certain . . . the Republican leadership failed to reach anywhere near either the senate figure of 4½ billion dollars or the house economy goal of six billion dollars.

Splitting the claims of the Republican leadership and the contrary claims of the Democratic leadership it would appear that actual cuts will run not more than three billion dollars.

And congress has authorized new and added expenses which will more than offset the three billion dollar cut. For instance, cashing of terminal leave pay bonds will eat up approximately two billion dollars. In addition there is 750 million dollars for foreign relief; increase of Spanish-American and Civil war veterans' pensions of 28 million dollars; the new national science foundation at 20 million dollars; increase in veterans' subsistence of 10 million dollars, and many other items.

So while the first aim of congress has been to slash appropriations and reduce governmental costs it is likely that new cost commitments will run the final figure to approximately the President's 37½ billion dollar budget estimate.

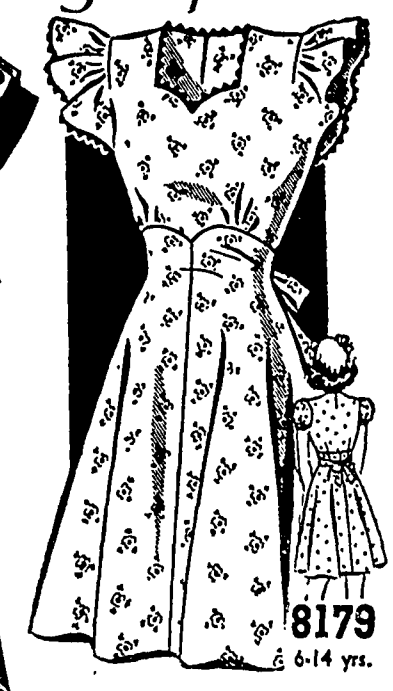
* * *

Who Loses?

Many small items slip through the huge appropriation bills in congress. Here is one—"For compensation, mileage and expense allowances due and unpaid to members of the house of representatives, 79th and prior congresses, $83,879.22." That camouflaged item was to reimburse house members for money they lost in a bank managed by the house sergeant-at-arms. The bank failed; the manager was jailed. Now this shortage of $83,000 will be made good by the taxpayer.

SEWING CIRCLE PATTERNS

Juniors Favor This Yoke Style School Dress for Girl of 6 to 14



Accentuates Youth

THIS stunning yoke dress is a favorite with the junior crowd. Four buttons close each shoulder—the wide girdle shows off a lovely youthful figure to perfection.

AROUND THE HOUSE

When placing articles in the refrigerator remove them from the paper bags and place in refrigerator bowls. This increases cold air circulation and looks neater.

—•—

Be sure to save your cancelled checks and receipts after a bill is paid. If a dispute arises over the payment of a bill, you then have the evidence.

—•—

If you have a bottle of perfume that you hesitate to use because of its heavy odor, try adding a few drops to your bath water. You will find it pleasant.

—•—

When crystal vases and bottles need cleaning, break several egg shells into the bottle or vase, add a little water, and shake until all film and dust disappears from the glass.

—•—

When melting paraffin for canning do not allow the paraffin to become steaming or smoking hot. Just reduce it to a liquid.

—•—

For quick drying of sheets, bed spreads and tablecloths, hang evenly and not quite double on the line.

Season vegetables such as green beans, corn, or spinach with bacon or sausage drippings to give them unusual flavor.

—•—

Use all your linens so they will all be laundered occasionally. This way they'll stay white.

Calliope Passes From River Boats to Circus

The calliope, the musical instrument consisting of steam whistles played by means of a keyboard, was developed in Massachusetts in 1855 as an added attraction on river boats, says Collier's.

The popularity of these "floating music boxes" lasted 20 years and then, as the steamboats started to discard them, the calliope passed from the river to the land and has since been associated with the circus, fair and carnival.

JUST RESTING

That's Enough?

"I see spots in front of my eyes."

"You should see a doctor."

"No, just spots."

Considerate

"Oh, come on—lend me a dollar bill.

"Sorry, my money doesn't like to be a loan."

Handfuls

Old Maid—So the waiter says to me, "How do you want your rice?"

W. F. Pavey was at Mason City Monday on business.

Mr. and Mrs. Art Schoenwetter were dinner guests at the Henry Busse home Sunday.

Mr. and Mrs. Harmen Trampel and sons spent Sunday evening at Clarence Trampels.

Mr. and Mrs. E. G. Beier visited with Charles Bredlow near Swaledale Monday evening.

Mr. and Mrs. Floyd Wilson and son of Rockford called at the Ed. Schaefer and E. G. Beier homes Sunday.

Mr. and Mrs. Truels Steffens and family of Waterloo visited at the Hilma Johnson home Sunday.

Mr. and Mrs. Clarence Bachman visited Art Knoke at the Mercy Hospital Sunday afternoon.

Leslie De Merrit and family were entertained to supper Sunday evening at the Wm. Ax home.

Mr. and Mrs. Fred Busse of St. Cloud, Minnesota were over night guests in the Henry Busse home Wednesday.

Mr. and Mrs. Mayo Whaley and family and Miss Rebecca Strong spent the week end visiting in the Hugh Hummel home.

Dr. and Mrs. W. F. Missman left last week for a vacation at their cottage at Land 'O Lakes, Wisconsin.

Mr. and Mrs. Ben Ridder drove to Minneapolis for a week end visit with Florance Gates and family.

Fred and Wayne Bachman, Mrs. Ed Neuhring, Jeannie Kay and Cathy were supper guests at the Clarence Bachman home Tuesday.

Mr. and Mrs. Henry Busse drove to Harlan, Iowa, Tuesday where they attended the funeral of their brother-in-law, Mr. James Deen.

Mr. and Mrs. Conrad Quandt left this morning for their cottage at Two Harbors, Minnesota where they will stay during hay fever season.

Mrs. Pete Merkel and Mrs. Henry Greiman attended a family reunion at Patton, Sunday. They also visited at the Lester Merkel home in Paton, Iowa.

Mr. and Mrs. Wilbur Haefner and daughter, Gloria, left Saturday for Beltrami, Minn. to see Henry Beier, and to enjoy a vacation in the north.

Mr. and Mrs. Art Wellemeyer called on Charles Bredlow near Swaledale Sunday evening and also visited with the Clarence Bredlow family at Rockwell.

Mr. and Mrs. Cliff Anderson and children of Sibley, Iowa came Tuesday for a visit at the Melvin Neuberger and Harvey Barz homes.

Mr and Mrs. Vic Greiman of Dayton, Ohio, came last week to spend their vacation visiting with Klemme relatives and friends.

Ed Schaefer received word that his brother Elias Schaefer died at a Chicago hospital Sunday. Funeral services will be held Thursday afternoon at Charles City.

AROUND IOWA

HEAVYWEIGHTS

When the four Brodersons, long time residents of Harlan, got together for a picture recently, the community saw 910 lbs. of brothers. Weight of the four big fellows, whose age ranges from 67 to 76, is 910 pounds, or an average of a little over 225 pounds each.

BUBBLE GUM

If you're wondering how many sticks of bubble gum one person can chew, read on. At a contest in Elkader, Vincent Kraus broke a ten-way tie by blowing a bubble with 25 sticks of bubble gum in his mouth. The other contestants chewed 25 sticks but could produce no bubble. The cause of scientific research marches on!

HORNED TOAD

It's a long way from Denison, Iowa, to Texas and Arizona, but "Oscar" made it. Oscar is a horned toad and was found by two Denison boys in an alley there. How Oscar got there remains a mystery.

NO ROOM

Little Betty Lou Nelson, two, suffered an internal hemmorrage at her home in Elkader and was rushed to the hospital at Postville. The hospital was full up and the child could not be admitted. On the trip back home, Betty Lou died.

CRASHED

Leo Ling, 22, of Worthington, is a student pilot. He flew down to Lake Park to the farm home of a friend, Helen Paling, and took her for a ride. Apparently while doing a climbing turn at low altitude, the plane crashed, breaking Ling's thigh and fractured the girl's skull. Both are recuperating.

RESCUED FAWN

Near Milford, Harlan Franker found a wild fawn which had become tangled in a barbed wire fence. Its hind legs were badly lacerated. If the fawn recovers, conservation officer Dwight Morse will enter it in the game exhibit at the state fair. Afterward, it will be turned back with the herd which has been roaming the river on the Franker farm for the past 11 or 12 years.

Iowa Duck Season October 21 To November 19

The migratory waterfowl season in Iowa has been shortened to 30 days, from noon, October 21 to one hour before sunset, November 19. After the opening day the season opens at sunrise and closes one hour before sunset. Bag limit on ducks is four per day with eight in possession after the first day. Only one wood duck may be taken in a daily bag or had in possession. An earlier report stating that the duck season closed at 30 minutes before sunset was in error.

LATE BLIGHT FOUND ON IOWA POTATOES

Late blight has been found on potatoes in the north-central part of Iowa.

The blight, which destroyed 25 percent of the commercial tomato crop last year, has not been seen on tomatoes. However, E. P. Sylwester, Iowa State College extension plant pathologist, thinks that if there is a week or so of cool, moist weather outbreaks are likely.

He recommends spraying both potatoes and tomatoes with copper compounds. Now, while it is dry, is a good time to put on a thorough coating of copper fungicides, so as to be prepared if the moist weather comes.

While Bordeaux is the most common and readily obtainable copper fungicide, any of the fixed coppers will do the trick.

Even if no late blight occurs on tomatoes, spraying would still be well repaid because it helps control Septoria leaf spot, which Sylwester says is prevalent over the state

Late blight and Septoria leaf spot can be told apart fairly easily

Septoria leaf spot appears after fruit sets Small, water-soaked spots show up on the lower leaves and becomes roughly circular The spots have gray centers surrounded by darker margins. Later the centers show tiny dark specks.

In late blight first infections are irregular, greenish-black, water-soaked patches. They may appear on either leaves or stems. The spots enlarge rapidly and plants may look as though they had been damaged by the frost.

TAKE NO CHANCES WITH SCREW WORMS

Livestock in this vicinity may be suffering with screw worm maggots that haven't been detected, says County Extension director Paul Henderson

If a livestock wound fails to heal readily, call a veterinarian, advises Henderson. The veterinarian can probe deeply into the wound to find out if there are maggots in it. Screw worm maggots keep burrowing inward. Sometimes they are hard to discover

The veterinarian can remove the maggots and stop infection.

Specialists at Iowa State College advise the use of Smear 82 on all livestock wounds. Smear 82 is a U S government formula. It repels the flies that are responsible for screw worm maggots. It may also kill the maggots if they are not buried too deeply.

Apply the smear, swab or paint brush. Use it on all wounds and cuts, including those from barbed wire, castration or de-horning, the specialists say.

The screw worm maggot will attack all livestock. It has cropped up in various parts of the state. Migratory truckers can carry infection over broad areas. Henderson advises checking the shipments of livestock as soon as they arrive, and treating any wounds with Smear 82.

2,4-D DAMAGE TO FIELD CROPS SAID EXTENSIVE

Reports of extensive damage to field crops from drifting 2,4-D dust have been received at the State College Plant Pathology Department.

The new weed killer damaged cotton in Texas and Louisiana and tomatoes in California when it spread to those fields after being released from dusting planes.

E. P. Sylwester, college plant pathologist, says that while no serious damage has been done in Iowa as yet, 2,4-D will destroy or injure any broad-leafed plant. He cautions against dusting the herbicide from a plane in areas where broad-leafed crops are grown.

Ground dusting is recommended where careful dust control is necessary. Sprays, while more controllable than dust, need also be applied by ground methods if there is danger of the herbicide getting on home gardens or similar crop areas

Is the 'Common Man' Fit to Rule?

Population May Backslide To Low Intelligence Level

By BAUKHAGE
News Analyst and Commentator.

WASHINGTON.—When the Henry Wallace for president movement was launched in California it made a lot of Republicans happy just to think about it, although they never really believed that a third party was possible. (When I was in college a friend of mine wrote an essay entitled: "Why a Third Party Is Impossible in America." This was just before Teddy Roosevelt came out with his Bull Moosers in 1912).

If Wallace were to become president of the United States it is unlikely that the "common man" whom he champions would have any more to say about running the country than he does now. However, when Wallace says this is the century of the "common man," he isn't far wrong.

The revolutions which have swept the world in the past decade certainly would not have been possible if they had not had the support of the people. This support was not necessarily the result of free choice, intellectual decision or popular vote. In fact, for the most part — certainly under Mussolini, Franco, Hitler and Stalin —it was the opposite. Nevertheless, they were not revolutions of the upper classes.

Baukhage

Even in the case of Great Britain's very mild revolution, which was the result of popular vote and a free choice, the traditional political and intellectual leaders were swept out of office.

Americans are committed to the idea that the majority should rule and the theory always has been that the people would be wise enough to select a person of sufficient intelligence, experience and integrity to represent them at the job of ruling.

Of late, however, a number of persons approaching the problem from quite different angles, have expressed concern about the education and training of the men available for the responsibility of carrying on the business of government.

I have been assured by old-timers here who have been familiar with the personnel of congress over a number of years that we perhaps have as high type of men, mentally and morally, in congress today as we have ever had. In fact, I am told they are making excellent use of the greatly expanded sources of information on the issues they have to consider and are, therefore, better informed than any congress has ever been.

Nevertheless, we hear from educators, from economists and statisticians, all sorts of dire warnings.

One that has recently stirred up the press considerably was by Guy Irving Burch, head of the population reference bureau. It seems Burch read a survey made in England by Sir Cyril Burt at the request of the royal commission on population.

As a result of his survey, Sir Cyril suggests that in 50 years the number of students of scholarship ability in Britain will be approximately halved and the number of feeble-minded almost doubled. This conclusion was based on psychological tests and size of families in Britain.

Nation of Dullards Seen in Future

Burch has studied population statistics for the United States from the standpoint of psychological tests, educational attainment, economic status and type of occupation. He says: "We may reach the general conclusion that the lowest third of our people in each one of these four categories has families about twice as large as those of the highest third."

And he concludes:

"As a voting participant in helping to solve the many intricate problems of our complex civilization a dull and backward individual is almost as helpless as an idiot. In fact, he may be more dangerous to democratic institutions because he is easily commanded by demagogues and dictators."

This gives us quite a different picture of the century of the "common man."

Dr. Francis Brown, staff associate of the American Council on Education and the executive secretary of the President's commission, doesn't quarrel with Burch's figures but he says: "This population-intelligence report does not give enough importance to the possibility of improving intelligence by education." In other words, if we broaden the base of our teaching we can regain a lot of the potential waste material that Burch has discovered.

What the Burch report overlooks is this, says Dr. Brown, "human intelligence never has been developed to its fullest among the great masses of people. No way has been found accurately to measure the ultimate capabilities of the human mind."

There are others, however, who while they may agree with Brown's postulation, question the methods now being used to develop these innate abilities.

A very dim view of the situation is taken by Canon Bernard Iddings Bell, educator, pastor, author and consultant on education to the Episcopal bishop of Chicago.

He thinks Henry Wallace is correct in his description of the current century but he says: "It does not follow because the common man has suddenly been lifted into control that he is thereby automatically made competent properly to exert control." He thinks Wallace's definition ought to be expanded. He says: "Ours is the century of the perpetually adolescent common man, of the common man unskilled in the art of living. Untaught in the wisdom of the race, he is incompetent either to rule or to be ruled."

Need Education For Common Man

The canon isn't snobbish. He is not looking down his canonical nose at anybody. As a member of society he takes his share of the blame by saying that society has played the common man a low trick "for which those who control education are chiefly chargeable."

Bell quotes the late Dr. William Rainey Harper's definition of an educated man: A man who by the

Canon Bernard Iddings Bell
"...unskilled...untaught..."

time he is 25 has a clear theory, formed in the light of human experience down the ages, of what constitutes a satisfying life, a significant life, and who by the age of 30 has a moral philosophy consonant with racial experience."

Bell thinks that what we do not do and what we ought to do to educate is, first, to give children a knowledge of the race's wisdom, imparting to them what they ought to know rather than teach them what they would like to study; second, to teach children how to read, write, listen to and speak the English language; third, they must be taught decent manners, the rights of others; fourth, they must learn that honest and craftsmanlike achievement is the only door to social approval; fifth, teachers must "inspire reverence for the unseen and impart some objective knowledge of what the various faiths about us are to do and teach."

I wish that some smart statistician would try to figure out if the kind of education which would give a man a high income likewise makes him fit to run a country as complicated as ours in a world as complicated as ours.

HOW BLUE YOUR EYES ARE . . . Anything can happen at a baby show, as witness this scene taken during judging at a Los Angeles competition. One-year-old Leland Dexter, contestant for the bluest eyes, went to sleep in midst of excitement and had to be judged in his carriage.

NEWS REVIEW

British Economy Menaced; Traffic Fatalities Slashed

Like a kaleidoscope in which several apparently unrelated chips of glass shift suddenly from a meaningless jumble of color into an understandable pattern, so at least some of the whirling segments of the world's intricate economy have begun dropping into place to form a coherent unit.

For masses of Americans, to whom economics could be boiled down into a matter of "you either have it or don't have it," the international hysteria of monies, credits, loans, spending, inflation at home and crises abroad began to take on some meaning.

Within a matter of hours came a sudden spate of developments, starting in England and ending up on virtually every farm in America. Having no ostensible connection on the surface, each fresh turn of events was linked inexorably with preceding occurrences. To philosophers, as well as economists, it was a perfect chain of causes and effects.

This is how it began:

1. **Field Marshal Viscount Montgomery, chief of the British imperial general staff, suddenly was called home from a tour of the Far East.**

Montgomery returned to Great Britain to advise the government concerning drastic curtailment of the nation's military establishment, cost of which (3.6 billion dollars a year) could no longer be borne by the threadbare British economy.

2. **In London, Labor government officials, no longer able to stave off a frank admission, told the world that England's plight was desperate, that the tight little isle was on the sharp brink of ruin. Prime Minister Clement Attlee, assailed with charges of "bungling" and "failure to act," nevertheless was given a vote of confidence when he sketched out a plan which would have British miners work an extra hour each day to increase England's coal production, key pillar in its economic structure.**

The British crisis was born out of four factors: Shortage of American dollars (the U. S. loan will have been used up by Christmas); shortage of coal (not enough to permit industries to operate and rebuild stockpiles); shortage of manpower, and inflation.

3. **Morally weakened under the threat of domestic political and economic crises, the London stock market broke swiftly, as sharp selling hit all sections.**

And, although U. S. state department observers scoffed at the idea that developments in England had produced a reaction over here, it appeared to be something more than coincidence that:

4. **Shortly after London stocks broke, wheat prices on the Chicago board of trade showed losses of nine to nine and one-fourth cents a bushel, while corn and oats dropped off from three to four cents. Industrial stocks also receded somewhat on the New York stock exchange.**

At the same time, it became apparent that the U. S. government, faced with high prices of grain and food and continued shortages abroad, would issue a call for another big wheat crop this year instead of reducing wheat production goals as was planned previously.

As the picture began to take shape, the dominating motif appeared to be economic insecurity.

DEATH ROAD: *Safety Report*

Compared with 1946, death is taking a back seat on the nation's highways this year, the semi-annual report of the National Safety council has shown.

For the first six months of 1947 the cross-country death toll stood at 14,480. That figure is 9 per cent below the 15,890 fatalities recorded for the same period last year. At the same time, travel was 11 per cent heavier this year.

According to the safety council's report, 2,490 lives were lost during June, which represents a 5 per cent increase over the June, 1946, record. In view of the increased traffic, however, it was a marked improvement.

Even the larger cities in the nation were decreasing their traffic fatalities. New York whittled its deaths by 15 per cent and Los Angeles by 16 per cent. Jacksonville, Fla., was tops on the record book with a 69 per cent decrease from 1946. Indication was that cities were becoming more traffic conscious.

INDONESIA: *U.N. Looks*

It was a matter of regret, the Dutch government said, that the matter of the Dutch-Indonesian fracas was being brought before the United Nations security council.

To a few million other observers, it was not so much a matter of regret as it was a surprise. U. N., it seemed, was even then overdue in its action.

Australia and India laid the problem before the council, where it immediately began to vie with the Balkan issue for priority of debate.

Although the Australian and Indian delegations told the council that the strife between Dutch and Indonesian forces threatened world peace, a Dutch spokesman in Washington said U. N. had no jurisdiction.

Netherlands authorities insist on terming the struggle a Dutch "police action," designed to control rebellious Indonesians who hate to wait until 1949 to attain their independence as a sovereign state. The Indonesians, however, say that the Dutch are waging a colonial war and that it looks like imperialism to them.

FARMERS BENEFIT

AAA To Resume Soil Program

WASHINGTON.—Extensive operations of the AAA soil conservation program were ordered resumed by the department of agriculture after congress finally approved a 255 million dollar administrative fund for the setup. Administrative expenses are in addition to the 265 million dollars which will go directly for payments to farmers participating in soil-saving practices.

Inaugurated in early days of the New Year, the AAA program offers cash and materials, principally lime and fertilizers, to farmers for carrying out approved soil and water conservation practices. Local details of the program are carried out by more than 100,000 farmer committeemen.

The program was halted in May when the house voted to appropriate only 165 million dollars for the setup this year and to end it altogether next year. The AAA had worked out a 300 million dollar program and President Truman had recommended that amount in his budget to congress.

Although the 255 million finally voted by congress is lower than the sum asked, the soil program is being resumed on the same basis as originally planned. The appropriation for administrative expenses is about 18 per cent less than last year. Bulk of the reduction in personnel and other expenses will be absorbed in Washington and state offices, allowing local AAA offices to retain most of their present staff.

A farmer may sign up for any number of approved projects, but he is promised only a certain amount of money with the provision that he will get additional payments if any funds remain after all farmers have been paid their minimum guarantees.

The program will be cut drastically next year. At insistence of the senate, however, the house agreed to go along with an appropriation of 150 million dollars for 1948.

ALL ON A STRING

'Magic Lasso' Enables Children To Realize Cherished Dreams

WNU Features.

PHILADELPHIA.—The American youngster's yen to be "a real cowboy" never wanes, and two war veterans, taking a leaf from their own childhood experiences, have made capital of it. Their unique business enterprise, spawned by wartime dreams, has harnessed the childhood ambition of being able to do real cowboy rope spinning tricks, which from time immemorial have intrigued youngsters at the movies, circuses, fairs and rodeos.

Their success formula was the development of a "magic lasso," which anyone can quickly learn to spin, yet which is "safe" in the hands of children Merely a piece of hand-finished sisal rope, it is fitted with a tiny imbedded swivel to permit free-spinning of the loop. The swivel also serves as a protective link should kiddies decide to do some fancy steer roping on playmates.

Children, of course, represent the bulk of potential customers. But even Hollywood studios have found the new gadget effective, using it as a standard prop in movie making. Broadway shows, where rope tricks must be more skillfully performed, find the "magic lasso" an efficient aid.

Partners in the unique business are David Knox and Horace Reese, both of Philadelphia. Childhood friends, both served in the armed forces, Knox in the army and Reese in the navy. Whenever personal plans for the postwar period were being discussed, the two old friends agreed that their major objective was to be in business for themselves.

Upon their discharge from the services, the two pooled their resources to found the business devoted to manufacture of the novel lasso. Starting on a small scale, without benefit of a veteran's loan, the two have seen their business grow to an organization employing as many as 14 people with an annual production approaching the half million mark.

Lately, a second rope development has been introduced by the Knox-Reese combination—a unique jumping rope that is adjustable so one or five can skip to their heart's content, without ruining the family clothesline.

MAGIC FOR CHILDREN . . . David Knox spins the "magic lasso," a new rope invention which enables children to realize their dreams of becoming "real cowboys."

American Flowers Bloom in Profusion In Far-off Pacific

American flowers are blooming in profusion this summer around army and marine corps hospitals in the far-off Pacific area.

Convalescent servicemen, finding their way back to health in these hospitals, all the way from the Philippines to Japan are the gardeners. The flower seeds, and vegetable seeds too, are supplied by Daughters of the American Revolution.

Tiny packets of seeds have been distributed through war department cooperation to the various Pacific areas. This year, 6,734 packages of seeds have been sent to the hospitals. The grand total since the project was originated is more than 50,000 packets of seeds.

The seeds are given to the convalescent men and are planted in gardens adjoining the hospital building. The patients have their choice of seeds and thus can grow the varieties of flowers and vegetables which might be found in their own yard back home.

Started during the war, the project has been continued by D.A.R. because of the many requests from hospitals overseas. In many hospitals there is keen rivalry among the men in growing the flowers and vegetables. Medical officers reported that the war gardens have greatly aided patients in their recovery to health.

Ex-G.I. Carries Out Order; Judge Pays

HOUSTON, TEX.—Acting on the plea of the youth's mother that she needed someone to do the work on the family farm, District Judge Frank Williford permitted an army veteran to return home. The youth was accused of writing a worthless check.

"Go home to your mother as fast as you can," Judge Williford told the youth, "but wire me when you get there."

The judge received the telegram all right, but it came collect. The cost, 45 cents.

Land of Spectacles

CHEYENNE, WYO. — Wyoming specializes in all kinds of unusual events—from cross-country horse races to bow and arrow buffalo hunts. Latest of the odd attractions were a 114-mile endurance horse race and a 15-mile "Pony Express" race.

G.I. Youth Gives Germans Novel Farming Lesson

Deep in the heart of occupied Germany a thriving sample of Indiana agriculture provides a novel lesson in American farming methods for people of the war-ravaged country. A Midwest home demonstration agent and a G.I. youth on occupation duty pooled their efforts and ideas to show nearly 100 German youths how to be good farmers while augmenting their meager diet by using vegetables grown by themselves.

Pfc. Birch Bayh Jr. of Vigo county, Indiana, is the American soldier and Miss Mildred Schlosser is the home demonstration agent who are responsible for the project.

Bayh, 19-year-old Hoosier farmer, qualifies as an able instructor by virtue of his past record. Two years ago, as a contestant in the annual production-marketing contest of National Junior Vegetable Growers association, Bayh was tilling a seven-acre plot on his grandfather's farm, where he raised crops worth more than $1,677. The crops were so good, Bayh sent a special batch to his father, Lt. Col. Birch Bayh of the U. S. army, then stationed in China.

In the national contest, Bayh's efficient operation rated so high he won the Midwest regional NJVGA title and a $200 scholarship from the $6,000 in contest awards provided annually by A & P food stores. Using this fund to augment his savings, Bayh entered Purdue university where his studies were interrupted by a call to army duty. Later he was assigned to the German occupation forces.

Impressed by the soil near his station in that country, and encouraged by seeds sent as a gift to him by Miss Schlosser, home demonstration agent and NJVGA advisor of his Indiana club, Bayh quickly recruited nearly 100 youngsters in his area and started a garden project. He divided his land into 45 individual plots with two children assigned to each. The young growers were given a series of lessons in American methods, tilling, planting and weeding. The results of their efforts are already evident, with a bumper crop of tomatoes and corn well on its way to maturity. Most of these products are new to the youths, but they indicate that they'll eat them with pleasure.

Bank Bulges Again— With Golden Wheat

CENTERVIEW, KAS. — The once-thriving Centerview State bank, which was liquidated 15 years ago, again is bulging with deposits — but this time the money is in the form of golden wheat.

Because of a shortage of granary space, A. R. Francis and his son, Raymond, leased the brick building which once housed the bank and have filled it with wheat.

Penn Liked Solid Houses, Deed Shows

SUNBURY, PA. — William Penn, Pennsylvania's solid Quaker founder, apparently was no advocate of temporary emergency housing. A deed for one of the first land grants made by the pioneer Penn family in this community, dated January, 1773, specified among its numerous provisions that a "substantial dwelling with brick or stone chimney, 25 feet square" must be built within three years of the date the deed was executed.

Frederick Nagle of Berks county, who rented the land for from $5 to $10 a year in present money, complied with the spirit of the deed. He built a log home so substantial that it lasted and was used as a dwelling place until this year.

Miss Katherine Reed, a school teacher who now owns the property, has the original parchment of the grant made by Penn's heirs.

Have an Eating Treat With a Barbecue!
(See recipe below.)

Barbecue Fun

Before the crisp, cool weather comes, treat yourself to one of those grand outdoor meals—a barbecue! There's no food like that cooked outdoors for real, honest-to-goodness flavor and marvelous eating.

There's nothing so relaxing, either, as eating outdoors, for most of the preparation comes ahead of time. Then, too, though you have to bribe and beg everyone to help in the kitchen, no one wants to be left out of the preparation when it comes to cooking out of doors.

Perhaps you have a barbecue unit to use for cooking; or maybe you just build a fire in the old makeshift brick oven in the back yard. Whatever you have, it will be good if you make the fire well in advance, and then let it burn down to glowing coals before you start cooking. That's the secret.

You have a choice of many kinds of meat—juicy hamburgers, plump weiners, steaks or ribs. But do have a good sauce to go with them. Or, let the folks have kabobs—everyone will enjoy roasting his own.

***Barbecued Ribs.**
(Serves 6)

- 3 to 4 pound ribs, cut in pieces
- 1 lemon
- 1 large onion
- ⅓ cup worcestershire sauce
- 1 teaspoon chili powder
- 1 teaspoon salt
- 2 to 3 dashes tabasco sauce
- 2 cups water
- ½ cup chili sauce

Place a piece of lemon and onion on each rib. Mix remaining ingredients together; heat to boiling and then brush sauce over the ribs. Broil slowly on outdoor grill and brush frequently with sauce. For outdoor broiling, place meaty side of ribs down on the grill. Onion and lemon may be secured with toothpicks.

For steak that is really elegant, use the above sauce for brushing the steaks while broiling. Or, if you prefer, the steaks may be marinated, as follows, for several hours before you start broiling: Mix together 1 cup of salad oil, ⅓ cup of vinegar, ½ teaspoon salt and ¼ teaspoon pepper, 2 tablespoons grated onion, 1 clove garlic and 1 tablespoon minced parsley.

Some people prefer a barbecue sauce for steaks, but even then they like to rub the meat with onion, garlic, herbs and such before basting with the sauce. Use your own taste as a guide. Steaks should be first quality, well aged and well marbled with fat for barbecue.

***Outdoor Potatoes.**
(Serves 6)

- 4 cups cooked potatoes, diced
- 2 cups sliced onions
- 1 tablespoon minced parsley
- 1 tablespoon paprika
- ½ teaspoon salt
- ¼ teaspoon pepper
- ¼ cup fat or drippings

Combine all ingredients and place in heavy skillet. Brown until crisp and golden colored. Serve piping hot.

LYNN SAYS:
Use These Neat Tricks In Your Kitchen

Place slices of bread on the partially opened lid of the kettle in which you cook strong smelling foods like cabbage and broccoli.

Spear tomatoes on a long fork and hold over a flame while turning. They will peel easily after this treatment.

Tea tastes better if it is mixed with a little orange rind, grated. Also, store it near a box of cloves in the pantry to make spicy.

LYNN CHAMBERS' MENU

- *Barbecued Ribs
- Buttered Buns
- *Outdoor Potatoes
- *Roasted Corn Ears
- *Cabbage Slaw
- *Deep Dish Blueberry Pie
- Cream
- Beverage

*Recipe given.

***Roasted Corn Ears.**

Remove outer husks from ears of corn. Turn back husk and remove the corn silk. Replace husk; place corn ears on grill. Turn frequently while roasting 8 to 12 minutes. Serve with butter, salt and pepper. The husk turns brown but the corn itself is excellent. If you prefer the corn more browned, roast longer

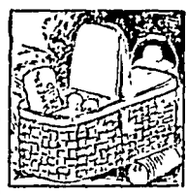
There's nothing quite like crisp, chewy food to set off the barbecued meat, skillet-fried potatoes and roasting ears, as some cabbage served with a creamy dressing and plump red-ripe tomato wedges.

***Cabbage Slaw.**
(Serves 6)

- 4 cups finely shredded cabbage
- 1 egg yolk
- 2 tablespoons sugar
- 1 tablespoon flour
- ½ teaspoon salt
- ½ teaspoon dry mustard
- ⅛ teaspoon paprika
- ¼ cup water
- ¼ cup vinegar
- 1 tablespoon butter
- ½ pint sour cream

Beat egg yolk; add dry ingredients and mix thoroughly. Add water and vinegar gradually. Cook in top of double boiler until thick and smooth, stirring constantly. Add butter. Chill. Fold in sour cream and mix with the shredded cabbage. Garnish with ripe tomato wedges.

Dessert problems are easy to solve. With fresh fruits and berries plentiful, a platter or basket of well chilled fruit and cookies will satisfy well for dessert. Some like cake for dessert for an iced beverage. Then make a spicy cake with a caramel frosting. It's just the kind to set off the meal properly.



Spice Cake.
(Makes 2 9-inch layers)

- 2¼ cups sifted cake flour
- 1 teaspoon baking powder
- ¾ teaspoon soda
- ¾ teaspoon salt
- ¾ teaspoon cloves
- ¾ teaspoon cinnamon
- 1 cup granulated sugar
- ¾ cup brown sugar
- ¾ cup vegetable shortening
- 1 cup buttermilk
- 3 whole eggs

Sift together flour, baking powder, soda, salt, spices and granulated sugar. Add brown sugar, shortening and buttermilk; beat for 2 minutes. Add eggs and beat another 2 minutes. Bake in greased, wax paper lined pans in a moderate (350-degree) oven for 30 to 35 minutes.

Let cool and frost with caramel icing: Mix 1½ cups brown sugar with ¼ cup cream, 2 tablespoons butter and 1 tablespoon vanilla. Bring to a boil and boil 3 minutes while stirring. Remove from heat. Beat until creamy, adding cream if necessary to make spreading easier.

Released by Western Newspaper Union.

Stale, hardened rolls and muffins can be freshened easily by placing in a paper bag, sprinkling the bag with water, then placing in the oven for a few minutes while they heat through and soften.

Let hamburgers take on glamour by serving them as a mixed grill with broiled tomato halves and pineapple.

Leftover egg whites may be stored for several days in a covered glass jar. Egg yolks may be poached until firm, then chopped and used in salads or sandwich fillings.

Plain Facts About Honesty

LESSON TEXT FOR AUGUST 24 — Proverbs 3.3; 11:1, 3; 12 17-22; 14:5; 23:10, 11.

MEMORY SELECTION — Prove all things; hold fast that which is good. Abstain from all appearance of evil. — I Thessalonians 5·21, 22.

EDITOR'S NOTE: Lesson subjects and Scripture texts selected and copyrighted by International Council of Religious Education; used by permission.

By WILLIAM CULBERTSON, D. D.
Of The Moody Bible Institute, Chicago.

THE Bible's presentation of the subject of uprightness of living, or plain, downright honesty in everyday contacts, is recognized by all who have given any attention to what it has to say.

The high ethical standard demanded by the Word of God is another evidence of its divine origin Were men to evolve a moral standard of their own, it is quite evident that that standard would not be very much higher than their own attainments; in fact, the probability is that the standard would be lower than the attainment of some. However, the Bible allows for no deviation from the standard.

We who by nature are the children of wrath have undoubtedly failed when we measure our lives against God's pattern. How needful is God's work of providing and effecting salvation! Those who have been born of God are then confronted with living a life that meets the divine standard.

I. A Plea for Honesty (Prov 3:3)

HOW good it is when the Christian has a reputation for integrity in all his dealings. However, that outward manifestation is possible only if there is inward reality. Therefore, we move in order of emphasis to the greater truth at the conclusion of the verse. Truth is to be written upon the tablet of the heart.

Here is the plea for heart honesty. It is not enough by plausible argument or by feigned conduct to appear honest before men. It is necessary rather to have motives so sincere, to have a heart so honest, that all we do and say will reflect a character that is honorable.

It is out of the fullness of the heart that man speaketh. As the heart is, so is the man. Let us give attention therefore to this word from God.

II. A Factual Presentation of Honesty (Prov. 11:1, 3; 12:17-22; 14:5).

THESE passages of Scripture bring to our attention the consequences of dishonesty as well as the rewards of honesty.

For example, we know that dishonesty is an abomination to God (Prov. 11:1; 12:22); that perversity of heart has its own reward, in that the perpetrator of evil is sooner or later ensnared in his own sin (Prov 11:3); that a lying tongue may be victorious, but that victory is short lived (Prov 12:19)

On the other hand, the rewards of honesty are also made apparent, for we are told that probity of character is God's delight (Prov. 11:1; 12:22); that the very integrity of the upright shall be a guide to them (Prov. 11:3); that blessings to others flow from the tongue of the wise (Prov. 12:18); and that the lip of truth shall be established forever (Prov. 12:19).

III. God and the Life of Honesty (Prov. 23:10, 11).

THE reference here to the ancient landmark has to do with the removal of such evidences as would prove the claim of individuals to certain property.

We are to respect the rights of others. Honesty involves more than correctness of speech; it implies rightness of life. No subtlety of reasoning can lead us to the conclusion that we may have God's approval if by unfair means we take that which belongs to another.

Particular attention is given to the fact that we are to have regard for the fatherless. The Word of God constantly gives special attention to the fatherless and the widows It would seem that God will particularly mark as amiss any unfair advantage taken over these individuals In fact, this text stresses that God as their Redeemer will plead their cause against anyone taking advantage of them. Of course, there can be only one result when God opposes, and that is disaster to the individual who occasions his wrath

Perhaps it is that very sense of helplessness that makes the fatherless depend upon him. It is certain that until we feel our need of God, we shall go on in our self-sufficiency without him. When our own lack of strength becomes apparent, then it is we turn to him, and then it is that he is willing to be our Redeemer.

Let us dare to face the implication of these texts. Unless we commend our God to men by our upright lives, we shall have to suffer the consequences of our dishonesty in divine displeasure.

Miss Patricia Kudje, who has been employed in Kansas City for the past year, came home with her parents Monday.

Fish And Wildlife Service Sets Duck Season Iowa Expected To Concur

Waterfowl hunting regulations designed to bring about a very substantial reduction in the kill of ducks and geese during 1947 have been announced by the U. S. Fish and Wildlife Service. In Iowa the 30-day season has been set for October 21 to November 19, inclusive.

The season will open at noon opening day and close at thirty minutes before sunset. Each day thereafter the season opens at sunrise and closes at thirty miinutes before sunset.

Bag limit on ducks, except mergansers, is four per day, eight in possession after the first day. Only one wood duck may be taken or possessed. Twenty-five American and or red-breasted mergansers may be taken per day with no possession limit.

The goose limit in Iowa is four with bag limit four. In Iowa only one of the total may be Canada, Hutchin's, or white-fronted geese, which in effect allows in this state one of the above and three blue and or snow geese in possession.

The state Conservation is empowered to further curtail the season as set by the U. S. Fish and Wildlife Service; however, it is believed that the Iowa Commission will concur in the federal regulations at their next meeting.

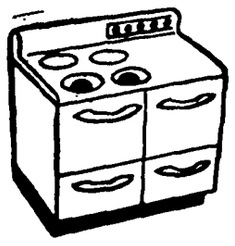
Ten Little Servants

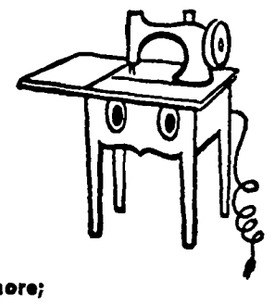
Ten little servants, waiting in a line;
Call one to do the wash—and still you have nine!



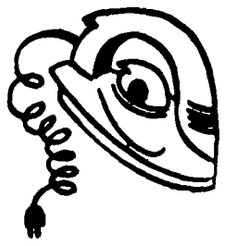
Nine little servants, working long and late,
Ask one to cook your meals—and still you have eight!

Eight little servants—working like eleven!
Call on one to clean for you, and still you have seven!

Seven little servants—you don't need candlesticks
When this one lights the house for you—and still you have six!

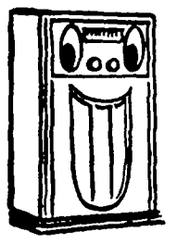


Six little servants, electrically-alive,
This one sews a handy seam—and still you have five!

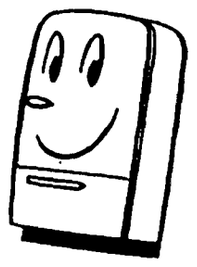


Five little servants to help with every chore;
One can iron all the shirts—and still you have four!

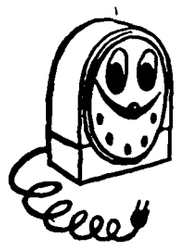
Four little servants—such activity!
One breathes a little breeze—and still you have three!



Three little servants—if you're feeling blue,
One will entertain you—and still you have two!



Two little servants, whose work is never done!
One keeps the food fresh, and thinks it's rather fun—



One tells the proper time from sun to setting sun.
(Dependable electric service makes these servants run—
And saves you lots of elbow grease. Suppose you had none?)

Yes, electricity is always ready to take the work out of housework. And it costs so little! Matter of fact, if yours is the average family, you're getting twice as much electricity for your money as you did 20 years ago. What other item in your budget does so much for so little?

Read the Want Ads and business Ads, they are here to help you do your business more quickly and economically.

Mr. and Mrs. C. G. Waterman were at Clear Lake on business Saturday morning.

Mr. and Mrs. Ed. Rall of Hanover, Ill., spent last week here visiting with her brothers, Bernard and Henry, and with her sister, Mrs. Elmer Schaefer and family near Miller.

Mrs. Ronald Gibbs and her class of nine Standard Bearers put on a very interesting and educational program at the W. S. C. S. meeting last Thursday afternoon. The ladies greatly enjoyed the fine program.

Dr. and Mrs. D. P. Anderson and daughter, Neva Ann, left Friday evening for Kansas City, taking the doctor's sister home, who has been here for a visit. Dr. Anderson and family are also enjoying a two-week's vacation.

Roger Ridder and Dean Roths left Thursday on an outo trip to the West Coast. The boys will take in the Black Hills, Yellowstone and other points of interest along the way to the Northwest. The date of their return is not definite, as they may seek work on the way out and back.

Frank Gibbs, a former Klemme man, returned to his home on the Hawiian Islands last week after coming to the states on a business mission. His wife, the former Blanche Gimer, could not come at this time. Mr. Gibbs is opening an insurance agency on the island.

Mr. and Mrs. Art Kudje and daughter, Ginger, drove to Kansas City, Mo., Friday afternoon for a visit with their sister-in-law and daughter, Mr. and Mrs. Harry Heite, Jr. The occasion was also to celebrate Mrs. Heite's birthday. Miss Patricia Kudje, who has been employed in Kansas City for the past year, came home with her parents Monday.

Fish And Wildlife Service Sets Duck Season Iowa Expected To Concur

Waterfowl hunting regulations designed to bring about a very substantial reduction in the kill of ducks and geese during 1947 have been announced by the U. S. Fish and Wildlife Service. In Iowa the 30-day season has been set for October 21 to November 19, inclusive.

The season will open at noon opening day and close at thirty minutes before sunset. Each day thereafter the season opens at sunrise and closes at thirty miinutes before sunset.

Bag limit on ducks, except mergansers, is four per day, eight in possession after the first day. Only one wood duck may be taken or possessed. Twenty-five American and or red-breasted mergansers may be taken per day with no possession limit.

The goose limit in Iowa is four with bag limit four. In Iowa only one of the total may be Canada, Hutchin's, or white-fronted geese, which in effect allows in this state one of the above and three blue and or snow geese in possession.

The state Conservation is empowered to further curtail the season as set by the U. S. Fish and Wildlife Service; however, it is believed that the Iowa Commission will concur in the federal regulations at their next meeting.

KLEMME LOCAL NEWS

Mrs Clarence Kluckhohn, who has been visiting at Wabash, Indiana, returned home Monday. She was accompanied by her sister, Mrs. James Stefanos and Mr. and Mrs. Robert Grogg and Diane, also of Wabash.

Mrs. Wesley Patterson and daughter, Paige, have returned home from a visit with her mother at Missouri Valley. They made the trip especially to see Mrs. Patterson's new nephew, Forest, son of Mr. and Mrs. Hans Raum of Elkport, South Dakota. Another sister, Mrs. Wm. Chambers of Dallas, Texas was also home.

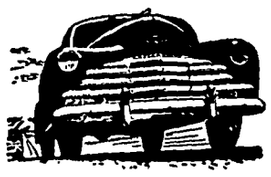
All these thrills are yours when you own this one car giving
BIG-CAR QUALITY AT LOWEST COST

CHEVROLET

Here are all the major thrills of motoring combined in one outstanding automobile—the new 1947 Chevrolet. Big-Car styling—Big-Car comfort—Big-Car performance—and big savings, too! They're all yours in this only motor car giving BIG-CAR QUALITY AT LOWEST COST.

One look at this smartly styled Body by Fisher will tell you it's the most beautiful motor car body in its field—both inside and out. It's extra-roomy, extra-comfortable, and extra-safe as well. It's one of the many Big-Car advantages found only in Chevrolet and higher-priced cars.

In the new Chevrolet, riding is like cruising in perfect weather. Your trip is so smooth, so steady, so enjoyable! You ride in solid, balanced comfort over all types of roads, with the famous Knee-Action Gliding Ride—exclusive to Chevrolet and higher-priced cars.



Count on having hair-trigger getaway—power for any hill—all the speed you'll ever need! For this new Chevrolet boasts a Valve-in-Head Engine—the extra-efficient type of engine—giving maximum results from every gallon of fuel. Remember—Valve-in-Head performance and reliability are exclusive to Chevrolet in the lowest-price field.

You ride in safety when you ride in this bigger-looking, better-looking Chevrolet for 1947, thanks to its Unisteel Body by Fisher, Knee-Action Gliding Ride and Positive-Action Hydraulic Brakes—a combination of features found only in Chevrolet and higher-priced cars.

May we suggest that you keep your present car operating efficiently and dependably by bringing it to us for skilled service, now and at regular intervals, until you secure delivery of your new Chevrolet. Come in for a complete service check-up today!

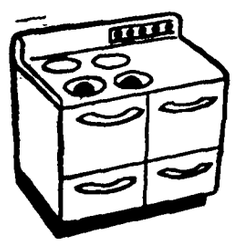
Ten Little Servants

Ten little servants, waiting in a line;
Call one to do the wash—and still you have nine!

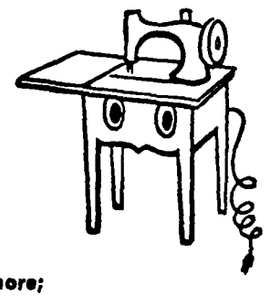


Nine little servants, working long and late,
Ask one to cook your meals—and still you have eight!

Eight little servants—working like eleven!
Call on one to clean for you, and still you have seven!

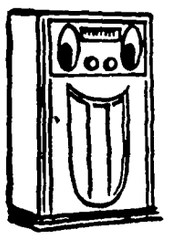
Seven little servants—you don't need candlesticks
When this one lights the house for you—and still you have six!

Six little servants, electrically-alive,
This one sews a handy seam—and still you have five!

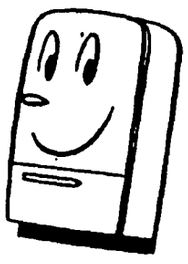


Five little servants to help with every chore;
One can iron all the shirts—and still you have four!

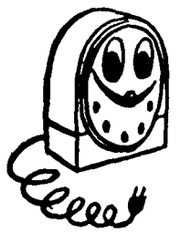
Four little servants—such activity!
One breathes a little breeze—and still you have three!



Three little servants—if you're feeling blue,
One will entertain you—and still you have two!



Two little servants, whose work is never done!
One keeps the food fresh, and thinks it's rather fun—



One tells the proper time from sun to setting sun.
(Dependable electric service makes these servants run—
And saves you lots of elbow grease. Suppose you had none?)

Yes, electricity is always ready to take the work out of housework. And it costs so little! Matter of fact, if yours is the average family, you're getting twice as much electricity for your money as you did 20 years ago. What other item in your budget does so much for so little?

Listen to the Electric Hour—the HOUR OF CHARM. Sundays, 4:30 P.M., EDT, CBS.

Teaching Staff Completed For Opening Day Of School

KLEMME SCHOOL TO OPEN SEPTEMBER 2ND

The Klemme School will open Tuesday, September 2nd with a morning session only. The students will register and textbooks will be issued. No hot lunches will be served as the pupils will be returned to their homes before noon.

Book bills will be sent home with the pupils some time during the first weeks of school. Pupils are asked not to bring money for books until these bills have been received.

Grade Teachers

Kindergarten: Miss Larraine Seim of Kiester, Minn.; First and Second Grades: Miss Lena Halfvassen of Chapin, Iowa; Third and Fourth Grades: Miss Bernice Tanner of Klemme; Fifth and Sixth Grades: Mrs. Betty Schlawin of Garner; Seventh and Eighth Grades: Mrs. Clara Smith of Goodell.

High School Faculty

Superintendent: A. L. Kingery; Coach and Commercial: W. E. Patterson; English: Mrs. Gladys Lewis; Home Economics and Science: Mrs. Kitty Andreae of Fayette, Iowa; Mathematics and Science: Robert Andreae of Fayette, Iowa; Band: Stanley J. Bulka of Sumner, Iowa.

School Busses

The school busses will travel practically the same routes as they did last year. Emil Beier's bus will go west past Lester Stille's. George Thieman will go east past John Waddingham's. Graydon Back will go west past Roy Swanson's.

Hot Lunches

Hot lunches will be served starting Wednesday, September 3rd. The charge will be 20 cents per meal.

NO SERVICES AT THE EVANGELICAL AND REFORMED SUNDAY

There will be no services or Sunday School at the Evangelical and Reformed Church Sunday. The Adult Bible Class will not meet Monday, but will meet September 8th.

Labor Day

KLEMME BUSINESS PLACES WILL BE CLOSED LABOR DAY, SEPT 1

As announced last week the Klemme business places will be closed on Labor Day, September 1st.

Tonight, Wednesday is also the last Wednesday night that the stores will be open until next June. However, Klemme business places will be open one night a week, Saturday.

HELLO, FOLKS!

HELLO, FOLKS!

Deputy Sheriff Jim Cooper and wife are the proud parents of an 8 lb. 10 oz. baby boy born Saturday afternoon at the Garner nursing home.

The Deputy was so elated that he slacked up on his drive to catch traffic violators but says he will make up for it this week. However watch your driving, folks!

Services Held Friday For John N. Day

Funeral services were held at the Methodist Church Friday afternoon at 2:00 o'clock with Rev. Herschel E. Harvey, Pastor, officiating and with Rev. Calvin Grosshuesch, pastor of the Klemme Evangelical and Reformed Church assisting. Rev. Grosshuesch read the following obituary.

JOHN NELSON DAY was born September 9, 1880 on a farm near Klemme, the son of R. M. and Dora Day He grew to manhood and was educated in the Klemme school. He attended Morningside College at Sioux City and taught school in the Klemme vicinity before his marriage to Anna Mildred Smith on June 26, 1907. To this union was born one son, Dorance Smith Day.

Mr. Day was in business in Buffalo Center for four years before coming to Klemme where he operated a general store for over 25 years. He was active in Scout work, and for many years was President of the Board of Education. He was a member of the Masonic Order, Modern Woodmen of America, Nat'l League of District Postmasters, Klemme Methodist Church, and was always ready and willing to help with any project that was for the betterment of the community.

In 1934 he was appointed Postmaster. The duties of this office were so confining and exacting during the war years that they brought on a paralytic stroke on May 28, 1946. Since then he was a partial invalid but enjoyed visiting with his many friends. He derived much pleasure from all the kindnesses which were bestowed on him. He was greatly sustained during this time by the constant care and devotion of his loving wife who did all in her power to make the days as pleasant as she could.

On Sunday August 17 he suffered a second severe stroke from which he failed to rally, and passed on the evening of August 19, 1947.

Surving are his wife, Mildred; his son Dorance and his wife Ruth, one grandson Gary all of Mason City; one sister Ida Baumgartner of Rock Falls, one brother Stephan H. of Hubbard, Oregon and several nieces and nephews.

He was preceded in death by his parents, two sisters and a brother.

Members of Bethel Lodge No. 619 took part in the services with the following Masons as casket bearers: Sumner Trumbell, Fred J. Arnold, Wm. H. Lemke, W. F. Pavey, Ed. Thompson and James Thomas. Mr. Day was a member of Bethel Lodge.

Masonic burial rites were conducted at Memorial Park Cemetery near Mason City where Mr. Day was laid at rest in the family lot.

Out-of-town relatives and friends who attended the funeral of J. N. Day were as follows: Mr. and Mrs. D. S. Day and son Gary of Mason City; Mr. and Mrs. J. E. Baumgartner of Rock Falls; Mr. and Mrs. C. D. Nissen of Sioux City, Iowa; Miss Margaret Skow of Watertown, South Dakota; Mr. and Mrs. Bert Mathews of Clear Lake; Mr. and Mrs. Walter Ross of Britt; Mr. and Mrs. Sam Barr, Manhattan, Ill.; Mrs. Laman Johnson of Chicago, Ill.; Mrs. Dick Jensen of Saunemin, Ill.; Mrs. Abbie Ross of Garner; Mrs. M. D. Kubicek and daughter Ann of Mason City; Mrs. Edward Rall of Hanover, Ill.; Mr. and Mrs. O. Overbough of Kanawha; Mrs. Geo. Peterson of Clear Lake; Mrs. Vern Petersen of Clear Lake; Mr. and Mrs. Art Petersen and son Allan of Clear Lake; Mr. Vern Whaley of Mason City; Mr. Keith McCourt of Mason City, and Mr. Fred Lasen, Mason City.

Klemme business places will be closed Labor Day, Monday, September 1st.

Harveys Honored On Their Silver Wedding Sunday

REV. AND MRS H. E. HARVEY CELEBRATED TWENTY-FIFTH ANNIVERSARY

Rev and Mrs. Herschel E. Harvey of Klemme, celebrated their Silver Wedding Anniversary Sunday, August 24th, 1947.

In honor of the event the Liberty and Klemme congregations of the Methodist Church held a program and reception for them at the Klemme Church Sunday evening with R A Jorgenson as master of ceremonies. Over 200 people attended from Liberty, Klemme, Clarion, Latimer, Coulter, Dows, Plymouth, Ledyard, Lakota, Alexander, Radcliffe, Garner and Denver, Colorado. Cpl. Elwood Harvey, their son who is with the U S Army Air Corps of Lowry Field, Denver, being home on furlough for the occasion.

A miscellaneous program was presented including a vocal trio by three Beier girls who sang, "I Love You Truly," a history of the "Harvey House" by Emil Blumer; A skit presented by Miss Novella Bredbenner with a group of boys and girls, a duet by Mesdames Wesley Patterson and Vern Bisom who sang "Silver Threads Among The Gold;" Presentation of a box of silver coins and gifts of silver by Mrs. Lester Stille, which was followed by a response by Mrs. Harvey and Rev Harvey. Miss Marcelle Josten played two numbers on her marimba after which the program was closed with the group singing of "Blest Be The Tide That Binds," and a closing prayer by Rev. Broberg of Garner.

After the program lunch was served Rev. and Mrs. Harvey, Elwood and LaNelle; Sunday School Superintendents Bernard Pringnitz and Otto Lemke, and their wives; Lay Leaders John Chambers and Emil Blumer, and their wives, and Rev. and Mrs. Broberg, were all seated at a long table decorated in pink and white with a decorated wedding cake, topped with a bride and groom and baked and decorated by Mrs. Marvin Isvik, was used as the centerpiece. White napkins with silver bells on which was printed "Nellie and Herschel" and vases of flowers completed the decorations. The bride and groom used on the cake as the decoration, was the same one which had been used on the cake served at the golden wedding anniversary of Mrs. Harvey's parents.

All present were served with coffee, punch, ice cream, cake and white and pink mints. Mrs. C A. Larsen and Mrs. Benn Coobs poured at the serving table.

Herschel E. Harvey, son of Mr. and Mrs. Nathaniel B. and Susan Harvey was born at Deer Park, Maryland. Nellie, daughter of Mr and Mrs. Henry A. and Sarah E. Schmidt, was born at Almont, Maryland,

After completing grade school Herschel Harvey graduated from the Asbury Academy at Wilmore, Kentucky. He received his B. .D degree at Morningside College, Sioux City, Iowa and completed his seminary work at Drew University at Madison, New Jersey.

Nellie Schmidt finished her grade school work in Altmont and then graduated as Valedictorian in Oakland High School, a county high school in Garrett County, Maryland. She then attended Catherine Business College at Cumberland, Maryland and graduated as an honor student.

Herschel E. Harvey and Miss Nellie Schmidt were united in marriage at her home in Almont, Maryland on August 24, 1922 at 8:00 P. M. with the Rev. Charles Thompson officiating. To this union were born three children. The first baby daughter who died shortly after birth; Elwood, now with the U. S. Army Air Corps, recently returned from Italy and now stationed at Lowry Field, Denver, Colorado, and La Nelle, a student in the Klemme High School.

Rev. and Mrs. Harvey came to Iowa in 1925 where he was pastor of the Ledyard-Lakota charge. While attending Morningside College he was student pastor of the Cushing church. Rev. and Mrs. Harvey then returned to the East and while attending seminary had the student charges at Stockholm, N .J. and Portland, Pa.

They returned to Iowa again in 1933 where Rev. Harvey served as pastor at Rowan-Latimer, Swea City-Grant, Clarion and for the past six years has been pastor of the Klemme-Liberty charge.

Mrs. Harvey Helped During Teacher Shortage

The community and the school system is also indebted to Mrs. Harvey who came to the rescue during the critical teacher shortage by giving up her home duties to accept a position on the high school staff as commercial teacher. She taught the past three years during the teacher shortage.

Rev. and Mrs. Harvey have been industrious and faithful workers in all of the charges they have served and have made a great many friends where ever they have been located.

Rowan Sunday School Class Help Harveys Celebrate

Some original members of a former Sunday School which Rev. and Mrs. Harvey organized, and which Mrs. Harvey taught at Rowan, came Sunday to help Rev. and Mrs. Harvey celebrate their Silver Wedding Anniversary. A fine picnic dinner was enjoyed by all in the Klemme Park. The Rowan people brought their baskets of dinner as well as 25 silver dollars which they presented Rev. and Mrs. Harvey as a wedding anniversary gift.

Klemme People Are Enjoying Vacations

KLEMME PEOPLE ON VACATION TRIPS THIS WEEK

Mr. and Mrs. Cecil Bridges and Mr. and Mrs. Kermit Stille left Sunday on a fishing and vacation trip to Minnesota for a week.

Mr. and Mrs. Fred Caroles, Mr. and Mrs. Virgil Stille, Mr. and Mrs. George Stille and Mr. and Mrs. Arthur Carlson all left Sunday for Minnesota on a fishing trip.

Mr and Mrs. Ed. Thieman and Mr and Mrs. Marvin Barz left last Friday on a trip to Denver and other points of interest on a vacation trip.

Mr. and Mrs. Glenn Terhufen and Mr. and Mrs. Milvern Barz left last Wednesday on a vacation trip to the Yellowstone Park and other places of scenic beauty

Mr. and Mrs. Roy Jacobs left Sunday to take in the State Fair as their vacation.

Edward Grosshuesch, Dean Jacobs and Francis Sherwood left last Thursday on a trip to the Black Hills and the Yellowstone Park.

Mr. and Mrs. LeRoy Johnson are also visiting the State Fair as their vacation trip this week.

Mr. and Mrs. Alvin Goll and son Lyle, left last Wednesday on a vacation trip to Minnesota and Canada. The trip was in honor of Lyle who won three ribbons for his showing at the recent Achievement Show.

Mr. and Mrs. E. J Arnold and Mr. and Mrs. Roy Arnold left Sunday for Des Moines to take in the State Fair for several days.

Mr and Mrs. Verner Priebe and family returned Friday from a trip. They were accompanied to Wapenkanetta, Ohio by Mrs. Rosendahl who remained there for a visit. The Priebe's then drove to Chicago and followed Lake Michigan to Milwaukee where they visited with Mr. and Mrs. Clyde Marshall at Milwaukee, Wisconsin. They then returned home, driving through scenic Wisconsin.

Mr. and Mrs. Martin Barz and Maxine are on a vacation this week, part of which will be spent at the State Fair.

Mr. and Mrs. Verner Stromer left Tuesday evening for the Twin Cities to take in the Minnesota State Fair for a couple of days and will then drive into Northern Minnesota for a few days of vacationing.

Mr. and Mrs. Ed. Thompson and Mrs. Edna Thada left Sunday for the East on a vacation trip. They will visit Mr. and Mrs. Ira Overholt at Keesville, New York and will then take in Washington, D. C. and tour through points of interest on the way home.

Services Held Today For Retired Klemme Farmer

SERVICES HELD TUESDAY FOR GOODELL PIONEER

Nels Chelsvig, 81, Died Saturday Morning Following Illness

Funeral rites were held at the Goodell United Brethern church Tuesday afternoon for Mr. Nels Chelsvig who passed away on Saturday morning after a short illness Rev. Carlton Spencer, pastor conducted the services.

Obituray

Nels Chelsvig, age 81, a retired farmer, who lived in the town of Goodell for a quarter of a century, passed away after a short illness, Saturday morning, August 23, 1947.

His parents were natives of Norway, but Nels was born in Story County, Iowa on July 25, 1866. He attended the rural schools nearby and also attended religious instruction at the Norwegian Lutheran Church and became a member by Confirmation.

In Februray, 1888, at the age of 22, Nels Chelsvig and Rande Anderson were married and began housekeeping on a farm near Roland, Iowa, after which they moved about for a few years, being in Texas four years. Then they again came north and farmed for 20 years in Wright and Hancock Counties, retiring and moving to Goodell in 1922. Nels and Rande Chelsvig were the parents of ten children, nine of whom survive.

In 1945, after having been married for 57 years, Mrs. Rande Chelsvig passed on to the great beyond, and now two years later Nels Chelsvig too has passed on.

He leaves of his immediate family four daughters; Mrs. Clara Kilbourne, Des Moines; Mrs. Julia Noren, Chicago, Ill.; Mrs Nellie Daniels, Westport, Minnesota; Mrs. Evelyn Robinson, Goodell, Iowa.

Five sons; Chester, LeRoy, Minn; Charles, Des Moines; Arthur, Kanawha, Iowa; Bert, Des Plaines, Ill.; and Raymond, U. S. Navy. Also 25 grandchildren and 13 great grandchildren, and other more distant relatives and friends.

The Wellemeyer Funeral service was in charge of the arrangements and interment was in the Amsterdam Cemetery east of Goodell. The casket bearers were Lew Wesenberg, Chas. Konklin, Ole Sandberg, Walt Mason, Jack Watermiller and Wm. Dempsey.

Final Notice!

ART KNOKE DIED SUDDENLY AT MASON CITY HOSPITAL

Mr. and Mrs. Art Knoke Retired From Farm Life This Spring

Funeral services for Art Knoke, 55, retired farmer were held Wednesday afternoon at the Klemme Evangelical and Reformed Church with Rev. Calvin Grosshuesch preaching the funeral sermon. Arrangements were in charge of the Wellemeyer Funeral Service.

Rev Grosshuesch in his service read the following story of Mr. Knoke's life.

Obituray

Arthur D Knoke, age 55, a resident of this community for fifty years, passed away Sunday, August 24, 1947, after a two week's stay at the Mercy Hospital.

His parents, Frederick and Whilmina (Nuehring) Knoke, were natives of Germany. Art was the youngest of five children and was born near Postville, Iowa, May 14, 1892.

Arthur Dietrich Knoke was baptized in the Reformed Church at Postville on October 16, 1892, by the Reverend J. Gass.

His parents moved to Hancock County when Art was a small lad, and later purchased a farm west of Klemme. Here Arthur attended our rural schools, and received religious instruction at the Klemme Reformed Church. He became a member of this church by Confirmation, and later was chosen as Deacon for a three year term, and at present he held the office of Elder in this church.

On November 22, 1916 at the age of 24, Arthur D. Knoke and Louisa Groh were married at the home of the bride's uncle, Jake Groh. They commenced housekeeping on the Knoke farm four miles west of Klemme, and later they bought this farm. They were the parents of three children.

Art Knoke was a big man physically and will be remembered for his sunny disposition and his ready smile.

He reached the age of 55 years 3 months and 10 days.

He leaves of his immediate family besides his wife, Mrs. Louisa Knoke; two daughters Esther, Mrs. John Kaduce, Jr.; Lillian, Mrs Don Mourlam; an adopted son, Arthur; one grandson, Carroll Kaduce; one sister, Mrs. Minnie Haupt. Also 17 neices and nephews and other more distant friends and relatives.

Mr. Knoke was buried in the Ell Towship Cemetery on the family lot and was bourne to his resting place by Alfred Josten, Fred Bell, Glenn Terhufen, Werner Schlawin, Fred Schmidt and Emil Lau.

REV. RUBEN GROSSHUESCH AND FAMILY IN CAR ACCIDENT

Rev. and Mrs. Ruben Grosshuesch and baby are in the Deaconess Hospital at Marshalltown following a car accident.

Rev. and Mrs. Grosshuesch and baby were out for a ride in the country near Melbourne Thursday evening when they were struck by a car at a country intersection. Their car was badly wrecked. They were taken to the Marshalltown hospital. Their baby was uninjured but Mrs. Grosshuesch suffered a fractured vertebrae, while Rev. Grosshuesch suffered a compound fracture of the right arm.

Miss Gertrude Grosshuesch, sister of Rev. Grosshuesch went to Marshalltown Sunday and found that they were making a good recovery. Rev. Ruben Grosshuesch is a son of Rev. and Mrs. Calvin Grosshuesch of Klemme.

SUNDAY SCHOOL LESSON

Work Is Good

LESSON TEXT FOR AUGUST 31—Proverbs 6 6-11; 18 9; 24 30-32; Ecclesiastes 5 12.

MEMORY SELECTION — Whatsoever thy hand findeth to do, do it with thy might.—Ecclesiastes 9 10.

EDITOR'S NOTE: Lesson subjects and Scripture texts selected and copyrighted by International Council of Religious Education; used by permission.

By WILLIAM CULBERTSON, D. D. Of The Moody Bible Institute, Chicago.

WISE indeed is that legislator who understands that there are two extremes to be avoided in dealing with the problems of the working man. The one extreme is that heartless, cruel exploitation of labor which grinds men to powder, which deals with individuals as chattel. The other extreme is to provide such an amount of free time for the individual that both his personal life and economic prosperity are in danger.

Work is good. It is well to keep in mind that before the fall man was commanded to tend the garden Perhaps to some of us that command is not a command to work, because the evidences of sin in a cursed creation were not present!

Life without purpose, life without activity for good, would be vain and actually intolerable.

I. An Illustration of Prudence and a Warning Against Indolence (Prov. 6:6-11; 18.9).

THE illustration from the creature world is apt. Ants, as this scripture states, have no overseer, and yet they are diligent in providing for the time of need.

It would seem as though they are constantly active in caring for present and future needs. In Palestine, where they may be active throughout the year, there is still the need of stored provisions for the rainy season, and so it is true that the ant gathers food in the harvest for future need.

Anyone who is tempted to be indolent would be wise to consider the ways of the ant, and to manifest as much concern for present and future needs.

The sluggard is described as one asleep, as one who is never satisfied, but constantly wants more slumber. Such folding of the hands, such indolence, brings poverty, and that poverty comes as a robber.

Indolence is not mere passivity. The man who fails to work is not guilty of omitting to do what he should do, but he is actually a robber of society. There is an active element involved in indolence; not only has the man failed to contribute, but, in addition, the good that he might have done has remained undone. The sluggard is therefore a brother to the destroyer (Prov. 18:9).

II. An Illustration of Indolence and a Lesson in Prudence (Prov. 24:30-32).

IT IS striking that the Word of God presents the ant as the illustration of prudence, but when it comes to an illustration of indolence it directs our attention to man.

The illustration is that of the man who is lazy, who is void of understanding. The Preacher visits him. Going to his field and vineyard, he finds it grown over with thorns, covered with vetches, and the stone wall broken down.

Instead of citing the particular lessons learned, the Preacher simply observes that he looked on, thought deeply, and received instruction Perhaps the best antidote to laziness is to see it in its inaction. The squalid conditions, the inability to cope with emergencies that we normally see in the life of the man who wants only ease are sufficient to warn most of us against it.

Entirely apart from the dignity of labor, the homely recompense of being able to meet our own needs is the compensation of self-respect that initiative and resourcefulness bring. May we have a higher goal as we labor than merely providing for our own needs, though this is certainly important. Beyond it, of course, is the ability to help others also (cf. Eph. 4:28).

III. A God-Given Reward for Labor (Eccles. 5:12).

ONE of the great compensations of faithful labor is sleep. This passage speaks of the sleep of the laboring man as sweet. When as Christians we have fulfilled our duty, when we have given an honest day's work, the recompense of the Lord is surcease from labor.

The great stress of the Word of God is similarly on the man in authority doing that which is right for those who labor under him, and on the laborer, to be worthy of his hire. Thus does the Bible guarantee a cordial and happy relationship between employer and employee. When either party departs from biblical standards, chaos results.

Here is a plan as up-to-date as the present hour, as workable as the most precise mechanical device ever made. All that is necessary is that the Word of God be followed

THE FICTION CORNER

THE PORK BANDIT

By DEE RANDALL

NOSEY COLLINS, as you know, is the Number One Egoist of the day. Just as Napoleon once laid claim to the title. But that was back in the 17th or 18th century. And nobody bothers much about him today more. Except those who like to dig and delve into musty old history books.

Napoleon had only an Empire to conquer. Nosey had a newspaper office and an ever-loving Tillie as his territorial grounds.

It's true, it proved rather expensive this ego-building business. But no matter the cost, Nosey is acclaimed as a self-made man. One of the finest men on the staff of the Daily Gazette.

Besides Tillie and the newspaper office, it must be revealed, Nosey had still another love. She now lay safely in her private retreat . . . the left hand drawer of Nosey's desk.

There was a quiet purr as Nosey stroked the soft, dirty white fur on Dermie's neck. Dermie was the nickname for Hypodermic. A name fitting to the oversized cat because you really had to stick a needle in her to make her stir.

This Week's Best Fiction

There was only other thing that would rouse the reflexing feline That was the smell of boloney or liver, even from the farthest corner of the ink-smattered city room.

Originally from the restaurant on the corner where she was expected to do the place of mice and make herself generally useful, she had found refuge in Nosey's comfortable desk drawer. The clatter of dishes and hustle bustle of the crowded restaurant had proved too much for her sensitive nerves.

Nosey stopped his tender patting. He annoyed Dermie no end. Raising her head, which was more energy than she cared to use, she cast a quizzical eye at him.

"Dermie," Nosey spoke seriously, "if we could get a beat on this Pork Chop case, we'd sure have something."

Dermie's answer was an assenting purr.

"Seven butcher shops in seven days," Nosey went on, "that's a record for any criminal. He's got plenty nervy, too. Sent them all a warning beforehand. He's got the police in a quandary. Must be a master bandit." Here he snickered mirthlessly at the idea of a ghost operating a cash register and using a butcher knife in a man's store.

"What puzzles me," Nosey went on with his one-sided conversation, "where he gets in and out with the police right under their eyes. And why does he always pick on pork stores? The same chain all the time. If we could get to the bottom of that, we'd be getting some place."

Dermie's boredom with this conversation was evident. She settled back on the comfortable pillow installed in the drawer. But not before looking at the empty plate before her. Soon she was snoring peacefully. She knew the plate would be filled later on.

The stranger's hand quivered nervously as Nosey motioned him to a chair.

Nosey read and reread the unsigned note on his desk. "Maybe I'll be able to get a lead out of this after all," he reflected. Some butcher has received a note saying his store would be next. He was coming in to speak with the editor. The editor had turned the whole business over to Nosey disgustedly. News seldom walked right into a newspaper office. Leads that came in by mail might better have been called "misleads." Usually some quack seeking publicity.

Grim determination could be seen in the set of Nosey's features. The editor had faith in him. He would have to get to the bottom of this thing. As number one egoist, he felt certain he could.

AN INDIGNANT public was becoming boisterous in their vehement denials of this Pork Bandit who slew and robbed at regular daily intervals. The editor had hinted at a bonus or something equally satisfying financially to the guy who got a lead on this story It would sure come in handy, Nosey dreamed. Next month he and Tillie were getting married.

A glint of happiness filled his usually placid eyes. Sweet Tillie with her flaxen curls And how she could cook! Nosey's mouth watered in anticipation of the daily meals, like those he had already sampled at Tillie's little apartment.

Dermie opened drowsy eyes and looked reflectively at the still empty plate. She let out a growling hiss and rousing herself, waddled off indignantly. She wasn't used to such shabby treatment.

Nosey had no time to worry over this breach of friendship in Dermie's indignant stamping off. In fact, she was back in a few moments, rubbing her face against his pants leg as a reminder of her gnawing vitals. She hadn't been fed in two hours.

Nosey paid no attention to her pleading. He was waiting for the stranger who was to visit him. At precisely three o'clock, as the note stated, a tall, shabbily dressed man appeared. His dark hair was sleeked neatly back, but otherwise he was hardly a picture of sartorial elegance.

"Mr. Collins? You received my note?" Nosey noticed the stranger's hand quivered nervously as he beckoned him towards a chair. He took the paper the man handed him.

"I'm manager of the store on East 80th street. Received this note early this morning. I left the place and hurried right down here as soon as I could. Didn't have time to change my clothes," he looked down apologetically.

"Your store will be next. This afternoon," the note read. It was signed: "The Pork Bandit."

Nosey scanned the writing carefully Nothing there to give much of a clue. "Have you seen the police?'

"No sir, thought I'd speak to you first. They seem to be getting nowhere fast," he laughed ruefully "There has been a note before each crime, you know," he reminded him. Nosey absent-mindedly patted Dermie's neck. She stirred looked languidly at the visitor and dozed off again.

Nosey asked him a lot of questions and the visitor seemed anxious to supply all the details possible. "I'm flattered you have so much confidence in us," Nosey told him. "Will you pardon me a moment while I get my notebook. I want to jot down all the information you can give me."

Now Nosey never bothered with a notebook. Any old piece of copy paper did for the hottest scoop.

Outside the city room, Nosey headed for a telephone booth. He made a call, picked up a notebook from a protesting stenographer and returned to his nervously waiting visitor.

He wrote down sentences scrupulously, making sure to dot every "i" and cross every "t." To anyone looking on, it was evident Nosey was stalling for time.

It was only a matter of a few minutes before the two husky cops arrived. A pair of handcuffs were clinched on the now sputtering visitor who demanded to know the meaning of this.

"Here, boys," Nosey addressed the cops, "is your Pork Bandit." He kind of sneered over the name as only a real egoist could do.

The man suddenly stopped battling. "How did you know?" he asked.

"Well, you see," Nosey drawled, his five feet four swaying magnificently, "you said you just came from your pork store. When Dermie woke up and just went right back to sleep again, I knew that was a lie. If you had really come from there, she would have been over there sniffing your pants and licking your leg, maybe even chewing a piece out of it. It's past her meal time now," he smiled down fondly at Dermie who had stirred at mention of her name, looking expectantly at the empty plate.

He went on: "Then you told me some details that the police have carefully guarded from the public. Nobody but the Pork Bandit himself could have known them."

The man hung his head despairingly. "I used to own half of the chain of stores," he spoke bitterly. "Until my partner swindled me out of my share. It was the only way I knew of to get back what really belonged to me."

For a moment Nosey's gaze was sympathetically bent towards the man's back as they led him away. Then he returned to Dermie.

"Have patience, old girl," he patted her head. When he returned, there was an extra cushion in Dermie's drawer domicile and a brand new plate. It has two sprightly mice painted on it. This has caused no end of concern to Dermie, who, minus her once sharp teeth, can't figure out just how to bite into the little rascals. She doesn't have any trouble with the extra helpings of boloney, though.

Series H-47

Sportlight by Grantland Rice

FOR the last six years, if you feel strong enough to turn back the calendar to 1941, the Cardinals and the Dodgers have taken over most of the pennant interest in the National league. By some odd turn, the Cubs slipped safely into port in 1945, but even then the Cardinals were breathing not fire on their necks.

It must be admitted, that in most of the Cardinal-Dodger pursuit races, the Red Birds from St. Louis have shown more wing power in the stretch. They had the extra flutter needed. A year ago, around this time, the Dodgers were seven-and-a-half games in front of their Cardinal pursuers, but this lead wasn't enough, as they finished in a dead heat with the Cardinals winning the play-off.

Grantland Rice

Whatever happens in the foggy future, and all futures are foggy, the Dodgers have stolen the National league show up to this spot.

Just before the season opened, their manager, Leo Durocher, was ordered to Elba, or St. Helena, the Napoleonic hide-out, by Happy Chandler, who, right or wrong, also was wrapped up in a fog. This forced Branch Rickey to reach out and drag in Burt Shotton, the most underrated manager in baseball, who knew nothing about his team.

Shotton stepped into the middle of a strange squad. He soon lost his star, Pete Reiser, who still believes his head is harder than a hydrant or a concrete wall. Then Shotton began looking around for a pitcher who could travel four innings—almost anyone who could locate the general direction of the plate.

A Mild Old-Timer

Shotton, a mild, country looking old-timer, the exact opposite of Durocher, like Ole Man River, just kept rolling along. The Dodgers were shot. The day of the Bums was over. The Brooklyn attendance would take a *dizzy dip*. But what happens? The Dodgers move out in front, and the attendance fills the ball park, despite a wet, cold spring and a wetter, colder June.

The Dodgers, so far, under Shotton, have outplayed the Bums. And they have even keener fan support. For Brooklyn knows its baseball and Brooklyn understands and appreciates the handicaps Shotton has faced, with Chuck Dressen and Red Corriden over in the Yankee camp.

An old-timer by the name of Burt Shotton deserves much more credit than he has received. He has turned in one of the big jobs of the year.

The Cardinals, looking back to March and April, appeared to have class. The Giants have had power. The Braves have had balance, pitching and hitting. But the Dodgers remain the major threat, the team to beat.

A few days ago, I ran across my old friend Arky Vaughan, one of the best all-around ballplayers you'll see in many a year. Arky can play either the infield or the outfield—and he is one of the best natural hitters baseball has known.

"What holds the Dodgers up?" I asked.

"A good all-around ball club," Vaughan answered. "There's always somebody around to handle the job when we get in trouble. This means pitchers, outfielders or infielders. We've had more hard luck with Reiser, Edwards and others, than any other team. But we keep hustling. We'll outhustle the Cardinals, too. We have a bunch of young pitchers, who will be stars next year. After all, Branca is only 21. Watch Hatten and Barney. Robinson has turned in a swell job. Show me a stronger second base-shortstop combination than Reese and Stanky. They are winning ballplayers. The Dodgers are made up of winning ballplayers.

The Yen to Win

"Every team and every ballplayer likes to win. But the Dodgers like the winning side better than anyone else. I can't understand why so many people are surprised at the Dodgers' showing. We might easily, with better luck, have been much farther in front."

It might be mentioned here that Vaughan has been one of the stars in this Dodger drive. Vaughan's hitting and his all-around play has filled a wide-open gap. And Vaughan is no longer a kid.

But, now the Cardinals are coming along—and the Cardinals have always been the team to beat.

They were 3-to-5 shots last April. They were the sure things of an unsure game. They still look to have the class, the experience, the pitching and their share of power. But, it is still a question as to whether they can outrun the Dodgers and the Braves. Anyone who leaves or heaves out the Braves is a trifle goofy.

The Yankees already have wrecked the American league race. This means a bigger world series payoff. This also means a keener financial interest for any National league winner.

Information on How To Raise Your Dog

A LITTLE knowledge is a dangerous thing when it comes to treating illness. If in doubt about what ails your pet, better call the veterinarian. Many diseases, however, are simple to recognize and treat by yourself.

* * *

Steps in treatment of many dogs' diseases is given in our Weekly Newspaper Service booklet No. 78. Covers diet, housebreaking, teaching tricks, etc Send 25 cents (coin) for "How to Raise and Train Your Dog" to Weekly Newspaper Service, 243 West 17th St., New York 11, N. Y. INS CAUSED DAMAGE TO RASPBERRY BUSHES

Rains played havoc with the wa raspberry crop this year, d the damage they may carry er into next year's crop.

Both the black and the red rieties were affected.

Specimens from nearly every rt of the state show much the me troubles, according to H. Nichols, Iowa State College rticulturist.

Berry growers reported that d fruiting canes of the bushes ielded one or two pickings, and hen dried up Often canes rom both last year's and this ear's shoots broke off at the round line Nickols believes his trouble can be laid to heavy une rains, which caused the canes to die at the ground line.

Raspberries must be grown in well-drained soil, he pointed out. This year, even normally well-drained soil was too wet. In some cases the ground was so saturated that roots were severely injured. Some roots died, and by the time the fruit was ripe there was not sufficient water getting to the berries. Increasingly dry weather added to the difficulty.

In other cases the outer bark of the canes apparently died at the ground line. Although no definite cause for this has been determined, Nichols thinks the extreme dampness encouraged the growth of various wood rotting organisms in the soil and caused the damage.

Usually in a wet season anthracnose attacks the black varieties. Sometimes this disease hits the red varieties, too. An- .racnose was prevalent this year. It causes circular or oval spots on the canes of the new shoots. The spots have a grayish or purplish margin. Similar spots can be seen on the new growth of older canes. This year anthracnose attacked the fruiting shoot, the stems of the berries and the berries themselves. Sometimes half of the berries dried up, while the other half remained more or less normal.

Nichols says there isn't a great deal that can be done about these difficulties. He suggests that as soon as the fruiting season is over, it would be well to cut the fruiting canes, leaving this year's shoots. In some cases this year's shoots have been injured; in other cases they are healthy. Since this year's shoots bear next year's crop, it is likely the 1948 crop will be reduced where new shoots show injury at the ground line.

SEEDING ALFALFA IN AUG. BEST

Seeding Now Gives Advantage Of Whole Year Gain

August seeding of alfalfa is recommended by Iowa State College agronomists.

The outstanding advantage of seeding in August is that a whole year is gained in getting an alfalfa hay crop. No nurse crop is needed if seeding is done in the fall.

Seeding should be done by about the middle of August in northern Iowa and by late Aug. in the southern part of the state. Moisture conditions should be favorable to insure the alfalfa getting a prompt start and being large enough by the end of the growing season to successfully withstand the first winter.

Prepare Seedbed

Alfalfa needs a well-prepared, firm seedbed. If ground has been plowed, firming the seedbed by rolling is important. On oats or wheat stubble, disking is preferable to plowing. It leaves the seedbed firm under the surface.

One good method of seeding is to cultipack, broadcast and again cultipack. This firms the soil and covers the seed to the right depth. About ½ inch is the best planting depth.

Since alfalfa is sensitive to lack of phosphorus and does not do well on acid soils, samples of soil should be taken from different parts of fields intended for alfalfa and sent to the Testing Labratory, Iowa State College, for analysis.

An application of 200 to 300 pounds per acre of 20 percent superphosphate is needed on many Iowa soils. The superphosphate should be thoroughly disked into the seedbed just ahead of seeding.

Acid Soils

On acid soils, alfalfa will do best where the limestone was applied earlier in the year.

A bromegrass-alfalfa mixture is recommended for erosion control. The brome helps make the soil erosion-resistant and improves the structure of the soil for future crops. A suggested seeding mixture is 5 to 6 pounds of bromegrass with 8 to 10 pounds of alfalfa.

Where alfalfa is seeded alone, 12 pounds per acre is recommended.

Proper inoculating bacteria are not present in many fields intended for alfalfa. Therefore, the only safe plan is to inoculate the seed. This helps to insure a successful stand and make good yields of high-protein content.

Reformed Church Team Schedules Games

During the coming week the R. C. ball team will have a heavy schedule. On Friday night of this week the Uker team of Clarion will play on the R. C. diamond. In two previous meetings these teams have split so it should prove to be quite a game. Next Tuesday evening the Clear Lake team will be here. As with the Uker team, in two previous meetings there is also a split. On the 3rd of Sept. the Woden team will be guest of R. C. Woden has handed Deckers of Mason City one of the few defeats which Deckers has suffered this year. These games will be played on the R. C. diamond and will start about 8:00 P. M.

WINNERS IN ANNUAL FARM SPORTS FESTIVAL AT KANAWHA

Winners of the various events at the annual Hancock County Farm Sports Festival held at Kanawha Tuesday, August 19, as follows:

Chair Quots

Div. 1, Anna Faust, first; Mrs. Harold Haberkamp, second, Mrs. Melvin Hill, third; Div. 2 Jenny Maynard first, Sharon Sarber, second.

Clock Golf

Div. 1 Mrs. Lydia Schram, first, Bernice Weaver, second and Mrs. Emory Weaver, third. Div. 2 - Bethel Haberkamp, first, Virginia Quintus, second and Sheryl Bredlow, third.

Dart Throwing

Div. 1, Ardith Friedow, first, Mrs. Mildred Sonerholm, second, Div. 2 - Bethel Haberkamp, first, Sheryl Bredlow, second and Vivian Stromer, third.

Nail Driving

Div. 1 - Mary Hill, first, Mrs. Harold Haberkamp, and Mrs. Silas Thompson tied for second placing. Div. 2 - Carol Friedow, first and Vivian Stromer, second.

Baseball Throwing For Distance

Div. 1, Dick Carr, first, Jack Greiman, second and Don Abbas, third. Div. 2, Jerry Pruisman, first, Wert Asche, second and Audry Verlo, third. Div. 3, Virgil Reuter, first, Paul Jackson, second and Alton Limberg, third.

Football Kicking

Div. 1, Jack Greiman, first, Joe Anderson, second and Vander Ploeg, third. Div. 2, Audry Verlo, first, Lonnie Yeager, second and Lyle Katter, third.

Football Passing

Div. 1 - Jack Greiman, first, Walt Greiman, second and Vander Ploeg, third. Div. 2 - Lyle Katter, first, Lonnie Yeager, second and Audry Verlo, third.

Dashes

Div. 1 - Jack Greiman, first, Audry Verlo, second and Harlan Carlson, third. Div. 2 - Richard Trenary, first, Walter Babcock, second and Jim Christians, third. Div. 3 - Jack Greiman, first, Roger Boyken, second and Audry Verlo, third. Div. 4, Carl Friedow, first, Delane Carlson, second and Corrine Riggles, third.

Basketball Free Throw

Keith Johnson, first, Donald Smith, second.

Softball All-Star Game

Amsterdam, first, Erin, second.

Softball 4-H Club Boys

Bingham, first, Garfield, second.

A large crowd attended this event which was the fourth held in county.

This reckless driver and his companion were speeding crasily through a thickly populated residential area, endangering the lives of dosens of people. Fortunately their wild ride ended before they had involved anyone else. The car went out of control on a medium curve and slammed into a gasoline pump, hurling its occupants onto the pavement. The driver was killed; his passenger lived—after many months in the hospital. Speeding was a reported violation in one out of every four motor vehicle fatalities last year. Strict enforcement of speed laws, and aroused public opinion are needed to prevent accidents of this type.

Sheriff Warns Car Drivers To Obey Traffic Rules

SHERIFF'S OFFICE REPORTS MORE LAW VIOLATIONS

The Sheriff's men and the Highway Patrol are continuing their drive against traffic violators, and have turned in the following list for publication this week:

Slyvester Blank of Hayfield was arrested by Marshall Gilbert on August 10th for speeding in a restricted zone. His case was heard August 18th when he was fined $10 00 and costs in Mayor's Court. The fine was suspended subject to good behavior.

Billie De Pigman, Britt, was arrested August 16th for running through a stop sign on Highway 18. Fined $10.00 and costs. Fine suspended subject to good behavior.

August 23rd, 1947, State of Iowa vs Wendell Floyd Riherd, Forest City, Iowa. Charged with operating motor vehicle upon the public highway while intoxicated. Filed by L. M. Brower, Sheriff, following an accident on highway 69 north of Garner. Arrested by Jim Gilbert marshall, (blood test taken, result 221) Curtis G. Riehm County Attorney appeared for state. Defendent pleads guilty and is bound to the Grand Jury at its next session. Bond set at $500 cash, which was furnished and approved by Court

August 25th., 1947, State of Iowa vs Otto Fred Timmerman, Garner, Iowa. Charged with operationg a motor vehicle upon highway without a license. Fined $25.00 of which $15.00 will be suspended upon correction of fault plus Court Costs. Filed by Highway Patrolman (arrested by same) following accident two wiles northwest of Ventura.

August 25th, 1947, State of Iowa vs Paul Severson, Forest City, Iowa. Charged with failing to yield the right of way. Fined $10.00 plus court costs. Filed and arrested by Highway Patrolman following accident 2 miles northwest of Ventura, Iowa Saturday evening, August 23, 1947.

REV. AND MRS. C. GROSSHUESCH ATTENDED 100TH ANNIVERSARY

Rev. and Mrs. Calvin Grosshuesch left Friday for Plymouth, Wisconsin for a visit with relatives and old friends, and on Sunday they attended the 100th anniversary of the founding of the Town Reformed Church near Plymouth.

This old church has a special meaning to the Grosshuesch family as it was there that Grandma Grosshuesch was baptized, confirmed and later married. All the children in her family were likewise baptized and confirmed in the same church, including Rev. Calvin Grosshuesch.

FORMER KLEMME TEACER TAKES MARRIAGE VOWS

Mr. and Mrs. M. Lindsey Craig, of Minneapolis, announce the marriage of their daughter Maude Lucille to William D. Rector on August 2nd.

Mr. Rector was principal of the Klemme High School the past year.

Must Have Proper Driver's Licenses Before October 1

The estimated 14 per cent of Iowa drivers now operating motor vehicles on the highways without proper driver's licenses are urged to secure or renew their licenses prior to October first by Alfred W. Kahl, commisioner of public safety.

"Failure to do so," Kahl said, "will subject such non-licensed drivers to severe penalties and require them to post immediately evidence of financial responsibility before licenses can be issued to them after the October 1 deadline."

Kahl points out that at the present time there is no fine or penalty applying to any unlicensed driver who applies for his drivers' license before that date. Afterward it will be another matter, Kahl states.

"We are doing everything we can to emphasize the importance of securing a license before the safety-responsibility law passed by the General Assembly goes into effect," Kahl says, "and we are encouraging immediate applications by those who for one reason or another may have neglected to renew their old license or who have not applied for one."

"Safety on the highways is our first concern," the public safety head states, " and greater safety is promoted each time a procrastinating unlicensed driver applies for his permit to drive."

After October 1, under the terms of the new Motor Vehicle Safety-Responsibility act, an unlicensed driver will be subject to having his car registration and license plates suspended and these cannot be restored until the driver files suitable evidence that he is able to pay damages resulting from any future accident up to the limits of $5,000 for a single injury or death, $10,000 for total injuries or deaths in a single accident; and $1,000 for total property damage resulting from a traffic mishap.

Motorists not having a proper drivers' license after October 1 would be required to post a form of insurance, surety, bonds, cash, or negotiable securities to the satisfaction of the department for a period of at least three years before their cars would be licensed or registered and befor a drivers' license could be issued, it is stated by the commissioner.

HATCHERY SHORT COURSE AT I.S.C., Sept. 8 - 12

The annual hatchery short course for poultrymen will be held at Iowa State College, Sept. 8-12, R. E. Phillips, head of the Poultry Department, said last week.

Techniques of hatchery flock selection and testing for pullorum disease will be taught in the course. Enrollment will be the largest ever recorded. Advance registration totaled 215. Registration is now closed.

Both practical and written examinations will be given at the end of the school. Successful completion of the training makes the student eligible to receive a pullorum and flock selection permit from the Iowa Poultry Improvement Association, Phillips said.

A card, authorizing the student to work for hatcheries in the National Poultry Improvement Plan, is also granted upon meeting requirements of the week's work.

Instruction will be by members of the Poultry Department resident and extension staffs. H. H. Kildee, Dean of Agriculture, will give the opening address.

Off-campus speakers will include W. S. Grotewlod, Lake Mills hatchery and member of the Iowa Poultry Improvement Association; K. C. Hemphill, Creston, first vice-president of the Iowa Poultry Improvement Association; John O'Connell, State Department of Agriculture; Cliff Stewart, Secretary of the Iowa Poutry Improvement Association and the Iowa Poultry Improvement Supervisory Board.

Dr. George Senior, U. S. Department of Agriculture specialist, will assist in pullorum testing instruction.

SEPTEMBER 1 DEADLINE DATE FOR AAA APPEALS

"The forced two months AAA vacation and extreme floods and drought of 1947 have forced the farmers to make many changes in their original conservation plans, stated Alfred V. Josten, chairman, Hancock County AAA.

In order to insure equal opportunities for all farmers in the use of the appeal for adjusting practices on the NCR-17, notice of approved practice, the state committee has decided to amend the appeal procedure to permit appeals in counties up to September 1. A written appeal must be made by the farmer to the county committee for any change he wishes to make in carrying out conservation practices on a farm in 1947.

County committees may grant such appeals as they deem necessary to secure the largest amount of real conservation possible within their county docket and funds available. In no case shall an appeal for a practice be allowed unless, first, it is yet to be carried out or, seecond, it was on the orignial NCR-3, 1947 farm plan signed this spring, signed this spring, which was approved by the community committeeman and the farmer.

All farmers are urged to study their notice of approved practices and if an appeal is to be made to do so before September 1."

THROUGH THE BRIDGE

A truck driven by Bill Blaschke, Sumner, broke through the flooring of an old bridge near Waverly last week and dropped 20 feet, right at the edge of the river. The driver escaped unhurt.

LaVohn Schlawin Is Honoree At Shower

A shower was held at the Fatland home near Clear Lake as a courtsey for Miss LaVohn Schlawin, Clear Lake, who will be married September 7 to Wayne Badker, Clear Lake. Guests were members of a neighborhood card club. Several gifts were presented to the couple. The evening was spent informally.

On Wednesday evening Mrs Tom Hartin and Miss Betty Mann entertained at a miscellaneous shower for Miss Schlawin at the Hartin home Her mother, Mrs Werner Schlawin, Klemme, and Miss Fern Morris, Meservey were the only guests other than those from Clear Lake.

KLEMME MERCHANTS PLAY GARNER HERE FRIDAY EVENING

The Klemme Merchants will play the Garner baseball team here this week Friday with the game starting at 5:00 P. M.

Rockwell Here Sunday

Klemme will go into league play here Sunday when they meet the strong Rockwell team which is now in first place. The Klemme Merchants won a undisputed second place by beating Hampton 7 to 5.

Union Service September 7th

Union Service will be held the Methodist Church on Sept 7th, at 10:00 o'clock Rev Calvin Grosshuesch will preach and have charge of the service as the members of the Reformed Church will worship here The Sunday Schools will meet separately in their own church after the worship service to church every Sunday

Had Birthday Party

Joyce Ann, daughter of and Mrs. Mitchell Bock, celebrated her first birthday anniversary Thursday. That evening her parents had a dinner in honor and had as guests Naska Bock of Klemme, Mr Mrs. Irving Meyer and Laure and Roger Miller of Alexand Harry Bessman and Lucille Lapherton of Dows.

[H]ANCOCK COUNTY [B]OARD PROCEEDINGS

[AD]JOURNED JUNE MEETING

Garner, Iowa
August 4, 1947

...e Hancock County, Iowa Board ...Supervisors met in session on ...e captioned date pursuant to ...rnment with Supervisors F. J. ...n, Geo. Th. Gerdes, and John ...bers, present.
...e minutes of the last meeting ...re read and approved as read.
...e Supervisor Schoun is appointed a ...mittee to investigate and cause ...ts to be made in DD No. 7.
...n motion and second the bond ...W. F. Pavey, Justice of the Peace, ...approved.
...n motion and second the con...t with Concrete Products Cor...ation of Humboldt is approved.
...n motion and second the semi...ual report of County Treasurer ...L. McMillin, is approved.
...n the matter of the petition of ...ley Nedved et al for the ex...sion of the Outlet of drainage ...trict No. 122 to Eagle Lake.
WHEREAS C. F Merten was ap...nted Engineer on April 21, 1947, ...make an investigation as to the ...bility and necessity of the ex...sion petitioned for as listed in ...preamble thereof and
WHEREAS said C. F. Merten did ...an investigation and prelimi...y survey as directed and did file ...report on August 4, A. D., 1947, ...report does recommend that ...proposed improvement be con...cted as prayed in the prayer of ...petitioners and that the cost ...of will be less than the bene...to be derived.
...E AND IT IS THEREFORE RE...LVED by the Board of Super...rs acting for and in behalf of ...D No. 122, Hancock County, Iowa, ...the report of the engineer be ...the same is hereby tentatively approved and a hearing on the report of the engineer and petition will be held at the courthouse in Garner, Iowa, on the 22nd day of September, A. D. at 1:30 P. M. The county auditor be and he is hereby authorized and ordered to publish notice of such hearing in the Garner Leader and Signal, a newspaper of general circulation published in Garner, Iowa, as commanded in Section 306.16 Code of Iowa, A. D., 1946 and laws amendatory thereto.

The foregoing resolution was offered and read by Supervisor Schoun who moved its adoption, was seconded by Supervisor Gereds whereupon the chairman placed the motion of its adoption and upon roll call the vote thereon is F. J. Schoun, Geo. Th. Gerdes and John Chambers, Aye. Nays, none. Where upon the chairman declared the resolution duly adopted.

Be it remembered that on this, the 4th day of August, 1947, the county supervisors of Hancock County, Iowa, met in session for the purpose of a hearing upon the budget estimate as filed with this board. There was present a quarum as reported by law Thereupon the board investigated and found that the notice of the time and place of hearing had, according to law and as directed by the board, been published on the 23rd day of July A. D., 1947, in the official newspapers of Hancock County, Iowa. Klemme Times, Klemme, Britt News Tribune, Britt; Kanawha Reporter, Kanawha; and Garner Leader and Signal, Garner; official newspapers, published in said county, and that the affidavit of publication thereof was on file with the county auditor Thereafter and on said day the estimate was taken up and considered and taxpayers heard for and against said estimate as follows. All taxpayers desiring to be heard were heard. The proposed budget reads as follows

Algona District Conference To Be Held At Call State Park

The Algona District Conference of the Methodist Church will be held at the Call State Park, Algona, on Thursday, August 28th at 9:30 a. m. Pastors, Lay Leaders, District officers, and all Sunday School workers should attend. Rev. and Mrs. W. M. Hubbard of Clear Lake will speak. Dr. Lloyd Gustafson, Mason City will give the main adress. Those who attend should take a basket dinner and dishes. Call the pastor if you wish a way provided.

SUGGESTS TRYING A PACKER-SEEDER

In Planting Brome and Alfalfa It Gives Uniform Depth And Firm Packing

Uniform depth and firm packing of the soil important in seeding of alfalfa and bromegrass.

If you have had trouble with your seeding this year, Ray Armstrong, Iowa State College agricultural engineer, suggests that you try an all-purpose packer-seeder.

Agronomists long have recognized that a uniform depth of 1-16 to ½ inch gives results in alfalfa or bromegrass seeding. They have known, too, that the only way to get good growth that will withstand the winter is to have a firm seedbed.

Does Both Things

The packer-seeder does both of these things. Developed several years ago, it has recently been improved, and is made by several implement companies.

It uses a double gang, corrugated roller-type soil pulverizer. The seeding attachment is mounted so that seeds of alfalfa and bromegrass are dropped from separate boxes mounted on the machine. Seeds fall between the front and the rear roller gangs on soil that has been leveled, firmed and groved by the first set of rollers. It is then covered and the soil firmed by the rear gang of rollers.

It has been found that this places the seed at the right depth. In addition, it presses pulverized soil close about the seed in a way that is favorable to good germination and seeding establishment.

Rotary Reel Excellent

A rotary reel in the brome box has been found excellent for giving a uniform drop of brome seed. Ordinarily, bromegrass tends to "bridgeover" with conventional seeding mechanisms.

Seed-feeding rollers in both legume and grass seed boxes are driven by a trailing wheel.

With equipment as this, normal seeding rates can be reudced by as much as 20 percent, experiments have shown.

REPORT SHOWS RISE IN IOWA FARM LABOR WAGE

Iowa farm workers' wages moved up another notch in July to an average of $6.50 per day, without board, the Iowa Farm Labor office at Iowa State College reported this week.

Wages have advanced steadily in recent months, and probably have reached their peak for this year, farm labor officials said.

The report of the state farm labor supervisor John R. Fitzsimmons, compiled from 66 counties, showed 9,259 placement made through county labor officies. Nearly all of these were youths who were placed for detasseling work in hybrid corn fields.

DOG BITE

Little Curtiss Bruvick 6, of Livermore, learned the hard way about "dog days." A dog on the Herman Raney farm took a hard nip at the back of the boy's neck and 31 stitches were required to close the wound.

Telephone Traces White House History

President Hayes Had First Phone in Executive Mansion

By BAUKHAGE
News Analyst and Commentator.

WASHINGTON.—Recently the President turned down a very flossy television set because he already had one. It was installed in the White House last January in time for Mr. Truman to "see" the installation of the new Republican congress.

However, I imagine this innovation caused nowhere near the flurry among the White House staff that ensued on that day in 1878 when the first telephone instrument was put in. That was in the administration of Rutherford B. Hayes of Ohio, the 19th president—and that was the year in which the Democrats, who already had control of the house, acquired control in the senate as well.

However, the opposition, when it became the majority, made blunder after blunder. Mr. Hayes continued his administration with a quiet if perhaps somewhat monotonous dignity, until he was succeeded by another Republican, President Garfield.

I doubt if the even tenor of Mr. Hayes' existence was frequently disturbed by the ringing of the telephone bell—or much of anything else for that matter. Very few residences or places of business possessed phones then. Furthermore, the telephone was by no means accepted as a means of communication for presidents or their entourages in those days. In any case, the White House managed to limp along on one phone until the end of President Cleveland's administration.

Baukhage

By the time President McKinley entered the White House, all government offices had phones and they were accepted as every-day necessities, but they were not an important element in the handling of White House business.

When Teddy Roosevelt came in, despite his strenuous activities and what was considered then a somewhat revolutionary outlook, he made very little use of the telephone himself.

Then along came Franklin Roosevelt and the New Deal, a part of which was a five-position branch exchange with more than 200 official extensions and 20 outside trunk connections to handle the calls. "White House calling" became a by-word.

Then also came the first woman telephone operator and probably the most efficient of either sex that the White House ever had or will have in many a day. Louise Hachmeister—"Hackie"—is probably favorably known to more famous users of the telephone than any other operator in history. Her genius in being able to locate people anywhere in the world has been the subject of many a story. Louis Howe, who introduced her to the President while she was working at Friends of Roosevelt headquarters, called her "the world's greatest telephone detective" because, he said, "she doesn't need a number to get her man."

Once she located Cornelius Vanderbilt Jr. with no other clue than that he was motoring east from California.

I don't know how many long-distance calls a day she put in at the peak of the war but I do know that the number of long-distance calls out of Washington jumped from approximately 11,000 a day in 1939 to well over 48,000 in 1945. Today they have dropped back to a little over 44,000. It is fair to assume that the White House calls have followed the same curve under the nimble-fingered direction of "Hackie."

Even by 1935 it took five operators in shifts to handle the White House calls. At that time Miss Hachmeister was the first and only woman to operate a White House switchboard.

President Truman uses the telephone a good deal—he has so many friends on Capitol Hill that

LOUISE HACHMEISTER
". . . doesn't need a number . . ."

his voice is almost as familiar over those branch lines as it was when he was a senator himself.

I don't know how much fun he gets out of the television set. His bowling alley is pretty dusty and the dirt doesn't often fly on his horseshoe pitching court—or whatever the technical name of that arena is. As to the "video," it can't be half the novelty to him that the old-fashioned telephone instrument was to President Hayes.

Russian Enigma Illustrated

Boris Krelov has gone home. He was a member of the staff of Tass (official Soviet news agency), stationed for some three years in Washington.

So far as I have been able to learn, his American contacts, which were many, both official and personal, made not a single ideological impact upon him or his way of thinking. He upheld the Russian cause; he talked more freely than most Russians in a semi-official or official capacity do but (also so far as I can learn) he never offered the slightest compromise of viewpoint, never accepted any argument or explanation of democratic (American-style) methods of thought or action.

And yet — and here is the thing that baffled most of us—he was well-liked, he was good company, and if we could have found the tiniest peg on which to hang an idea, he would have inspired us to write about Russia "with a heart," as a Russian woman interpreter is reported to have begged of Sam Welles, Time's correspondent in Moscow.

We wonder about Boris. We would have liked so much to sit down and talk frankly and freely with him about the common problems and the still more common misunderstandings between our countries. Was he able to appear so genial and friendly and charming because he held such high rank at home that he wasn't afraid to consort, as far as personal matters went, as a trusting friend?

Was he so deeply indoctrinated in the ideology of Marxism-Leninism-Stalinism that he was filled with pity rather than the typical suspicion which seems to permeate most Russian-American relations?

One slight clue we have, though it may be a false one. Once, at a rather intimate gathering, Krelov's hostess finally grew a little impatient and said something like this: "Listen here, Boris, we're friends. Surely you can be frank with us and explain why your government—"

Before she could finish (he guessed what was coming) he held up his hand.

"Please," he said with a disarming smile that took the sting out of his words, "We are having such a pleasant time, but you force me to say this: I cannot explain what you wish because you people are just too stupid to understand Communism."

If that sentiment is a sincere and typical expression of how the men who run Russia feel, the road ahead is a rocky one. Kipling once put into verse the problem he felt the foreigner faced in trying to understand the American. What he said might be applied to Russia:

"Inopportune, shrill accented, the acrid Asiatic mirth that leaves him, careless 'mid his dead, the scandal of the elder earth. How shall he clear himself, how reach your ear or weighed defense prefer—a brother hedged with alien speech and lacking all interpreter?"

IT PAYS TO BE EDUCATED . . . Some kind of high-water mark for radio quiz show prizes must have been reached when $7,440—largest amount of money ever offered on a radio show—went to Mr. and Mrs. Albert Fowler of Glen Rock, N. J., whom M. C. Bert Parks is congratulating here. Both in their seventies, they are teachers in Paterson, N. J.

NEWS REVIEW

Mark Birthday of Atom; Hungarian Attitude Hit

ANNIVERSARY:
Bells Tolled

In Hiroshima, Japan, the bells tolled. People of the city stood silently in prayer for a moment, then went on about the business of living.

It was the second anniversary of the radiant, consuming flash of the world's first atomic bomb.

Hiroshima, which saw 92,000 of its citizens immolated in that uncontrollable outburst of energy in 1945, was perhaps the one place on earth where the bomb could be thought of as a reality. Everywhere else it was a nightmarish, Damoclean sword; but in Hiroshima the people were paying it a sort of fantastic and bewildered adulation.

They tolled bells, and they planned the building of a modern city with a peace memorial at the spot over which the bomb had been dropped.

At other points across the globe, the atomic age was living up to its awful reputation by wringing fearsome comments and predictions from men who are supposed to know about it.

Robert M. Hutchins, chancellor of University of Chicago, said that two atom bombs which now could be manufactured would make the United States uninhabitable if exploded simultaneously. He made it a complete Jeremiad by adding, "We know that some other country will have the atomic bomb within five years. We know that when that happens we are all set for the final catastrophe."

In a constructive moment, Dr. Robert Oppenheimer, atom pioneer, said that usable electrical power derived from atomic energy may be available by 1952.

But everybody knew that the United States was stressing development and production of the atomic bomb to build a stockpile for utter destruction. And everybody knew that Russia was laboring furiously toward the same ends.

The people of Hiroshima did well to toll bells two years after they felt the bomb. It brought to mind an old, poetic question:

Did the bells herald a wedding or a funeral?

INSOLENCE:
Slap Hands

The United States, visibly irked by recent actions of the new Communistic Hungarian government, vented its diplomatic rage in a stinging note which accused Hungary of "inadmissibly insolent" conduct toward American diplomats in that country.

Second cause for U. S. anger was the arrest and beating in Budapest of an American citizen and the subsequent unsatisfactory explanation of the incident offered by Hungarian officials.

One of the most harshly worded protests to come from the state department since American planes were shot down over Yugoslavia a year ago, the note marked the first official unpleasantry to be delivered by the United States to the puppet Hungarian regime.

The incident grew out of the arrest of Stephen T. Thuransky, an American citizen, for his alleged "revolting and scandalizing vilifications in public" of Hungary's president and other government members. Thuransky, his wife and two daughters later were taken into custody by U. S. legation officials and removed to Vienna.

In the protest note, the state department pointed out that the arrest of an American citizen on purely political charges is "absolutely inadmissible" under the armistice agreement which prevails in Hungary. Also, officials of the Hungarian ministry of the interior were accused of being "uncooperative in the extreme and in some cases inadmissibly insolent."

VIVA:
Toreador

Orson Welles, the man who didn't come from Mars, has found himself, to put it politely, on the horns of a dilemma.

The self-designated genius was quoted recently as saying he had killed 20 bulls, and immediately he was challenged by another actor, Fortunio Bonanova, to enter the bull-fighting ring at Tijuana, Mexico, and perform for the benefit of charity.

Said the Spanish-born Bonanova in an open letter to Welles, "Killing 20 bulls is a lot of killing," neglecting to add that it is also a lot of bulls.

"So let us do a corrida (series of fights) this season in Tijuana for the motion picture relief fund. I am sure the impresario would give us a Sunday afternoon. What do you say to two bulls apiece?"

Admission: Shady side, $2; sunny side, $1.

ALEUTIANS:
Bases Retained

The Aleutian islands, that long, cold chain of fog-bound rocks which started many an American G.I. talking to himself during the war, is being integrated into the pattern of the North American defense system.

General of the Army Dwight Eisenhower has revealed that the framework of strategic bases in the Aleutians is being kept intact for rapid expansion if necessary.

After having paid a visit to the continent's northernmost line of defense, General Eisenhower said that the islands were not being abandoned, but were undergoing a "contraction and concentration of military potential."

75 MILLION ACRES

U.S. Boosts 1948 Wheat Goal

WASHINGTON. — Fourth largest wheat acreage the farmers of this nation have ever planted may be realized in 1948 if the department of agriculture's revised goal of 75 million acres is met next year.

That mark is a five million-acre increase from the pattern recommended last year and a seven million-acre boost over the wheat goal set last spring before the corn outlook took on its gloomy cast. Continued and unremitting international demand for food grains influenced the agriculture department into making the upward revision.

While officials admitted that the increased acreage constitutes an invitation to farmers to plant heavily in wheat, they cautioned against plowing up sod-lands not suited for sustained farming in order to take advantage of high wheat prices.

However, an even more important factor in determining the nation's wheat acreage in 1948 will be the lure of the two dollar-a-bushel market price. Department authorities admitted that high market prices will do more to dictate the amount of wheat planted than could any arbitrarily assigned government goal.

The department said the 75 million-acre goal, if achieved, would provide the fourth largest wheat acreage the farmers in the United States have ever planted. Higher plantings occurred in 1919, 1937 and 1938.

Estimating on the basis of a 10-year average yield figure of 14.3 bushels an acre, the crop in 1948 would be 1.07 billion bushels, but if the outturn follows the 1942-46 average of 16.3 bushels an acre, production would reach 1.221 billion bushels.

In the wake of this year's bumper crop, a much smaller 1948 wheat yield normally would be indicated; however, the world food shortage makes it desirable, according to department spokesmen, that the United States continue its high rate of production. The United Nations has warned that the world food situation has not improved in the past year, and predicts shortages will continue another two years.

DREW PEARSON

Deadlock Over Korea

MAJ. GEN. ARCHER L. LERCH, military governor of Korea, gave an off-the-record talk to reserve officers recently expressing great pessimism regarding U. S. relations with Russia in Korea. Latest efforts to get together with Russia, General Lerch said, may as well be written off as failure. What caused the deadlock was recognition of political parties, since Russia would not recognize any Korean parties not controlled by Communists.

General Lerch also revealed:

(1) Russia's agrarian reforms in northern Korea have backfired. Northern native farmers, oppressed by a 50 per cent tax on produce and strict control under the "cooperative" system, are drifting south across the 38th parallel.

(2) Border incidents have been reduced along the Russian-American line. However, two Russian soldiers, prowling for rice below the border, were shot and killed by Korean police.

(3) Only 53 Japs are left in southern Korea—all hospital cases.

(4) Russia, which controls the industrial half of the country, is permitting a smooth flow of electricity into the American zone without interference.

General Lerch said he was not worried about too many Koreans becoming converted to communism. "Koreans," he said, "could never be regimented into communism, I am sure."

Oddities in the Big Burg

Radio City has three employees whose duties consist of picking up ciggie butts all day. . . . In the year 2015 Rockefeller Center's maze of skyscraper buildings will become the property of Columbia university without cost.

How Times Change: At the turn of the century a shave and haircut in the Big Burg cost two-bits. Tipping was taboo. . . . The reason some of the old brownstones have blue windows: At one time it was believed that sunlight streaming through blue glass was very healthful.

Slavery was abolished in Manhattan before the Revolutionary war exploded. . . . It's well known that New York once was called New Amsterdam. But for a few years it also had another monicker: New Orange. . . . Scientists claim the land that makes up lower Manhattan is probably the oldest known part of the earth's surface.

Many of the jewels in the door of the tabernacle at the Little Church Around the Corner are stones from the rings of women married there. . . . Maiden Lane gots its name because Dutch maidens once washed their clothes in a brook there.

WALTER SHEAD

Doom to Veterans' Loans

ONE of the main reasons why veterans are failing to obtain loans under the G.I. Bill of Rights is the fact that the 80th congress has clipped the power of Reconstruction Finance corporation to purchase these mortgages from banks. The 79th congress, which passed the G.I. bill, gave RFC authority to purchase mortgages on homes where the loans had been guaranteed by Veterans' administration under terms of the G.I. bill. The authority under which the RFC purchased these mortgages expired June 30. When the new law was passed by this congress extending the RFC for another year and slashing its loan authority from something like 18 billion dollars to two billion dollars, congress not only swept away the only source of small business and small industrial loans but refused to give RFC authority to purchase G.I. home, business and farm mortgage loans.

Banks throughout the country, therefore, have no outlet for disposal of these loans and must hold them in their own portfolios, and from all over the country veterans are finding it almost impossible to obtain home loans no matter how well they are armed with letters of eligibility.

Sen. John Sparkman of Alabama introduced a bill in the last minute rush of congress seeking to extend this authority of the RFC.

PAUL MALLON

Military Weakness of Russia

MUCH has been made of the superior size of the Russian army. Our military men frequently mentioned this recently to get their appropriations through congress. But little or nothing has been reported of the critical military weaknesses of Russia. She may be an isolated economic and political power existing behind an iron curtain, but from the military standpoint, she is wide open from the air on three sides, and extremely vulnerable in oil.

The custom is to regard Russia as unconquerable because of her vast spaces. Hitler's military mistake was in attempting to devour more than he could chew. No one seems to think of Russia's far vaster, outer circumference of defense, which is really too extensive to be defensible.

But these considerations run beyond current military realities. The Russia which has become so aggressive in the world of politics, does not comprise eight million square miles, but the few square miles occupied by its few thousand political leaders, chiefly in a few large cities (say Moscow and Leningrad).

Russia could be effectively isolated in war from the rest of the world without much difficulty. On the other hand, the atomic missile and other bombing rocket threats against her are somewhat dulled by her farflung distribution of industry (except oil).

For our part, defense against use of such missiles is our most vital necessary concern. We are protected everywhere except in the air. We are protected in every way excepting from atomic possibilities and missiles. In these baskets most of our eggs may now be put. We must think of atomic defense, not offense. We must concentrate on air and missile protection.

WRIGHT PATTERSON

Stolen Fruits Are Sweetest

DURING boyhood days in Iowa I was taught that it was wicked to stealthily appropriate the other fellow's watermelons. Later, for more than half a century, I was never tempted. Now, living in a small community, I have a watermelon vine in my own back yard—but that vine is rooted in a neighbor's garden. The friendly, neighborly argument has been over the question: "Whose melons are those in my back yard?" To settle it, I ate the melons.

...N TO BABIES—AND PARENTS, TOO . . . Experiments con-...ed by University of Nebraska food and nutrition laboratory have ...wn the value of feeding meat to babies. Mothers are interested ... a nutrition standpoint; fathers are impressed by the fact that ...ies are less fussy and sleep better. Patsy is shown here receiving ...lood count at the hands of Dr. A. K. Myrabo, pathologist of Uni...sity hospital, with Dr. Ruth Leverton, university nutritionist, stand...by to help.

...THE BETTER, TOO

...en Babies Are Affected ...Revised Eating Habits

WNU Features.

...INCOLN, NEBR.—Chances are your great-grandmother ...ld have no more thought of eating a "love apple" than of ...g to China. But now we call love apples by the more pro... name of tomatoes—and not only eat them but drink 'em,

...doesn't prove much except ...people's eating habits change. ...University of Nebraska's food ...rition laboratory is trying to ...it that they change for the ...

...e babies—six weeks old—for ...m. A lot of mothers would ...h astonishment if you said, ...don't we give the baby a nice ...get meat today?" They might ...ell you scornfully that babies ...get meat until they're at least ...nths old.

Babies Like It.

Dr. Ruth M. Leverton, uni... nutritionist, and two pedia... have been feeding meat to ...bies for some time now. The ...like it, and the results have ...ded even the American Med... Association Journal, which ...get interested very easily.

...e big thing that Dr. Lever... and her associates found is ...meat added for eight weeks ...diets of babies as young ...weeks can knock out nu... anemia. This, they ...y important because that ...of anemia is common to ...fants.

...searchers don't pretend that ...anemia from babyhood is ...to produce a race of super ...women. But they do say ...ch keeps the human body ...or big—from 100 per cent ...ence.

...ay be that freeing infants ...emia will let them grow ...enough to toss off some of ...childhood diseases. Any...s what Dr. Leverton hopes ...laboratory is assisting with ...study along that line.

...unch Experiments.

...niversity's food and nutri...ratory launched its attack ...seven years ago. It found ...s added to the diets of a ...f co-eds reduced simple ...

...g the war, a second ...revealed that meat was ...ed to blood bank donors. ...me a study of expectant ...s. A meat supplement to ...iets boosted their hemo...values—which is a fancy ...saying they did not be...anemic.

...ged by these results, the ...s turned to babies. When ...started, strained meat for ...s not yet on the market ...processors cooperated and ...strained meat of custard ...which could be added to ...ulas. Since then a meat ...has come on the market ...ally.

...eration with doctors at ...g institute in Omaha; at ...s orphanage in Lincoln ...small group of parents, ...of babies versus anemia ...At the outset, a third of ...strained meat was add... the formulas for babies ...old. This amount was in...ed at the end of a week ...of a full ounce of meat ...being added.

...Marked Gain.

...Child Saving institute ...the 18 "meat babies" ...average gain of 13.3 per ...globin content of the ...end of eight weeks. ...ators—15 babies of the same age group and same general condition who did not get meat—lost 10.3 per cent during the same period. The red cell values of the meat eaters jumped an average of 22.2 per cent while their competitors chalked up a gain of only 6.2 per cent.

Nurses at the institute reported the babies who got meat seemed less fussy and slept better than their competitors. The institution's pediatrician said the general physical condition of the meat-eaters was better, too.

Results comparable to those at Child Saving institute were obtained at St. Thomas orphanage. Among the babies in private homes, the records were not as spectacular—probably because the routine of care was not as exacting—but even in the homes the meat eating babies showed no loss in hemoglobin content of the blood while their competitors who did not get meat lost 8 per cent.

It was this ability of the meat eaters to avoid hemoglobin loss that the researchers consider important. According to Dr. Leverton it means that the protein in the meat diet kept the babies from taking the downward road to nutritional anemia.

Worth 50 Scents, Old Trapper Opines At Big Skunk Hunt

RANGELEY LAKE, ME.—Ain't been so much fun down Maine way since the lassie moose mistook an air raid siren for her lover's call to arms.

The first skunk hunt in the Pine Tree state was such a sockeroo that they say it's going to be an annual affair from here on in, with brass bands and all that.

"I wouldn't have missed it for 50 scents," giggled one grizzled old trapper.

Skunks are a bit of a problem in the resort area of inland Maine. So this year, in an effort to speed mass migration of the "burrowing carnivora" in the Rangeley Lake region, W. Scott Peirsol, general manager of the Rangeley Sheraton hotel, solicited the services of Boston's fanciest debutantes and their escorts for the first mass skunk hunt.

Their weapons for the fray included wicker baskets (you throw the basket over the skunk's head or, if you prefer, over your own); flashlights (not too far, please), and pitchforks (by process of elimination, since nothing in Emily Post recommends the use of any other fork as de rigeur).

To climax three days of unrivaled, unfettered frolic, a Skunk Hunters' ball was held for all participants.

Three "C's" Now

NORMAN, OKLA.—It's the three "C's" instead of the three "R's" for wives of war veteran students at University of Oklahoma. Instead of readin', writin' and 'rithmetic, they are learning about cannin', crochetin' and clothin' in classes sponsored by the school of home economics.

Clock Performs Many Tasks

...BURG, S. C. — Made ...a four-faced clock still ...here—keeping time, ...ements of the moon ...ed incidentally telling ...track of days and ...on a master wheel ro...every 13 years.

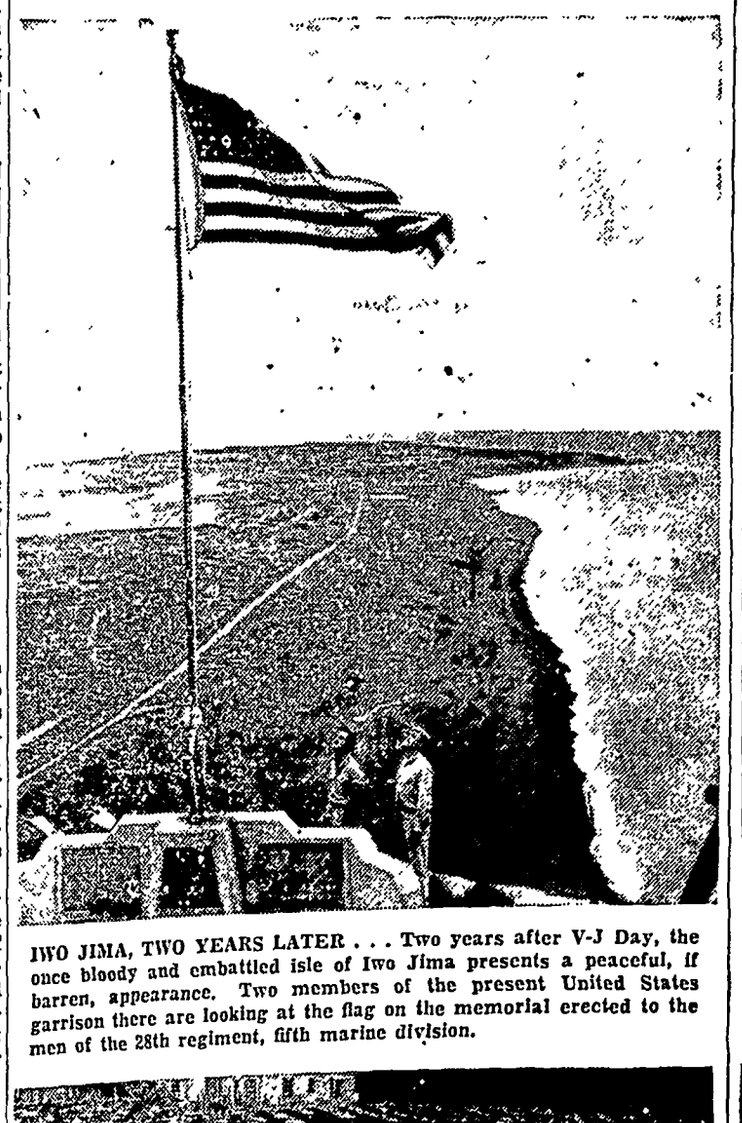
...the creation of Dan... used crude tools to ...years and cabinet in ...cabin in the Carolina mountains.

One face records the 24 hour progress of the sun. Another charts the course and phases of the moon. A third tells the day and month, even allowing for the extra leap year day. The fourth face performs a clock's ordinary timekeeping duty.

R. O. Davis, grandson of the skilled maker, now owns the novel gadget, which holds a place of honor in his home.

FOUR WET HENNS . . . While practically everyone else in the country was sweltering and squirming in the supercharged heat wave a while back, this foursome got cooled off with a sprinkling can wielded by Nurse Virginia McCormick at St. Agnes hospital in Baltimore, Md. The tots are quadruplets, born last December to Mr. and Mrs. Charles Henn.

EARTH SHIFTING THREATENS TOWN . . . Two hardy members of the opposite sex, residents of Welch, W. Va., brave a stroll on the buckled streets of the town after sections of the little city started to sag alarmingly because of a mysterious shifting of the earth. Huge cracks appeared in several large buildings, and inhabitants were fearful that their homes would be destroyed.



IWO JIMA, TWO YEARS LATER . . . Two years after V-J Day, the once bloody and embattled isle of Iwo Jima presents a peaceful, if barren, appearance. Two members of the present United States garrison there are looking at the flag on the memorial erected to the men of the 28th regiment, fifth marine division.

TRACTORS TO THE ARGENTINE . . . Members of the institute of Argentine trade promotion are shown seated on some of the new type tractors scheduled for shipment to Argentina where they will be used to cultivate that country's vast wheat fields. The tractors are lined up outside the factory at Manayunk, Pa. There are 1,000 of them ready for shipment to the South American nation.

TURKISH TRACK STAR . . . Long distance runner Esref Avdin of Istanbul, who came 10,000 miles to run 10,000 meters in national AAU meet, liked the U. S. so well he decided to stay and enroll in University of Nebraska.

DOG DAYS MADE EASY . . . At this stage in the life (all one month of it) of Corky the pup, the only thing he can lick is an ice cream cone. Corky, who belongs to Joan Struck, 16, of Milwaukee, Wis., turned to ice cream as an escape from the heat.

RECORD BREAKER . . . Maj. Howard (Deacon) Hively, AAF pilot of Norman, Okla., made a record-breaking round trip in a P-80 Shooting Star jet plane from Mitchell Field, L. I., to Washington, D. C., and back.

BACK TOGETHER . . . Mrs. Flora Van Buskirk (left) of Lemmon, S. D., and her twin sister, Mrs. Cora Scougall of San Francisco, celebrated their joint birthday anniversaries in San Francisco as a climax to their first visit together in 32 years.

AILING HIPPO . . . Pete the hippo, his Bronx zoo attendants finally decided, was feeling poorly. He was listless during the day and suffered from insominia at night. It turned out he was suffering from the heat.

HOUSEHOLD HINTS

Your step-stool or kitchen ladder can't be too carefully chosen. It should be as wide and sturdy as possible with rubber feet and nonslip treads for safety. Take no chances on a rickety ladder.

—•—

Finger marks and ugly smudges on wallpaper can be removed efficiently with a handy art gum eraser. Keep one of these erasers on hand for easy cleaning.

—•—

Avoid leaning against the door when riding in an automobile. If you like to sit sidewise, put on the safety latch.

—•—

Small scraps of white candles may be put together in a small cotton bag and brought out on ironing day. The iron won't stick if it's passed over the bag a few times.

—•—

Before washing dirty curtains, allow them to soak in cold water overnight, to loosen dirt.

—•—

Hard-to-get-at places around machines can be conveniently lubricated by attaching a soda straw to the stem or spout of an oil can.

—•—

Buy pillow cases large enough for your pillows. Otherwise the casings will not stand the wear and tear.

—•—

When shoes begin to scuff and peel, rub them with the white of an egg. It will paste down the broken pieces.

—•—

Hang table linens on the lines lengthwise. The warp threads in the long weave are stronger than the woof threads.

George Albers returned home last Thursday from the Mercy hospital at Mason City. He is getting along fine at this writing.

Mr. and Mrs. Burton Hanson and daughter, Linda Lou of Wesley, and John Griewe of St. Paul, were dinner guests Sunday at the Art Wellemeyer home.

FARM OPERATIONS CHANGE UNNEEDED

Even Though Corn Outlook Is Gloomy It's Too Early For Major Move

In spite of the gloomy corn outlook farmers would not be wise to make any major change in farming operations at present.

Carl C. Malone, Iowa State College agricultural economist, says the best thing to do would be to wait until the feed picture is clear.

The present situation is not nearly as critical as the drouth years of 1934 and 1936, he points out. A large supply of roughage is already in the barn or stack. Pasture conditons until midsummer were good in both the western range areas and the Corn Belt. No large-scale forced liquidation of livestock is in prospect.

Large Carryover

A fairly large carryover of corn this fall seems certain.

Malone does advise economy in the use of the present supply of grain feeds, nevertheless. If corn production continues to suffer under adverse weather conditions the pinch will come hardest on producers of grain-using livestock. Farmers with roughage-using animals won't have much trouble.

A short corn crop will mean an unfavorable relationship between feed and livestock prices. This won't affect immediate production as much as 1948 output, says Malone. The real pinch in meat and poultry production shows up in the summer and fall following a short crop.

STOLE BEES

Carl Budzine of near Otterville is looking for a burglar; one possibly with a number of welts on his body. Some one stole a hive full of bees on the Budzine farm. However, they left the floor of the hive behind and might have had a little trouble with their "booty."

Rosemary Dow Became Bride Of Otho Keraus

Rosemary Dow of Osage, daughter of Mr. and Mrs. L. E. Dow of Sheffield, became the bride of Otho K. Keraus of Osage, son of Mr. and Mrs. W. C. Keraus of Klemme, in a double ring ceremony at the home of the bride's parents in Sheffield on Sunday afternoon, August 31st. The Rev. A. S. Grarup officiated in the presence of the immediate families and a few close friends.

The bride, given in marriage by her father, wore a white spun rayon two-piece street length dress and carried a bouquet of yellow roses and white carnation. Her twin sister, Virginia Dow of Marshalltown, served as bridesmaid and was attired in a blue shantung street length dress. She carried a bouquet of white carnations and yellow roses. The bridegroom was attended by his brother, Verle Keraus of Garner.

Mrs. Richard Dow of Oelwein played a prelude of nuptial music and the wedding march from Lohengrin for the processional.

After the ceremony a reception was held for the wedding guests. Mrs. E. P. Dow of Forest City poured with Mrs. George Dow of Cedar Falls and Mrs. Verle Keraus of Garner assisting. Priscilla Dow of Sheffield, sister of the bride, and Eleanor Barz of Osage served.

The couple left on a short honeymoon and upon their return will be at home in Osage where both are employed by the Press-News.

Mrs. Keraus graduated from the Sheffield high school and the Hamilton School of Commerce in Mason City. She was employed for a year by the Iowa State Teachers college at Cedar Falls in a stenographic capacity and since May, 1946, has been employed by the Press-News in Osage.

Mr Keraus graduated from the Klemme high school and spent 5 years with the army, including 3½ years overseas with the 34th division in Africa and Italy. Since his discharge in September, 1945, he has been employed as foreman of the Press-News mechanical department.

Closing Date To Apply For Benton Oats Set For September 15th

The Hancock County Seed Distribution Committee has set September 15th as the closing date for Hancock County farmers to apply for Benton oats being grown under agreement with the Garner FFA and Virgil Cook, Klemme, Iowa. There will be a limited number of Benton oats for 1948 planting. Benton are later than Clinton and have yielded slightly less than the Clinton.

If you prefer Benton oats you should apply from one of the growers or at the Farm Bureau office.

Attended Family Reunion In Illinois

Mr. and Mrs. Herb Marshall and Irene; Mr. and Mrs. Bob Marshall and family and Mr. and Mrs. Harlow Helps and daughter, returned the latter part of the week from Pekin, Illinois, where they attended a family reunion.

HELLO, FOLKS!

Mr. and Mrs. Marvin Wade of Deer Lake are the parents of 7 lbs. 9½ oz. baby boy born to them on September 1st. They have named him Ernest James.

September 11:
Ell Township meeting No. 3 school.

CHECK WESTERN FEEDER LAMBS FOR SORE MOUTH

Farmers buying western feeder lambs this fall should look their flock over every day the first week or two for signs of sore mouth.

While sore mouth seldom kills, it can quickly knock the profit out of lamb feeding this year, says K. W. Stouder, extension veterinarian at Iowa State College. He points out that lambs suffering from sore mouth will not eat well, and as a result soon loose weight. With present high feed prices such shrinkage can easily trim off all feeding profits.

First sympton of sore mouth, which may be picked up by clean lambs from a dirty truck or shipping lot, is a blister at the corner of the mouth.

The blister soon breaks the skin and becomes a deep, bleeding sore with a crust over the top. The crusty skin eruption can quickly spread all over the muzzle and become painful enough that lambs will not eat

Sore mouth will spread rapidly over an entire flock, Stouder says, unless diseased animals are separated from the rest of the flock. It is caused by a virus which apparently lives in the soil. Once it gets started in a flock, it may continue for quite a while unless treatment is given

In treating sore mouth, Stouder says to first rub off the crust with a corncob. Knock off all the crust so that the sores will bleed Then swab on antiseptic is satisfactory. Treatment should be continued for a couple weeks, until the sores show rapid healing.

Vaccination is no cure for sore mouth. It is a good preventive, however, and is not expensive or hard to do. On farms where sore mouth gave trouble last year, Stouder suggests that a veterinarian vaccinate the lambs to avoid a possible reoccurrence this fall.

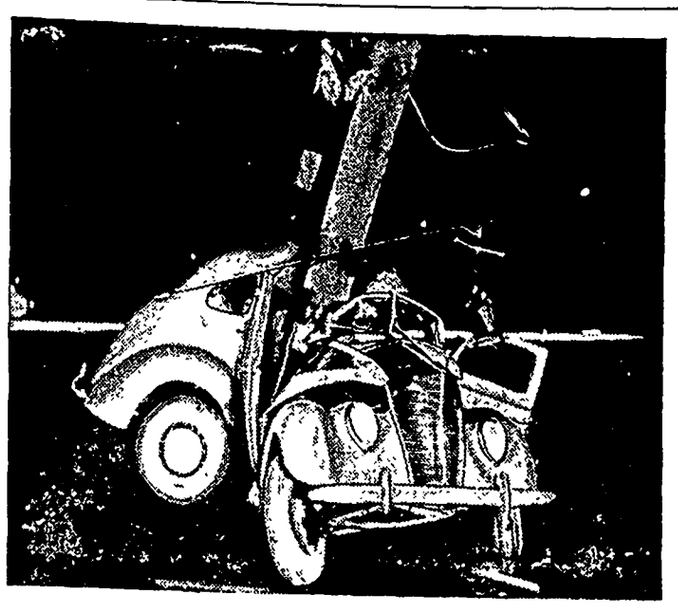
Barn lots on which sore mouth has occurred should be thoroughly cleaned out before being used. Stouder suggests doing this while the sun is still hot enough to kill any virus remaining. Litter from the lots should be spread over plow land.

Household Hints By Mary Jane

When drying lamp shades that you have washed, put it right back on the lamp to dry, avoid putting it in the sun to shrink or fade.

If you must frost a cake in a big hurry, try melting a candy bar while hot and let it melt.

If you want to pack a cold salad for a picnic, put salad in top of double boiler and ice cubes in the bottom and wrap good in newspaper, it will be carried a great distance and still be cold.



Speeding through the night, the driver of this car was momentarily blinded by approaching headlights. Because he was going too fast to control his car instantly, he swerved off the highway and crashed into a telegraph pole with such force that the car was almost broken in two. He was dead when help arrived. National Conservation Bureau advises night-drivers to keep their eyes focused on the side of the road, never to look directly into headlights and—most important of all—to drive at moderate speed.

Large Number Boys, Girls Attending Colleges

WHERE KLEMME TEACHERS WILL TEACH THIS YEAR

Iva Christie will teach the 5th and 6th grades of the Belmond school

Mrs. Quentin Stille is teaching in Twin Lake No. 1 school.

Mrs. Cecil Bridges is teaching in Liberty No. 6

Ann Nieman is teaching in Liberty No. 9 school

Mrs Asa Legee is teaching in Liberty No 5 school

Mrs Kenneth Schultz is teaching in Liberty No. 4 school.

Frances Mickelstad is teaching in Twin Lake No. 5 school.

Marjorie Meinders is teaching in the Lemke school, Liberty No. 8

Mrs Eugene Kluckhohn is teaching in the Stille school school west of town, Liberty No. 7.

Miss Bernice Tanner is the new teacher in the Klemme schools in grades 3 and 4

Evelyn Arnold commenced her teaching duties at Meservey Monday Miss Arnold has charge of the 6th and 7th grades

CLEAN EGGS FOR MARKET HELP TOWN HOMEMAKER

Iowa's farm homemakers have a bit of the advantage when it comes to the egg market—they get first choice But they have a real chance to do a good turn for their neighbor in town who buy all their eggs at the corner grocery

Quality of eggs in the store depends upon their handling between laying and marketing, especially in late summer when it's hot, says W R. Whitefield, Iowa State College specialist in poultry Many "hot-weather" eggs come to market at this time of year, and the resulting shortage of good eggs may raise quality egg prices, he says.

Quick cooling immediately after gathering is important. Eggs should be placed in a wire basket or perforated pail and kept in a cool, damp basement until marketed.

Frequent gathering is another precaution While on many farms it's the practice to gather the eggs only once a day, for best quailty gather them at noon as well as in the evening. And market them, often especially if you haven't the proper conditions on the farm for protecting them against temperatures and dryness.

Take clean eggs to the market. If the nests and floor of the chicken house are well cared for, there won't be many dirty eggs. As for dirty eggs—wash them under the tap and then use them for immediate cooking.

Special care of a few eggs sold may not seem to pay. Yet the eventual loss of a market for eggs of poor quality is something to think about, Whitefield says.

MANY KLEMME BOYS AND GIRLS GO TO COLLEGE THIS YEAR

Klemme will be very well represented in a number of colleges this year, as more than the usual number of graduates are taking up college work. Out of 19 graduates, 12 are enrolled in college.

The list of those whom we have been able to procure follow:

Nine young men and women will attend State Teachers College at Cedar Falls: Elizabeth Goll, Marcelle Josten, Elwyn Jacobs, Dean Jacobs, Ewald Grosshuesch, Ivan Blumer, Patricia Kudje, and Novella Bredbenner. "Bill" Grosshuesch is already there, having taking the summer course Miss Bredbenner, who has been teaching for several years, will work on a higher degree

Allen Barz will again return to the Mission House College at Plymouth, Wisconsin.

Edward "Red" Buntenbach will return to Upper Iowa University at Fayette.

Eunice Larsen and Clarence Larsen, Jr are Klemme's representatives at Iowa State College at Ames.

Eugene Habercamp will go to Luther College at Decorah to major in music He formerly attended Waldorf College.

Lois Ann Lau and Dean Merkel will attend Waldorf College at Forest City.

Emily Johnson and Jeanne Kurtz will start nurse's training at the Deaconess hospital at Marshalltown

Peggy Coobs and Dorothy Ellingson are already attending schools in Des Moines.

Baptisms At Klemme and Liberty Methodist Churches Sunday

Baptisms at the Klemme Methodist Church on Sunday, August 31, 1947 were as follows:

William Dean Arnold, son of Mr. and Mrs. Roy E. Arnold;

Marcille Darlene DeMerritt, daughter of Mr. and Mrs. Leslie DeMerritt.

Lorinda Sue White, daughter of Mr. and Mrs. Claude Worden White.

Mervin Burton Groesbeck, adult son of Mr. and Mrs. Clarence Groesbeck was baptised at home on August 26, 1947.

As the parents brought the infants to the altar, for baptism, Mrs. Wesley Patterson and Miss LaNelle Harvey sang the duet; "See Israel's gentle Shepherd stand with all engaging charm; Hark, how he calls the tender lambs, and folds them in his arms."

Babtisms At Liberty

Baptisms at Liberty on same day: Duane Francis Pringnitz, son of Mr. and Mrs. Bernard Pringnitz; Allen Lynn Bredlow, son of Mr. and Mrs. Marvin Bredlow; Gary Dean, son of Mr. and Mrs. Erwin Blank.

MAY NOT HAVE OPEN SEASON FOR PHEASANTS

There is a possibility Iowa may not have a pheasant season this fall, Bruce Stiles, assistant director of the state conservation commission said Thursday.

"On the basis of a survey, which has not yet been completed, indications are that the pheasant population is no better this year than last and last year's 3-week season was not considered successful," Stiles said.

The 1946 3-week season, beginning Oct. 28, was the shortest since 1942 when pheasant hunting also was allowed for 21 days. The 1941 season was only 7½ days.

Stiles said the chief concern was for pheasant hens.

"If we knew sportsmen would refrain from shooting hens, we believe we could have at least a limited season," he asserted.

There always is an excess of cocks, he said, but added that every hen taken cuts the population for the following year from 6 to 8 birds.

The pheasant population is low because of unfavorable weather conditions in the spring when the pheasants normally nest.

Minnesota has announced it will not have a season this fall because of the lack of birds and Stiles said the Iowa commission has been getting questions from hunters concerning prospects for an Iowa season.

The commission usually announces season dates early in October.

Stiles said that during last year's season, the average hunter got 6 birds throughout the 3 weeks.

SOIL CONSERVATION DISTRICT MEETING

Commissioners of the Hancock County Soil Conservation District held their regular meeting on August 29 at the local office in Garner.

Commissioners Sam Barber of Kanawha, and Ben Riemer of Garner, District Conservationist, L. E. Kuester of Ft. Dodge, and Vernon Moss of Garner conservationist for Hancock County District were present. Kuester and Moss are employees of the Soil Conservation Service assigned to assist Soil Conservation Districts. Kuester is District Conservationist over eight districts in this area and Moss is for Hancock County District.

Moss reported progress of work in the district during the past month as follows: over 20,000 feet of tile have been staked, survey for farm drainage was started on the M. C James farm, surveying and classification on drainage project for Liverce, Whitney, Couper and Buns in Crystal and Bingham Townships was finished, farm plan was written for M. J. Kearney in Avery Township and four new requests for assistance were accepted.

Farm plan of M. J. Kearney was reviewed and approved by commissioners. Requests for assistance No's 116, 117, 118 were approved

Celebrated Fourth Birthday

Judy, daughter of Mr. and Mrs. Ray Jorgenson, Jr., celebrated her fourth birthday on Sunday, August 24th. Her mother baked and decorated a nice cake on which were placed four candles. Grandpa and Grandma Jergie were invited to have dinner with Judy and she had fun blowing out the candles.

FIRST SHOWER IN SIX WEEK!

The first good shower Klemme has enjoyed for six weeks fell Thursday night. The rain was just about enough to settle the dust good. The last shower here was on the afternoon of July 17 on a Thursday, or just six weeks between showers. It's been so dry here the frogs haven't learned how to swim yet.

Hancock 4-H'ers Show Up At Iowa State Fair

LABOR DAY WAS MOVING DAY FOR SEVERAL KLEMME FAMILIES

Labor Day, September first was an active moving day in Klemme when several families moved.

Cliff Adair and family, who lived in the Wm. Stille house one block north of the Post Office, moved to Clear Lake Melvin Neuberger and family moved into the house vacated by the Adairs.

Mrs Henry Medaus, who purchased the house vacated by the Neubergers moved into her new property Vern Bisom and his family who purchased Mrs. Medau's home and acreage in the north part of Klemme moved into their newly acquired property

The Bisom family had lived in the Gobelei place in the northwest part of town and Eugene Kluckhohn and family, who have resided in a farm home south of Klemme, moved to the Gobelei house.

Allen Lau and wife, recently married, moved into the farm home vacated by Eugene Kluckhohn The farm belongs to Allen's father, Emil Lau

Lydia Bock, who has resided in the apartment above the Roths' Cafe moved about a week ago to an apartment upstairs in the N. G. Moberly residence No one has moved into the apartment vacated by Miss Bock, as the Roths family will occupy the apartments above their place of business.

Mr. and Mrs. Melvin Schlei have their new home in southwest Klemme about completed and will move in there. Mr. and Mrs. Elwood Geary have their house about ready for occupancy and will soon move in there

Mr and Mrs. Robert Andrea, of Fayette, will move into Ed Christians house in the south part of Klemme This house was brought in from the country some time ago and is being made ready to occupy Mr. and Mrs Andrea both teach in Klemme high school.

GARNER COUPLE OBSERVES 25TH WEDDING ANNIVERSARY

Dr. and Mrs. Earl H Phillips of Garner observed their Silver Wedding Anniversary Sunday afternoon, August 31st when they held open house from 4:30 to 5:30 o'clock. A large number of their friends called during that time and all were served a light lunch. Dr. and Mrs. Phillips received a number of nice gifts.

Their wedding date is September 2nd but was held on Sunday so their two daughters and son could be at home. The affair was a surprise which had been planned by their children.

W. S. C. S. Meets Thursday September 4th

The W. S. C. S. of the Klemme Methodist Church will meet Thursday afternoon, September 4th. Mrs. Dwight Hummel will lead the Devotions and Mrs. Clarence Lemke is leader of the Lesson.

The hostesses are Mrs. Lester Stille, Mrs. John Etchen and Mary Swanson.

Elder Picnic Held At Clear Lake State Park Aug. 24th

Mr. and Mrs. R. W. Elder attended the annual Elder reunion and picnic held at the Clear Lake State Park, Sunday, August 24th. There were members from a number of states. R. W. has never missed one of the reunions since they were begun a number of years ago.

IOWA STATE FAIR WINNERS

Don Greiman of Garner exhibited the reserve champion 4-H purebred beef heifer in the Angus at the Iowa State Fair; this heifer also won first place in the class for produce of former 4-H Club heifers

In exhibiting this heifer Greiman won an Elgin wrist watch offered by the Des Moines Chamber of Commerce for first place in the showmanship contest.

Greiman also showed two steers that placed fourth and ninth in their classes. Shirley Greiman exhibited two steers; she captured a twelth place for one of them.

In an election for State Fair 4-H King Don Greiman was one of two runners-up In the 4-H boys' demonstration contest Maynard Dorow of Concord Township was awarded a blue ribbon on the topic "Control of Bovine Mastitis."

The 4-H livestock judging team which represented Hancock County at the State Fair consisted of Ronald and Paul Zrostlik of Liberty and Maynard Dorow.

The Hancock County 4-H girls' demonstration team was awarded a white ribbon on their presentation of "Are You Closet Conscious?" The girls on this team were Mary Ann Wellik and Eleanor Jakoubek of Madison Township; their leader and coach is Mrs Frank Brozik.

The following received Blue Ribbons at the State Fair; Vivian Stromer, exhibiting a window seat, cushion and curtains; and Betty Ann Schultz with curtains.

The following red ribbons were won by. LaVaune Verlo, with a dressing table unit; Dorothy Jordanger, dresser scarf; Shirley Greiman, picture frame; and Mercedes Formanek, with a long time expense account book.

The following received white ribbons. Mersedes Formanek, with a natural finished unit; Gloria Haefner, painted unit, lamp, book shelf, and waste basket; Ardys Bailey with curtains, and dresser scarf; Marjorie Trenary, with a slip cover, and Ardys Bailey, slip cover; Marjorie Bredlow with a pillow cover and Ardys Bailey, pillow cover.

KLEMME 4-H CLUB BOY WINS RIBBONS AT NORTH IOWA FAIR

Galen Gruis returned home Monday evening from the North Iowa Fair where he entered his 2 calves in the 4-H competition. His Shorthorn baby beef, "Ber Mil" won him the first blue ribbon in a class of 20. "The Duchess" a purebred Shortnorn heifer won first blue ribbon in both the 4-H and district showing. In open class she carried off the red ribbon This is Galens' first year in club work and he is a member of "Little Cattle Feeders Club."

FAIR SIZED CROWD ATTENDED THE COOPERATIVE PICNIC

A fairly good sized crowd attended the Cooperative picnic and sports festival held Friday. A picnic dinner was enjoyed in the Park at noon, followed by sports events at the school grounds.

The East farmers defeated the West farmers in a soft ball game after which the winners walloped the Cooperative team. Races were run between events and a large number of kids participated.

In the final windup the Klemme Merchants and the Garner baseball team put on a good contest which was called on account of darkness. Klemme came out winner, 5 to 3.

SUNDAY SCHOOL LESSON

Earning and Spending

LESSON TEXT FOR SEPTEMBER 7—Proverbs 11:24-27; 16:8; Ecclesiastes 5:10, 11, James 5:1-6.

MEMORY SELECTION—Better is a little with righteousness than great revenues without right.—Proverbs 16:8.

EDITOR'S NOTE: Lesson subjects and Scripture texts selected and copyrighted by International Council of Religious Education; used by permission.

By WILLIAM CULBERTSON, D. D.
Of The Moody Bible Institute, Chicago.

AS BELIEVERS in Christ we are responsible not only for the way we earn our living, but for the way we spend what we earn.

Of course we must earn our living honestly, but if we spend foolishly that which we have earned, we shall have dissipated much of the effect of our example in earning.

Possessions are a trust from God, and we shall have to render an account of our stewardship.

Just because we have given a certain percentage of our income to Christian causes is no reason to think we shall meet with divine approbation with regard to our stewardship. If we give a tithe, well and good, but what about the other nine-tenths? Is God pleased with our stewardship there?

I. The Vanity of Wealth (Eccles. 5:10, 11).

IN ANY study of wealth, it seems necessary to begin with an understanding of its limitations. We live in a world in which men frequently lay great importance on possessions, and indeed, there are many things which wealth can purchase. On the other hand, there are some things that money cannot buy. And further, we should recognize that our possessions are not eternal, that they may suddenly fade away.

The passage here reminds us of the fact that wealth for wealth's sake is bound to be a disappointment. The man who loves silver shall not be satisfied with silver, any more than the man who loves pleasure shall be satisfied with pleasure. Augustine was right when he said that man could be satisfied with no less than God himself.

Notice how accurately the picture is drawn. If we have increased wealth, we have increased responsibility (v. 11). That fact is as unalterable as the most rigid law we know. The only advantage is, as the Preacher expresses it, the beholding of goods with the eye—not a very great advantage after all.

II. The Proper Accumulation of Wealth (Prov. 16:8).

IT IS just as true as when Solomon wrote it, that "Better is a little, with righteousness, than great revenues with injustice."

This statement needs no argument, needs no proof. If we would have the honor of men, self-respect, and the blessing of God, there is no alternative.

III. The Improper Accumulation of Wealth (James 5:1-6).

THE apostle James speaks of a condition that will obtain in the last days (v. 3). There are many evidences that the condition he describes has had altogether too many fulfillments in recent history.

James excoriates the rich who have defrauded their employees in order that they might fare sumptuously and live riotously. These unscrupulous rich have taken advantage because they were not resisted (v. 6). Such wealth is corrupted.

Notice once again that the result of their sin will rise to break them. It is a serious thing to trifle with sin, to eat the bread of iniquity. God has no patience with injustice in social relationships. Sooner or later judgment will come.

IV. The Proper Use of Wealth (Prov. 11:24-27).

LIBERALITY should characterize the child of God. It is true that the Bible condemns the attitude of imprudence, yet it also condemns the attitude of the miser. To withhold more than is meet, also tends to want.

How blessedly true it is that there is a recompense to giving. Here we read that the one who waters shall himself be watered. Our Lord affirmed the same truth in Luke 6:38.

To have it within our power to help, and fail to do so, is to bring upon ourselves censure and condemnation. Therefore, we should seek to perform the good (v. 27).

This passage concludes with the statement that one who searches after evil shall find that evil will come to him. The man who sets his heart to do wrong will not have to wait long to find the occasion to do that which is in his heart.

Many are the injunctions in the New Testament regarding the proper use of wealth. For example, the Christian has a duty toward his own family (I Tim. 5:8). He is enjoined to be sympathetic and generous in his giving to help others (II Cor. 8:8-15). Certainly he is to dispense his goods with the glory of God in view (cf. Col. 3:17).

COLORFUL FIESTA GARB . . . Descendants of Spanish Conquistadores and Pueblo Indians will stage a re-enactment of their final peace treaty as a highlight of the Santa Fe Fiesta. Colorful costumes, like those worn by the Pueblo Indians (above), will add a reminder of the past to fiesta time.

THESE UNITED STATES

Historic Fiesta Commemorates Reconquest of Old Santa Fe

WNU Features.

SANTA FE, N. M.—"Hasta la Fiesta!" That old Spanish greeting resounds through the streets of Old Santa Fe as preparations near completion for the 235th annual edition of the historic Santa Fe Fiesta. Descendants of Spanish Conquistadores and Pueblo Indians once again will join together in the four-day Labor Day fiesta, opening August 29 and continuing through September 1, by staging a reenactment of their final peace treaty drawn up in 1692.

America's oldest community festival, the Santa Fe Fiesta, commemorates the reconquest of the southwest territory and especially of Santa Fe, the former Spanish capital, by Gen. Don Diego de Vargas in the year 1692. The reconquest came 12 years after the Indian uprising in which all Spanish persons north of the border fled back into Mexico or were killed.

Twenty years later, in 1712, the Marquis de la Penuela, governor and captain general of the province of New Mexico territory, decreed that a fiesta should be held annually "for all time to come" in honor of the retaking of the City of Santa Fe. This was in keeping with a vow, made prior to the reconquest by General De Vargas, to hold a fiesta in honor of the Virgin of Guadalupe.

Its annual celebration, prior to World War II, was one of the outstanding festivals in the country, with thousands of tourists coming from with local Spanish-Americans, Mexicans, Indians and Anglos (Caucasians who have settled here from other states).

The colorful pageantry of the re-enactment of the city, the covered wagon days parades, Indian marriage and dances, native musicians playing their folk music and dancing, including, as it will this year, the importation of a Mariachi band and orchestra from Old Mexico, Conquistadores Baile or Ball, always have intrigued fiesta visitors.

This year for the first time since the war all major features have been included in the program and from the burning of Zozobra (a giant 100-foot figure of the god of gloom) on Thursday evening, until the last musical concert on Monday evening, Old Spain and the spirit of fiesta will be supreme.

Each day is given over largely to certain religious activities. Highlights include a procession to the Cathedral church of high Catholic dignitaries, a high pontifical mass and the stirring candlelight procession in which thousands of pilgrims bearing lighted candles wend their way through the streets, with luminarios and bonfires helping to light their way.

Santa Fe, oldest capital city of the nation, will be decked out in her holiday attire for fiesta. Gay bunting and colorful banners will adorn city streets, and many residents will be bedecked in colorful old costumes reminiscent of early Spanish and Indian days.

Located in mountainous country at an elevation of 7,000 feet, Santa Fe sets forth its cool, invigorating climate as an added lure for fiesta visitors. The city and the nearby country are replete with authentic historic sights which beckon to many visitors who, like the freighters of old, make their last stop at the terminus of the Santa Fe Trail.

Shure and Begorrah—She's Welcome to It

SPOKANE, WASH. — For 50 years an 82-year-old Englishwoman resentfully carried the Irish name of O'Connor.

She resented the name so much in fact, she told Judge Carl Quackenbush, that she delayed marrying her late husband for two years because she did not like the name. Moreover, she testified, ever since her marriage she has bewailed the fact that she was mistaken for an Irishwoman.

The court did not hesitate giving her back her maiden name of Elizabeth Jane Cook. The decision may have been prompted by the fact that she already had it engraved on her tombstone.

Minister Renounces Salary To Take Job As Railroad Laborer

LANARK, ILL.—Renouncing his church salary because of a "steady decline in revenue," the Rev. Harmon H. Bro, 27, pastor of the Christian church, has taken a job as a railroad section hand to support his family.

The minister, a Harvard graduate and son of a college president, told his congregation he will continue to serve the church without salary, which was $200 a month, including parsonage rent. He is married and the father of a baby daughter.

His job as a railroad section hand pays 85 cents an hour for a 48-hour week, a total of $177 66 a month.

In announcing his decision to take the job, Mr. Bro told his congregation:

"There are too many people in modern churches who think that the kingdom of God is just something you hire a preacher to worry about so the congregation can relax."

He explained that "only about 30" of the church's 100 members attend services regularly. Church income, he added, has been dropping regularly.

Fire Lookouts Watch For Careless Airmen

SALT LAKE CITY, UTAH.—Airplane pilots are supplanting careless motorists as the bane of U. S. forest service fire-fighters, according to Supervisor F. C. Koziol of Wasatch National forest.

It used to be that motorists carelessly flipping cigarettes from their car windows or knocking out pipe ashes were blamed for the majority of man-set forest fires. Now, Koziol says, fire lookouts have been warned to keep their binoculars trained on pilots of aircraft.

"It has been established in many instances that aircraft have flown over areas immediately before fire has broken out," he reports. "With no other causes discovered, there's a distinct possibility that burning material tossed from the planes caused the fires."

Members of each farm family which must resort to well water for its drinking supply travel a total distance of 152 miles yearly lugging water, he reports.

The one-day school here is designed to bring state agricultural and Indian service leaders together with water system manufacturers to promote "taps" for farmers.

The FICTION Corner

BETTER LATE

By EDWARD STEVENSON

WELL, I'm certainly glad you're not seasick. When I first saw you leaning over the rail I said to myself that you must be seasick, though I couldn't see how anybody could get seasick with the water so calm the way it is. Our room steward says that anybody that gets seasick in this kind of weather wouldn't be safe on the lake in Central Park. He's a regular comedian. . . . And that reminds me, how much do you think I ought to tip him—the room steward, I mean? I'm not one that don't have to count my pennies, but still I want to do the right thing as to tipping.

You see, this is the first time we've been on a boat—my wife and me, I mean. Of course we've taken a trip up the Hudson with the kids, but I guess you wouldn't mention the Hudson River Day Line in the same breath with the S. S. Goliath, would you? The kids thought it was grand, though. They're grown up and married now, with kids of their own—except Judy, that is, and she hardly had time, not having been married quite a year yet—but it don't seem more than yesterday that they were running about like a bunch of wild Indians and getting into all sorts of mischief. Time certainly flies.

Whew! it's getting hot, isn't it? We must be coming into the tropics from the way it feels. Ever been down here before, Mr. —— I don't think you mentioned your name, did you? . . . Arthur? . . . Well, I'm glad to know you, Mr. Arthur. My name's Bentham. I'd like you to meet my wife some time, too. That's her laying in that deck chair down at the end. She's making believe she's reading that book, but she's sound asleep. The salt air seems to tucker her out.

As I was saying, time certainly flies. Now, you take me. Why, it seems it's only the other day that Ellen and me were getting married; and here we are, grandparents of six already.

We've been married thirty-five years. It don't seem possible, but that's what it is, all right. Why, say, I can remember the wedding just as plain as if it happened last week. It wasn't much of a wedding—you know, no fuss and feathers Besides Ellen and I and the minister there was only the minister's wife and the church janitor, for witness. But I can still see the five of us standing there in the chapel, with the sun coming through a high window and falling all around us and turning everything golden. I remember Ellen specially She was so pretty and little.

When I look back, I think Ellen and I must'a been crazy, getting married the way we did. My gosh, I didn't have a cent to my name—it was all I could do to scrape up the money for the wedding ring. Engagement rings and honeymoons and all the fixings were out of reach as far as we were concerned.

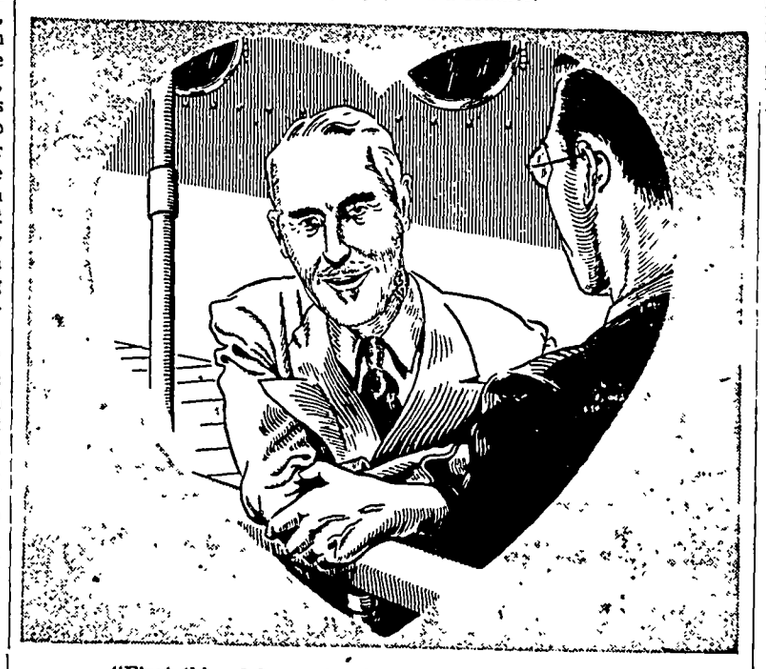
I felt pretty bad, taking her right from church to a $2.50-a-week furnished room. A wonderful girl like her deserved better, and I told her so. A big wedding, a reception at the Waldorf—the old Waldorf, you know—and a honeymoon at Niagara Falls was little enough to her. But she just laughed. "If I wanted such truck," she says, "I'd've married Mr. Astor and not Johnny Bentham." That's the way she is. I didn't mind so much not having a big church affair, or a reception afterwards, but, gosh, what's a wedding without a honeymoon? I mean, it made me feel kind of low, not being able to provide even that.

You know, marrying Ellen was the making of me. I was just a shipping clerk at the time, but she made me study bookkeeping and when an opening in the company came along I stepped right in. I'm head bookkeeper now. Of course that isn't so much—there's only one other bookkeeper—but being head of anything is pretty good these days, I always say. A couple of years back when I'd been with the company thirty-five years they put on a dinner for me at Jack Dempsey's and gave me a watch. Here it is. See what it says. "To John W. Bentham"—that's my full name—"for thirty-five years of devoted service. Atlas Paper & Supply Co." Mr. Stover, the president, made a speech. I did too—but I was too choked up to say much. You can bet I'd never've stuck around to get that watch if it hadn't been for Ellen.

And the kids, too, of course. When you get to be a family man you got to tend to business. Kit—that's short for Christopher — was the first; then Roger, Cynthia, Anthony, and Judy, the baby. Nice names, ain't they? Ellen picked 'em out.

They're all grown up now—fine young men and women, if I do say so myself—but there was times when you just wondered if they ever would. It was just one thing after another. Sick or healthy, they had you up to your neck in bills.

Well, last year our company did pretty well and they gave all the old employes a month's pay for a bonus at Christmas — first bonus we'd had in years. So what did I do? Well, I figured with all the kids married and no one to take care of but ourselves, that we didn't have any real need for the money, so I didn't breath a word about it to Ellen. You see, I'd been seeing these cruise ads in the papers and I thought to myself that's just the thing for Ellen and I. Twelve days. Nassau, Jamaica and Cuba. $125 and up. I didn't say anything till about two weeks before we were to sail. Then I broke the news. Well you could've knocked Ellen over with a feather.



"First thing I knew she threw her arms around me."

"Johnny Bentham," she says, "are you out of your mind?" "No," I says. "And I haven't robbed a bank, neither." So I told her all about the bonus.

Well, she still thought I was crazy. "Spending all that money on a little trip," she says. "Do you think we're millionaires? Johnny, I'll never put foot on that boat."

"Now, that's a fine howdydo!" I says, making out I'm insulted. "A woman refusing to go on a honeymoon with her husband!"

Well, she just looked at me and I just looked at her, and first thing you know she threw her arms around me and began kissing me, and what did the two of us do but end up laughing and crying like a couple of kids.

"Gosh, Mama," I says. "It's better late than never, ain't it?" . . .

Say, will you look at them porpoises!

Book Reviews In Brief

THE CAMPBELLS ARE COMING —Glenn H. Campbell (Dodd, Mead & Co., $4).

The origin of the Clan Campbell and the history of Scotland are synonymous and here the author, as a bearer of the famous name, takes the most interesting aspects of each and has woven them into a skillfully drawn account of the Campbells' hand in Scottish affairs.

Liberally illustrated, the book contains historical information written in an absorbing narrative form. In every Scotch crisis a Campbell had a responsible role in the ultimate outcome. One of the best chapters in the book concerns the story of the ill-fated Mary, Queen of Scots, on whose side the Campbells remained loyal with almost disastrous results.

The author, an advertising executive of Cleveland, O., took many pains to bring his readers an accurate, descriptive history of the Campbells. Not content with a long and diligent research in local libraries, he travelled to Scotland and covered personally the territory about which he writes. While the book is of primary interest to the Campbells themselves, many of whom know nothing of the fascinating background of the clan, every individual of Scotch descent and scholars of every nationality will find something appealing in its pages.

National Park Ideals

National parks in the United States, created by act of congress, are areas of national significance distinguished by superlative natural scenery, set aside for preservation as nearly as possible in unimpaired condition and dedicated to the use and inspiration of the people. In establishing the Yellowstone, first national park, congress quaintly designated it "a public park or pleasuring-ground for the benefit and enjoyment of the people," and provided against "injury or spoilation of all timber, mineral deposits, natural curiosities or wonders within said park, and their retention in their natural conditions. In establishing national parks no thought is given to geographic location. The area proposed for national park use is considered primarily from the standpoint of whether or not its principal features are of broad, national interest.

You Can Have Both Beauty and Health Through a Series of Simple Exercise

ARE large matronly hips keeping you from enjoying slacks and other sportswear? Why put up with them any longer? You can literally melt away that flabby flesh through exercise.

* * *

Here's one that helps Sit on the floor, legs straight, hands on floor behind hips. 1. Pull knees up to chest, raising feet a few inches from floor. 2. Swing knees from side to side, first touching floor on right side, then left. Sixteen times altogether

Other figure faults can also be cured by exercises given in our booklet No. 90. For the bust, hips, waist, neck, shoulders, etc. Send 25c in coin for "Beauty and Health Through Simple Exercises" to Weekly Newspaper Service, 243 West 17th St., New York 11, N. Y. Print name, address with zone, booklet title and No. 90.

Odd Eyelid

The most peculiar eyelid known is that of a rare fish, the cuckoo ray (raia circularis). This lid is round, has a large fringe and is located inside the eyeball, directly under instead of over the cornea.

CHECK WARM AIR LEAKS IN YOUR REFRIGERATOR

If hot weather seems to have your mechanical refrigerator on the run," it's possible that the "overtime" it is putting in may be due to warm air leaking in around the door.

One way to test for leaks says Naomi Shank, extension home management specialist Iowa State College, is to close the door on a piece of ordinary paper about the size and thickness of a dollar bill. If the paper pulls out easily, the gasket isn't tight enough to keep warm air out. The rubber in the gasket may have become hard and brittle. In this case a new one is needed. Of course, the door itself may be at fault, with hinges and latches in need of tightening.

Sometimes the refrigerator puts in needless effort because the temperature control is set too low for the food being kept. Or, again, it may be due to neglecting to defrost the refrigerator frequently. Miss Shank says.

As to temperature, 40 degrees F. is normal, except for the freezing cabinet. The temperature needs to go lower only for freezing desserts and other foods. Immediately after the freezing, return the temperature control to normal to keep the motor from overworking.

A heavy coating of frost on the freezing unit prevents the cold from getting out to the refrigerator shelves. During hot weather and especially in homes where three meals a day are prepared, it may be necessary to defrost the refrigerator every other day. Frequent defrosting means better refrigerator temperatures with less wear of the motor.

SELECT PHLOX FOR ALL SEASON GARDEN BLOOM

By the right selection of phlox, you can have blooms in your garden from early spring until late fall says Larry Grove, Iowa State College horticulturist.

There are many dwarf forms of phlox that are adapted to rock wall and rock garden work. They also work well on banks as a general ground cover.

The best time to transplant the early spring phlox is about now, he says. He suggests August as the logical month. Then they will have a chance to get well established before cold weather sets in. Late flowering phlox should be moved in the spring.

Sunshine and full sunlight are best for sturdy growth. The soil should be rich in organic matter and slightly acid. Use plenty of well-rotted barnyard manure, leaf mold or compost when planting phlox. The addition of a handful of superphosphate to the bottom of the hole at planting time would be set in 5-inch pots, or closer together than 3 feet. Spread the roots out well, and firm the soil around them. Then water immediately.

To ward off mildew disease and red spider dust with microfine dusting sulfur. Use good cultural practices and keep the plants growing, is Growe's advice.

SMALL-SIZE EGGS GIVE GOOD VALUE THIS SEASON

Small or medium-sized eggs are good buys during late summer and early fall, Iowa's budget-wise home-makers are reminded.

This is the time of year when pullet eggs come to market, report nutrition specialists, Iowa State College. Supplies of large grade A eggs are lower during this same period, and many a homemaker vies with her neighbor to buy them. Therefore the price of eggs goes up.

But a wise homemaker will get her money's worth by choosing the smaller size eggs grade A eggs. The smaller eggs within a grade have the same food value as the larger eggs, allowing for the difference in weight of course. Medium eggs weigh about one-eighth less than large eggs; small eggs about one-fourth less than large eggs. Prices, however, usually differ much more at this season than relative weights. This is why the smallest size is likely to offer the best return for the money spent.

During most of the year, the supply of small eggs goes to hotels, restaurants and institutions. In late summer and early fall, when these sizes are so plentiful that they appear on the retail market, the homemaker has this same advantage in buying.

Recovering From Auto Accident

Rev and Mrs. Ruben Grosshuesch and baby, who were injured in an auto accident, were removed from the Deaconess hospital at Marshalltown last Wednesday in an ambulance and taken to the home of Mrs. Grosshuesch's parents at Waukon where they are recovering from their injuries. Mrs. Grosshuesch, who received a back injury will be in a cast for eleven weeks. Rev. Grosshuesch received a compound fracture of his right arm, and also has a cast on it. Their baby was uninjured.

WHICH FARM LEASE?

This is the second of four articles on types of farm leases, their advantages and limitations. Careful planning in drawing up farm leases is necessary due to the sharp changes expected in farm prices in the years ahead.

The operator-owner lease is designed for use by the owner of a fully equipped and fully stocked farm with a tenant or operator who is well qualified for farming in every way except that he lacks capital.

For a war veteran returning to agriculture this plan is one of the best. It allows him to start farming on a farm of proper size. He can have an adequate layout of livestock and equipment without putting out a lot of money or going ino debt.

It has an added advantage of letting the tenant sell his labor while it is high and take advantage of farm prices while they are high.

Thus a renter, by saving his money, may soon have enough to pay for the farming equipment and livestock he needs to start out for himself when prices turn lower, points out I. W. Arthur, Iowa State College.

While this is one of the best farm business agreements, there are a number of requirements which should be met if this lease plan is to be successfully used.

First, the farm business covered by the agreement should be large enough to support two families in normal times.

Second, the income must be divided in proportion to the contribution of each man.

A good set of farm records is needed. Separate living quarters are desirable and perhaps even necessary. Finally, the debt load on the farm should not be too heavy.

Arthur says that under most agreements the operator can be paid a minimum wage plus a part of the net income, if such income is large enough to provide a bonus over and above the operator's basic wage.

Operator-owner lease forms are available from Iowa State College or at the county extension director's office.

CORN-SOYBEAN FIELD DAY TO BE SEPT. 19

The Corn-Soybean Field Day will be held at the Agronomy Farm, Ames, on Sept. 19 this year, one week later than had previously been planned.

The annual event was moved back one week because of the late maturity of this year's corn. Announcement was made by the Iowa State College committee in charge.

Although the exact condition of the corn cannot be forecast now, a good deal of the day will be devoted to discussing current problems of utilizing the corn crop. Agricultural engineers, animal husbandmen and farm economists will assist the agronomists will assist the agronomists in presenting practical feeding and storing methods.

Soybeans, also slated for discussion, are expected to be in better chape than the corn. The field day is open to all interested Iowans.

RECORD SUPPLY OF HAY PER ANIMAL THIS YEAR

There will be plenty of hay this year.

The United States hay crop will be up 2 percent from last year, according to reports received by Francis Kutish, Iowa State College agricultural economist.

This year's production, plus the carryover from last year, makes it seem likely the nation will have a record supply of hay per animal. On July 1 range pastures were in the best shape since 1942. This was true in spite of a dry area across New Mexico and California. The USDA reported that cattle and sheep, except in these dry areas, are in excellent condition.

Coop. Soft Ball Team Meets Liberty Thursday

The Klemme Coops will play the Liberty team at the Liberty Methodist diamond Thursday evening of this week.

The R. C. team split two games the past week, dropping one to Clarion and Tuesday night winning from Clear Lake.

In the hard ball league in the final play off the Klemme Merchants lost to Rockford who won the championship and giving Klemme second place.

1 Prepares food by heat (Electricity does it)
6 Make clothes (Electricity helps)
8 Radio entertainments (Electricity brings 'em)
13 Wire that brings electricity to you
14 Seventh note of the scale
15 Accomplish or perform (Electricity can)
17 Trade or exchange
18 Front end of elephant (Watch out for this one!)
19 Toward
21 Two-thirds won (Excuse it, please!)
23 Suffix meaning condition or state
24 For instance; like (Also a Roman weight of 1 pound)
25 In what way or manner
26 And not; or likewise not
28 A male person
29 Be it ever so humble, there's no place like it (And electricity does a lot to help)
30 Always (Frequently used to describe electricity's readiness)
32 Electrical energy (And it does a lot of jobs)
33 The Electric Hour — "Hour of Charm" — comes to you by this
35 When your electric alarm wakes you up
36 North Dakota (abbrev.)
38 A useful material agency which exhibits magnetic, chemical and thermal effects — and you use it in every room in your house
39 Postscript (abbrev.)
41 Indefinite article
42 Low in cost — and electricity certainly is
47 Banishes darkness by electricity; and, like your electric bill, isn't heavy
52 You get one every month for electric service — and think of all the jobs it covers!
53 What electricity helps you do to the laundry
55 Light-Power (initials)
57 The best place in the world to live — and it has the most and best electric power, too (initials)
58 National (abbrev.)
59 Plural of "I" (And it isn't "eyes")
60 To turn away in disgust (Scottish). Sorry, this is a tough one
62 On top of
63 Half an em
64 More than one guy
65 The lady who makes the meals — make it easy for her with an electric range
67 To such a degree or extent. Often followed by the word "what?"
69 Third person singular, present tense, of the verb "be"
70 An oven for burning bricks, not bread (But nobody burns bread in an electric range with thermostatic control)
71 Greek letter; also Greek symbol for 20 (Did you know you're getting twice as much electricity for your money as you did 20 years ago?)
72 A gadget that makes a breeze by electricity
73 Prepared, willing, handy (like electricity)

DOWN

1 Your electric vacuum cleaner helps you do this
2 Lubricates
3 Single individual or object
4 King's Exchange (abbrev.)
6 A river in North China. Also Spanish for "yes" (This is very unfair of us, we know)
7 War Department (abbrev.)
9 High School (abbrev.)
10 Office of War Information (initials)
11 Wi[illegible] you d[illegible] anyt[illegible] ve[illegible]
12 R[illegible] (E[illegible] you
14 A tal[illegible]
16 Pe[illegible] (Yo[illegible] wh[illegible] light and p[illegible] pany [illegible])
19 Heavy [illegible] very d[illegible]
20 A us[illegible] agency wh[illegible] magnetic, ele[illegible] thermo[illegible] It [illegible] helps [illegible] cess [illegible] the t[illegible] mi[illegible] fo[illegible]
22 [illegible] ow' [illegible] eat[illegible]
25 [illegible] t- [illegible] wh[illegible] word [illegible]
27 A pers[illegible] bel[illegible] Ente[illegible]
29 A [illegible] attent[illegible] Santa Claus
31 Kn[illegible] (abbrev.)
32 Any time between noon and midnight
34 On top of
35 A practical unit of electric current strength (We're just showing off!)
37 To put on
40 South Carolina (abbrev.)
41 On, upon, close to, by, near, in or within (Sorry, this is all the help we can give you)
43 Hard-boiled (abbrev.)
44 Three very well-known vowels (Really, by this time we were quite desperate)
45 Likewise, furthermore
46 Designs, devices or plots
47 The system of wires by which electricity reaches you
48 Persia
49 Acquired
50 How nice! (initials)
51 A gadget to tell time. When run by electricity, it tells the most dependable time in the world
54 A small coin, practically worthless these days. But when you spend it for electricity, it becomes the biggest one-cent bargain in your budget
56 A swift Malayan vessel (Will it help if we tell you it rhymes with "fresh"?)
59 To unite heated metal (Electricity did a lot of this during the war)
61 The upper portion
64 Italian for "my" (Well, nothing else fitted in)
66 A domestic duty loved by soldiers (abbrev.)
68 Belonging to
69 Within
70 Knight Errant (abbrev.)

• We hope you had as much fun solving this crossword teaser as we had creating it. The puzzle comes to you as an amusing reminder that electricity does many, many tasks for you, willingly, swiftly and at very little cost.

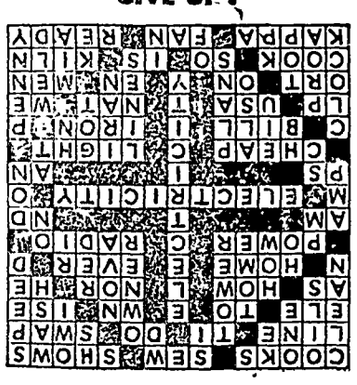
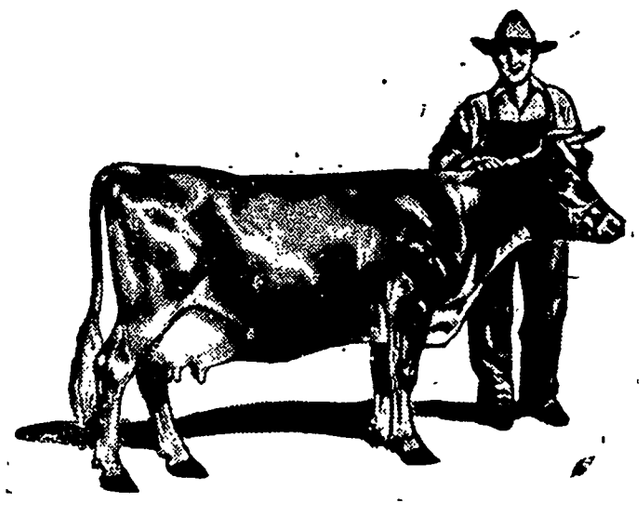
GIVE UP?





Who Gets The Cream?

Occasionally, people unfamiliar with cooperative business, ask: "Who gets the profits, or the cream of the business?"

We don't operate for profit, but for service to our membership. That is why people join co-ops, to provide themselves with goods and services at the lowest possible cost.

Members make worthwhile savings when they join and patronize their own co-op. These savings are the "cream," and it all comes back to individual members on the basis of patronage.

We invite your membership and patronage. You help yourself, your family and community when you pool your efforts with others through co-ops.

HANCOCK COUNTY BOARD PROCEEDINGS

9TH ADJOURNED JUNE MEETING

Garner, Iowa
8-18-47

The Hancock County, Iowa, Board of Supervisors met in session on above captioned date pursant to adjournement with Supervisors F. J. Schoun, George Th. Gerdes and John Chambers, present.

The minutes of the last meeting were read and approved as read.

Notice of warning to depart is hereby ordered served on Herman Friesenberg and Evelyn Friesenberg.

On motion and second the following insurance policies are approved No. 354176, Iowa Mutual Tornado Insurance Association; No. 22702, The Farmers Mutual Fire and Lightning Insurance Association, No. O. C. 50739 and No. 50883, Great American Insurance Co.

Supervisor John Chambers is appointed a committee to investigate and cause repairs to be made in DD No. 70-147

On motion and second the material contract with the Wheeler Lumber Bridge and Supply of Des Moines for bridge Lumbers is approved.

Whereas C. F. Merten, Engineer, has to report that the Claremont Brick and Sand Co. have completed the contract for gravel surfacing roads in Hancock County to his entire satisfaction and there is due on said contract a final estimate in the sum of $2453 17

Be and it is therefore resolved by the Board of Supervisors of Hancock County, Iowa that the report of the Engineer be and the same is hereby approved and the County Auditor be and he is hereby authorized and ordered to draw a warrant on the Road Construction Fund of Hancock County, Iowa, in favor of the Clermont Brick and Sand Company in the sum of $2453 17 as a final payment on said contract all as by law directed

Whereas, Wm Henschen, Engineer, has to report that Sylvan C Oleson of Forest City has completed his contract for cleanout work on the main open ditch of Drainage District No. 10 to his entire satisfaction and

Whereas, there is due on said contract a final estimate in the sum of $789 60 as a final payment on said contract.

Be and it is therefore resolved by the Board of Supervisors for and in behalf of DD No 10, Hancock County, Iowa, that a hearing on the Report of the engineer will be held at the Courthouse in Garner Iowa at 10 30 a. m. on the 15th day of September A D 1947 The County Auditor is hereby directed to cause Noitce of said hearing to be published in the Britt News Tribune, a newspaper published in Britt Iowa.

This being the 18th day of August, 1947, a date set for a hearing on the report of C F Merten recommending that the contract of Bill Heller of Carter Lake for a cleanout of lateral No 2 DD No 3 and 4 be accepted as completed and final estimate in the sum of $193 20 be paid the hour for said letting having arrived and the Board being fully advised said hearing was held as scheduled No objectors appeared

Be and it is therefore resolved by the Board of Supervisors acting for and in behalf of Lateral 2 of DD No 3 and 4, that the report of the Engineer recommending a final payment on the Contract with Bill Heller for the cleanout of lateral No 2 of DD No. 3 and 4 me approved and final estimated ordered paid as by law directed.

In the matter of the petition of Herman E. Limberg et al for a sub drainage district to be established in section 8, 9, 16 and 17 East one fourth of 18 N 2 NW4 of section 20 and the NW4 NE4 of Section 20, all in Township 97, North, Range 26 West. Wm Henschen is hereby appointed Engineer to make an investigation, preliminary survey, into the feasibility and necessity of the establishment of said district

This being the 18th day of August A D 1947 a date heretofore set for a hearing on the petition of Chris Gilstrap et al for cleanout of the South Main of DD No 1 and 2 thereon the hour having arrived for said hearing the Proof of publication being on file and the Board being fully advised said hearing was held as scheduled

The Board considered all objections on file and heard objectors to said cleanout and the proponents therefore and after duly considering all arguments for and against said proposed improvement as petitioned for by Chris Gilstrap et al and as recommended in the report of the Engineer it is deemed for the best interests of the taxpayers of DD No 1 and 2 Hancock County, Iowa and conductive to Public health welfare, convenience and utility that said improvement be made as prayed in the prayer of the petitioners and recommended in the report of the Engineer

Be and it is therefore resolved by the Board of Supervisors in and for Hancock County Iowa acting for and in behalf of DD No 1 and 2 that the Petition and report of the Engineer referred to in the Preamble hereof be approved and September 8th at the hour of 2 30 P M at the Courthouse in Garner is the date and place set for a letting on the Construction of said improvement.

The County Auditor be and he is hereby directed to cause notice of such letting to be published in the Britt News Tribune, a newspaper published at Britt, Iowa which notice shall state the kind and approximate amount and kind of work to be done, the date for commencement and completion and that a certified check on a Iowa bank in the amount of 10 percent of the bid payable to the County Auditor with each bid and that the successful bidder will be required to file a bond for 75 percent of the contract sum as security for the completion of the contract

This being the 18th day of August A D 1947 a date heretofore fixed for a hearing on the vacation of an alley in Duncan, Iowa petitioned for James Drabek et al, the hour for said letting having arrived the Proof of publication being on file and the Board being fully advised, said hearing was held as scheduled. There being no objections oral or written

Be and it is therefore resolved that the alley listed in the petition of James Drabek et al, in the town of Duncan, Iowa be and the same is hereby ordered vacated as prayed and the County Auditor be and he is hereby ordered to correct his records accordingly All as provided for by law

This being the 18th day of August A D 1947 a date hereofore fixed for the hearing on the establishment of DD No 144 Extension, a sub-District of DD No 1 and 2 Hancock County Iowa petitioned for by Ellsworth and Jones. In'e et al the hour for said hearing having arrived the proof of publication being on file and the Board being fully advised said hearing was held as scheduled

All objections on file were read and objections and proponents were heard and after duly considering all objections the Board is of the opinion that the proposed extension petitioned for is necessary and will be conducive to public health, welfare convenience and utility and the benefits to be derived will be greater than the cost thereof.

Be it therefore resolved by the Board of Supervisors of Hancock County, Iowa, acting for and in behalf of DD No. 144 Extension that the petition for DD No. 144 Extension and the report of the Engineer recommending the establishment and construction thereof be and the same is hereby approved and shall henceforth be know as DD No 144 Extension

The foregoing resolution was offered and read by Supervisor Schoun who moved its adoption, was seconded by Supervisor Geo. Th. Gerdes, wherefore the Chairman placed the motion of its adoption and upon roll call the vote thereon is F J Schoun, John Chambers, and Geo. Th Gerdes, aye. Nays none. Whereupon the Chairman declared the resolution duly adopted.

On motion and second C F Merten is appointed Engineer to Supervise the Construction of the Cleanout of the open ditch on the South Main of 1 and 2 and his bond as such Engineer is hereby fixed at $500 00.

Whereas Wm. Henschen, Engineer Walter Kahl and Wm Boehnke, were heretofore appointed Commissioners to view, classify lands and assess benefits in the watershed of DD No 147, Hancock County, Iowa all inaccordance with Chapter 455 Code of Iowa, A D 1946, and laws amendatory thereto

Whereas said Commissioners did qualify as by law directed and did view said lands and did assess benefits, as by law directed and did filed their report on the 15th day of August A D. 1947, which report sets out in detail the assessment against each tract and parcel of land and railways and highways in the district as directed by law

Be and it is therefore Resolved by the Board of Supervisors of Hancock County, Iowa, acting for and in behalf of DD No. 147, Hancock County, Iowa, that the report of the Commissioners heretofore appointed to classify land and assess benefits in the watershed of DD No. 147, Hancock County, Iowa is tentatively, approved and a hearing thereon will be held at the Courthouse in Garner, Iowa and the 6th day of October A D 1947, at the hour of 1 30 P M, at which time taxpayers in said district will appear and show cause why said classification and assessment designated shall not be accepted and assessment taxed against the lands in the watershed of DD No 147, Hancock County, Iowa, Iowa all objections to such assessment of benefits chall be in writing and filed in the office of the County Auditor at or before the time for hearing thereon

The County Auditor be and he is hereby directed to cause notice of such hearing to be published in the Britt News Tribune, a newspaper of general circulation published at Britt, Iowa, setting out the names of the owners of lands in DD No. 147, Hancock County, Iowa together with the description of real estate and the designated assessment, each tract, parcel of land highway and railway in the ditrict is charged with.

The foregoing resolution was offered and read by Supervisor Geo. Th Gerdes, who moved its adoption was seconded by Supervisor Schoun whereupon the Chairman placed the motion of its adoption and upon roll call the vote thereon is F J Schoun Geo Th Gerdes and John Chambers, aye Nays none.

Whereupon the Chairman declared the resolution duly adopted.

On motion and second the Board adjourned to August 25th A. D. 1947, at the hour of 9 00 o'clock A. M.

AROUND IOWA

ASPHYXIATED

At Winterset last week, James Mounce, of Des Moines, climbed into a septic tank at the Patterson school building and immediately called out, 'you'd better get out of there." Before he could be pulled out, he fell forward on his face Death resulted from toxic sewer gas.

LOST FINGER

As Wilma Dittmer, of near Bremer, jumped from a truck recently, a ring on the third finger of her right hand caught on a bolt and the weight of the body tore the finger off. Amputation was necessary.

DAMAGED PLANE

Officials at Greene are looking for vandals who damaged planes on the Greene airport. Rudders of both planes were damaged with a knife so badly that had the pilots taken off without detecting the injury crashes would probably have resulted.

DOWN EMBANKMENT

Mike Ketelsen, 12, and his pony, "Collie" plunged down a 30-foot embankment on the Ketelsen farm near Anthon last week. The boy was unhurt but the pony was killed

Methodist Annual Conference Will Be Held At Fort Dodge

The Annual Methodist Conference will be held this year at Fort Dodge September 17 to 21st A number of Methodists are looking forward and will attend the conference this year.

Thank You!

•

We want to thank all those who came to the Cooperative Picnic and all those who assisted to help make it a success

Next year the Cooperatives will have the picnic at an earlier date which will not conflict with Fair dates and we hope to have a much larger crowd.

However, we all had a good time and we want to thank all those who helped make it a success.

We've Been Asked:

"Am I Going To Be Able To Outfit This Boy For School?"

We Give You A Straight-From-The-Shoulder Answer:

It Won't Be Easy! The clothing situation is still very critical. We are receiving a few shipments daily to outfit that boy of yours for school this fall But it is not nearly enough. During the month of September we here at our Store want to urge all you mothers that have to outfit YOUR boy for school to start shopping for the things he'll need Maybe by Fall you will have enough clothes to put on his back.

Try Our Store First! Yes, come in and look over our stock, for you are more apt to find just the thing here than you are after driving miles. Our wholesale outlets have been more than fair to us. It will pay you dividends to shop here.

Try Our Store Often! And if we don't have just what you want come back in a few days, it might have arrived. Make Our Store your 1947 headquarters for School Clothes for Jr. America.

Morgan Horse Typically American

Government Runs Unique Breeding Farm in Vermont

By BAUKHAGE
News Analyst and Commentator.

WASHINGTON, D. C.—Some time ago the world was startled to learn from Pravda, the official communist party newspaper in Moscow, that it was a Russian who discovered "wireless" (as radio was called in its youth), and as if that weren't enough, it was announced later by the same authority that the electric light, which poor Thomas Edison certainly thought he had something to do with, was likewise a Russian invention.

If I ever read, as some day I fear I shall, that ice-cream sodas and hot-dogs were first discovered on a pleasant afternoon by some mysterious Muscovite as he sat dreaming on his back steppes, I shall announce that bortsch and vodka are American products and that the Volga boatmen were simply a prodigal local of the CIO maritime union.

Meanwhile, however, I am reminded by the department of agriculture that one thing which is as American as America and which no foreigner had better try to appropriate as a home-grown product, is the Morgan horse.

Baukhage

Justin Morgan is immortalized in bronze and you can see him today standing on his pedestal before the main stable of the United States Morgan horse farm which covers about 1,000 acres of rolling, wooded country two miles north of Middlebury, Vt.

The original farm of 400 acres was presented to the United States department of agriculture by Joseph Battell. Colonel Battell had long been an admirer and breeder of Morgan horses, and had founded the American Morgan register. The farm was established in 1907. The area was increased by an additional gift of about 35 acres by Colonel Battell in 1908, and by purchase of about 550 acres from Middlebury College in 1917. The land, underlain with limestone, is well adapted to the production of horses.

In the selection of foundation breeding stock, and in planning subsequent matings, emphasis was placed upon size and quality, and ability to perform the three gaits, walk, trot and canter. These points

Morgan brood mares, with their foals, run in one of the pastures of the department of agriculture's U. S. Morgan horse farm near Middlebury, Vt.

continue to be emphasized. Also, every effort has been made to preserve adequate muscling and depth of body and to preserve and enhance desirable temperament.

The stocky stallion, original of the post-mortem effigy was named for its owner, a singing schoolmaster, was foaled in 1793 and died in 1821. He (I mean the stallion not the schoolmaster) had a romantic career and he is the progenitor of the breed, which as the department of agriculture says, is one of the few breeds of horses developed in the United States. Justin was a "small, active animal of great power and endurance, with the reputation of being able to outwalk, outrun, and outpull any other horse in Vermont and the neighboring states."

He had the power to transmit these qualities, says the department, to his three known sons and the United States government is doing its share to perpetuate the characteristics for which his ilk is known: — "beauty, easy keeping, soundness, endurance, and spirit coupled with gentleness."

The first time I ever went to Vermont I was attracted to these plucky little horses. Later I learned more about the Morgan horse. He weighs less than 1,000 pounds, he is not over 14 hands high, round-barrelled, with powerful chest and leg muscles, a proud head and a stout heart. He has done a lot to develop the state of Vermont and his adventures have carried him far afield. In a fictionized but remarkably accurate story of "Justin I," Marguerite Henry tells how the boy Joel, who "gentled" Justin as a colt, later lost track of him and finally found him again and how Joel, in his cavalry uniform with a sprig of evergreen in his helmet, sat proudly on his diminutive mount when President Monroe reviewed the Green Mountain boys when they came back from the War of 1812.

The author has Joel say about Justin afterward: "He was just a little work horse that cleared the fields and helped Vermont grow up. Come to think of it, he's like us. He's American . . . that's what he is, American."

The Morgan horse helped other states and territories grow up, too, for their equine brotherhood went West with the emigrating farmers, and more than one American soldier was proudly mounted on a Morgan as he went into battle. General Custer rode off on a Morgan horse when he went out to fight the Indians, a whole regiment of cavalry had Morgan mounts in the Civil War.

Breeding Program Is Under Way

Now, "The Morgan horse breeders" Dr. McFee of the animal husbandry division of the department of agriculture told me, "have given more attention to the traits desirable in a riding horse." (Forty descendants of Justin became famous as trotters. Some of you remember such names as Ethan Allen, Black Hawk and Dan Patch.)

At the Morgan farm today usually about forty-five horses are under test.

According to the official description, the breeding program there calls for "the measurement of each youngster at one year of age, at two years, and at three years. All are trained under saddle and in harness and are put through controlled performance and endurance trials when about three years old. The data thus obtained form the permanent records of the individuals. They are used also in studies of sire and dam inheritance and as criteria for formulation the station's breeding program. For the tests of three-year olds the department's horse specialists have devised specific trials to measure the walking and trotting gaits and the horses' endurance in harness and under the saddle."

Always versatile, the Morgan was as chipper when he went to the meeting house on Sunday pulling the surrey with the fringe on the top as it was weekdays when it could drag a log to the sawmill which often took a team of its big brothers to budge. And where buggies are still used, you'll often find a Morgan between the shafts. He is used on the trail, too, for his forte these days seems to be under the saddle.

The Morgan horses have found homes far from the shadow of their native Green Mountains and today the stock probably is increasing more rapidly in California than anywhere in the East. I regret to say that on my last trip to Vermont, this summer, though mighty Mount Mansfield looked up at the heavens with the same stern profile that it did when I first panted, pack-laden to its top, the maple-sugar tasted as good (though it cost too much), the mist still held the peak of Killington as gently as ever in its graceful fingers. But I missed the quick tattoo of those small strong hooves on the hard highways, and the silhouette of an arched neck against the sky above a mountain pasture.

I'm glad that Uncle Sam is doing his part, in the shadow of Justin's statue, to perpetuate the breed that is "just like us," as Joel said:—American.

HOW TO CELEBRATE A BIRTHDAY . . . Triplets Maureen, Michael and Michele Yosco of Flushing, N. Y., got all dressed up to celebrate their first birthday. They also had three lovely cakes. Put them all together—clean clothes, gooey cake and inquisitive one-year-olds—and they spell washday for mother.

Rioting Flares in India; British Get Stern Rule

INDEPENDENCE: *India Riots*

During the two days before fateful India became a land of free men, more than 200 died in a bloody orgy of violence and rioting in the huge northern province of Punjab.

Lahore, the capital, was the center of the disturbance, but fierce fighting also took place throughout the west and east Punjab countryside. Wide sections of Lahore were aflame.

This took place on the eve of India's independence day, just before the Indian constituent assembly sat down to function as a free governing body.

Cause of the rioting, incited, as always, by terrorists, was the bitter disagreement arising out of the partitioning of India into two separate zones—one for Hindus, the other for Moslems.

In New Delhi, the independence day ceremonial program began with two minutes of silence for those who died in the fight for freedom which was finally achieved through amicable negotiations with the British.

IRON HAND: *Britannia Ruled*

It well may be true that "Britons never, never, never shall be slaves," as the anthem has it, but in view of Prime Minister Clement Attlee's new emergency action giving the government stern powers over British industry and labor, many in the islands are now harboring serious doubts about that.

The emergency bill, which Winston Churchill charged invoked such restraints as the government has never before imposed except in time of war, has been passed by both houses of parliament and now —for better or worse—is law of the land.

Designed to bring Britain out of her deadly economic slump, the bill empowers the government to command labor and industry to do practically anything and everything, if it is in the national interest.

Rallying cry of the British conservatives, led by Churchill, is "dictatorship."

Eden

Anthony Eden, former foreign secretary, got into the fight by asking that parliament cut short a planned vacation so the members can be on hand to examine the measures which the government will order.

"The house cannot be an absent spectator while the government does a split over the ever-widening abyss," said Eden, also a member of the Conservative party.

CO-OP INQUIRY: *Two Questions*

Although the public is not too well informed about it, one of the most important and fiercely waged domestic post war battles is that being fought between private business and cooperative enterprises.

Crux of the feud is the fact that cooperatives are tax-exempt, while private business is not. From this evolve two basic questions:

1. What effect does tax-exemption have upon growth of the cooperatives?

2. Is tax-exemption a factor of discrimination against private business?

A house small business subcommittee has begun an attempt to find the answers with an investigation of the cooperative community enterprise at Greenbelt, Md. In the Greenbelt case, business groups have charged that the government has aided the cooperative in keeping private business out of the development area.

This hearing, as well as others on the west coast, is being conducted by Rep. B. Walter Riehlman (Rep., N. Y.) as acting chairman of the subcommittee.

In view of the theory that taxes will remain high, compared with the past, for at least 50 years, according to economists, the tax-exemption feature of co-ops' existence will grow increasingly important.

RED SAUCERS: *Soviets Curious*

Those flying disks were fun while they lasted, but by this time everybody has practically forgotten them.

Well, almost everybody.

Latest report having to do with the aerial chinaware is that Soviet agents in the United States have been ordered to solve the mystery of the disks. Presupposing the report to be true, it means, at least, that the saucers were not of Russian origin.

Soviet espionage agents here are said to have been advised that the Kremlin believes the flying saucers might have some connection with army experiments on methods of knocking out enemy radar.

Tourist Trade

Operating on the highly plausible theory that left-over land mines are not only unhealthy for wandering tourists but are also bad for business, the French ministry of reconstruction is working hard to clear all possible danger spots in former fighting areas around France. While the French admit that erstwhile battle zones might attract heavy tourist trade, they are not taking any chances.

NO THUMB ON SCALES

Extend Prepackaging to Meat

That old caricature of the butcher resting his thumb on the scales as he weighs out the meat soon will vanish completely from the American scene if the trend toward prepackaging of fresh cut meats continues at its present pace.

Approximately 100 stores across the nation currently are operating their meat departments on that basis, and their cash registers are recording ample proof that attractively cut meat wrapped in cellophane and placed in display cases sells itself as efficiently as a butcher's sales talk could.

With the popular cuts of meat in weights most in demand placed in open-top refrigerated cases, the housewife can shop at her leisure and not be compelled to wait her turn in line. From the retail standpoint, prepackaging cuts down store overhead and increases turnover.

Although so far, prepackaging largely has been confined to retail shops, large chains are becoming more interested in streamlined merchandising plans. One has a meat self-service experiment in operation in about 10 Detroit stores, with the prepackaging done at a central distribution point.

At least one local of the Amalgamated Meat Cutters and Butcher Workmen's union has vetoed the idea of pre-cutting fresh meats, but general opinion among other union locals is that the practice would be a favorable one insofar as it would allow butchers to concentrate on their skilled trade instead of spending time serving customers.

Customer demand, which admittedly takes peculiar turns at times, can, nevertheless, be anticipated by analyzing customer buying habits. For instance, steaks and chops would be cut in several thicknesses so that virtually every customer could pick up exactly the kind and cut of meat he had in mind.

Experiments have almost wholly disproved the theory that loss of personal service in butcher shops would result in a decline of sales, principally because attractively packaged meat displays become an effective selling medium in themselves.

WITH THE COLUMNISTS

PAUL MALLON

Republican Strategy Pays Profits

THE Republicans brought themselves out of their first new leadership session of congress in greater unity than any political party has achieved since long before the New Deal. Defections generally drew only three of their senators.

This was accomplished by a peculiar inner system of organization. Normally steering committees are bossed by one or two men, but the Republicans made theirs truly representative of the party. For instance, in the house Speaker Martin was boss, but he worked closely with Floor Leader Halleck (which is not unusual). They both cooperated genuinely with a steering committee, which made many decision to which both Martin and Halleck were opposed.

Out of this system of operating from the grass roots up, instead of from a top leadership down (as Mr. Roosevelt did), came the dominant party characteristic of their first session.

Now this guiding committee-leadership had an operating system which was kept completely under cover. They had a two-pronged base policy from the start. They strove (A) to keep down the amount of legislation, selecting only the bare essentials for beginning a new policy era for the country, and (B) to get away from emergency and "must" legislation. Their delay on the union reform bill was deliberate. Nothing was said about this yardstick. They kept the Democrats from knowing their formula. But they feel rather good now about the way it worked out.

H. I. PHILLIPS

Letter for Special Delivery

"Mr. Averell Harriman,
Secretary of Commerce,
Washington, D. C.

"My Dear Mr. Harriman—The papers say that the Committee of Nineteen which is to look into this country's capacity to do all our foreign lending and underwriting has started on the job in a big way and that it will 'make a study unmatched in history.' Fine and dandy! Some such study to find out where the bottom of the barrel is, what's between it and the top, how big the bunghole should be and whether multiple spigots are advisable is certainly overdue, bub. And it will comfort most Americans to feel for the first time in many years that 'Stop, look and listen' is replacing the slogan 'Shoot the works, let the poorhouse come when it may.'"

* * *

Bill Powell is reported the Hollywood choice to play Elwood Dowd in the movie of "Harvey."

We can't imagine him as even close to the type, and the actor we think would be a scream in it would be Barry Fitzgerald. He is the only performer on stage or screen who could touch Frank Fay. Why not, by the way, Fay for the picture version. Too much as the author intended, eh?

—*—

It is our guess that Hollywood will put the rabbit into the play, visually. And that, were John Bunny alive, he would get the part.

* * *

"So far as this airplane business is concerned I have been in it 13 years and lost $14,000,000."—Howard Hughes.

—*—

"Is that good?"

* * *

It seems to us, reading about those gay parties as an amusing interlude in the war contracts routine, that there should have been a "Miss $200 of 1944."

DREW PEARSON

Congressional Junket for Peace

SEN. GLEN TAYLOR of Idaho, a former cowboy vaudeville crooner who has come to win the respect of his senatorial colleagues, will take an unusual trip this summer.

While some senators will be junketing to Alaska or touring Europe, Taylor will ride horseback from the Pacific to the Atlantic coast.

The senator from Idaho candidly admits that it is a publicity stunt, but not for Taylor, for peace. Along the way, Taylor plans to speak for the United Nations and world cooperation.

At the last session of congress, he helped introduce a bill to strengthen the United Nations and help eliminate the veto power by which one nation can hold up the peace efforts of the rest of the world. Taylor feels that the Middle West is becoming isolationist, is worried over the threat of war and wants to dramatize the problem of peace.

The Idaho senator planned to buy two horses in California and begin his trek from the Golden Gate bridge, San Francisco. One horse will follow behind on a trailer, while he rides the other, alternating each day. Taylor says he plans to ride horseback every inch of the way, even including western deserts and the Rocky mountains. He figures the trip will take him three months.

WALTER WINCHELL

Land of the Melting Pot

This underlines America's reputation as a melting pot: We have 256 different religious denominations. . . . A democratic form of government in America had its origin in Virginia under Governor Yeardley—two years before the Pilgrims landed at Plymouth. . . . Polish, German and Irish workers began to battle their oppressors in Virginia long before the Revolutionary war exploded. . . . During nine of the last ten years America's annual immigration quota was not filled.

Those who say the Indians are a vanishing race are spreading a myth. Their population has doubled during the past decade. . . . Many American Indian reservations have modern homes. They look like any other small town.

Historians have said that the American Revolution was the achievement of an "aggressive minority." The colonies consisted of men and women who came from Ireland, England, Scotland, France, Germany, Holland, Switzerland, Sweden, Poland and Italy. And every religion also was represented among the soldiers who formed Washington's army.

AMERICA IS A NATION composed of minorities. And when compared with the rest of the world's population—Americans as a whole also are a minority. . . . Bigots who blame all our troubles on foreigners should be reminded that only 10 per cent of America's population is foreign-born. . . . And we must not forget America's most beloved immigrant—the Statue of Liberty.

WALTER SHEAD

Cost of Living Spirals

IN PRESIDENT TRUMAN'S state of the union message to congress last January he warned of the spiral of inflated prices. In the succeeding seven months the President filed with congress two economic reports on conditions in the country, and in both of these he urged congress to do something about the high cost of living. In addition, more than a month before adjournment of congress he sent a special message urging positive action against the continued spiral of living costs. He also made a plea to private industry to reduce costs voluntarily.

All through the long months until congress adjourned, no action was taken. In the meantime, living costs reached their peak immediately before adjournment. As prices soared, profits soared and 1947 earnings will be approximately 50 per cent above last year's record of $12,539,000,000.

On the last day of the session the senate named a joint committee and appropriated $100,000 for it to hold hearings to probe the question of whether or not there is a high cost of living problem. That is all congress did. These hearings probably will get under way in mid-September.

WRIGHT PATTERSON

Useless 'Jobs' Will Remain

POLITICS being politics, regardless of which party is in power, it probably was too much to expect any considerable reduction in the many agencies, bureaus and administrations of the federal government. Useless as many of them may be to John Q. Public, they do provide jobs, and jobs represent patronage. Those bureaus were created by a Democratic administration, but the jobs they represent can be filled by a Republican administration if and when there comes such a change. As long as the jobs are filled by Democrats the present administration wants them continued. Anticipating a possible change, the Republicans wish to retain these jobs.

Instrument Enables Dancer To Produce Accompaniment

The strangest electronic musical instrument, developed by Leon Thermin of New York in the early 1930s, consists of an inch-thick platform backed by a stand supporting a loud-speaker and two six-foot vertical metal rods, says Collier's.

As the pitch and volume are controlled by the waving of the hands near these rods, a dancer performing on the platform can, by her movements, produce her own accompanying music.

TOP MEDIATION MAN . . . Cyrus Stuart Ching has been named by President Truman to head the new independent federal mediation and conciliation service created by the new labor act.

Citizen Soldiers Resume Role As Guardian of Nation's Peace

National Guard Is Major Force In Security Team

WNU Features.

WASHINGTON. — As the second summer of peace settles on the United States, an army of more than 75,000 men has been moving into camps for training which will qualify them as guardians of that peace in the years to come. They are men of the new postwar National Guard.

For the first time since 1940, when the initial National Guard troops were called into federal service during World War II to protect the security of the country and the integrity of the American way of life, National Guard units are undergoing regular field training this summer. Encampments opened in the latter part of July and will continue until early September.

Individual and specialist training, including small arms familiarization firing, is being emphasized during the field training this summer for the 50,000 men attending the regular 15-day encampments and the 25,000 men taking the shorter, school-type training.

This is the first phase of the training program the army ground forces has patterned to the growth of the new National Guard, which is planned as an M-Day (Mobilization Day) force of 682,000 men, trained, equipped and immediately available for service in the event of any aggression by an enemy nation.

Maj. Gen Butler B Miltonberger of North Platte, Nebr., retiring chief of the National Guard bureau can look back to a growth that doubled the progress of reorganization following World War I. Completely demobilized upon separation from federal service at the end of World War II, the new National Guard has grown to a strength of more than 100,000 in the first year of its reorganization. Federal recognition has been granted more than 45 per cent of the ground and air units planned for the ultimate M-Day force, and their personnel is drawing federal pay for regular, weekly training.

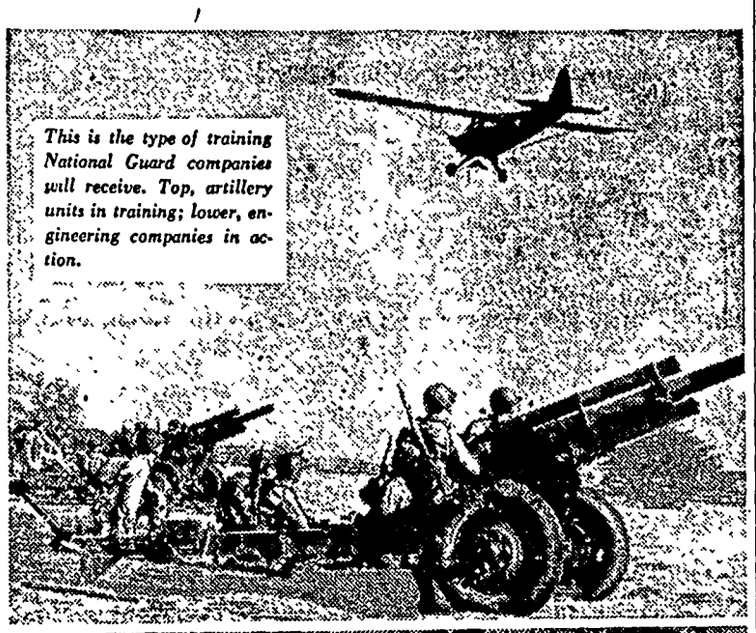
Triple Strength.

To Maj Gen. Kenneth F Cramer of Wethersfield, Conn., falls the task of supervising the continued growth of the National Guard to a strength almost three times that authorized before World War II. Assistant Commander of the 24th infantry division in the Pacific during World War II, General Cramer has been appointed new chief of the National Guard bureau by President Truman for a term of four years.

A veteran of both world wars who has won the Silver Star with three Oak Leaf Clusters and an officer in the Connecticut National Guard since 1931, General Cramer typifies the leadership in the new National Guard. The same high standards required of the enlisted men and officers in the peacetime regular army are met by the enlisted men and officers of the National Guard.

In addition, all officers above the grade of second lieutenant must have had federal service during World War II. This requirement is designed to insure the professional fitness of the men who will have increased responsibilities in commanding a tactical force, in contrast to the prewar guard, which was a reserve force requiring additional personnel and training before it was ready for service

The prewar National Guard sent 18 infantry divisions into action in every theater of operation. At Bataan, Bougainville, Morotai and Leyte; in Tunisia, Salerno, Anzio and Normandy some 300,000 men of the National Guard served with the distinction that has characterized their service in every conflict into which the United States has been forced.



This is the type of training National Guard companies will receive. Top, artillery units in training; lower, engineering companies in action.

In line with its increased responsibilities, the postwar National Guard will have 25 infantry divisions, two armored divisions and 21 regimental combat teams There also will be 123 anti-aircraft artillery battalions, 45 field artillery battalions, 68 coast artillery batteries, 20 tank battalions and 15 mechanized cavalry reconnaissance squadrons, together with the necessary supporting troops in the ground forces.

Expand Air Arm.

The greatly expanded air arm of the National Guard will consist of 84 tactical squadrons plus a radar and communications net of 12 aircraft control and warning groups. This contrasts with the 25 observation squadrons which were active before World War II.

No field training is planned for air units before the summer of 1948, but already 50 fighter squadrons, flying P-51 Mustangs and P-47 Thunderbolts, and 10 light bombardment squadrons, flying A-26 Invaders, have been granted federal recognition and are making regular trainng flights.

Jet-propelled P-80 Shooting Stars also will be flying National Guard insignia in 1948.

This modern air arm will be integrated into the nation's air defense along with other regular and civilian components of Army Air Forces under the commanding general of the air defense command and will be ready to stave off any initial thrust of an enemy approaching by air.

Planning for this modern tactical force, equipped with the same weapons as the regular army, began before World War II's end when the nation's military leaders laid the groundwork for a balanced military force consisting of a comparatively small regular army of 875,000, a National Guard strength of 682,000 and an organized reserve of 200,000 men in service type units.

The pattern for the military establishment of the United States was set back in colonial days when the early settlers organized themselves into companies to protect themselves and their property. The 182d infantry of the Massachusetts National Guard, oldest regiment in the continental United States, traces its history back to the "North Regiment" which was organized in 1636 from companies or "trainbands," then in existence.

Reliance upon themselves as citizen soldiers rather than upon a large professional army has been a tradition with Americans since that time.

Washington's View.

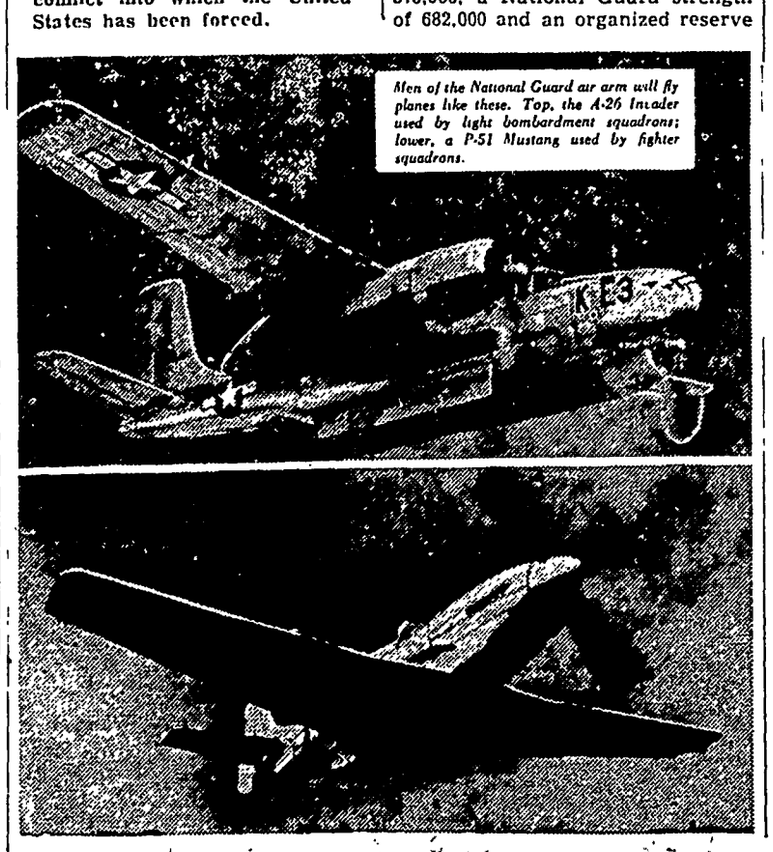
George Washington, who led an army of citizen soldiers to victory in the Revolutionary War, expressed it this way when asked by the first congress of the United States to give his views on what the military policy of the new nation should be:

"Every citizen who enjoys the protection of a free government owes not only a proportion of his property but even of his personal services to the defense of it."

At the conclusion of World War II George Marshall expressed it this way:

"Obviously, we cannot all put on uniforms and stand ready to repel invasion. . . . But all Americans can, in the next generations, prepare themselves to serve their country in maintaining the peace or against the tragic hour when peace is broken, if such a misfortune again overtakes us."

This is the tradition and the heritage of the new National Guard, which will take its place as an integral part of the nation's security team.



Men of the National Guard air arm will fly planes like these. Top, the A-26 Invader used by light bombardment squadrons; lower, a P-51 Mustang used by fighter squadrons.

Kansas Gardener Gives Seeds Free Throughout World

TOPEKA, KAS.—Although he is living on a modest pension, Phil E. Zimmerman is known in many parts of the world. His notoriety stems from the fact that he is identified simply as "the man who gives away flower seeds."

Known as the world's champion seed giver, the tall, gangling flower gardener makes certain that his flowers get around. He gives them away free.

Some of the Zimmerman flowers are growing in every continent in the world except Australia.

"I'm going to get them there pretty soon," he promises.

Almost everybody in Topeka knows Zimmerman. Others are just as likely to know him in China, Great Britain, Cuba or Africa. There are more than 1,000 gardens in Topeka bearing Zimmerman's flowers. He is credited with being instrumental in establishing several hundred new flower gardens every year.

KLEMME LOCAL NEWS

Mr. and Mrs. Mitchell Bock, Jimmy and Ida Mae, left last week on a trip to Colorado.

Mr. and Mrs. Herb Marshall and Irene attended the State Fair last week Wednesday.

Mr. and Mrs. Lyle Wilcox drove to Minneapolis Tuesday for a visit with his folks for a few days.

Echard Zeidler and Herman Gast have been building a new chimney at the Methodist Parsonage the past week.

Dick Dulmes went to Grundy Center Sunday for a visit with his grandmother, Mrs. Mary Mutch until Sunday.

Mr. and Mrs. C. A. Larsen, Eunice and Clarence Jr., left this morning for a vacation trip through Colorado.

Mr. and Mrs. Adolph Horsens and Mr. and Mrs. Kenneth Horsens of Cecil, Wisconsin, were dinner guests last Wedneday at the C. A Larsen home.

Mr. and Mrs. C. A. Larsen had as their dinner guests Sunday Mr. and Mrs. Marvin Isvik and children. The occasion was in honor of Marvin's birthday

Mrs. Ben Katter, Mrs. R. W. Elder and Mrs. C. A. Larsen drove to Des Moines Tuesday for a visit with their aunt, Mrs. Wm Leach, who is ill.

Mr and Mrs. R. A. Jorgenson, Sr, Mr and Mrs. Ray Jorgenson, Jr. and Judy; Beverly Christiance and Mrs. Mert Harson and baby daughter visited at the Albro home at Rowan Thursday evening.

KLEMME LOCAL NEWS

Mr. and Mrs. Robert Jahnke and baby have moved to Garrison, Iowa.

Mr. and Mrs. L. A. Jennings and son Ray attended the Fair in Mason City on Labor Day.

Mr. and Mrs. Earl Ruka of Des Moines are visiting with relatives at Goodell this week.

The Misses Mildred Busse, Vade Eikenberg and Margaret Veenstra spent the week end at the Henry Busse home.

About a week ago Harry Smith took a bad fall and injured his hip. He is a patient at the Mercy Hospital.

Vernon Pherson, of Ames, spent the week end and Labor Day with his family here at the Jim Thomas home.

Miss Dorothy Ellingson, of Des Moines, was a guest of Miss Beulah Goll over the week end and Labor Day.

Mr. and Mrs. Henry Boland returned home last week from a trip through Wisconsin and Minnesota.

Miss Ruth Stille, of Des Moines, visited over the week end and Labor Day at the parental Lester Stille home.

The Blumer-Goll annual reunion and picnic was held in the Klemme park Sunday with a large crowd present.

Wallace Pavey drove to Garrison Tuesday to get his mother, Mrs. E. M. Pavey who is ill and who will remain in Klemme for several weeks.

Mr. and Mrs. Edwin Josten and Marcelle and Mrs. Wesley Patterson visited the Iowa State Teachers College campus at Ceder Falls last week.

Miss Marjorie Meinders began teaching in Liberty No. 8 school on Wednesday, August 27th This is one of the first schools to open in August that we know of

Miss Eunice Larsen home Tuesday evening from Cedar Point, Wisconsin where she was employed at a summer resort along with other girls from the University of Iowa.

Mr. and Mrs. Ernest Helps and Mr. and Mrs. Duane Katter and Ivan left last week for an auto trip to the West. They took the northern route and expect to be gone for several weeks.

Mr. and Mrs Rufus Haefner, Doris and Donald of De Kalb, Illinois and Miss Smith of Sycamore, Ill., spent the week end visiting at the Wes Haefner home and with other relatives in the community.

Mrs. Ed. Jacobs and son Elwyn, and Miss Caroline Severson of Webster City, spent the past week visiting with Mrs. Jacobs brother Clarence and family at Squaw Lake, Minnesota.

Mrs. Naska Bock spent several days of the past week visiting with the Lyle Burr family at Ogden. The Burrs recently sold their furniture and undertaking business at Mitchellville and purchased a tourist camp and filling station at Ogden

Mrs. Dorance Day and son, Gary returned to Mason City Thursday evening after having spent the past few weeks at the John Day home during his illness and death. Mrs. Day accompanied them to Mason City for a visit of several days.

Rev. and Mrs. H. E. Harvey and LaNelle and Mrs. J. A. Chambers were at Algona Thursday where they attended a Methodist District meeting held at the shelter house in the State Park. Over 100 were in attendance from the Algona District.

Wilbur, Evelyn and Bruce Arnold and Leona Lau went to the State Fair on Wednesday morning. They returned home Thursday evening accompanied by Mr. and Mrs. Elmer Arnold who had been there since Sunday.

Gordon Baack, who has been home on a three months vacation, returned to the School for the Deaf at Council Bluffs on Tuesday. He was accompanied by his mother, Mrs. August Back and son Dorance and Mr. and Mrs. Howard Baack. Gordon liked school real well last year and made wonderful progress.

Mr. and Mrs. Emil Beier drove to Van Meter Sunday for a visit at the Rev. Wm. Suckow home. They returned home Monday evening.

Mr. and Mrs. Ray Jorgenson, Jr., and Judy spent Sunday afternoon and evening visiting at the Bob Liebendorfer home at Clear Lake.

Mr. and Mrs. Ed. Theiman and Mr. and Mrs. Marvin Barz returned home Friday from a trip to Denver, Estes and Rocky Mountain National park. They enjoyed their trip very much.

John Josten came over from Duncan the latter part of the week to remain in Klemme for some time. At present he is rooming at the Henry Keeper home.

Mr. and Mrs. R. A. Jorgenson visited with Mr. and Mrs. Ed. Buntenbach and daughter, Lorraine at their cottage at Clear Lake Sunday evening and enjoyed a speed boat ride on the lake

Mr. and Mrs. Wm. Lacey and children returned home from a week's trip visiting with Mrs. Lacey's brother at Milwaukee, Wisconsin, and with uncles, aunts and cousins at Racine and with friends at Boscobel, Wis.

Bruce Arnold returned home a week ago and has received his discharge from the army after serving overseas in Japan. Bruce, who takes pictures as a hobby, has over 400 colored scenes taken during his stay in the Pacific.

Mr. and Mrs. Dick Mohler of Dayton, Ohio; Burton Hanson and family of Wesley and Don Bacon and family of Leland, were dinner guests Sunday at the parental Art Wellemeyer home.

The Times received a card from Edna Thada, dated Aug. 29th saying "Glad we were privileged to see the Legion take over Times Square (New York City) last night. Surely a sight." Mrs. Thada and Mr. and Mrs. Ed. Thompson are on a trip East.

Lee Ridder took the following ladies to Clarion Tuesday afternoon where they visited with Mrs. Fred Musefelt who broke her arm some time ago. Mrs. Frances Ridder, Minnie Lau, Mrs. Wes Schuldt and Mrs. Mary Waterman.

Mr. and Mrs. Kenneth Voights and sons, David and Keith, returned home Sunday evening from a two weeks vacation trip to the Bad Lands, Black Hills and the Yellowstone National Park. They also visited relatives at Webster, Murdo and Oakaton, South Dakota, enroute.

Mr. and Mrs. Dick Mohler left Monday morning for Minneapolis and from there drove to Chicago and on to their home at Dayton, Ohio, after several days visit at the parental Art Wellemeyer home. Mr. Mohler built three houses this year, sold two and will move into the third one when they return to Dayton.

Rev. and Mrs. Calvin Grosshuesch drove to Marshalltown last Wednesday to see their son, Rev. Ruben Grosshuesch, wife and baby who were in the hospital following an auto accident. Rev. and Mrs. Grosshuesch were getting along quite well, although Mrs. Grosshuesch will be in a cast for several months on account of a back injury.

Dr. and Mrs. Arnold Tice and family of New Orleans and Dr. and Mrs. George Tice and family of Rochester were vacationing at the Dr. E. A. Larsen cottage at Clear Lake the past week. On Sunday evening the Arnold relatives met there for a 6 o'clock dinner. Those present were F. A. Arnold; Mr. and Mrs. Fred J. Arnold and Bobbie; Mr. and Mrs. Asa Arnold and Clarice Ann; Ella Schneider; Emilie Arnold; and the Elmer and Roy Arnold families, all of Klemme; and Dr. and Mrs. C. B. Tice and Mary Griffen of Mason City.

KLEMME LOCAL NEWS

Rev. and Mrs. H. E. Harvey called on Mrs. Ronald Gibbs and baby at the Garner nursing home Friday afternoon.

Mrs. Art Wellemeyer and Mr. and Mrs. Dick Mohler were supper guests Friday at the Burton Hanson home near Wesley.

Mr. and Mrs. Frank Ward and Mrs. Aug. Ridder and son, Walter of Leland attended the Co-operative picnic here Friday.

Martha and Charles Elder spent the past week visiting at the home of their grandparents, Mr. and Mrs. R. W. Elder.

Mr. and Mrs. Truels Steffens and family of Waterloo came Friday for a visit over Labor Day with Klemme relatives.

Mr. and Mrs. Will Mutch of Grundy Center visited over night Friday at the Dr. A. H. Dulmes home.

Miss Darlene Perkins of Chicago, came Saturday for a visit over Sunday and Labor Day with her parents, Mr. and Mrs. L. V. Perkins.

Mr. and Mrs. Dick Mohler of Toledo, Ohio, came Thursday for a visit over the week end and Labor Day at the parental Art Wellemeyer home.

There is a bad electrical "leak" somewhere around town and many people are complaining it interfers with their radio programs. Better check up on your appliances.

Leslie De Merritt has purchased a lot from George Schoenwetter south of the Schoenwetter residence. He will move his house from the north part of town to the new location as soon as the basement has been completed.

Mr. and Mrs. L. A. Jennings and Ray spent last week in Rochester, Minnesota where Mr. Jennings' mother, Mrs. Belle Jennings of Aberdeen, South Dakota underwent major surgery. Mrs. R. M. Van Winkle who has been visiting at the Jennings' home accompanied them to Rochester and remained for a visit with her daughter, Mrs. L. A. Schulze.

Garner Reformed Church

Rev. R. D. Stubbe

The Zion Ladies Aid will meet on Wednesday, September 3, at 2:00 P. M. in the church. Note the change of date.

The Peace W. M. S. will meet on Thursday at 2:00 P. M.

There will be no services in the Zion Church, however, all are invited to attend the services at Peace Church commencing at 10:00 A. M.

Student Chester Ploeger of Schaller, Iowa will deliver the message.

There will be no Sunday School.

Mr. and Mrs. Frank Sandry have moved a house in from the country to one of their lots south of their house in the same block. We understand the house will be for rent when completed.

La Vohn Schlawin Bride In Candle-light Ceremony

The Evangelical and Reformed Church was the setting for a pretty candle-light wedding ceremony Sunday evening at 7:30 o'clock when Miss La Vohn Schlawin, daughter of Mr. and Mrs. Werner Schlawin of Klemme, became the bride of Wayne Badker, son of Mr and Mrs. Roy Badker of Clear Lake, in a double ring ceremony performed by the Rev. Calvin Grosshuesch in front of a background of baskets of gladioli.

Nuptial music was played by Miss Iris Rosendahl, cousin of the bride, who also accompanied Miss Elizabeth Goll, also cousin of the bride, who sang "Because," and "The Lord's Prayer."

The Bride, who was given in marriage by her father, wore a gown of white satin trimmed in lace, with a long train and a fingertip veil. She carried a bouquet of red roses and her only jewelry was her grandmother's locket and chain.

Mrs. Lyle Dolder, of Gowrie, was Matron of Honor and a close friend of the Bride, wore a yellow crepe dress with matching accessories and carried a bouquet of gladioli and asters.

The Bridesmaids were Miss Betty Mann of Clear Lake, a close friend of the Bride, and Miss Theone Badker, sister of the groom, of Rochester, Minn. Miss Mann wore a dress of pink satin and chiffon while Miss Badker wore a dress of blue chiffon. Both carried matching bouquets of gladioli and asters.

The groom wore a pin-stripe suit and white boutonniere.

Mr. Virgil Ashland of Clear Lake was best man, while Ronald Ashland and Ward Allen, both of Clear Lake, were groomsmen. All wore white boutonnieres.

Ione Rosendahl, flower girl and cousin of the bride wore an identical little dress like the bride's complete to finger-tip veil. She carried a basket of rose petals which she strew in the path of the bride. Marvin Josten, also a cousin of the bride, and ring-bearer, wore a white suit and carried the rings on a satin pillow.

Mrs. Werner Schlawin wore a black dress with white and black accessories with a pink corsage Mrs. Roy Badker wore a brown dress with matching accessories and yellow corsage

Ushers were Aaron Wille of Klemme and Art Juhl of Clear Lake.

Miss Esther Alverson, of Mason City, had charge of the registration in the guest book.

Following the ceremony a reception was held in the dining room of the church where some three hundred guests were entertained at a light lunch. Decorations were in white and pastel shades and the Bride's table was centered with a tiered wedding cake, baked and decorated by Mrs. Alvin Goll. The cake, which was topped by a minature bride and groom was cut by the Misses Martha and Mary Davis, twin sisters and college friends of the bride, from Audubon, Iowa.

The waitresses and waiters, cousins of the bride, were Luella Rosendahl, Lillian Wille, Marjorie Hartbeck, Beulah Goll, Ardell Rosendahl, Dorance Rosendahl, Glen Rosendahl, and Calvin Josten.

The Bride is a graduate of the Klemme High School and the Iowa Beauty School of Des Des Moines, and is employed at Dodd's Beauty Shop at Clear Lake

The groom is a graduate of the Clear Lake High School and served two years in the U. S. Army. Since his discharge from the service he has been assisting his father operate his farm.

After a wedding trip to Minnesota the couple will be at home at their apartment in Clear Lake.

MR. AND MRS. WAYNE BADKER

BRIDGES WILL MODERNIZE HOUSE THEY PURCHASED

Mr. and Mrs. Glen Bridges have started work on modernizing the house which they recently purchased from the Ben Dallmeyer estate.

They plan to change both the interior and the exterior of the house and when completed will be entirely modern. Plans call for a modern kitchen with cabinets and bathroom will be built in one part of the house, and part of the west side of the house will be taken down.

Sewer and water connections have already been made and the electricity hooked up.

This house was built by Mrs. Bridges' grandparents. Later they built another house just north of the place which is now occupied by the Carl Finders family.

There is a good well at the Bridges house which they plan to keep in use as a sort of historical site.

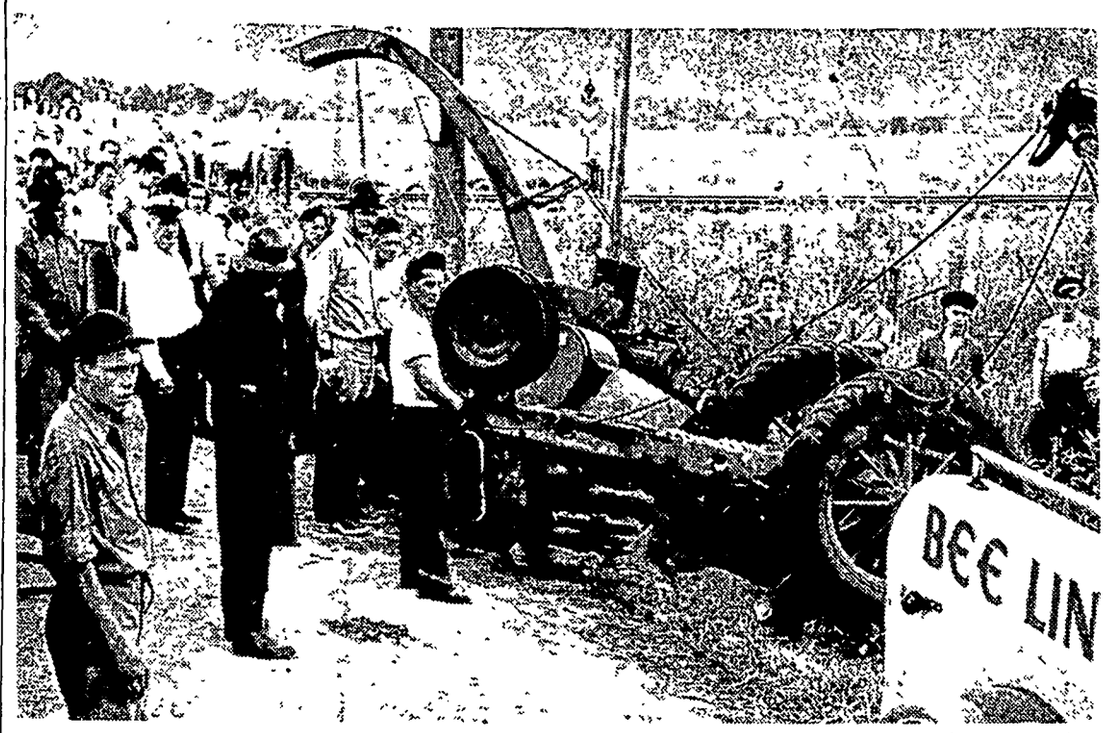
Later the barn on the premises will be converted into a garage.

TABB REUNION AND PICNIC HELD SUNDAY AT PARK

A Tabb family reunion and picnic was held Sunday at the Klemme Park, with the following present:

Art Tabb and family; Jim Tabb; Armond Tabb and family; Clarence Aitichens and family; Mrs. Oma Jacobs and Miss Eunice Tabb, all of Corwith and Miss Tabb's friend of Eagle Grove; Roy Arnold and family; Mr. and Mrs. John A. Chambers and Roy Jacobs and family, all of Klemme.

Klemme Farmer Injured When Tractor Turned Over



(Courtesy Globe-Gazette)

KLEMME FARMER INJURED WHEN TRACTOR UPSET IN MASON CITY

George B Smith, 31, Klemme, who is employed on the Mitchell Bock farm east of Klemme, was injured last Wednesday afternoon at 3:30 o'clock when he received second degree burns on his left arm, back and left hip, and bruises but no fractured bones as was at first reported, when the tractor he was driving upset in front of 1220 Kentucky S. E., Mason City Smith was pinned under the tractor which caught afire. Two women and a man in the neighborhood carried water and sand to put out the blaze and called the police and fire department. Smith was taken to a hospital for treatment and is expected home the middle of this week.

Mr. Smith had gone to the Avery farm east of Mason City to get a field cutter, which he had hitched to the tractor. His version of what happened is that he apparently had a dizzy spell and fainted as he did not recall crossing the tracks near the scene of the accident and was unconscious from 3:30 until after 5:00 p. m. He also said he had a dizzy spell on the way to the Avery farm but got off the tractor and sat down and soon felt alright again.

As Mr. Smith approached the railroad tracks he recalled that he stood up in order to see if a train was coming. That was the last he remembered until he came to in the hospital. However, he crossed the tracks and was still clutching the steering wheel when help arrived. He was pinned under the one fender of the tractor and could not be extricated until the fire department arrived when several men were able to lift the tractor off from his chest. A wrecker came later to pull the tractor over Quick work of the neighbors who shoveled sand and carried water saved Mr. Smith from more serious burns.

Pictured above is the scene of the accident. Milton Nagel, extreme left, and Mrs. Gerald Rafferty, 1226 S. Kentucky, and Esther Wolff, 1221 S Kentucky, carried water and put sand on the tractor until help arrived, and their efforts helped prevent more serious injuries to Smith, who formerly lived in Mason City

Edmund Josten Buys Lewis Radio Shop Business

WON BLUE RIBBONS ON AGED BOAR AND FUTURITY FALL SOW

Friedows Took Plenty Of Prizes On Their Fifteen Poland Chinas

Floyd Friedow & Sons, 7 miles west of Klemme, prominent breeders of Poland China hogs and Holstein cattle, took a large share of ribbons with 15 head of their herd Competition was stronger than it had been for several years as there were 30 exhibitors from Iowa and Illinois showing Poland China hogs, but the Friedows won a large share of the honors at the Iowa State fair

Win Two Blue Ribbons

The Friedow's won First Place Ratings in Aged Boar and Futurity Fall Sow. Second Place Ratings in Fall Sow, Senior Spring Gilt, Senior Spring Gilt Futurity. Young Herd and Get of Sire

More Winnings Listed

They won Third Place with Senior Spring Gilt and Senior Yearling Sow.

They also took the following honors: two 4th placings, three 5th placings, one sixth placing one 7th placing, three 8th placings and one 9th placing.

The Friedows are widely known as breeders of Modern Type Poland China Hogs They are planning another Poland China Hog Sale to be held Saturday, October 4th. Buyers from all over the state, as well as surrounding states attend the Friedow sales and purchase hogs for building up their own herds.

COWGIRL

While playing "cowgirl", 10 year old Marlene Brady ran under a clothesline, which knocked from her hand, and discharged, a 22 calibre rifle. The bullet entered her head just above the ear, emerging about three inches higher up. A partial paralysis has resulted but doctors expect her to recover.

WILL TAKE POSSESSION OF BUSINESS ABOUT OCT. 15

Klemme Farmer Buys Established Appliance Business Here

A deal was closed the first of the week whereby Ernest E Lewis sold his Radio shop and electric and appliance business to Edmund K. Josten, Klemme farmer.

Mr Josten purchased the stock and fixtures as well as the Shellane bottled gas service, but not the building Mr. Lewis retains his Surge milking machine business which he will continue to operate.

Mr.and Mrs. Lewis have been in Klemme for a number of years and have built up a very good business and have perhaps the most complete appliance store in the county.

Mr. Josten and family expect to move to town as soon as they can have a closing out farm sale Klemme welcomes Mr. and Mrs Josten into the business circle of our fine town.

Visitors At Tom Blank Home Sunday

The following were all visitors at the home of Mr. and Mrs. Tom Blank Sunday: Mr. and Mrs. Tokie Ahrenkeil and son of Hubbard; Fred Blank of West Bend; Mr. and Mrs. Ralph Blank of Iowa Falls; Mr. and Mrs. Freddie Blank of Applington, Minn., and Mr. and Mrs. Leonard Blank and son, Allan of Ames.

ANOTHER TOAD

For the second time in recent weeks, a horned toad has been found in Iowa. Henry Wiedner found the toad, promptly dubbed "Oscar" in his garden last week. Oscar's cousin turned up at Denison some time ago, which prompts some wonder as to how these natives of the western desert got into Iowa.

DALE SCHLEI, KLEMME TOOK TWO FIRST PRIZES AT HORSE SHOW

Dale Schlei made a good showing at the Webster County Fair and Horse Show when he brought home five ribbons last week

Dale took two Belgians and two American Creams to the fair and was awarded First Prize in the American Cream Division for Mare Colt, and another First Prize for Yearling Mare. In addition to that he also won a First Prize for produce of dam.

In The Belgian Division he took Second Prize for Aged Mare and Second Prize for Yearling Filly.

Last year Dale also showed at the same place and won Grand Championship Prize. Dale has some mighty fine horses on his farm southwest of Klemme.

EXTREMES! TALL SUN FLOWERS AND SMALL TOMATOES

Sunday evening Wm. Tiggeman left a small carton of tomatoes at the Times Office. Most people tell about the big ones they raise but Bill's varieties were small red and yellow tomatoes. They range in size from the size of a marble to about 1 inch in diameter! They look more like plums.

The other extreme came Monday when Walt Lau brought in a tall sun flower from his garden. It measured 14 ft. and 8 inches and as Walt had cut it above the ground, it would be about 16 ft. tall! Some sun flower. Walt wants to know if anyone has a taller one. Bill wants to know if anyone has smaller tomatoes, so take your choice!

Will Attend College

Bruce Arnold, who was recently discharged from the U. S. Army, will join the long list of some twenty Klemme young folks who are attending college this year. Bruce will attend the Iowa State College at Ames.

Melvin Coobs has been taking summer school at the University of Iowa, will return there for the fall and winter term. There are 22 Klemme boys and girls in college this year.

Klemme Fire Fighters Made Two Country Runs In 2 Days

BUZZARD - TABB

Tuesday morning at 11:00 o'clock on September 2nd at the Little Brown Church at Nashua, Iowa, Miss Walda Buzzard, daughter of Mr. and Mrs. Robert Buzzard of Erie, Pa. and Jack Tabb, son of Mr. and Mrs. James R. Tabb of Corwith, were united in marriage. The single ring ceremony was preformd by the pastor, Rev. Hanscom.

The bride wore a street length dress of tailored orchid flannel. Her corsage was of lemon yellow gladioli. Her accessories were black.

The bridesmaid, Miss Lora Kristjorson of Fargo, North Dakota, wore navy blue with white accessories.

Thor Ronenigen of Ames, was best man. He wore navy blue.

The nuptial music was played by the organist of the church. At the close of the wedding ceremony as the wedding part stood in a prayer circle with the pastor the organist sang and played very beautifully, "My Wedding Prayer."

The mother of the bride wore black and her corsage was of red roses.

Those attending the wedding were Jack's father, James Tabb of Corwith, her mother and Mr. and Mrs. John A. Chambers of Klemme.

The groom and best man were war buddies and saw service in Europe under General Bradley.

The bride graduated from High School at Indianapolis, Ind. and was in the service for three years. The bride and bridesmaid were in the service together.

The groom graduated from High School at Corwith in 1942, and had a year of college at Ames before he entered the Service, in which he served 4 years.

After their honeymoon in Northern Minnesota, they will return to Ames and live at 129 Welch Ave. Both will attend Iowa State college.

MARTIN BRINKMAN PUTTING UP NEW BUILDING FOR SHOP

Martin Brinkman, who has been located in the Etchen Building for several years as a blacksmith and welder, is having a new building erected on the lot across from the Northern Lumber Co. Implement Store. The new building will be 26 x 28 feet and Mr. Brinkman expects to move into his new quarters before the end of this month.

The building which he had occupied was sold to the school for a bus garage

Return Home From Trip Through Rocky Mountains

Mr. and Mrs. Mitchell Bock and son, Jimmy, and Mrs. Bock's brother, Harry Bessman of Dows, returned home Wednesday night from a visit with Mrs. Bock's cousin at Araphoe, Nebraska and a trip that took them through the Rocky Mountain National Park near Estes Park, Colorado and to the many places of interest at Colorado Springs.

Little Joyce Ann Bock stayed at the home of her aunt, Mrs. Ervin Meyer, at Alexander while Mr. and Mrs. Bock were on the trip.

Sept. 30, Hayfield
Oct. 2, Goodell

Sept. 20, 22, and 23 Sec. Tourney.

LARGE BARN ON CLARENCE SWALVE FARM DESTROYED BY FIRE

The Klemme Fire Department made a quick trip to the Clarence Swalve farm south of town on Highway 69 Monday night at about 9:30 o'clock, where the large barn was afire.

The Swalve family had gone to bed when they were awakened by the crackling of the flames and the entire roof of the barn was ablaze. The fire had gotten such a start that one fire company could not battle the flames and at the same time save the house close by and the Belmond and Garner fire departments also arrived to battle the fire which consumed the combination large barn, hog house and silo. Burning embers fell on the house which was kept soaked with water and embers flew into the air and were carried nearly a half mile.

The loft in the barn was filled with baled hay and it is thought that no live stock was lost in the blaze.

Called To Paul Veldhouse Farm Tuesday Morning

The Klemmee fire department was again called out Tuesday morning at 10:30 o'clock to the Paul Veldhouse farm 4½ miles south of town where a straw stack had caught fire and endangered the nearby farm buildings. This blaze was also intense and the Belmond and Goodell fire departments arrived to help control the blaze.

Tractors and plows were also used to plow strips around the two straw stacks and the farm yard to keep the flames confined to one area. The fire departments worked until noon before it was considered safe to leave.

The men on the Klemme Fire Department deserve some bouquets for their speed in getting to the above two fires and for doing a fine job of fire fighting.

INTO RIVER

When they failed to make a turn, Marvin Hammond and Wesley Merritt drove their car through a guard rail and plunged 20 feet into the Yellow River near Forest Mills recently. The car landed right side up in 3 feet of water.

HELLO, FOLKS!

Mr. and Mrs. William Neuberger are the parents of a baby girl born August 4th and tipping the scales at 8 lbs. and 3 oz. She has been named Margaret Ann.

Mr. and Mrs. Raymond Wille are the parents of a 7 lbs. baby girl born Monday morning, Sept. 8th at the Garner Nursing home. She has beeen named Margo Mae.

Mr. and Mrs. Ronald Gibbs are the proud parents of a baby girl born Wednesday, August 24th at the Garner Nursing home. The little Miss checked in at 7½ pounds. Her name is Ronna Ja Nelle. Her arrival makes Mr. and Mrs. Herman Gast grandparents for the sixth time, and Mr. and Mrs. Harry Gibbs grandparents for the second time.

Mr. and Mrs. Donald Mourlam are the proud parents of a 6 lbs. 14 oz. baby boy born to them on Thursday, September 4, 1947 at the Garner Nursing Home.

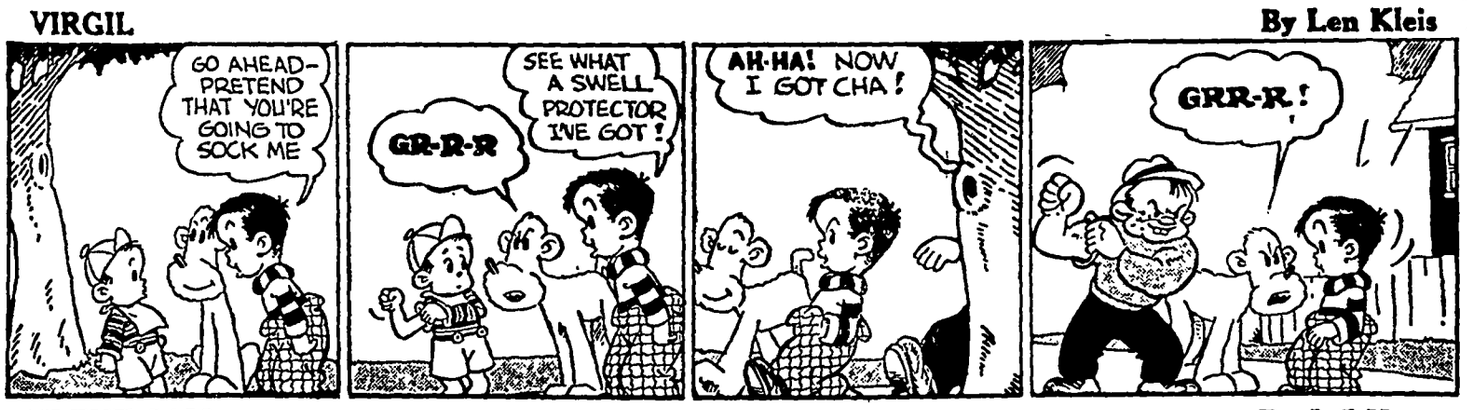
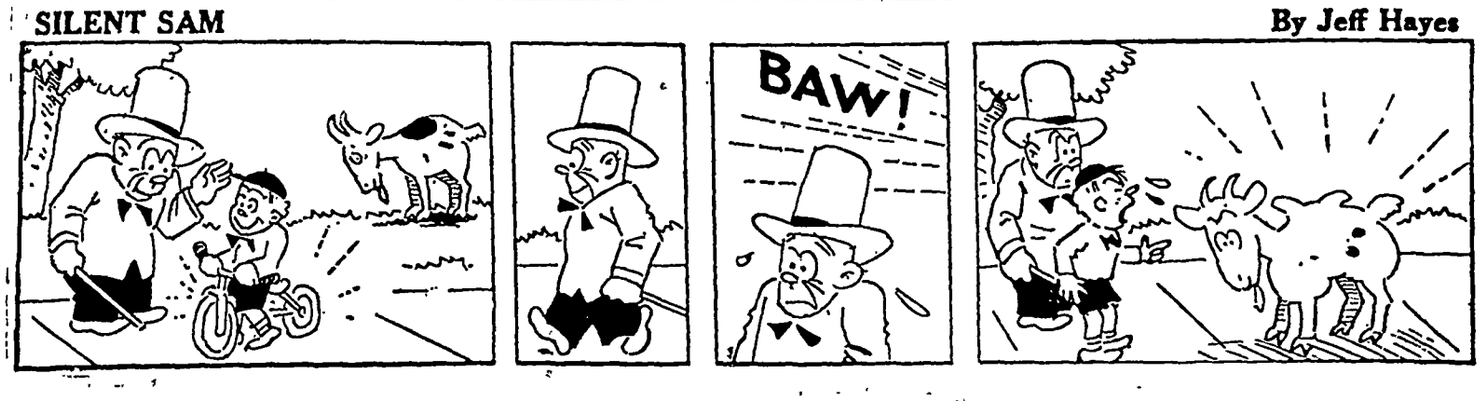
VIRGIL

By Len Kleis



SILENT SAM

By Jeff Hayes



The Once Over by H. I. Phillips

For Fewer and Worse Roads

Major Philip B. Fleming,
Administrator,
Federal Works Agency,
Washington, D. C.:

Dear Major—The papers inform me of approval of a super-dooper national highway system to embrace the whole United States. It will connect 42 state capitals and link the larger cities of the land by express highways, viaducts and tunnels, so that traffic lights and cross traffic may be eliminated and swifter travel made possible for Americans The system is to be built by the States with Federal aid and will cost three billion dollars.

—•—

Well, I am against it. Not on account of a little sum like three billion dollars It is years since any American could get disturbed over a sum as petty as that. I am against it because the movement to make it easier for Americans to go places has gone far enough. What this country needs is a movement to make them stay home more.

—•—

The truth is, Major, that the express highway has already put the American family on the bum, made a wreck of the home, increased national indigestion 82 per cent, doubled our eyestrain, overloaded our hospitals, made the hot dog the national symbol and completely blitzed the day when Americans stayed home for hours at a stretch without squawking.

—•—

They had poise, dependability and self-control when it was impossible to have breakfast in Parsipanny, N. J.; lunch in Saugerties, N. Y., and dinner in the Thousand Islands. They were a less jittery folk before ma, pa and all the kids could touch six different states in 24 hours They were a more easily satisfied race before the road builders began converting the highways and byways into so many chute the chutes.

—•—

Link 42 state capitals by superhighway my eye! Unlink a few of 'em, says I. Dig up some of the present boulevards, throw some roadblocks across the viaducts and let's have a five-year moratorium on tunnels. The human race is going in too many directions too fast and with too few excuses.

Yours,

Elmer.

• • •

What's become of the old-fashioned housewife who used to say "No, that's more than I want to pay?"

• • •

What Does Russia Want?

The following is an excerpt from a recent speech "What Does Russia Want?" delivered by Dr. Elmer Twitchell before the Befuddlement Club of America:

"What does Russia want? I ask you again, ladies and gentlemen. Nothing that has been suggested so far has met with anything but the veto, the horse laugh, and the dark look. We must be on the wrong track. It can't be mere territory and power. These are not things that stir the imagination and make men unreasonable in the pursuit. Can Stalin want an American-made scooter?

"Is it not possible that all the feeling against us is due to the fact not one of our wayside billboards portrays a Russian girl in the beer ads? Could it be that Russia has been tuning in on the American radio commercials and wants to hear fewer things spelled backwards? Has the Politboro been trying some of those regulators? Can all the bitterness be due to the fact Molotov bought one of those 'pre-shaped hats' and found it like all other hats?

—•—

"Ladies and gentlemen, we must find out what Russia is really after. We must determine what her genuine desire is It simply cannot be the trivial matters of influence and domain previously mentioned.

—•—

"Of course it is possible Stalin doesn't want Gromyko back in Russia and is afraid, if he is at all conciliatory, that he may get him.

—•—

"Can the Stalin attitude be traced to frustration? Does he want the hope of all mankind today, a garter with genuine elastic in it? Has he been unable to get a pipe cleaner that is any good? Has he been secretly sending in ideas in all those box top commercial jingle contests without winning a thing, even a sheriff's badge? Does he, like all men, yearn for a set of pajamas that really fit right?"

• • •

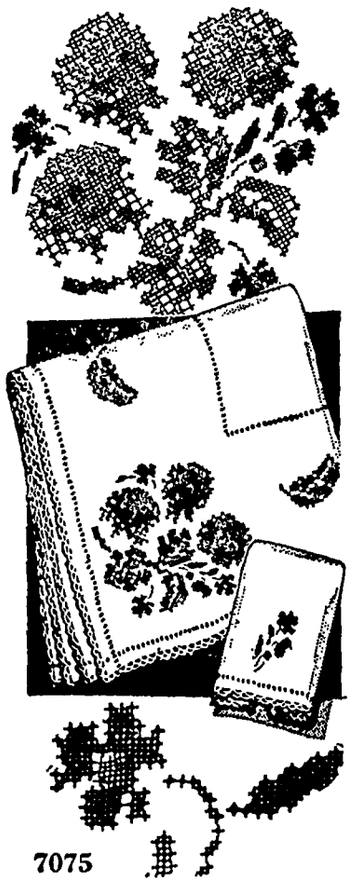
Jimmy Auditore, "the millionaire stevedore," says his life rivals that of Horatio Alger. His own story of his rise, from newsboy to magnate, controlling many New York docks, might be retitled "Snowwhite and the Seven WHARVES."

• • •

This estimate that it will take $24,000,000 to locate and get rid of all the sworn servants of Russia now on the Federal pay rolls seems a little high. It might be cheaper to point out the loyal Americans and just let the others go.

NEEDLECRAFT PATTERNS

Chrysanthemum Motif on Towe



7075

ART FOR HEART'S SAKE

By Rube Goldberg

...HERE, take your pineapple
...l juice," gently persuaded Kop-
...the male nurse.
..."Pope!" grunted Collis P. Ells-
...th.
..."But it's good for you, sir."
..."Nope!"
..."It's doctor's orders."
..."Nope!"
...Koppel heard the front door bell
...was glad to leave the room.
...met Doctor Caswell in the hall
...upstairs. "I can't do a thing
...with him," he told the doctor. "He
...won't take his pineapple juice. He
...won't want me to read to him. He
...hates the radio. He doesn't like any-
...thing!"

Doctor Caswell received the in-
...formation with his usual profession-
...al calm. He had done some con-
...structive thinking since his last vis-
...it. This was no ordinary case. The
...old gentleman was in pretty good
...health for a man of seventy-six. But
...he need to be kept from buying
...things. He had suffered his last
...heart attack after his disastrous
...purchase of that jerkwater railroad
...in Iowa. The one before that
...had come from the excitement engen-
...dered by the disintegration of the
...Blue Package chain of grocery
...stores which he had acquired at a
...ridiculous price All of his purchases
...in recent years had to be liquidated
...at great sacrifice both to his
...health and his pocketbook.

Collis P Ellsworth sat in a huge
...overstuffed upholstered chair by the win-
...dow. He looked around as Doctor
...Caswell inquired, "Well, how's the
...old man today?"

"Urgh!" grunted the figure in
...the chair in a tone like a rasping
...saw with all the implications of a
...curse.

"I hear you haven't been obeying
...orders," the doctor chided.

"Who's giving me orders at my
...time of life?"

The doctor drew up a chair and
...sat down close to the old man. "I've
...a proposition for you," he said
...quietly.

Ellsworth looked suspiciously
...through his spectacles. "What is it,
...medicine, more automobile
...more balderdash to keep me
...away from the office?"

"How'd you like to take up art?"
...The doctor had his stethoscope
...on case the abruptness of the
...question proved too much for the
...old man's heart.

The old gentleman's answer
...was a vigorous "Rot!"

"I don't mean seriously," said the
...doctor, relieved that disaster had
...been averted. "Just fool around
...with chalk and crayons. It'll be
...fun!"

"All right." The doctor stood up.
..."I only suggested it, that's all."

Collis P sucked his gums and his
...bewhiskered chin bobbed up and down.
"Where'd you get this crazy idea, anyway?"

"Well, it's only a suggestion—"

"But, Caswell, how do I start playing with the chalk—that is, if I'm foolish enough to start?"

"I've thought of that, too. I can get a student from one of the art schools to come here once a week to show you. If you don't like it after a little while you can throw him out."

Doctor Caswell went to his friend, Judson Livingston, head of the Atlantic Art Institute, and explained the situation. Livingston had just the young man — Frank Swain, eighteen years old and a promising student. He needed the money. Ran an elevator at night to pay his tuition. How much would he get? Five dollars a visit. Fine.

Next afternoon young Swain was shown into the big living room. Collis P. Ellsworth looked at him appraisingly.

"Sir, I'm not an artist yet," answered the young man.

"Umph!"

Swain arranged some paper and crayons on the table. "Let's try and draw that vase over there on the mantlepiece," he suggested.

"What for? It's only a bowl with some blue stains on it. Or are they green?"

"Try it, Mister Ellsworth, please."

"Umph!" The old man took a piece of crayon in a shaky hand and made a scrawl. He made another scrawl and connected the two with a couple of crude lines. "There it is, young man," he snapped with a grunt of satisfaction. "Such foolishness. Poppycock!"

Frank Swain was patient. He needed the five dollars. "If you want to draw you will have to look at what you're drawing, sir."

Old Ellsworth squinted and looked. "By gum, it's kinda pretty. I never noticed it before."

Koppel came in with the pronouncement that his patient had done enough for the first lesson.

"Oh, it's pineapple juice again," Ellsworth mumbled. Swain left.

WHEN the art student came the following week there was a drawing on the table that had a slight resemblance to the vase. The wrinkles deepened at the corners of the old gentleman's eyes as he asked elfishly, "Well, what do you think of it?"

"Not bad, sir," answered Swain. "But it's a bit lopsided."

"By gum," Old Ellsworth chuckled. "I see. The halves don't match." He added a few lines with a palsied hand and colored the open spaces blue like a child playing with a picture book. Then he looked toward the door. "Listen, young man," he whispered, "I want to ask you something before old pineapple juice comes back."

"Yes, sir," responded Swain respectfully.

"I was thinking—could you spare the time to come twice a week or perhaps three times?"

"Sure, Mister Ellsworth."

"Good. Let's make it Monday, Wednesday and Friday. Four o'clock."

Koppel entered and was flabbergasted when his patient took his pineapple juice without a whimper.

As the weeks went by Swain's visits grew more frequent. He brought the old man a box of water colors and some tubes of oils.

Two students giggled at the raucus splash of color on the wall, and Swain fled.

When Doctor Caswell called Ellsworth would talk about the graceful lines of the andirons. He would dwell on the rich variety of color in a bowl of fruit. He proudly displayed the variegated smears of paint on his heavy silk dressing gown. He would not allow his valet to send it to the cleaner's. He wanted to show the doctor how hard he'd been working.

The treatment was working perfectly No more trips downtown to become involved in purchases of enterprises of doubtful solvency.

The doctor thought it safe to allow Ellsworth to visit the Metropolitan, the Museum of Modern Art and other exhibits with Swain. An entirely new world opened up its charming mysteries. The old man displayed an insatiable curiosity about the galleries and the painters who exhibited in them. How were the galleries run? Who selected the canvasses for the exhibitions? An idea was forming in his brain.

When the late spring sun began to cloak the fields and gardens with color Ellsworth executed an awful smudge which he called "Trees Dressed in White." Then he made a startling announcement. He was going to exhibit it in the Summer show at the Lathrop Gallery!

For the summer show at Lathrop Gallery was the biggest art exhibit of the year — in quality if not in size.

"If the papers get hold of this, Mister Ellsworth will become a laughing-stock. We've got to stop him," groaned Koppel.

"No," admonished the doctor. "We can't interfere with him now and take a chance of spoiling all the good work that we've accomplished."

To the utter astonishment of all three — and especially Swain — "Trees Dressed in White" was accepted for the Lathrop show. Not only was Mister Ellsworth crazy, thought Kppel, but the Lathrop Gallery was crazy, too.

Fortunately, the painting was hung in an inconspicuous place where it could not excite any noticeable comment. Young Swain sneaked into the gallery one afternoon and blushed to the top of his ears when he saw "Trees Dressed in White," a loud, raucous splash on a wall otherwise drenched in beauty and harmony. As two giggling students stopped before the strange anomaly Swain fled in terror. He could not bear to hear what they had to say.

Two days before the close of the exhibition a special messenger brought a long official-looking envelope to Mister Ellsworth while Swain, Koppel and the doctor were in the room. "Read it to me," requested the old man. "My eyes are tired from painting."

The doctor read:

It gives the Lathrop Gallery pleasure to announce that the First Landscape Prize of $1,000 has been awarded to Collis P. Ellsworth for his painting "Trees Dressed in White."

Swain and Koppel uttered a series of inarticulate gurgles. Doctor Caswell, exercising his professional self-control with a supreme effort, said, "Congratulations, Mister Ellsworth. Fine, fine. . . . See, see. . . . Of course, I didn't expect such great news. But, but—well, now, you'll have to admit that art is much more satisfying than business."

"Art nothing," snapped the old man. "I bought the Lathrop Gallery last month."

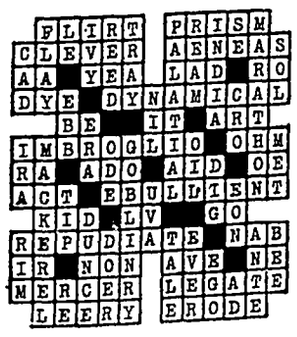
Answer to Puzzle Number 29



Series H-47

Sportlight

by GRANTLAND RICE

TWENTY years ago, Babe Ruth turned in his 60th home run in a single season.

Here is a mark that thousands of ball players have been swinging at ever since, but only three have seriously challenged. These were Hank Greenberg of the Tigers, Jimmy Foxx of the Athletics, with 58 each, and Hack Wilson of the Cubs with 56.

Babe Ruth

What the three don't know is that they were halted by the jinx plastered on their robust frames by several million kids, to whom that number SIXTY has been a shining star in baseball's sky because the Babe put it there.

Just when it began to look as if both Greenberg and Foxx were certain to beat it, star dust, thrown mysteriously by all these kids, got in their batting eyes and they were forced to halt abruptly.

Now Big John Mize of the Giants is the latest Ruth challenger for a record season. Big John of the moon face and the mighty swing will be facing the same jinx. Many thousands of kids would like to see the mauling Mize reach 59. But not 60 Especially not 61.

This mysterious kids jinx won't begin to affect Jolting John until he passes the 50, or perhaps the 55 point. Then he will feel mysterious forces at work that will turn the baseball into the size of a golf ball. He will find star dust in his batting eye, just as Greenberg and Foxx did. Big John won't quite understand what has happened, but some ten million kids will.

Untouchable Record

Those 60 Babe Ruth home runs, delivered twenty years ago as part of a total cargo of 714—which is beyond anybody's reach unless they use rubber balls and move the fences in back of the infield—is now a classic number in American sport. It belongs to the greatest power hitter of all time, who was only halted by the 100 to 170 bases on balls handed him each year.

The Babe picked out his stance from Joe Jackson. This position is known in golf as the closed stance which, in Babe's left-handed batting posture, meant that his right foot was well in advance of his left. However, Babe's stance was not as pronounced as Shoeless Joe's was, and his feet were planted closer together to give his tremendous body a better chance to work with his hands and arms.

Added to his power was almost perfect coordination between mind and muscle, including amazing reflexes. If Ruth had started out as an outfielder in 1914 or 1915, where he was a winning pitcher, his home-run mark today would have been around 1,000.

Mize and the Modern Ball

No one can question the fact that the ball Babe swung at was far livelier than the pellet Home Run Baker, Ty Cobb, Joe Jackson, Tris Speaker and other hitters had to face before the first war. On the other hand, taking nothing from Johnny Mize, the 1947 National League ball looks to be the liveliest ammunition yet thrown at swinging bats.

In certain places the fences have also been moved in to decrease the home-run range.

But this isn't Johnny Mize's fault. He is swinging at the ball that is O.K.'d by the National League. He has always been a great power hitter.

The war came along just when Big John was at his prime, and after his injury last season, few thought he would ever be the same old walloper.

Lots of Power Hitters

It isn't so much that Mize is now up in the home run 30s. It is more that so many others are close on his trail. As I recall the far off details, Home Run Baker, another stout swinger, led both leagues around 1911 with either 9 or 11 home runs.

I can't recall a ball club that had such power hitters as Mize, Marshall, Cooper and Thomson at this stage of the race—not even Ruth, Gehrig and Meusel. The Giant are now after the old Yankee mark and are quite likely to break it.

Today any power hitter who hasn't collected 20 home runs, in the National League especially, is on the puny side. Ted Williams, rated the hardest modern hitter, is close to the Giant trio. Ted has a good chance to lead the American League, but only an epidemic of home runs down the stretch can put him in front of Mize.

Club owners have decided that the home run is something the crowd wants, and apparently the 1947 attendance is backing up their judgment. Any number of teams will pass the million mark this season, including Pittsburgh, which has been just above the cellar line. The baseball fan is a rabid animal, and if he thought too many home runs were being hit, he would lose little time in staying away.

ASK ME ANOTHER?

A General Quiz

The Questions

1. Who said: "When there is an income tax, the just man will pay more and the unjust less on the same amount of income"?
2. Was a battle of our Civil war ever fought in Europe?
3. Where is the Valley of Ten Thousand Smokes?
4. How did Julius Caesar meet his death?
5. What is the number of degrees around the equator?
6. What is the largest inland sea in the world?
7. Which is the most populous of the South American countries?
8. Who was it said: "These are times that try men's souls"?

The Answers

1. Plato.
2. Yes. The Union ship Kearsage sank the Confederate cruiser Alabama in European waters off Cherbourg, France.
3. Alaska
4. He was assassinated.
5. 360 degrees.
6. The Caspian, which is 760 miles long and varies between 100 and 280 miles wide. Its total area is 170,000 square miles.
7. Brazil.
8. Thomas Paine.

Route of Cyclone

A cyclone may travel around the world. One cyclone which originated in the state of Montana on February 23, 1925, traveled around the world and finally broke up in the Gulf of St. Lawrence river about a month later.

Big Cottonwood Tree Near Bell's Produce Being Taken Down

Perhaps one of the largest trees in town, a large cottonwood tree on the lot north of the Bell Produce Store is being taken down by Henry Runge, veteran tree remover of Klemme. The lot on which the tree stands has been purchased by Henry Suckow who will move in a house from the country to put on the lot.

The old tree is sort of combination of two trees, and later a third branch sprang up from the ground. The whole thing measures 18 feet around the base, and it is 8 feet through the oblong section of the base.

DON'T LEAVE ONIONS IN GARDEN AFTER MATURING

Don't leave onions in your garden after the have matured

If you do, they won't store well, is the warning of Larry Grove, State College horticulturist.

In order to cure onions, spread them out in a warm well-ventilated room, or hang them up in mesh sacks with plenty of air circulation. Another good method is to tie the tops together, and hang them in bunches from a nail in the garage.

Blue Cross Enrollment Sign Up, Open Oct. 1 Through Oct. 15

The Hancock County Health Improvement Association Board decided at it's board meeting September 3rd to conduct a new enrollment sign up in the Blue Cross hospital plan and the Iowa Medical Service plan starting on October 1 and ending the evening of October 15 according to V. A. Cook, President.

The plan is to have a sign up booth in each town in Hancock County These booths will be open on certain days, the schedule to be set up soon. You may sign up any of the 15 days at the County Farm Bureau office in Garner

Questions will be answered by those in charge of the booths. Anyone interested may sign up at the booth or at the Farm Bureau office. Write or call for information.

This will be the only chance to enroll in these health plans for at least a year.

The effective date will be Nov. 1, 1947 and will be until April 1, (5 months). Then the payments will be for 6 months periods. Watch for advertisment or news stories on where the booths will be located in your town and also the days they will be open

Work Circle

The Work Circle of the Klemme Methodist Church will meet September 18 with Mrs. A G Koerner and Mrs. Henry Helps as hostesses.

If you dont want it. sell it with a Times want ad.

6 HANCOCK RESIDENTS TAKE ASSESSOR TESTS

Six applicants wrote the examination for the position of chief deputy assessor in Hancock County, Wednesday. Ruth Hughes, county clerk, served as monitor and represented the state tax commission by whom the examination was prepared. Those writing were: B. H. Olson, Britt township assessor; C. A. Frisbie, Garner corporation assessor; Frank P. Smith of Britt; Deputy County Auditors Myrtle White and Maynard Schoneman and County Auditor Fred C. Missal.

Three applicants failed to show up for the exam. They were: H. D. Schroeder, Kanawha assessor; Walter Woiwod, Concord township assessor, and Marvin Woiwood, Garner.

HUMBOLT SITE OF POWER PLANT

New Building To Cost Estimated $7,000,000

The merging of 2 REA co-operatives will bring to Humbolt, Iowa a new 30,000 kilowatt plant to cost $7,000,000. The building will be constructed next year and will serve 30,000 farms in 20 counties.

The new co-operative will be known as the Cornbelt Power co-operative. The 2 companies merged are the REA Central Electric Federated co-operative at Pocahontas and the Federated Co-operative Power Association at Hampton. The 2 plants serve Sac, Calhoun, Buena Vista, Pocahontas, Humbolt, Butler, Franklin, Grundy, Hancock, Hardin and Wright counties.

The 9 power plants in the co-operative will be tied together with high voltage transmission lines.

Read it first in The Times.

KLEMME SCHOOL ENROLLMENT HITS ALL TIME HIGH

The total enrollment of pupils in the Klemme Public Schools this year has hit a new mark of 235.

There are 145 pupils enrolled in the Grade School and 90 students are enrolled in High School.

Following is a list of the enrollment in both departments

Kindergaten

Roxanne Back, Sharon Kay Blau, Daryl Brager, William DeMerritt, William Heginger, Jo-Ann Helps, Lynn Huenemann, Jo Anne Jacobs, Maurine Johnson, Gordon Lassahn, Darryl Nuehring, Eldon Nuehring, Paige Patterson, Roger Sobek, David Voigts, and Francis Williams.

Rural Youth Held Meeting At Britt

"What the Farm Bureau Means to Rural Young People" was the topic of an interesting talk given by Roger Fleming, secretary of the Iowa Farm Bureau, to the Hancock County Rural Youth at their regular monthly meeting held at the Central States Building at Britt on Monday evening, September 8th.

Mr. Fleming outlined in his talk the organization of the Farm Bureau, the purposes it serves, its progress since organization, and the service it gives.

Plans were made by the group for a talk meet, an annual event to be held at the October meeting. The boy and girl who are winners in the local group will represent the county at the state talk meet to be held in connection wih the Farm Bureau Convention later this year.

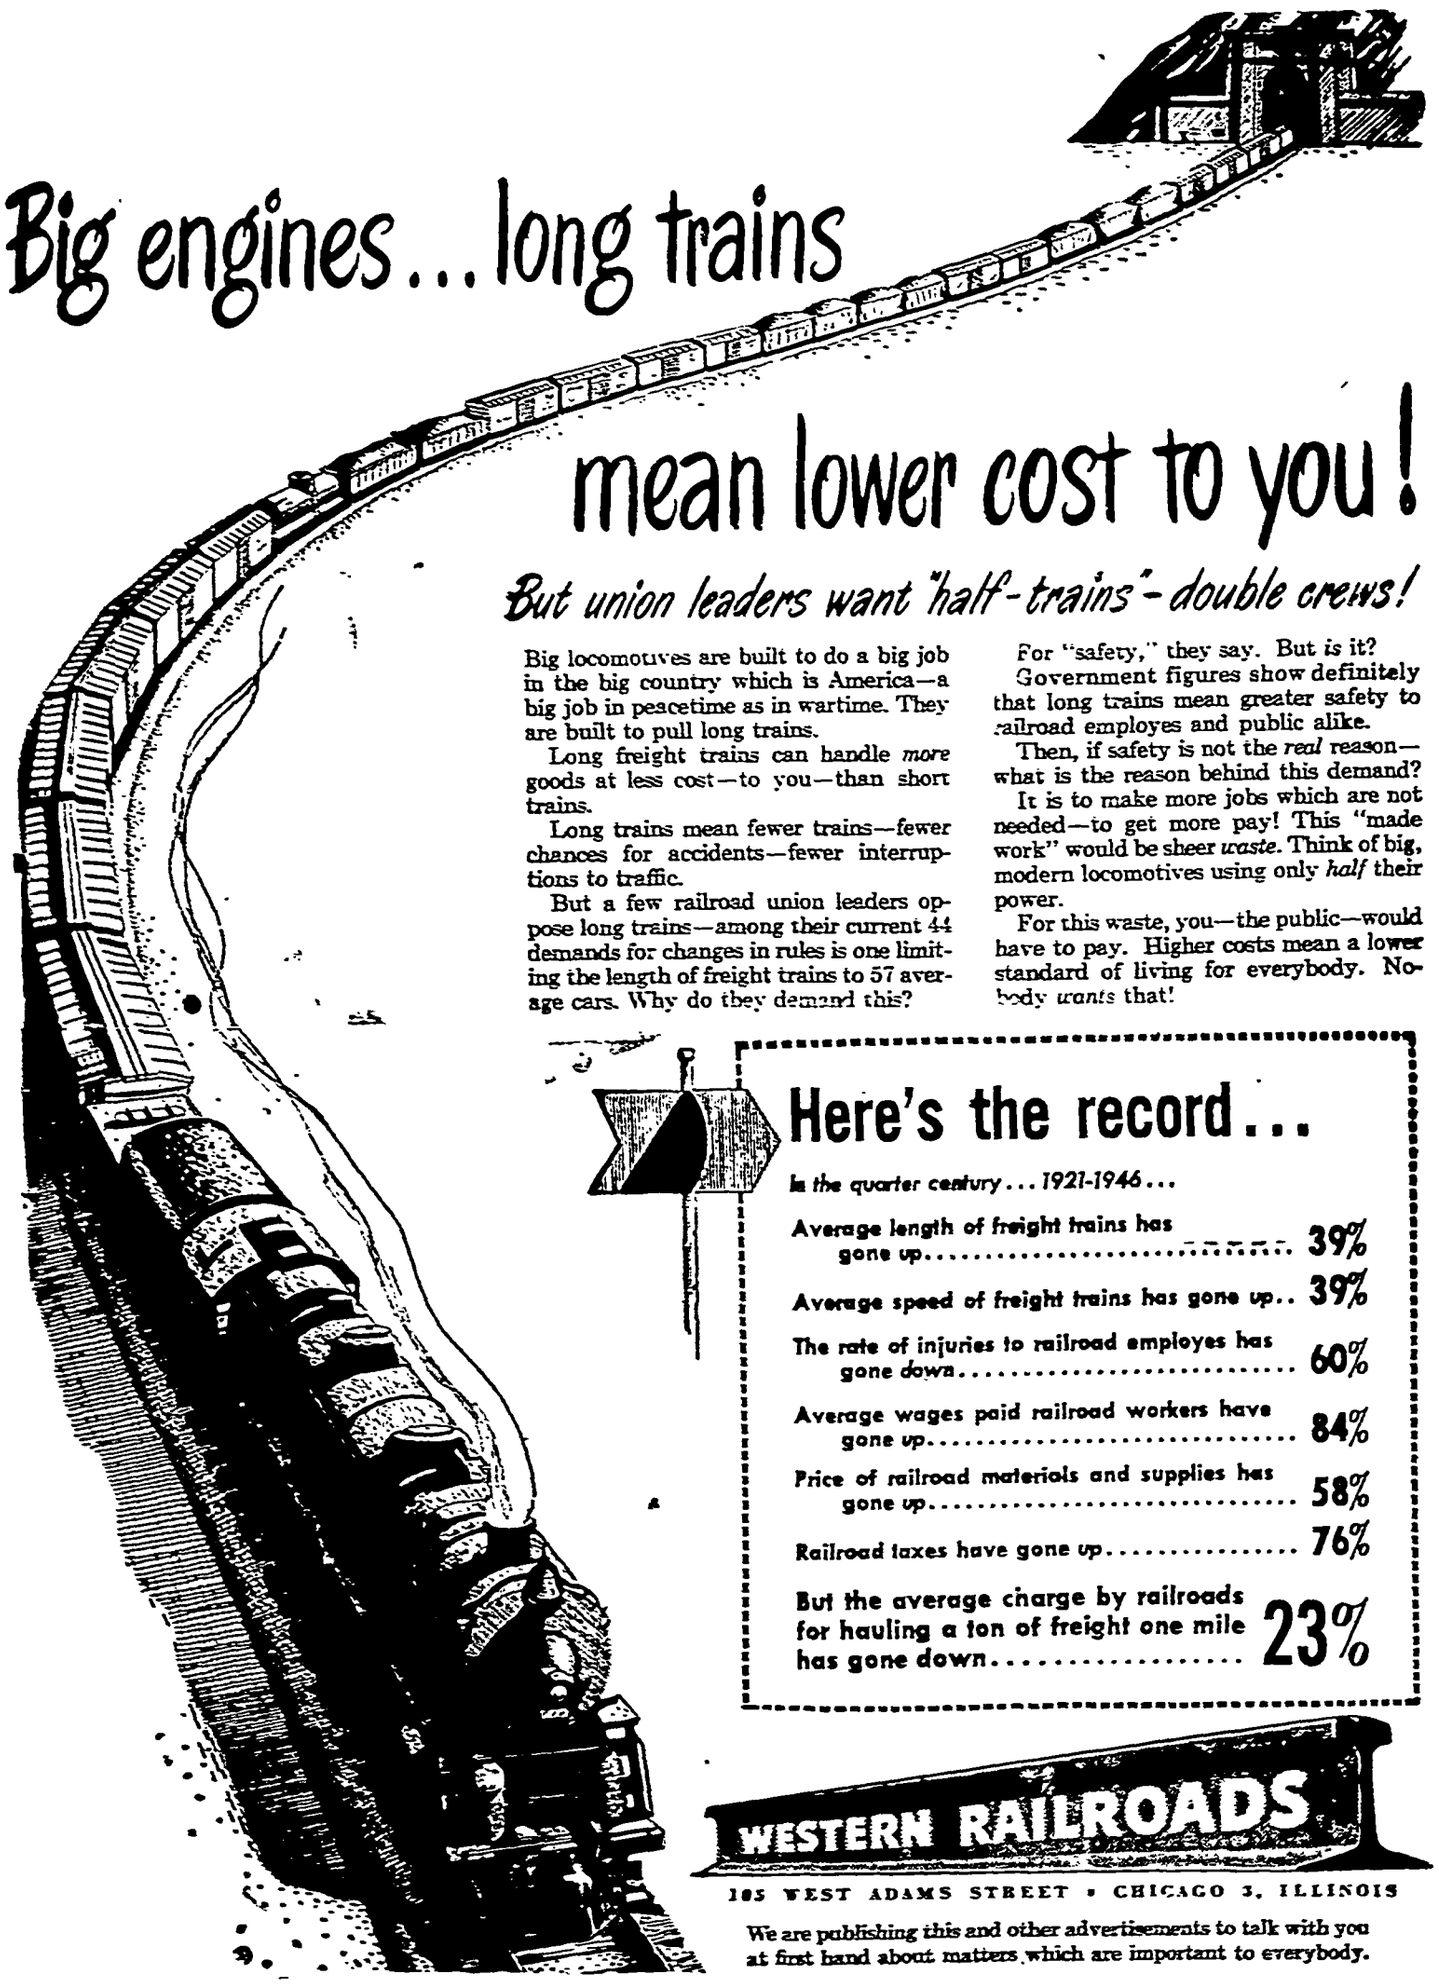
Northern Lumber Co.

Lloyd Sherwood, Mgr. Klemme, Iowa.



Big engines... long trains mean lower cost to you!

But union leaders want "half-trains"-double crews!

Big locomotives are built to do a big job in the big country which is America—a big job in peacetime as in wartime. They are built to pull long trains.

Long freight trains can handle *more* goods at less cost—to you—than short trains.

Long trains mean fewer trains—fewer chances for accidents—fewer interruptions to traffic.

But a few railroad union leaders oppose long trains—among their current 44 demands for changes in rules is one limiting the length of freight trains to 57 average cars. Why do they demand this?

For "safety," they say. But *is* it?

Government figures show definitely that long trains mean greater safety to railroad employes and public alike.

Then, if safety is not the *real* reason—what is the reason behind this demand?

It is to make more jobs which are not needed—to get more pay! This "made work" would be sheer *waste*. Think of big, modern locomotives using only *half* their power.

For this waste, you—the public—would have to pay. Higher costs mean a lower standard of living for everybody. Nobody *wants* that!

Here's the record...

In the quarter century... 1921-1946...

Average length of freight trains has gone up	39%
Average speed of freight trains has gone up	39%
The rate of injuries to railroad employes has gone down	60%
Average wages paid railroad workers have gone up	84%
Price of railroad materials and supplies has gone up	58%
Railroad taxes have gone up	76%
But the average charge by railroads for hauling a ton of freight one mile has gone down	23%

WESTERN RAILROADS

105 WEST ADAMS STREET • CHICAGO 3, ILLINOIS

We are publishing this and other advertisements to talk with you at first hand about matters which are important to everybody.

New Merchandise

•

From time to time we receive merchand
in the "hard to get" class. Come in often
we may have just received the item you h
been waiting for. We now have:

A few Oil Burning Circulating Ro Heaters
Double Tub Dexter Washer
Speed Queen Washer
Ironing Boards
Electric Irons
Electric Clocks
Electric Lanterns
Flash Lights
Foot Balls, Basket Balls
Army Log Chains, 7-16, 16 ft. long Heavy Duty
Some Crescent Wrenches
6 inch Pliers

Quality and Service Since 1919 Klemme,

NEW CORN DRIER READY THIS FALL

Will Help In Processing Soft Corn Crop Expected In Iowa This Year

New corn driers, now in the process of manufacture, will help in processing Iowa's anticipated soft corn this fall.

They will be better than most others previously manufactured—but there probably won't be nearly enough of them to supply the demand.

W. V. Hukill, U. S. Department of Agriculture agricultural engineer, reported this week at Iowa State College on the findings of conferences held recently in Chicago and at Perdue University to study the soft corn problem.

He said that artifical drying has advanced to the stage where it can be done in practically any type of corn crib, providing a good drier is available. Research of nearly 10 years has provided engineers with a good deal of information on artificial drying. They don't know all the answers, but they can save soft corn from spoiling. (And they don't need any special type of crib in order to do it.)

Few Other Requirements

In addition to the drier, heavy paper or canvas to seal parts of the crib, and a small amount of lumber are about all that are required.

Because large numbers of driers are not likely to be on the market soon, it has been suggested that farmers share their use as much as possible.

Some farmers probably will be able to build homemade driers. Such driers have sometimes proved highly satisfactory. Engineers caution, however, that there are many pitfalls here. General recommendations are available through the Extension Service, Iowa State College, for those who want to tackle the job.

Whether a farmer builds his own rig or buys a commercial type drier, now is the time to start planning. Line up a dealer who will furnish you with a drier, or scout around for the material with which to do your own building, the engineers say Line up a supply of fuel, too, they warn.

Safety In Operation

Engineers also stress safety in operation. All driers constitute an additional fire hazard during the drying process. They suggest that any farmer who does artificial drying consult his fire insurance company. Unless this is done, insurance may be voided in case of a fire resulting from drying operations.

Some farmers may not be certain this fall that they want to use artifical drying methods. The engineers point that it will still be possible to do drying next spring—providing, again, that a drier can be obtained.

The Extension Service at Iowa State College warns that anyone planning to purchase a drier should first check to be sure that it meets USDA and state agricultural college specifications.

Do Not Milk Cow When Time For Rest Period

To dry off a cow, completely stop milking her when it is time for her rest period regardless of the amount of milk being produced.

Don Voelker, extension dairyman at Iowa State College, advises against milking once a day, lengthening the intervals between milkings or incomplete milking, because this tends to make the milk abnormal.

When milk is left in the udder for more than the normal length of time, its composition changes and takes on characteristics of colostrum milk of newly-freshened cows.

After the last complete milking, carefully wash and dry the teats. Then dip them in collodion to seal the ends. This will prevent the enterance of bacterial organisms through the teat cord.

It has been shown that even cows with a large, persistent milk flow can be dried off abruptly. A maximum pressure is soon developed; milk secretion ceases and resorption starts.

Carefully controlled experiments at olwa State College have shown that drying off cows by this method has no detrimental effect on either milk produced or bacterial count of the milk in the next lactation.

MUST SAVE MANY OF PIGS IN FALL

Big Investment In Brood Sows And High-Priced Feeds Make This Vital

A big initial investment in brood sows, topped by a lot of high-priced feed, makes saving every pig possible mighty important to hog raisers this fall.

K. W. Stouder, Iowa State College extension veterinarian says sows must be fed properly during the gestation period, especially the last 30 days, if strong pigs are to be farrowed.

Pregnant sows need plenty of exercise. Running in the sun on good, legume pastures as long as they stay greeen is good exercise, and the green grass provides vitamins essential for developing a strong litter. It will also put vitamins into the sow's milk for nourishment of the litter later on.

Vaccinated Hogs

Pregnant sows should be kept out of lots where vaccinated hogs have been or where there is any chance of their coming into contact with cholera virus. There is some evidence that such exposure contributes to the early loss of some litters from one form of so-called "baby pig disease."

See that stalls have been cleaned, disinfected and sprayed with DDT to control flies. Scald the floors to kill worm eggs. Before farrowing time is best for doing these jobs.

Wash all the dirt off sows and move them into their quarters in plenty of time for them to become accustomed to the new surroundings, thus reducing the chance of nervous restless sow killing some of her litter.

Prevent Navel Ill

When sows do farrow, Stouder says to catch each pig and paint the navel with iodine to prevent navel ill and swollen joints. Look into the mouth and cut off any sharp tusk teeth to prevent fighting and sore mouth later on.

Examine the sow's udder and watch the pigs closely to make sure that milk is being let down. If one is not producing milk call a veterinarian. By injecting a little extract of the pituitary gland he can probably bring her to full milk flow.

Having guard rails and using short straw for bedding will keep pigs from getting crushed. Try to keep the stall dry at all times. A stall into which the sun will shine helps here, and sunlight is a powerful dininfectant for the most germs.

WHICH FARM LEASE?

When a grown son is living at home and farming with his parents, getting a part or all of his income from farm returns, it is well to have a written agreement.

If the son, or daughter, is married and two families are dependent on the farm for their living, a written farm business agreement is especially necessary.

In either case the prime requirement is that the farm business be large enough to support two families.

Other rules which, if properly applied, will help to make the father and son farming agreement profitable and satisfactory include the following:

Income should be divided in proportion to contributions made by each.

A good set of farm records is needed. They should be kept up to date.

Separate living quarters are necessary. If two houses are not available, one floor of the farm home can be made into an apartment.

The agreement needs to be flexible and revised promptly when necessary.

There should not be too heavy a load of debt.

When the son is getting started, a monthly wage may be advisable. A percentage of the net income can be provided in addition, if the farm makes enough money to pay something above his wages.

The son and his wife must really want to farm, and the two families should share the farm income in the same proportion as they contribute to the joint farming enterprise.

LIME IN FALL FOR SPRING RESEEDING

Fall liming, according to Larry Monthey, Iowa State College extension agronomist, is particularly useful in preparing pasture land for spring reseeding to legumes.

When lime is applied to pasture land in the fall, it should be thoroughly disked into the soil. Since permanent pastures are often on rolling land, at least one or two diskings are necessary to prevent loss by washing. Disking should follow contours.

Lime may be applied to advantage on bean ground which is to be seeded to wheat next spring.

Occasionally corn ground, cut for shock or silage, is available for fall-seeded wheat. Applying lime here is worthwhile also, Monthey pointed out.

6-8 Months

In all cases it is desirable to have the lime on 6 to 8 months in advance of seeding time.

Applying ordinary quarry-run limestone at the time of preparing land for seeding is not ordinarily advisable, Monthey says, because it does not allow enough time for the lime to correct acidity

Main objectives in liming are to get uniform distribution and to work the lime into the surface soil so that it has contact with moisture. In order to neutralize the soil acids, the lime and soil particles must come into close contact. Thorough disking and cultivation help mix the lime with the soil but will not overcome poor distribution. Uniform distribution avoids poor streaks or patches in legume stands.

Amount To Use

The amount of liming material to apply is governed largely by the acidity of the surface soil, requirements of the crops grown and the purity and fineness of the material used. Sweetclover and alfalfa require the largest amount of available calcium. Meeting the needs of these legumes will benefit other crops in the rotation. Larger applications are necessary if coarse lime is used.

Before liming any soil, Monthey advises the testing of the soil first to determine the needs of the particular field being limed.

PROPER POISON KILLS RAT IF USED RIGHTLY

Choose the right poison, use it properly, and you have an effective weapon against rats, says Harold Gunderson, Iowa State College entomologist.

Red squill is good, particularly if fortified or concentrated to meet government standards. It kills only rats. Domesticated animals eating squill become ill, vomit and usually recover. However, squill has a distinctive, bitter taste. Rats recovering from red squill poisoning will never again touch baits poisoned with it.

ANTU is a war-developed poison which is primarily effective against the brown rat. But it will kill almost any domestic animal. Handle it with respect, Gunderson advises. ANTU kills more quickly than other common rat poisons and sometimes a large percentage of the poisoned rats die in the open. ANTU's disadvantage is that rats recovering from it become immune to further poisoning ANTU also may have a distinctive taste which warns recovered rats away from baits containing this poison. For this reason, Gunderson advises against blowing ANTU into burrows or runways as a dust.

Barium carbonate has been used very effectively, too, says Gunderson. It is tasteless, odorless, and can be used time after time without making rats suspecious. It is poisonous to all animals and must be used with great care.

Other poisons are arsenic and phosphorus. Both are poisonous to all animals. In addition, some phosphorus compounds are considered a fire hazard.

LIST OF PETIT JURORS FOR SEPT. TERM OF COURT

List of the Petit Jurors for the September Term of Court are: Arvid Westerberg, Forest City; John Kester, Forest City; Emma Gabrielson, Crystal Lake; O. L. Logan, Hayfield; Opal Schultzer, Woden; Florence Hinder, Jr., Britt; Orville Whitney, Britt; Palmer Pearson, Britt; Hildred Weiland, Britt; Harry Thompson, Britt; Fern Huling, Britt; Viola Loebig, Wesley; Mrs. W. C. Harvey, Britt; Miles Vescilus, Britt; Arlene Rayhons, Garner; A. J. Hejlik, Garner; Mildred Schissel, Garner; Oscar Wenck, Garner, Malinda Blumer, Garner; Elmer Beier, Garner, Garner; Clarence Greiman, Garner; Nellie Harvey, Klemme, Iowa; Marcellie Fuller, Goodell; Anita Kelling, Kanawha; Geo. Goodrich, Kanawha; Wm. Brummund, Kanawha; Glen Sloan, Corwith; Albert Kudje, Kanawha; Herman Heginger, Goodell; Lena Severns, Corwith.

SCS TO EMPLOY PART TIME AID

Word has been received by Vernon Moss, Soil Conservation Service Technician for Hancock County District, that a part time aid may be employed. The position will be a sub-professional rating under the Civil Service regulations. At present the position will be part time, much of it not over 4 days per week and not over 120 days per year Duties of the Conservation aid will be to assist the technician with layout work for contour cutivation, grassed waterway, drainage and other related conservation measure, assist in the preparation of conservation farm plans and related reports According to notice received by Moss, applicants should be veterans with farm background and experience in conservation farming. Training or experience in surveying will be of considerable value.

Persons interested in applying should contact Moss at the Soil Conservation Service office in Garner.

HANCOCK NURSE FILES REPORT FOR 3 MONTHS

Hancock County Nurse Harriet Oxley has filed her report for June, July and August. The reports indicates that she has made 129 visits to patients during this period, talked to four groups with attendance of 150, addressed the annual meeting of rural teachers and co-operated with mobile x-ray unit on June 16 at which time 56 persons were x-rayed.

The next meeting of the Hancock county public health council was held at Kanawha on September 8th, at which time plans were made for county-wide immunization.

AROUND IOWA

FOUND

Twenty-seven years ago, while milking, Mrs. Harry Seehusen of Afton lost her wedding ring. Since then, the grove of trees where the mishap occurred has been cut down and a new grove planted. Recently, her granddaughter found the ring while playing; it was nice and shiny as when lost in 1920.

SAD ENDING

Mrs. Virgil Carley and infant son Jimmy left Jefferson, Iowa, recently enroute to Tokoyo to join her husband, Lieut. Virgil Carley. On reaching Seattle, she learned that her husband was a passenger on the B-17 which crashed near Honolulu and was listed as missing.

FISH STORY

We won't vouch for this but they say it really happened. As Abe Bernstein, Albia merchant, was pulling a three-pound bass into his boat at the Country Club lake there last week, a three-ounce sunfish jumped out of the water and flipped his way into the boat.

MOTORBIKE

Dale Turnmire, 16 year old Cresco youth, recently returned home from a five-day, 1,000 mile motorbike trip. Averaging 32 miles an hour, the young cyclist included Minneapolis and Mithell, South Dakota, in his intinerary.

OLD QUILT

A 150-year old quilt was among the effects left by the late Mrs. Sally Cook, of Maquoketa. The historic bedspread was the work of Mrs. Cook's great grandmother and was made from pieces of dress worn by her mother, Mrs. Cook's great great grandmother. This lady, Sarah Dyer, was captured by Indians when 14 and held prisoner for four years, later marrying a West Virginia farmer.

SLICK TRICK

Purchasers of prisoner-of-war barracks at Clarinda, who have been tearing their newly bought purchases down board by board, gaped with envy at W. G. Dunn there last week. Mr. Dunn simply backs a truck into one end of the building, hoists the building up with a toggle lifting-device. He then drives the truck to the desired location and lowers the building into place.

NO DINNERS

The Salem Lutheran church, some miles north of Correctionville, is winning fame as a church with no "church dinners." Funds for church purposes are raised by the members through direct donations. When the church does give a dinner, it is purely for "social purposes," pastor Albert Guetzlaff explains.

TURNED OVER

Mr. and Mrs. Hans Hansen of Audubon turned over in an automobile recently. Nothing unusual about that, perhaps -- but it was a Model T. Ford, which seldom figure in accidents any more.

Klemme Girl Has Dress Worn By Movie Actress

Janice Hummel is proud of the dress sent to her by her aunt, Mrs. Hulda Johnson Greene, who is a costume buyer for movie actresses in Hollywood. The dress Janice received was worn by the 20th Century Fox Studio's actress Miss Jeanne Crane in "State Fair." The dress is a lavender colored velvet trimmed with green and a bunch of violets as a bouquet and has an eyelet embroidered silk blouse

BOARD TO HOLD GRAVEL LETTING

Hancock County Calls For Bids On Surfacing

Hancock county supervisors ordered a letting on the crushing and loading of 30,000 cubic yards of gravel and the hauling one-half mile of 420,000 units. The gravel will be used for surfacing all roads now under construction or which have recently been constructed.

The letting will be held at the Hancock County courthouse on September 22, at 2:30 p. m.

County Engineer Charles F. Merten estimates the total cost of the project at approximately $27,300. Work is to get under way immediately and to be finished in the fall or early winter.

ATTENDED AIR RESERVISTS MEETING AT MASON CITY

Ray Jorgenson, Jr. went to Mason City Thursday night to attend a special meeting of the North Iowa ROA chapter at the American Legion Hall, with Capt. John E. Bush, Fort Crook, Nebr. as speaker. Some thirty members were present.

Capt. Bush gave information on training plans for the air reservists of the 2nd air force command. Credits for retaining a reserve commission will be given for attendance at ground school lectures which will be set up in the near future.

Report On 4-H'ers At North Iowa Fair

Hancock Coutny 4-H boys made a good showing in the District 4-H Show at the North Iowa Fair in Mason City.

Don Greiman, Ell Township, won first placings on a first year Angus heifer, on a two-year old heifer, and on a bull calf produced by a 4-H heifer.

Lyle Goll, also of Ell Township, exhibited a pen of purebred Poland Chinas, on which he was awarded a red ribbon. His boar won a blue ribbon and his three gilts won two red ribbons and a white ribbon.

The dairy judging team, consisting of Maynard Dorow, Concord Township, Dale Huling, Boone Township, and Milton Friedow had second high individual score in the contest. Alternates on the team were Ronald Bredlow and Paul Zrostlik of Liberty Township.

A fifth place was awarded the demonstration, "Bovine Mastitis Control" presented by Maynard Dorow and Harold Puegel, Concord Township.

Dairy Herd Improvement Ass'n Monthly News Report

The DHIA reports for the month of August, 25 herds tested, 309 cows in milk, and 73 cows dry. The total number of cows tested was 382. The average production per cow (including dry cows) was 626 lbs. of milk and 22.9 lbs. of butterfat.

There were 29 305-day lactations completed during the month of August. Some of them were V. A. Cook, Klemme, a Registered Holstein, produced 14,892 lbs of milk and 511.1 lbs. of butterfat. Albert Abele and son, a grade Holstein produced 14,70[illegible] lbs. of milk and 491.7 lbs of butterfat and Dethmers Molander, a registered Holstein produced 12,470 lbs. of milk and 459 1 lbs. of butterfat. C. E. LaFavre, a registered Brown Swiss produced 12,143 lbs. of milk and 439.3 lbs. of butterfat. Jack Ostercamp, a Shorthorn Guernsey (mixed breed) produced 10,720 lbs. of milk and 422.2 lbs of butterfat. Hammon Bros, a Grade Holstein, produced 11,608 lbs of milk and 419.5 lbs. of butterfat. Floyd Friedow, a Grade Holstein produced 11,115 lbs. of milk and 390.9 lbs. of butterfat. Virgil Everett, a grade Guernsey produced 9,622 lbs. of milk and 339 4 lbs. of butterfat Richard Schubert, a Grade Guernsey produced 5,638 lbs. of milk and 312.5 lbs. of butterfat.

Presidential Travel Is Major Project

Chief Executive Zealously Guarded by Secret Service

By BAUKHAGE
News Analyst and Commentator.

WASHINGTON. — When President Truman finally announced that he was going to Brazil, he was immediately asked if he contemplated any trips across continental United States. He answered in the negative.

A reporter piped up: "This year or next year?"

"THIS year," the President replied.

That gave the White House press and radio conference a short interlude of laughter. For the reason that whenever a president is forced to drop his role of chief executive to assume the functions of candidate, it is funny. Frequently it isn't funny for the candidate, especially when he has been used to the respect spontaneously and (except in election years) almost universally, tendered his office.

A presidential trip may be, in many cases, fun for the President, but it isn't much fun for a lot of other people.

Not that all Presidents have had easy traveling.

It was an ordeal for the early heads of the nation just to get home in the stagecoach and tavern days. President Garfield was shot in a railroad station; McKinley was killed by a half-mad anarchist on a trip to the Pan-American Exposition in Buffalo; Harding died in San Francisco on his way back from a swing-around that had taken him to Vancouver, Canada; Wilson suffered a stroke in his Pullman; Theodore Roosevelt was wounded while he addressed a meeting on a visit to Milwaukee.

Baukhage

Furthermore, it has been recently revealed by the head of the secret service, Mike Reilly, in his book "Reilly of the White House," that Franklin Roosevelt, who disliked air travel, nearly cracked up in Malta, and might have been assassinated in a park in Miami had he not leaned out of his car to take a telegram (Mayor Anton Cermak of Chicago was killed and four other persons wounded).

Stayed Within Nation's Borders

Up to Franklin Roosevelt's time, Taft was the most traveled of presidents, and in 1901 worried all the constitutionalists (unfamiliar with the Constitution) by visiting the Canal Zone. However, he was scrupulously careful to stay on board the American warship which touched only American soil. It had been considered an unwritten law since George Washington's time (he had refused to enter Rhode Island until it was admitted to the Union) that a president in office couldn't leave the country. When Woodrow Wilson went to Paris and Vice President Thomas Marshall had to preside at cabinet meetings, the vice president made it clear he was officiating only at the request of Wilson and that he didn't consider Wilson's leaving the country vacated the presidency.

Signal Corps Photo

President Truman receives teletype message aboard the presidential radio car. Standing by the President are 1st Lt. Clinton G. Conover (left), maintenance officer of the army security agency, and 1st Lt. Harvard E. Dudley, cryptographic officer, White House signal detachment.

Travel has become a president must, and Mr. Truman's trip to South America is just routine.

But it is complicated routine for a whole army of people.

What these people do is little known to the public, especially the secret service. One out of every 10 of our presidents has been assassinated up to the time congress turned the job of protecting the chief executive over to the secret service. Since then no president has been assassinated.

Theirs (the secret service) is a heartbreaking job, and never have the details been so thoroughly revealed (to the discomfiture of some of his former colleagues) as by Mike Reilly in the book I mentioned.

Of course in wartime the job was vastly more complicated, and the army and navy worked closely with the secret service. A special air raid alert system was designed, Reilly says "to protect FDR anywhere in the United States."

When a spotter or watcher, either civilian or military, spotted an airplane he or she was unable to identify "any place from Greenland to the Straits of Magellan," the information was radioed immediately to the army air force headquarters at Mitchell Field, N. Y.

The information was immediately evaluated and conveyed by radio and land line to the secret service communication system where men were standing a 24 hour watch. This system tied together Mitchell Field, Bolling Field, the homes, offices and automobiles of various secret service agents, field offices throughout the country, all secret service mobile units, the President's train, Shangri-La, and the President's room at Hyde Park.

President Kept Informed Constantly

But keeping the President alive is only one activity. Keeping him in touch with his job is another.

Once when a bullying congress demanded of President Grant which if any of his duties he performed in Washington, he replied that his business and where he did it was his own affair. Now a president's out-of-town business is a lot of people's affairs.

In wartime this signal corps detail had the mission of speeding the President's top-secret communications "from the highest level conference tables to installations in the field."

"Today," as Major McNally puts it, "wherever the President travels, the White House signal detachment continues its task of weaving deftly an intricate communications net, which enables the commander-in-chief (and, he might have added, a travelling candidate) to keep himself constantly informed and in touch with the nation."

This work of weaving this "communications net" is an exciting story too long to recount here, but let me quote Major McNally briefly to show how continuous communication was maintained when President Roosevelt made one of his frequent trips to Hyde Park.

"A 50-watt frequency modulation station was modified and installed on the secret service car attached to the presidential train. Army vehicles, radio equipped, were spotted at strategically plotted points along the route between Washington and Poughkeepsie, so that the train was in constant touch with the White House all the way. Another FM radio link was installed in the old stable on the President's estate at Hyde Park. By means of a direct telephone line to Washington and frequency modulation radio, the White House was kept informed of the President's whereabouts at all times."

The speed with which messages could be dispatched and answers received was astounding. When Winston Churchill was making his second visit to Hyde Park, he and the President who were keen competitors as well as close collaborators decided to make a speed test on the communications facilities. Each sent identical messages to Australia over the respective British and United States facilities. The President had an answer in less than two hours; the Prime Minister got his the next day.

SET FOR NEW SPEED RECORD . . . After two years of preparations, John R. Cobb of England was prepared for an attempt to drive his Railton Mobil Special to a new land speed record. Cobb's car is powered with two airplane engines.

NEWS REVIEW

Hint American Aid Plan; Truman Acts for DP's

THE AMERICAS:

Aid Promised

"We must reject an encroachment upon the fundamental rights of the state. I am confident that we all agree that the state exists for man, not man for the state—and that we abhor any limitation upon the freedom of expression of men throughout the world."

Thus, in his first address before the inter-American conference at Petropolis, Brazil, U. S. Secretary of State George Marshall issued a reaffirmation of democratic principles in the western hemisphere and then bulwarked his expression of idealism with specific assurances of U. S. economic aid to Latin America.

He told the delegates that the U. S. government "will continue to take up economic questions with its sister republics and seek a sound basis for practical cooperation."

Marshall at Rio
". . . the state exists for man . . ."

That was interpreted as meaning that the U. S. is willing to help solve Latin America's economic problems through a series of bi-lateral pacts. There was also a hint that the big northern neighbor is counting on sending down its capital.

DP SHUFFLE:

Truman Acts

President Harry Truman, in a renewed effort to alleviate the "tragic plight" of Europe's displaced persons, ordered a three-way shift in the top command of the U. S. immigration and naturalization service.

In addition, it was disclosed that administration officials in Washington have resumed their review of the problem of displaced persons.

Most important personnel shift involved the transfer of Ugo Carusi from his post as commissioner of immigration to a position in the state department where he will survey all "critical" problems relating to displaced persons, particularly their resettlement.

This is expected to result in added stress being placed on a directive Mr. Truman issued in December, 1945, calling for coordinated action by federal officials to admit as many displaced persons as possible within quota limitations.

Watson B. Miller, federal security administrator, succeeds Carusi as commissioner of immigration, and Oscar Ross Ewing, New York lawyer, replaces Miller.

President Truman's action was taken in the face of congress' refusal to act on his proposal to relax immigraton quotas.

Headliners

IN DALLAS . . . Mrs. Warren J. Woodard, 24, housewife, got up in arms about legs. She organized the "Little Below the Knee club" for women who oppose the long skirt now in style. The girls organized a parade and ankled through Dallas streets to give emphasis to their protest.

Mrs. Woodard

IN LAS VEGAS . . . Senator McCarthy (Rep., Wis.) put the bite on congress for its "do nothing" attitude toward veterans. Congress, said he, "did foully by our disabled veterans, their widows and dependents."

IN BALMORAL SCOTLAND . . . Princess Margaret Rose of England, just turned 17, received as a birthday present her first military title—colonel-in-chief of the Highland light infantry.

CRYSTAL BALL:

Next President

General Douglas MacArthur will be the next president of the United States.

That, at least, is the occult prediction of a 75-year-old Japanese fortune teller, Kakudo Tomioka, who eulogized: "MacArthur has a glorious future in store for him."

Tomioka, who is said to have a record of several accurate predictions, placed the general on a plane with Mohandas Ghandi in the field of social welfare.

"There presently are two living men who have succeeded in realizing a peaceful revolution," he said. "They are MacArthur and Ghandi. But, then, Ghandi's mission is over. And MacArthur has his most glorious task to accomplish for the world in the future."

It was not immediately known whether MacArthur would use Tomioka's recommendation as a plank in his platform if he runs in 1948.

SURPLUS:

Budget Review

President Truman's budget business made big news again when the chief executive (1) forecast a record treasury surplus next June of nearly five billion dollars, and (2) hurt Republican feelings by telling the nation that congress trimmed the 1947 budget estimates by only 1.5 billion dollars.

His mid-year budget review estimated tax receipts this year at $41,667,000,000, which is 2.1 billion dollars more than any previous forecast.

Mr. Truman made his announcement coincidentally with a bureau of labor report which indicated that the U. S., far from being in for a business depression, can look forward to a period of prosperity continuing "indefinitely."

CAUTION TO THE WINDS

Sharp Rise in Buying Noted

Swinging sharply away from its previous cautious attitude of economy-minded discrimination, the U. S. buying public has launched itself on a relatively liberal purchasing spree.

Virtually all fields of trade have reported a clear-cut trend away from passive waiting for lower prices, and purchases are increasing all over the country.

The change has given rise to a certain amount of alarm over the possibilities of a new inflation spiral which may develop as a result of indiscriminate buying. It has become the subject of much discussion among business leaders, bankers and economists, some of whom express concern that the movement might acquire runaway proportions.

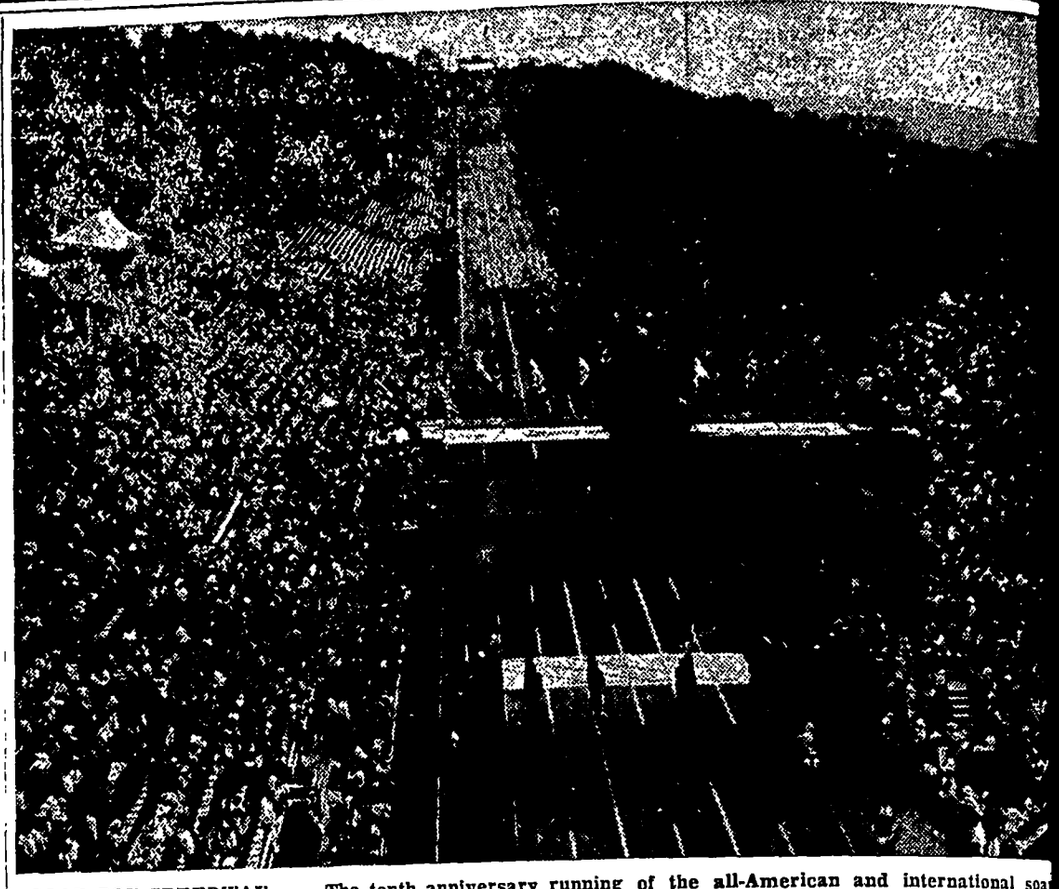
"We are watching developments from day to day," said a government economist, "hoping that it will taper off before it becomes a violent spiral that can end only in a serious reversal."

It is generally agreed that the movement began with the renewed wave of price increases that followed the boost in coal prices and mine wages. It has gained momentum ever since.

Consumers apparently have given up hope that any material reduction in prices will occur within the reasonable future and are going ahead to purchase merchandise which they long have needed. Many merchants who curtailed their inventories a year ago are placing orders to replenish their stocks.

As a result of the widespread buying trend, previous opinions that industry and business were in for at least slight setbacks in the last half of this year are being revised. Current forecasts are optimistic concerning high levels of business activity during the third and fourth quarters.

Belief now is that prices generally will move upward, or at least hold their present heights, until well into next year. Cash remains abundant, and the influx of large amounts of money from veterans' terminal leave bonds and state bonuses will be added contributing factors to the inflationary trend.



SOAP BOX SPEEDWAY . . . The tenth anniversary running of the all-American and international soap box derby got under way at Akron, Ohio, with a spectacular pre-race parade, all derby entrants participating. The derby, won this year by Kenny Holmboe of Charleston, W. Va., was held on a special track built for the motorless speedsters.

BIG CHECK FOR CANCER RESEARCH . . . California has received its first $100,000 allocation from the Damon Runyon memorial fund for cancer research, presented by a group of representative leaders of the motion picture and radio profession in behalf of the treasurer, Walter Winchell. Presentation was made to the California division of the American Cancer Society, represented by Dr. Lyell C. Kinney. Shown left to right are: Tyrone Power, Danny Kaye, Greer Garson, Dr. Kinney, Frank Sinatra, Bob Hope and Jimmy Durante.

WILD BLUE YONDER GIRL . . . Calm confidence radiates from the face of Jane Page, 25, of Wilmette, Ill., who entered as a contestant in the national Bendix air races to pit her flying skill against the best male aviators in the world. One of her opponents was Bill Odom, solo globe-hopper. Miss Page sits atop the P-38 in which she planned to compete for the $10,000 Bendix prize money.

BEST PICTURE . . . This photograph by Lloyd MacLean was awardod first prize in the fourth annual Hollywood studios still photograph show. It is a still from "Stallion Road."

MOSAIC OF LAST SUPPER . . . F. F. Burfitt, retired Portland, Ore., plumber, who has been dabbling in mosaic work for several years, is shown with his recently completed Last Supper. The 5 by 10 foot mosaic contains 49,000 pieces of vari-colored rock, all picked up from beaches between Portland and California. It took Burfitt 9,700 hours to complete the detailed work which is an exact reproduction of Da Vinci's immortal painting.

PARKED AND HAPPY . . . To protect the tot from any do-gooder who might want to cart her off to the lost and found department, Barbara Salsmon's mom put this sign on the big waste paper basket where she parked the girl.

HOG HOTEL—3 FLOORS, 50 ROOMS, 500 GUESTS . . . Once a flourishing "watering place" for dignified ladies and their very proper husbands, the old Hotel Colfax at Colfax, Iowa, now shelters the elite of the hog world—purebred swine which are being developed as seed stock for Midwest farmers. Picture at left shows a sow feeding her brood in the old marble lobby of the hotel. Wayne Fox, former army air corps captain and one of the brothers now running the National Swine Palace, is the man taking notes. A general view of the once ornate hotel is shown at the left, while inset is the old hotel ball room, now the scene of livestock auctions where the boars and gilts strut their stuff.

GILDED PALACE

Once Ornate 'Watering Place' Harbors Elite of Swine World

WNU Features.

COLFAX, IOWA.—Pigs in the parlor? No, sir! As any housewife will testify, a parlor is no longer good enough for them, particularly in view of prevailing pork prices. They should reside in a gilded palace these days. And that's just what's happening. Pigs are living in a pretentious palace.

Here at Colfax hogs are housed in the old Hotel Colfax, once fashionable and famous "watering place" of the Victorian era, and now re-named the National Swine Palace.

The occupants of these plush surroundings, of course, aren't just any old hogs, nor are they just any old purebred hogs. Only special strains of certain breeds of purebreds are admitted—strains that the owners of the palace are developing to produce pork at lower costs against the eventual day when low prices again force farmers to begin squeezing every cent out of their feed bills.

Mecca for Millionaires.

Once a flourishing hostelry, Hotel Colfax was built in 1877 and later remodeled at an estimated cost of between $600,000 and $700,000. It was on its yellowed hotel registers the names of widely known and still prominent families of the Middle West.

Guests would arrive in high-wheeled horseless carriages and linen dusters, staying for days and sometimes weeks to take the healing mineral waters bubbling from springs scattered over the ground.

By the time World War I came along, however, the bathing public seemed to have lost interest in the hotel's health-giving waters. Shortly thereafter the government leased the hotel as a veterans' hospital at a rental of $45,000 a year. Huge sums of money were expended in remodeling the building to suit the needs of army officers. A turkish bath costing $20,000 was torn out; elaborate apartments were built for the officers in charge. Officers' parties were "the talk of the town."

Generally regarded as a "white elephant," the hospital within two years became the subject of a congressional investigation. At only one time, it was learned, had there been more than 100 patients in the hospital. The 30 remaining patients were transferred to another veterans' hospital and the once luxurious hotel saw the end of its role as an instrument of mercy.

Abandoned for Years.

Since 1922, the structure has stood empty. A large wing was torn down and the rest of the hotel was dismantled.

When the postwar housing shortage developed, plans for remodeling the building for returning G.I.s and their families were heatedly discussed, but finally abandoned as impractical. It was then that the National Purebred Livestock exchange purchased the building and grounds. Purchase price was $75 per acre for the 160 acres of land, with the once ornate palace "thrown in for good measure."

Down in the hotel basement where dignified ladies and their very proper husbands once took turkish baths (men to the room on the left), prime specimens of Yorkshires, Durocs, Tamworths and other breeds now snore in deep beds of wood shavings.

In the kitchens where rich foods for the guests once were prepared, hogs are spoon-fed on a carefully balanced diet of proteins, vitamins, minerals and carbohydrates.

The newly-painted ball room has been converted into a sales pavilion where livestock auctions are held. It is complete with show ring and runways, all ankle deep in clean sawdust and with upholstered theater seats for the bidders. Across the lobby a spacious, glass-enclosed sunroom now serves as a maternity ward where sows and their little pigs convalesce after the trials of farrowing.

In the wooded parks surrounding the palace, hundreds of head of livestock—hogs, cattle, sheep and horses—develop while they wait to be taken to Midwest farms for foundation stock of meat you will be eating three and four years hence.

Edwin and Wayne Fox, the brothers who are responsible for the National Swine Palace, are both gifted with a sense of humor and admit that they have had "a lot of fun" along with the work of making the building and grounds presentable.

Pictures of hogs leaving the elevator, of a sow feeding her pigs in the middle of the old marble lobby and of a lonely gilt, Juliet, mournfully waiting on a grilled second-floor balcony for her Romeo, decorate the office.

Still Pioneering.

The man behind the palace is genial Frank Fox, pioneer Iowa resident and twice candidate for congress. As the founder of an old, progressive feed manufacturing concern, he is known personally to thousands of Midwest farmers for his pioneer work during the past 40 years in promoting balanced rations for livestock. He still speaks two or three times a week at farm meetings throughout the corn-hog belt. Although question periods following his talks often last until 1 or 2 a. m., Fox thrives on the sessions. His friends claim they are seldom able to get him off the subject of livestock but they readily testify that the stories of his experiences "keep them sitting on the edge of the chair." When they do get him off the subject of livestock, talk inevitably swings to politics and economics, where he also is classed as a "pioneer thinker."

And now he is pioneering once more. His idea is that the average farmer—the farmer who grows the meat—must have the best producing strains of purebred livestock available. This, he contends, is essential if livestock growers are to avoid the starvation income so widely prevalent among them during peacetime.

STAMP OF IDENTITY

Fingerprints Reveal Startling Tales

Loops, whorls and arches on the ends of a person's 10 fingers irrevocably spell out his identity, no two sets of fingerprints in the world being identical. That is the basis on which the far-flung activities of the Federal Bureau of Investigation's identification division are carried out.

Many unusual stories lie behind the more than 103 million fingerprints now on file in the FBI's identification division. One set of inked finger impressions may tell of a long-sought murderer captured when his prints were checked with the FBI. Another set establishes the identity of an amnesia victim, restoring a loved one to his family. A third identifies a victim of a fatal plane crash.

In addition to criminal prints the FBI's fingerprint files contain personal identification prints, army, navy, marine, civil service and alien prints. Daily, thousands of new prints are being forwarded to the identification division by local law enforcement agencies.

Many Strange Cases.

The story behind the fingerprint record of Charles Sidney Worthington is illustrative of the many strange mysteries encountered by FBI fingerprint experts in making identifications.

Wanted for violation of the theft from interstate shipment statute, Worthington had been a fugitive since 1934. When he was arrested under an alias in June, 1944, on a charge of false representation, Astoria, Ore., authorities forwarded his prints to the FBI for a fingerprint check. There identification experts determined they were identical with those of Charles Sidney Worthington. Returned to West Virginia, the long-sought fugitive was sentenced to serve two years and six months in a federal penitentiary.

Missing persons, victims of tragic accidents, amnesia cases and the like are often identified through a search of their fingerprints through the FBI's files.

When a right hand was found in the stomach of a shark caught at Miami Beach, Fla., the finger impressions were forwarded to the FBI. They were found to be identical with those of a young Texan who had enlisted in the U. S. naval reserve. The tanker on which he had been assigned had been sunk off the coast of Florida.

Ease Father's Doubts.

Arrangements were made recently for a harried father to visit the FBI war casualty section. The father, although notified of his son's death in action during the battle for Southern France in 1944, refused to believe that the deceased had been his son.

An FBI fingerprint expert set his mind at rest. The father was shown his son's army fingerprint card and the prints taken of the deceased soldier. The expert gave a detailed explanation of the two forms and pointed out that they were identical.

Doggone—Ditto the Big Deal

KANSAS CITY, MO.—It's a dog-gone shame but this, in reality, is the way a local realty deal went.

A Kansas City real estate salesman's prospect was a dog-lover interested in a certain property because it was in a quiet neighborhood where a lack of traffic seemed to assure a safe place for his favorite dogs. Several dogs near his home had been hit by motorists and he was anxious to move.

The salesman assured him that any occasional automobile meandering in the new neighborhood proceeded at a snail's pace.

"It's a deal," the prospect said. "Draw up the papers." Just then a squeal of brakes and a dog's yelp came from the street. Both men ran out. There lay a dead dog. The deal was off.

SUNDAY SCHOOL LESSON

Cultivating Good Will

LESSON TEXT FOR SEPTEMBER 14—Proverbs 3.30, 31; 15:1, 18, 22 24, 25; 25 18, 21, 22; 26.20, 21; Matthew 5:9; James 3:17.

MEMORY SELECTION — Blessed are the peacemakers: for they shall be called the children of God.—Matthew 5:9.

EDITOR'S NOTE: Lesson subjects and Scripture texts selected and copyrighted by International Council of Religious Education; used by permission.

By WILLIAM CULBERTSON, D. D.
Of The Moody Bible Institute, Chicago.

IT IS true that the Christian life gives offense on occasion. When a controversy exists between men and God, the Christian has no other course of action than to align himself on God's side. As he takes his stand in such cases, he should do it in love, but nevertheless with firmness.

The Bible nowhere commends a critical spirit or a perverse attitude. It rather emphasizes the necessity of firmness in the course of right, a firmness that loses nothing of its intensity through being tempered in the fires of love.

The Christian beyond all others should give himself to a life manifesting sympathy, kindness and charitableness. Thus he will open avenues of opportunity, of witness, and of service in which the Lord may be greatly magnified.

I. Contributing Factors to the Marring of Good Will (Prov. 3:30, 31; 22:24, 25; 25:18; 26:20, 21).

VARIANCE and strife mar good will (Prov. 3:30, 31). Notice that this strife is unoccasioned. When we strive with men to no purpose; when men have not harmed us, and with bitterness of spirit we turn upon them, we of course forfeit every opportunity to influence them for good.

The man of variance similarly should be passed by. We are not to emulate him; we are not to envy him; we are to choose none of his ways.

A wrathful spirit also mars good will (Prov. 22:24, 25). A man of anger is not to be followed by the child of God. This passage enjoins us to have no friendship with such individuals, for there is danger that we shall learn their ways and their ways will then be a snare to our souls.

Another way in which we mar good will is to be the purveyors of untruth (Prov. 25:18). The false witness is characterized as a large hammer or a sword or a sharp arrow, for he wounds his neighbor, often grievously.

The man or the woman who in gossip has maliciously wounded another loses all opportunity to influence him for God. The cultivation of good will involves the speaking of truth.

Let us with all diligence, with the help of God, banish from our hearts and minds all of these attitudes which hurt and mar.

II. Contributing Factors to the Making of Good Will.

IN THE first place, the soft answer of the controlled spirit will establish good will (Prov. 15:1, 18). The soft answer does turn away wrath. The man who is slow to anger appeases strife.

Let us not confuse a soft answer with an unconvincing one, or with that mealy-mouthed procedure that we commonly call double talk. Happy is that man who knows how to present the truth convincingly, who can make men, despite his opposing standards, understand that he has their good at heart. Of course, there is one absolute requisite to such a testimony, and that is a life wholly lived for God.

Another factor in making good will is the act of kindness (Prov. 25.21, 22). This passage, you will remember, is quoted in Romans 12. Here is the opportunity for us, in all matters of personal injury, to place our case in the hands of God rather than to seek revenge. By such acts of kindness, as we trust God, we shall be obeying the Lord; and who knows but that our enemies may thus be turned to him.

A third contributing factor in making good will is that of making peace (Matt. 5:9). So often this business of attempting to make peace is a thankless task, but that thanklessness is only from human sources. So far as God is concerned, he has placed his seal of approval upon every child of his who seeks to lead men into peace with God and to make peace between men.

God speaks of them as being "called" sons of God. It is one thing to be a son of God; it is another thing to be acknowledged as a son of God.

III. The Source of Good Will (James 3:17).

THAT wisdom will be characterized by purity, peaceableness, gentleness, approachableness, mercy, and will be without partiality and without hypocrisy. This wisdom which is from above is guaranteed to those who know him who has been made unto us wisdom (I. Cor. 1.30).

UNDER FLOODLIGHTS . . . For 74 years, Seven Falls and South Cheyenne Canyon have been among the major scenic attractions in the Pikes Peak region of Colorado. Visitors now can view the famous falls at night, under electric lights. The waterfall, shown above, is lighted by 28 large floodlights with alternating white and color effects.

IN THESE UNITED STATES

Floodlights Now Cast Beam On Scenic Falls and Canyon

WNU Features.

COLORADO SPRINGS, COLO.—Embracing "the grandest mile of scenery in Colorado," majestic Seven Falls and picturesque South Cheyenne Canyon have intrigued visitors to the Pikes Peak region for the past 74 years. Their beauties, however, have been shrouded when nightfall descended but now, through completion of an electrical engineering feat, this major scenic attraction of the Rockies can be viewed under electric lights.

The project, which makes this Colorado beauty spot the only completely lighted canyon and waterfall in the world, required the use of 80 huge floodlights and more than 1,000 small spotlights. More than two miles of heavy copper rubber insulated cable was installed underground.

The waterfall, which has seven separate falls in its 266 foot descent, is lighted by 28 large floodlights with alternating white and color effects. The crystal clear trout pool at the foot of the falls is lighted by eight underwater lights, revealing the rainbow trout gliding about in its depths.

The magnificent weather beaten pink granite walls of the canyon, which rise to a height of more than 2,000 feet, present countless shadow effects as the lights play upon them. Various rock formations, such as the "Setting Turkey," Devil's Slide" and "Wrestling Bears," are spotlighted by 500 to 1,500 watt lights.

Majestic pine trees on the banks of the splashing mountain stream are bathed in various colored flood lights, while others are sprinkled with colored lights. Standing as a sentinel at the entrance of the canyon are the familiar "Pillars of Hercules." It is at this point that the huge $10,000 anti-aircraft carbon arc light has been installed. The big light has eight million candlepower and shoots an effective beam five miles in the air. The Lonesome Pine, Eagles Cliff and other features of interest are caught in its bright path. It also will be used to sweep the sky to indicate that Seven Falls is now under lights.

As a final touch, a 90 watt sound amplifier system has been installed to play soft music.

Al G. Hill, Dallas, Tex., oil man, who purchased the 1,400 acre scenic attraction June 1, 1946, immediately began a program of improvements which have taken more than a year to complete and have cost approximately $100,000. In addition to the lighting project, a stairway of 250 steps has been erected to a spectators' platform on the south wall of the canyon from which point all Seven Falls can be seen at one time. Part of a mountain slope was removed by bulldozers to provide parking space for cars, and a graceful arch has been erected over the roadway at the mouth of the canyon.

The canyon approximately one mile in length is a "box" or dead end type. Before the coming of the white man, the Indians stampeded herds of buffalo from the plains into the canyon where they then were killed as food was needed. The canyon also served as a strategic retreat from which the Indians fought off their enemies.

At the top of the falls lies a picturesque valley with many small waterfalls and shady nooks. A short hike takes the visitor to Inspiration Point, which is 1,500 feet above the floor of the canyon. From this point, a breathtaking panorama of mighty cliffs and distant plains is seen. The beauty of Inspiration Point inspired Helen Hunt Jackson to write some of her most famous books and poems; and, on her death in 1885, her last request was that she be buried there.

Mule Postman Loses Contract In Remote Area

PORTLAND, ORE.—The lonely existence of the scattered families living in the remote fastness of Siskiyou national forest no longer will be relieved by periodic visits from the mule-driving postman.

The mule-pack postal route between the isolated towns of Illahe and Marial, near Grants Pass, has been terminated by the government because the carrier, who has a monopoly on mules, submitted too high a bid.

The action leaves only one route served the year around by mules although 12 others are served by mule and horse during the stormy winter months.

Residents of the remote mountain areas served by the mule routes do their shopping through the mail order catalogues and depend upon mule packs for everything—clothing, accordions, rifles, even food, according to Fred H. Twohy, railroad mail district superintendent who has spent 10 years traveling the mountain regions to check on his mule postmen.

"One winter not even a horse could get through the heavy snows," Twohy recalls. "The residents were shut off from the world, and there was quite a squawk."

Obliging postmen resorted to sleds to reach the isolated areas, Twohy adds, "and the first thing the people ordered by parcel post was several cases of beer."

The Marial route was typical of the involved carrier setup required to get mail to secluded areas. Mail went 34 miles up a river in a flat-bottomed river boat from Wedderburn. Then it was transferred to mule for an additional 16-mile trip.

It was "kind of expensive," Twohy admits, costing about $400 a person to keep the route open. "The stamps don't begin to pay for it," he adds.

"I have a hard time convincing them back in Washington that these routes are worth the expense," Twohy says.

Bombing Proves of Peacetime Use

HELENA, MONT. — Bombing techniques which wreaked havoc on enemy cities and military installations during the war also have proved effective in saving valuable timberlands of the northwest through control of forest fires from the air involving spraying water from planes.

In a special test conducted jointly by the forest service and army air forces, a B-29 and two P-47s successfully dropped seven water bombs on a fire deliberately set near Lolo Hot Springs in Lolo national forest.

After the water bombs had been dropped with accuracy near one set blaze, splashing water over the burning area and practically bringing the fire under control, two forest service jumpers parachuted out of a forest service plane to do the mop-up work. Their tools and a hot lunch also were dropped from the plane.

Mrs. Paul Grange of Mason City, a former Klemme resident, is ill and is a patient at the Mercy hospital.

Miss Novella Bredbenner went to Des Moines Saturday for a visit before going to Cedar Falls where she will attend college.

Mr. and Mrs. Cliff Montgomery, Carole Ann and Bill were visiting in Mason City and Clear Lake Friday evening.

Mr. and Mrs. Lyle Wilcox returned home Saturday evening from a week's visit with Lyle's folks in Minneapolis.

Eddie Grosshuech is working at the Corner Store before and after school hours and Saturdays during the school year.

Mrs. A. H. Dulmes, Mrs. Ed. Jacobs and Mrs. Geo. Lawhorn were Mason City visitors, Friday afternoon.

Miss Frances Tanner is taking care of Mrs. August Lau at Garner. Mrs. Lau has been ill for some time.

Rev. and Mrs. Fred Ortmeyer, pastor of the Methodist Church at Spencer, visited at the Art Wellemeyer home on Thursday morning.

Leslie De Merritt and family spent Sunday at Jackson Junction visiting with Leslie's parents. It was also the first time since 1942 that the four brothers had been together, as three had been in the service.

Melvin Coobs, who has been attending summer school at the Iowa State College, came home the latter part of the week for a visit with his parents, Mr. and Mrs. Benn Coobs, to enjoy a week's vacation.

Rev. Calvin Grosshuesch will conduct services for his son Ruben, Sunday morning at Melbourne. Sunday afternoon Rev. Grosshuesch will conduct a Mission Festival at Clarkesburg. From there Rev. and Mrs. Grosshuesch and their granddaughter, Judith, will go to Waukon where Rev. and Mrs. Ruben Grosshuesch are recovering from their recent auto accident.

Rev. and Mrs. H. E. Harvey and LaNelle drove to Des Moines early Sunday morning and while there attended the services at the First Methodist Church. They enjoyed visiting with W. Henry Galbreth and family, the Misses Ruth Stille and Peggy Coobs and the Wayne Lemke family. They were dinner guests of the Lemkes and in the afternoon Rev. Harvey baptized a pair of twins staying at the Lemke home.

Study Group Will Hold First Fall Meeting

The Study Group of the Methodist W. S. C. S. will hold their first fall meeting at the home of Mrs. Dwight Hummel on Thursday of this week, with Mrs. Art Kudje as co-hostess. Mrs. D. P. Anderson is in charge of the lesson on India. Mrs. Mace is in charge of the questions. Mrs. Harvey has Scripture lessons and Mrs. E. J. Arnold the hymn tory.

Garner Reformed Church

Rev. R. D. Stubbe

There will be no services or Sunday School in Zion. We are all invited to attend the Mission Festival at Peace Church. The Services will be held as follows: Morning Worship Services at 10:00 A. M. and Sunday School at 11:00 A. M. Afternoon Services at 2:30 P. M. and Evening Services at 8:00 P. M. Rev. John Gerber of Lancaster, Wisconsin will be the morning and evening speaker and Rev. Roskamp of Alexander will be the afternoon speaker. At each service a special collection will be taken for benefit of Missions.

The ladies of Peace church are requested to be at the church on Thursday, September 11 in the afternoon to clean the church.

KLEMME LOCAL NEWS

Mr. and Mrs. Wilson Sandry and Frank Sandry returned home Sunday from a trip through South and North Dakota.

There was a large crowd present at the Erick Josten Estate sale of household goods Saturday afternoon. Bidding was lively and prices were good.

Mr. and Mrs. M. L. Harson and daughter, Mary Katherine, were supper guests at the Ray Jorgenson, Jr. home Sunday evening.

Mr. and Mrs. Harvey Barkema are improving their property in the southeast part of town by having a new cement walk laid around their house to the street.

Mr. and Mrs. O. A. Stewart, who live on a farm between Klemme and Garner, were visiting at the A. L. Kingery home Sunday evening.

Mrs. Herman Paul of Duncan attended the W. S. C. S. meeting at the Methodist Church Thursday and enjoyed meeting all of her old friends.

Mr. and Mrs. Levi Klotzbach and Mrs. Smock and children of Kanawha were calling on old Klemme friends on Wednesday afternoon.

Mrs. Eva Kingery, and son Frank, and Mr. and Mrs. Elwyn Shuknecht and Merlin of Greene were dinner guests Sunday at the A. L. Kingery home.

The office of the Klemme Cooperative Grain Company has undergone a "face-lifting" as the interior has been repainted. It is a nice improvement.

Mrs. Paul Potter of Ruthven, spent the past week visiting at the Roy Arnold home. Mrs. Potter is the former Miss Schall, daughter of Rev. and Mrs. Schall, formerly of Corwith.

M. L. Harson began a two week vacation Labor Day when a relief agent arrived to take over. Mr. Harson is helping out with the rush of work at the Jacobs Hardware store during his vacation.

Mr. and Mrs. Frank Schultz moved into their new home in Klemme on Labor Day and are now quite comfortably settled. Their son Robert, and Mr. and Mrs. Lester Neuberger are running the Schultz farm.

O. W. Friedow and son of near Britt were business callers in Klemme Thursday. Mr. Friedow expects to hold his next Poland China Hog sale on Thursday, October 3rd. He made arrangements to have The Times print his catalogs and other material for the sale.

A new porch of the vestibule type was built to Mr. and Mrs. E. G. Beier's house the past week. Mr. and Mrs. Beier have had a lot of remodeling done on their home since they purchased it, including a full basement excavation and new brick walls laid up.

Glen Bridges has started remodeling of the Ben Buehlmeyer house 2 blocks north of the bank which he recently purchased. Sewer and city water was connected up the last of the week. The interior of the house will be refinished and a bath room installed.

Mr. and Mrs. Ed. Thompson returned home Thursday from their trip to New York state and other places of interest. Mrs. Thada, who accompanied them, remained at the Ira Overholt home at Keesville, N. Y. for a visit. She will return home later after visiting with relatives in Ohio.

In our moving list last week we erred in stating that the Roths family would use the apartment above their cafe. The Kenneth Medin family have rented the apartment vacated by Lydia Bock. Mrs. Kenneth Medin and children have spent most of the summer visiting with her folks in Kentucky but returned in time for school.

Roths' Cafe Redecorated

The interior of the Roths Cafe has been redecorated the past week with new paint which makes it very inviting. The apartment occupied by the Kenneth Medin family above the cafe was also redecorated.

Phone your news to 12.

FIVE ARRESTED FOR TRAFFIC SLIPS

Garner Justice Hears Highway Patrol Cases

Five new cases were reviewed by Justice R. J. Fritsch the past week at Garner.

Paul Severson, Forest City, was fined $10 and costs of which $5.00 was suspended pending good behavior, for failure to yield right of way. Severson was apprehended by highway Patrolmen.

Clarence M. Nannenga, Klemme, was fined $5.00 and costs for failure to dim lights to on coming traffic. Arrested by highway patrolmen.

Dr. Adrian Fankhauser, Charles City, was fined $5.00 and costs for failure to dim lights to oncoming traffic. Arrested by highway patrolmen.

Henry P. Aalderks, Forest City, was fined $25.00 and costs for improper and inoperative equipment (no taillight, no identification lights, no reflectors, etc.) $15.00 of the fine being suspended upon correction of faults. Arrested by highway patrolmen.

Francis V. Gaffney, Rockwell, defective equipment, was fined $25.00 and costs of which $15.00 was suspended upon correction of faults. Arrest was made by highway patrolmen.

Sheriff's Office Reports Arrests

Walter Edwin Gast, Ventura, was arrested September 2nd for operating a motor vehicle while license was under suspension He appeared in court Sept. 3rd at 10:00 o'clock and pleaded guilty to the charge. He was sentenced to 30 days in the Cerro Gordo County jail, plus an additional 20 days which had previously been suspended, to run concurrently. Plus court costs.

Robert W. Donahue, Forest City was arrested by Highway Patrolmen for improper passing. Fined $5 and costs, $2 of fine suspended.

Lloyd Christensen, Hartland, Minn., was arrested by Highway Patrolmen for runing through stop sign. Fined $3.00 and costs.

Small Boy Falls From Swing, Fractured Arm

Billy, small son of Mr. and Mrs. Leslie De Merritt fell from a swing at the school grounds Tuesday after school and fractured his arm.

Thanks for sending in your news. Phone or send it in.

What Is A Customer?

A CUSTOMER is the most important person ever in this office . . . in person or by mail.

A CUSTOMER is not dependent on us . . . we are dependent on him.

A CUSTOMER is not an interuption of our work . . . he is the purpose of it. We are not doing him a favor by serving him . . . he is doing us a favor by giving us the opportunity to do so.

A CUSTOMER is not an outsider to our business . . . he is part of it.

A CUSTOMER is not a cold statistic . . . he is a flesh-and-blood human being with feelings and emotions like your own, and with biases and prejudices.

A CUSTOMER is not someone to argue or match wits with. Nobody ever won an argument with a customer.

A CUSTOMER is a person who brings us his wants. It is our job to handle them profitably to him and ourselves.

Klemme Times

Feed Prices Are High

FEEDS FELCO FEEDS

They cannot be otherwise with grain prices where they are but when they are so high, you want to be more sure that you do get what you pay for.

Good feed cannot be cheap today, but that is no sign that all high priced feed is good feed. Your own cooperative is more interested in your success, and has less reason to want to take advantage of you and no one is more dependent on your good will for their future business.

We have coming soon a carload of 32½-0-0 Nitrogen and also a carload each of 4-12-8 and 3-12-12 Fertilizer. Put in your order at once.

Iowa State College Gives Advice On Care Of Beans

COMBINE BEANS SOON AS DRY, AVOID SHATTERING

Begin combining soybeans for grain as soon as possible after the beans are dry to avoid shattering, advises Dale Hull, Iowa State College agricultural engineer.

If the pods are fully matured and the beans are hard, it is a good indication that they are ready to harvest. The most efficient method of combining is direct from the standing stalk.

Farmers can expect to have some immature beans this year. Immature beans probably will not be ready for harvest as soon as the beans that are more mature at the time of the first frost. Even though they may show a green tinge, Hull recommends that immature beans caught by the first frost should be combined if the pods are filled.

Combines need to be adjusted differently for soybeans than for other grains. To prevent excessive cracking, the speed of the cylinder should be reduced approximately half of that for other grains. The concaves may be removed entirely for dry mature beans. If the pods are a little tougher, blank concaves can be used.

Split and cracked beans may be caused by tailings being returned to the cylinder, Hull continues. By proper adjustment of the screens, sieves, air blasts and tailing fingers, cracking can be kept to a minimum.

The operator can determine when his machine is producing the proper threshing action and still not damaging the beans by examining the straw behind the combine. Unthreshed pods in the straw mean a need for increased threshing action. Hull recommends as much clearance and as slow a cylinder speed as you can have and still beat the grain from the straw.

FARMERS BEGIN FILLING SILOS

Silo filling got under way in Hancock county the past week and will be nearly completed this week. Hot weather has hurried the corn along and most of it has dented or is denting. Three more weeks of favorable weather will insure good quality corn.

Some recent wind and rain blew down a lot of corn, some fields were seriously damaged and corn in these fields that were uprooted will be chaffy.

The rains the past week have been very beneficial to pastures and meadows, especially new seeding, and fall plowing is now in full swing.

Rains also benefited late soybeans and sugarbeets. Clinton Eads is selling for $2.25 for seed.

Infants Baptized Sunday

Baptism at the Klemme Methodist Church last Sunday were: Kathy Kay Waddingham, daughter of Mr. and Mrs. Ardell Waddingham, Ventura, Iowa.

Mary Catherine Harson, daughter of Mr. and Mrs. Merton Harson.

Donna JaNelle Gibbs, daughter of Mr. and Mrs. Ronald Gibbs.

Byron George Dodd, son of Mr. and Mrs. George Dodd, Kenyon, Iowa.

Margaret Ann Neuberger, daughter of Mr. and Mrs. Will Neuberger, Ventura, Iowa.

At Liberty: Russell Wayne Hanson, son of Mr. and Mrs. Arthur Hanson, Garner, Iowa.

School Opens

The Goodell independent school opened with an enrollment of 90. Mrs. E. Denham of Webster City is Superintendent. Sam Waldo of Garner is coach.

BRITT BANK BUYS HOSPITAL BONDS

$100,000 Issued Sold By The Treasurer of Hancock

The First State Bank of Britt was the successful bidder on the $100,000 county hospital bond issue sold by Treasurer Roy L. McMillin of Hancock County at Garner on Monday afternoon.

The Britt bank bid 1¼ per cent with a premium of $875. The Hancock County National bank of Garner was 2nd high with a bid of 1¼ per cent with a $855 premium and the Halsey Stuart company of Chicago was 3rd with a bid of 1¼ per cent and a premium of $780. Eight bidders submitted bids at the sale.

The bonds will run over a period of 10 years with the first bonds becoming due on Oct. 1, 1948, and are optional after 5 years.

Hospital trustees have purchased a site but do not contemplate any construction work on the hospital during 1947.

Hancock 4-H Boys Elect County Officers

The Hancock County 4-H boys elected officers for the coming year at a rally held in the I. O. O. F. Hall, Britt, Friday evening, September 12. Maynard Dorow is the new president; Delwyn Stromer, vice president; Herman Limberg, secretary-treasurer; and Jack Greiman, reporter.

Boys who want to participate in the Western lamb feeding projects this fall should notify the county extension office immediately. This is necessary so that enough lambs may be located, according to Paul Henderson, county extension director.

Henderson emphasized the necessity for dairy heifer and beef heifer projects to be blood-tested before being vaccinated for Bang's disease in order to comply with state regulations for exhibiting animals. The bloodtest must be negative for Bang's disease. The results of the blood-test and the date of vaccination must be recorded with the state veterinarian and certificated bearing the same information must be presented when the animal is exhibited.

The 4-H boys were urged by Henderson to enroll as many new members as possible so that they may plan and begin projects for next year.

Including pictures, clippings, a good 4-H story and accurate entries in record book to improve them was discussed by Edgar Dorow, county extension youth assistant.

Sheriff Reports Traffic Violation For The Past Week

The Sheriff's Office reports that Leo Donald Degroos, Forest City was arrested by Highway Patrolmen for failure to stop for stop sign. Fined $3.00 plus court costs.

A couple of other cases are pending further investigation.

Klemme Ladies Honored At Pink And Blue Shower

The Saturday Bridge Club entertained a number of ladies at the Buntenbach cottage at Clear Lake Saturday afternoon in honor of Mrs. Asa Arnold and Mrs. Ray Jorgenson, Jr.

The afternoon was spent in playing bridge after which a nice lunch was served and the honored guests were presented with some nice gifts.

Mrs. Jorgenson won high score and Mrs. M. L. Harson won second high in bridge.

SPORTSMAN—ONE WHO IN SPORT IS FAIR AND GENEROUS
USAGE

Why Call Them Sportsmen?

By Bill Voight, Jr.
Western Representative
Izaak Walton League of America

To elaborate on Ding's drawing, "Why Call Them Sportsmen,?" is like attempting to gild a lily or tint a butterfly wing. Examine the drawing carefully, ponder its implications, and answer the question sincerely to yourself, "Am I a sportsman?"

Today the word sportman is used much too loosely. As commonly employed it is applied to every buyer of a fishing or a hunting license I contend, and the Izaak Walton League of America concurs, that too large a segment of our license buyers seem to know little and to care less about true sportsmanship.

We have all seen too much carelessness, recklessness, and lack of consideration for the landowner and for other sportsmen, as well as a woeful disregard for the welfare of fish and game

The farmer-sportman problem is the direct result of the lack of sportsmanship The chief complaint against the city folks is that they disregard the rights of the landowner and in far too many cases this is true Gates are left open when they should be closed, or vice versa Fences are ridden down. Carelessly handled firearms pepper livestock with shot. Growing crops are trampled. Hunters fail to take the trouble to ask the landowner's permission before entering his private property.

Sometimes, too, the landowner may be charged with lack of sportsmanship by taking the attitude that he may do as he pleases with wildlife on his premises, in season or out.

There is a burning need afield today for intelligent understanding of the farmer-sportman relationship. This problem would vanish into thin air overnight if all concerned would "be fair and generous in sport"

Many men afield today do not make sure their target is within range when shooting Consequently many birds are crippled and are easy prey for predators or die in some distant marsh or woodland—a waste and cruelty Long careful search must be made for each bird knocked down. Failure to do so is unsportsmanlike and cannot be too strongly condemned To kill quickly or miss completely is more than just an empty phrase, it is common sense and the essence of conservation in the harvest of our wildlife—when we have a surplus

It is the sportsmanlike thing to recognize limitations when natural conditions have brought about a reduction in game populations and to be satisfied with less than the law allows. In the sportsman's mind the limit is a point beyond which no one ventures and not a goal to be attained

When game populations are down, as they are in many areas this year, the sportsman supports with the word and deed his harraassed fish and game authorities who are trying to perpetuate this sport by reducing game bags and the length of hunting seasons. They are endeavoring to guarantee that sports afield will be maintained for our children's children and for generations yet unborn

In the Izaak Walton League of America there is a well defined movement afoot to deny membership to any know deliberate violators and to the game and fish hog, as well as to all who refuse to abide by the rules of moderation, of consideration for his fellow man, of fairness and mercy for the game and fish

Isaak Walton, for whom this great organization was named, in the quaint language of this day revealed the very soul of sportsmanship in his words, "Thus use your frog. put your hook through his mouth and out at his gills, and then tie the frog's leg above the upper joint to the armed wire; and in so doing use him as though you loved him"

Fishing on our American waters and hunting in our American woods and fields provide the finest public outdoor sport known to man the world around. Persued properly it is clean, manly and health-giving It stimulates that which is best within us. Let us keep it that way by being all that the definition of sportsman implies Not only will we as individuals benefit, but we will thus help to assure that Americans of tomorrow and tomorrow's tomorrows will have the out door benefits that we today enjoy. Be fair and generous in sport.

Board Lets Contract For Cleanout Of Ditch

Hancock county supervisors awarded a contract to H. C. Young of Monroe, for the cleanout of the south main of Hancock county drainage district No. 1 and 2. The bid was lowest among 5 bidders.

The improvement involves the excavation of 410,000 cubic yards of dirt and silt and the removal of some trees. The total amount of the contract was listed by Engineer Charles F. Merten at $62,110.

Work will get under way by October 1 and must be completed by December 1, 1948.

Attending Conference

Rev. H. E. Harvey and Mrs. Vern Bisom left Tuesday afternoon for the Annual Northwest Iowa Conference at Fort Dodge. Mrs. Bisom is a delegate to the conference.

BRIDE IS HONORED AT PARTY

Mrs. Verle Keraus, Garner, entertained a number of relatives at a party in honor of Mrs. Otho Keraus of Osage Saturday afternoon at two tables of Bridge

High score was won by Mrs. Clarence Kluckhohn and low score was won by Mrs. Carold Larson.

After the games Mrs. Keraus served a nice lunch.

Cpl. Harvey Transferred

Corporal Herschel E. Harvey Jr. has been transferred from Lowry Field, Colorado to the National Airport in Washington, D. C. His new address there is:

Det. 734th AAF. BU (104th AASC Sq.)
Washington National Airport
Washington, D. C.

Teachers In Rural School Are Named By Chas Whitney

The teachers for the rural schools in Hancock county were recently revealed by County Supt Chas. S. Whitney. Listed below are the instructors and their respective schools:

Avery township: Lorraine Rice, Garner; Lydia Pearson, Klemme.

Bingham township: Bernice Doden, Woden; Sereina DeWaard, Woden; Irma Eden, Woden; Bessie Johnson, Buffalo Center; Marjorie TerBeek; Woden and Mrs Andrew Verlo, Woden.

Ell township; Judith Haberkamp, Garner; Miriam Huenemann, Garner; Lois Huenemann, Garner; Bertha Johnson, Klemme; Marjorie Hartbeck, Klemme

Liberty township· Mrs Robertine Gatchel, Garner; Ruth Upmeyer, Garner; Mrs. K. A. Schlitz, Britt; Mrs. Asa Legge, Garner; Mrs. Lucille Bridges, Klemme; Mrs. Marie Kluckhohn, Klemme; Miss Marjorie Meinders, Klemme; Ann Marie Nieman, Klemme.

Twin Lake township: Mrs. Evalyne Stille, Klemme; Mary Schreur, Kanawha; Mrs. Frances Myklestead, Goodell; Gladys Eliason, Belmond.

Bruce Arnold Entertained Sunday Evening By Showing Colored Pictures

Bruce, son of Mr. and Mrs. E. J Arnold, entertained a number of people at the Arnold home on Sunday evening by showing his colored slides which he took during his army career. Bruce had taken over 400 colored pictures which he projected on the screen, showing army scenes in camps in the U. S., pictures at sea, and many beautiful pictures which he took in Japan. He also showed one reel of moving pictures taken in Japan. Bruce has a fine collection of pictures that will be highly prized in years to come.

After the display of pictures the guests were shown the souvenirs collected by both Roy and Bruce. The latter had some very beautiful silk kimonas which he had purchased in Japan. They were all hand made.

After the entertainment Mrs Arnold served a nice lunch Those present were Mrs. C. A. Arnold, Miss Minnie Lenz, Mrs. Martha Ridder, Mrs. Ella Schneider, Mrs. Frank Sandry, Mr. and Mrs. Bill Johnson, Mr. and Mrs. Roy Arnold and Billie, and Mr. and Mrs. R. A. Jorgenson.

Zeidler Grows Them Like Grapes

Now comes Echard Zeidler with something different in the way of tomatoes, after reading the article in last week's Times about the small tomatoes grown by Bill Tiggeman.

Echard's tomatoes look like red grapes and grow on clusters like grapes and are also about the same size. He has grown this variety for several years. Anything more in the line of unusual tomatoes before we call it quits?

Blue Cross Enrollment Plans Shaping Up For Oct. 1 to 15

The plans for the Blue Cross hospital plan and the Iowa Medical Service Surgical benefits are going forward with the following booths already to operate. Goodell bank, Klemme bank, and Crystal Lake bank. Others will be announced next week.

The drive is scheduled for one day periods at these booths named by volunteer workers, Oct. 1 to 15. The effective date will be November 1, 1947. Collections will be for a five month period or until April 1, 1948.

Anyone interested should contact the Farm Bureau office or at one of the booths. This is one of the most popular health plans known. It is sponsored by the hospitals and the medical doctors.

Co. Supt. Whitney Reports On Hancock County Schools

The Schools Of Hancock County

There are nine public schools within the county operating high schools this fall, classified as follows: three Consolidated schools and six Independent schools. Two schools, namely Hayfield and Goodell, have new Superintendents, Mr. Edward Stice and Mrs. Emma Denham, respectively.

Seventy rural school reopened for the fall term with a majorty of the teaching positions filled by regular certificated teachers. The number of special emergency certificates issued is less than twenty-five this year.

Other schools are: a village Independent, at Miller, operating with one teacher and St. John's Parish School, in Concord Township, which was closed last year, is operating again this year with one teacher.

Total enrollment figures for this year are not yet available but the number will be approximately the same as last year which the annual report shows to be 945 enrolled with an average daily attendance of 711.9 pupils.

Adopt New Rural School Books

The County Board of Education adopted a health series for grades one to eight inclusive and an Iowa History text to be used the last twelve weeks of the school year by the eight grade pupils.

One major adoption (arithmetic) remains to be completed. This adoption will be made in the spring or summer of 1948

Are Workin In County

Mr. Arthur Carpenter, North East Iowa Supervisor, and Miss Ivah Green, Rural School Supvisor, both from the Department of Public Instruction, are in the county September 16, 17, and 18, to work on rural school library building and classification.

The work for the most part will be limited to standard rural schools.

School Busses Popular In Hancock County

Fifteen public schools in and around Hancock County are providing bus transportation to pupils in the Consolidated districts and non-high school areas of Hancock County To provide transportation, there are thirty-eight school busses traveling on thirty-nine bus routes. Last year the 9 transporting schools within the county reported a cost of $35,858.73 for transportation of pupils. This amount does not include schools outside the county operating busses within the county

The County Board of Education approved all bus routes in the county on August 19, subject to review and adjustment, by the Board and the Department of Public Instruction.

Virgil Cook President Of County Board

The County Board of Education, at its meeting September 11, appointed Mr. Virgil Cook, Klemme, to fill the vacancy created by the resignation of Mrs. Floyd Franklin, who moved from the County. Mr. Cook's appointment will be until April 1, 1948, when the newly elected County Board of Education will be sworn in.

He represents district number four or the southeast part of the county.

Kanawha Man Heads School Masters Club

Mr. Walter C. Nysteun, Kanawha, has been elected president of the Hancock County Schoolmasters' Club for the following year, Mr. Vern Troupe, Corwith, was elected vice president, Chas. S. Whitney, County Supt. is secretary and treasurer.

The schoolmasters and their wives will have a dinner meeting at Garner on Thursday evening, September 18, with two members of the State Department of Education staff and three members of the extension service of Iowa State Teachers College as guests. The purpose of the meeting is to discuss the final plans for the two day elementary teachers institute, which is to be held in the Garner Buildings for all rural and urban elementary teachers in the county.

Hancock County is fortunate to be one of only nine counties in the state in which such institutes are being conducted.

GAME BIRD AND FUR ANIMAL CENSUS TO START

Conservation officers in all parts of the state will start the regular fall roadside pheasant census September 24. Completed reports are to be in the hands of the Game Technicians by October 10. Recommendations will then be made to the State Conservation Commission for the 1947 pheasant hunting season. Quail and fur bearing animal populations will also be under scrutiny by the officers during this period.

The various census are not actual counts of populations but rather comparative population checks, that when compared with previous census reports and the actual hunting and trapping success of previous years, gives an over-all picture of relative abundance

The pheasant count is made by sample roadside checks taken from an automobile in the early morning when pheasants have a tendency to sun in open areas. Quail counts are made with the aid of trained bird dogs. The fur animal census is made by painstaking observation of tracks, dens, trails, etc., by the Conservation officers who also enlist the aid of experienced trappers. General precensus observation indicates an excellent quail population. Pheasant populations are believed to be no higher than in 1946. Among the fur bearers, raccoons are apparently the leading animal in compartive abundance, with fox populations also high. Precensus reports on muskrat and mink are inconclusive with these two popular fur bearers believed to be scarce in some areas.

Catch 64,000 Fish In Month At Lost Island

In a 30 day check made by the Biology Section of the Conservation Commission on seven major fishing lakes from July 24 to August 24, Lost Island, near Ruthvan, led the parade by a long distance. 64,000 fish were caught during the 30 day period with an average catch of 3.46 fish-per-hour per fisherman. Second high was Spirit Lake with 23,000 fish, with a take of 1.92 fish-per-hour. West Okoboji followed with 12,000 fish, 1.68 fish-per-hour; Black Hawk Lake, red hot earlier in the season, dropped off to 0 17 fish-per-hour, with Center Lake, 1.53; East Okoboji, 1.19; Storm Lake, 0.75.

Most of the fish caught at Lost Island were Bullheads on which possession limits have been taken off to relieve an over supply of these fish in that Lake. Most of the other lakes produced larger fish of mixed kinds.

GIRL SCOUT NEWS

The Girl Scouts held there meeting in the park on Monday, September 8th.

We voted on having the Sunflower Patrol join us in our troop.

We appointed each girl to a certain job for the next meeting. The meeting was then adjourned by the Scout leader.

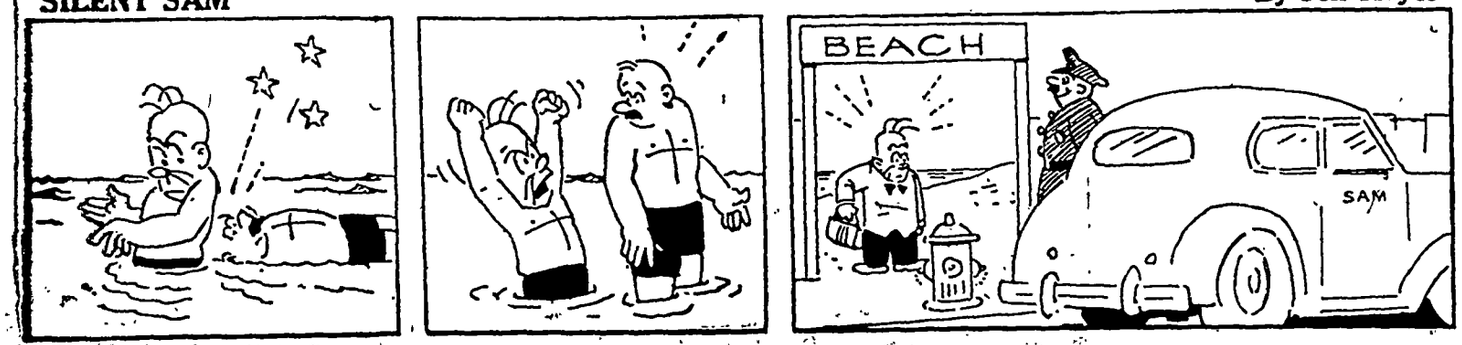
CAN WE WAIT IN HERE UNTIL THIS LIGHTNING STORM IS OVER MR. GREY?
SURE- IF YOU BEHAVE YOURSELF
I'LL BET EVEN A LITTLE PIECE OF LIGHTNING COULD DO A LOT OF DAMAGE--
KER-ASH!
OH- AN AWFUL LOT!

SILENT SAM

By Jeff Hayes



Day Begins for Andrei Gromyko

1—The alarm clock goes off announcing that it is 8 a. m. Mr. Gromyko silences it and declares it to be 4:30.

2—He is disturbed by a wrong phone call. The caller asks, "Will you excuse it, please?" He replies that he cannot consider this suggestion until he confers with Moscow.

3—He rises and takes his setting up exercises standing on his head, just to be different.

4—He shaves, but with a wrong side of the razor.

5—He consults the U. N. agenda and in preparation puts in a half hour in shadow boxing.

—•—

6—He goes to the hotel dining room. The waiter greets him with a "Good morning?" He asks time for further study before acknowledging the truth of the statement.

7—He consults the menu. The head waiter makes a few suggestions. He vetoes them.

8—The waiter says, "The griddle cakes and sausages are very good." He replies, "I demand further proof of that statement."

9—He is asked, "Do you care for chipped beef in cream?" and replies that this is the first time the question has come up and that he had no notice of it.

—•—

10—He settles for eggs. The waiter asks, "Hard or soft?" to which he replies sharply, "Hard, of course. Russia likes nothing soft."

11—He decides to return to his hotel room and goes to the elevators. The starter asks, "Express?" He replies, "No." The starter asks, "Local?" He replies "No."

12—"Can't you say, 'Yes' to one suggestion or the other?" inquires the starter. "Not without violating Moscow's orders," snaps Gromyko, who nevertheless takes an express.

13—"Kindly stand back in the car to allow room for others," calls the elevator boy. Mr. Gromyko refuses to budge. The elevator boy repeats his request. "I cannot commit myself on that until you put it properly in the form of a motion," explains the Russian leader.

—•—

14—After getting some papers in his room he phones for his auto. "The big car or the little car?" is the query. "Consult your code book," is the answer.

• • •

The Garble Sisters

"Are you following the baseball race this season?"

"Yes, it looks like the Yankees were a sure thing. They're great under that new manager, Ernie Bevin. Brooklyn is going great guns, too."

"Look at the way Tony Baksi and Tito are hitting the ball this summer."

—•—

"What new movies have you seen?"

"'The Two Mrs. Paulines' and 'The Egg and the Badman' were good I thought, but I like 'Brute Crossfire' and 'The Huckster and the Bobby Soxer.'"

"They say 'The Perils of High Barbaree' is swell. I seen a good legitimate show the other night. 'Finian's Birthday.'"

"A friend of mine seen it. She didn't like it as well as 'Call Me Brigadoon' or 'John Loves Harvey.'"

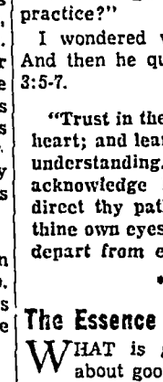
SCRIPTURE: Proverbs 3:5-7; 4:23; 6:16-19, 9:10; 14 34, 15:1, 16:18; 21:3; 22:1, 27 1, 2; 28.1; 29.18; James 4:17.
DEVOTIONAL READING: Proverbs 16.1-9.

Guidance From Proverbs

Lesson for September 21, 1947

OUR study of Sunday's lesson centers about the idea of goodness, which is a rather trite-sounding theme, but very vital, I assure you, and quite interesting. The Scripture passages are all found in Proverbs, save one, and that from the very practical preacher of the New Testament, James, chapter 4, verse 17.



Dr. Newton

Perhaps you will find the passages from Proverbs as helpful and interesting as I did. It will require but two minutes to read them—Proverbs 3:5-7; 4:23; 6:16-19; 9:10; 14:34; 15:1; 16:18; 21:3; 22:1; 27:1, 2; 28:1; 29:18. And after you have devoted two minutes to the reading of these passages, you will have something to think about for the rest of the day, the week, all your life.

• • •

One Man's Experience

A VERY successful business man in Atlanta, a shoe manufacturer, was telling me his life story one day as we fished together at Homosassa, Fla. Finally, he said:

"Do you know the passage in the Bible that has meant most to me as a rule and guide for my faith and practice?"

I wondered what he would say. And then he quoted from Proverbs 3:5-7.

"Trust in the Lord with all thine heart; and lean not unto thine own understanding. In all thy ways acknowledge him, and he shall direct thy paths. Be not wise in thine own eyes; fear the Lord, and depart from evil."

• • •

The Essence of Goodness

WHAT is goodness? We talk about good men and bad men, good times and bad times, good luck and bad luck. Just what is goodness?

Jesus himself once said to a young man:

"There is none good but One, that is, God." Mark 10:18.

Goodness then, permit me to suggest, is what happens when God lives in us. We can never know goodness apart from God, try as we may. The essence of goodness, therefore, is found in that heart, in that life, that sincerely prays, "Thy will be done."

• • •

The Essence of Badness

GUIDANCE from these great Proverbs identifies the things that we are to shun as well as the things we are to do—the essence of badness as well as the essence of goodness. Here are the seven things that God hates—the seven qualities of heart that constitute the essence of badness:

"Haughty eyes, a lying tongue, hands that shed innocent blood, a heart that deliberately plans wickedness, feet which are swift in running to mischief, a false witness who utters lies, and one who sows discord among brethren."

Analyze these seven qualities of heart, and you have the explanation of the woes of the world. Many clever modern books toy with these deadly sins, trying to make them seem good, but no amount of decoration can atone for the heart that consistently entertains these cancers of hell.

• • •

The Individual and Society

I LIKE the impact of these Proverbs. They begin with the individual. They fruit in society. Individuals who "trust in the Lord with all thine heart," will "exalt a nation." It is not enough to put better food in peoples' stomachs, better clothes on their bodies, better roofs over their heads. These are essential as expressing the better life; but you have got to give people something to live for as well as something to live on.

Good business depends upon good business men. Good international relations depend upon good nations. Good race relations depend upon good races.

We have been greatly enheartened by the establishment of United Nations as a world idea and ideal. Will it succeed? The answer is found not in dollars and bullets, but in hearts that always "trust in the Lord."

"Except the Lord build the house,
They labor in vain that build it;
Except the Lord keep the city,
The watchman waketh but in vain."
—*Psalm 127:1*

THE FICTION CORNER

OUT OF THE EMBERS

By NORMAN STANLEY BORTNER

ET'S talk this thing out," Janice had said. "For good d all." And he had agreed. Not nthusiastically. He thought he w what it would be like. She s going to be very calm, very e, very much the long-suffering, sient wife who will go no farther. right, my dear. If you want one talk, I'm game. Just so it n't end in another row.

e became slightly noble him- Now that it was all over with e was suddenly courteous. spoke to her in a tone he might e used toward any good-looking an not his wife: "Where would like to sit while you pronounce ence?"

e knew at once. She must have thinking about that. "Not ," she said. "Would you mind e went down to the cabin?"

e cabin. How long had it been e had seen the inside of that two-roomed affair beside the river? And what could have made her want to go there, of all places? "Not in the least," he said. "We'll need wraps."

This Week's Best Fiction

They dressed for the raw December nd went out the west door. ing the lawn she took his arm. as unexpected. And also a mcalled for, he thought, under rcumstances. Why should she a game out of splitting up? ing that, he stiffened and she But she did not release his "Remember the first time we down here together?" she

n't say I do."

u mean you don't want to. It fter our honeymoon. And you MY arm." Her voice was low even and somehow queer.

" he said. "What's the mat- etting a cold?"

Not used to fresh air, I sup- 'll be all right soon."

the Nevada climate, you " She did not answer. Maybe n't meant that. To speak of vantages of Reno while he ed East would not fit her mood. There had been plenty of them—when the ast small niceties of conver- between them had been for- giving way to bitterness and ation. But he admitted she er been crude. To cover his mark he said: "Has the en kept clean?"

. It's always in good order. ing when someone might use it. There's some wood m sure. And you remember lfireplace heats, Will."

's right. I do remember." rt of it was that he remem- er well, all at once. They ed there—he and Jan—for a while after their honeymoon. The big house was too big. Too many people around. Too many distrac- tions from each other. So they had moved to the cabin. . . . They had changed a great deal since then. Not in looks. Ten years wasn't very long. In themselves, somehow.

But the cabin had not changed. It was precisely as it had been then. Seemed a bit smaller, but then time always does that to distances and dimensions. He busied himself with the kindling. There was only one big chunk of wood. Enough for a little while. The fire caught nicely.

Jan held her hands to the growing flames. "Feels good," she said. And when the chill had been taken from the room she sat on the sofa and

"The first time we came here you carried me through the doorway, Will."

asked him, with a restrained, almost fearful little gesture, to sit beside her. He did, and waited—again very nobly—for her to begin this last talk she wanted.

At last she did. "This is where we started, Will," she said. "Here in this little two-by-four. Do you ever think about that time?"

"Thought of it just a moment ago," he admitted.

"We were happy then, weren't we?"

HE SHRUGGED. "Suppose we were, Jan. But I'm afraid we haven't been very happy since."

"No, not very. . . . And why, Will? Do you know? How did we lose what we had then? Not that it makes any difference, of course. Here we are, and how we got here doesn't really matter, or even who's to blame. . . . Right, Will?"

"Right." He stared into the roaring fire and considered that she was being exceptionally calm. Better than he had hoped.

"The first day we came here you carried me through the doorway, Will. I remember thinking, while you held me in your arms, that no girl could have been happier than I was at that moment. No two people could have been more in love. We were—don't laugh, please—we were like that fire is now. Just one consuming blaze of love for each other."

He couldn't help smiling at that. Jan really was in a state, to talk like that. But it disappeared when he turned toward her. She was so close to tears.

"And now, Will, look at us. We've made a wretched mess of things, haven't we?"

"Damned if we haven't." He was nearly noble enough to admit, furthermore, that it had been almost entirely his own fault, but he didn't. She might have agreed with him, and then the row would start. He was quiet for a long while, and then he said: "But fires do go out eventually, and I guess ours has."

"Yes. And what's the use of blowing on cold ashes? . . . But that's why I brought you here to the cabin, Will. I had the wild idea that somehow we could patch it up. Try again. But we've done that too often, haven't we?"

"Too often, Jan."

The room was hushed, after that, for many minutes. Hushed, except for the crackling of the one big chunk and the rush of air through the chimney. And even that slowly decreased. The fire he had built and not replenished was burning out. Just like the fire Jan has spoken of. Burning out. It was a simple thing to throw more wood on a fire. But was it so simple to rekindle their own flame? He decided he was getting morbid.

There were only deep red embers between the andirons when she rose. "I told you last night that nothing would keep me from Reno," she said. "I meant, it, then, but—Will, I'll stay if you want me. I'll do my best to make us happy. We were once. Maybe, in some way, we could be again." She waited. He did not move; did not raise his eyes. The embers glowed.

"Will, I said I'd stay if you want me to."

Glowed.

"Must I get down on my knees to you? Is that what you want?"

Glowed dully.

"Too late, then. . . . All right, dear, I'll be packed and on my way in an hour Would you—do you mind if I kiss you goodbye? Just for old times sake. I—won't bother you any more."

He permitted it quite nobly, and when she had leaned and kissed him full on the lips he turned away from her and toward the fire once more. The door closed behind her.

AN HOUR, she had said. Well, he would wait that long before going back to the house. No use having more farewells.

He did not stir for a long while, frowning at the fireplace. The one big chunk had only a tiny bit of redness along one edge. The rest was cold gray ash, smoking fitfully and not pretty to look at. She had been right. They had been exactly like the fire, blazing up for a time and then cooling to drabness.

"I won't bother you any more." What had she meant by that? Never see him again? He realized suddenly that he WANTED to see her again. It wouldn't be right not to. You can't live with a person ten years and simply forget it, like that. Maybe they could even be good friends, after the divorce, and have some of the fun they missed before. Without the ties of marriage, or the restraints—

He knew he was being very foolish, thinking things like that. It was all over, and she would be strange and distant whenever—IF ever—they met. Friends? Hardly. Jan was out of his life for good—that was settled.

The cabin was getting cold. He had no idea how long he had been sitting alone. Was the hour up? He rose to stir his aching legs and considered hunting more wood for the fire. With the tongs he probed at the ashy big chunk and at his touch the wood which had seemed so cold—so lifeless—jumped into flames, warm, surprising, beautiful.

A single touch had done that. HIS touch.

He gazed open-eyed. And then in quick, bounding leaps he ran up the hill and into the house. Up the stairs. Through a door he had not opened for so very long. The hour was not yet gone.

"Jan," he said. "Jan. You're as slim as you ever were. I'll carry you over, again."

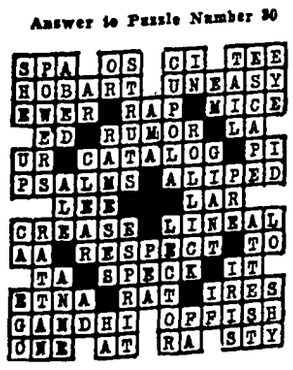
Answer to Puzzle Number 30



Series H-47

Sportlight

BY GRANTLAND RICE

THESE have been hard days for the British. Not only on the economic side, but also in sport.

Only recently they saw Babe Didrickson Zaharias, the Wonder Woman, remove their women's golf crown for the first time, but also had to watch an American, Willie Turnesa, take over the British Amateur championship, while an Irishman lugged home their Open Cup in golf.

Didrickson

Bobby Locke, a lone wanderer from the veldts of South Africa, has been the Empire's lone winner.

They have seen their boxers and tennis players, their scullers and others left behind. The latest is defeat of their Wightman Cup tennis squad by a stronger American group of girls.

Six years of war, under constant fire, plus the stringent food situation later have been partly responsible for the British debacle. The decline, however, began many years ago, in the wake of the Doherty Brothers, many fine polo players, Vardon, Taylor, Braid and Joyce Wethered, plus a number of Olympic stars.

More than one or two generations will pass before Great Britain will regain any part of her old glory, and even then, her domain will be outnumbered by the United States at least three to one

At the moment, however, it seems that Great Britain has a much more important job ahead than winning games.

Olympic Discussions

There are now two so-called schools of thought about holding the next set of Olympic games in London. No one can say whether these games help or hurt international relations. Many believe they do. Just as many are certain they don't. They should help, of course, if the incredible human race had even a fair amount of sanity.

There is already a definite split over the translation of "amateurism," of which there is no large amount in any game today.

There are debates about food discrepancies. There is certainly no deep and abiding affection for the United States, and its constant victorious Olympic marches.

The Olympics at London, in 1908, almost brought on a break between England and the U. S., in an incident over the Johnny Hayes—Dorando Pietri marathon, where Pietri, exhausted and out, was dragged over the line ahead of Hayes. Eventually Hayes was declared the winner. There have been many other incidents that were not too happily wrought.

We believe the games should be resumed for several reasons. One is that England, the probable goat, one of the least likely to succeed, wants them.

Another is that after the 1940 lapse, thousands of young athletes in this country, as well as in other countries, are now in hard training to make the team, and are keen to have their chance. They deserve this chance.

Sweden's Track Stars

In addition to the U. S., there is little Sweden, with the best distance runners in the world, who deserves the chance to show what her stars can do against all-world competition. Can you imagine what Sweden's mile, and longer-distance runners would have done in 1940 to the rest of the world?

I don't believe any set of Olympic games can lower the present international standard of fellowship and friendliness, of which there is practically none left.

Insofar as track and field goes, the U. S. has always been given a big edge in other years, and has yet to fail. So there will be nothing new along this line.

So far as food is concerned, I have seen more than a few of our star athletes lose because they were overfed. In 1924, Paavo Nurmi, Finland's distance star, gave me a few chunks of his main training food, which consisted of hard bread studded with fish. It was stronger or tougher than my teeth, so I can't report on its personal effectiveness. All I know is that Nurmi had twice the stamina of any U. S. distance runner. The Swedes will probably have the same.

We excel in events that call for quickness and agility, such as the shorter dashes, the jumps, the pole vault, etc. But when it comes to stamina, we have rarely shown the fiber needed to go the longer routes.

In racing parlance, we belong to the sprint division, not to the Derby and longer tests. We have few athletes who have the patience needed to get ready for a 3,000, 5,000 or 10,000-meter drive.

Checking up both sides of the argument, I believe the 1948 Olympic games should be held, even if the margin in their favor is slight. The wishes of thousands of young competitors are more important than the sedate philosophies of older men.

ASK ME ANOTHER?

A General Quiz

1. How many legs has a Bombay duck?
2. What is the 49th parallel?
3. Which of the Seven Wonders of the ancient world can still be seen?
4. Who was the "knight of the woeful countenance"?
5. Do Eskimos have beards?
6. Which was the first American city to have a single railroad station for all lines?
7. What is the true name of the dog star?
8. What is the largest flower in the world?
9. What is a satyr?
10. The poem "Charge of the Light Brigade" was inspired by a tragic incident in what war?

The Answers

1. It has no legs. It is a fish.
2. The Canada-U. S. frontier.
3. The pyramids.
4. Don Quixote.
5. Yes, but not luxuriant ones.
6. St. Louis. The Union station was built in 1893.
7. Sirius.
8. The amorphophallus, which grows in the warm, damp forests of the East Indies. It produces a flower 8 feet in diameter and 15 feet high
9. A sylvan deity or demigod, represented as half man and half goat.
10. The Crimean war.

Dog Enters Arena and Bull Fight Becomes a Comedy

A recent bullfight in Madrid was unexpectedly turned into a comedy by a dog sent into the ring to arouse the anger of a bull that refused to fight, says Collier's. Shortly, both animals were in such a belligerent mood that they started a real battle.

This was climaxed by the dog when he sank his teeth in the bull's tail and held on, until rescued several minutes later, despite the desperate efforts of his astonished and enraged antagonist to shake him off.

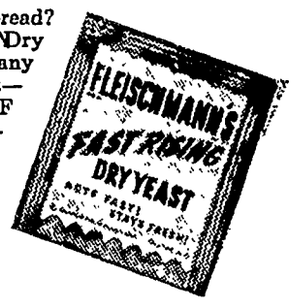
First Broadcast Over Air Sans Wires Made in 1892

Nathan B. Stubblefield, as a demonstration to a number of scientists in 1892, broadcast a message through the air that was received without the aid of wires. Stubblefield's first public broadcast was on January 1, 1902.

And on May 30, 1902, in Fairmont Park, Philadelphia, his voice was heard a mile away.

FLEISCHMANN'S Dry Yeast—
no need to keep it in the ice box

● Menfolks have a hankering for fancy bread? Now—with Fleischmann's Fast Rising Dry Yeast you can bake it in "hurry-up" time...any time! It's always there when you need it—stays fresh in the cupboard for weeks. IF YOU BAKE AT HOME—dissolve according to directions. Then use as fresh yeast. Get Fleischmann's Fast Rising Dry Yeast today. At your grocer's.



Keeps in the cupboard

THIRD AND FOURTH GRADE NEWS

The following puplis received 100 in Spelling·

Third Grade
Martin Brinkman
Eva Thiemann

Fourth Grade
Carol Bridges
Margaret Haefner

Sharleen Swanson and Ronald Trampel missed one word.

We each have a Spelling chart on the bulletin board and will record each Friday's grade.

The third grade have been studying about trees and their leaves in Science. We have learned the names of ten different leaves.

The fourth grade tested different foods in Science class, to see if they contained starch. We found that if we put iodine on cornstarch it turned blue. Potatoes and bread turned blue so we know they contained starch. Salt didn't turn blue so we knew it contained no starch.

FIFTH AND SIXTH GRADE NEWS

The fifth grade have been studying about early exploration in History. They have made Viking ships and early sail boats.

Our Art classes were busy finding the want ad sections of old newspapers. They are drawing baskets of fruit and stick figures.

Mothers insist on your children eating breakfast. We are striving for 100 per cent in our fifth and sixth grades. We are studying what foods to eat and when to eat them. Our slogan is "Eat what you want, after you have eaten what you should."

The sixth history have made some very good pencil sketches of the "Old Stone Age" which they are studying in History.

7TH AND 8TH GRADE NEWS

—Reported by Maralee Ridder

There are 31 in our room this year, 15 in the seventh and 16 in the eighth Gene Albers joined the eighth grade this year.

In Arithmetic we have been reviewing what we had last year.

In English the eighth grade has formed a Science Club. We voted for officers. They are as follows: President, Maurice Jacobs; Secretary, Maralee Ridder; Treasurer, Gene Albers.

The seventh grade have been studying the countries of the Near East in Geography this past week. We are now beginning our explorers chart.

FRESHMAN HIGHLIGTS

On September 2, the first day of school, 20 freshman enrolled in the Klemme High School. All were a bit nervous when they were told they were to have tests the next two days but when they were finally over some said they had found out they weren't too hard after all.

On Friday we started with our regular assignments. In Algebra we have been studying how to work with letters in place of numbers. Friday we had an unexpected test but we found it wasn't too hard. Mr. Andrea is our Algebra teacher.

In English we have been studying how to play our part in the school and community. I think that a lot of us have found this particularly interesting because of learning the school rules and regulations. Mrs. Harvey is our English teacher.

In Science we have been studying our environment. It hasn't been too hard except when we don't read our lesson. Mr Andrea is also our teacher in Science.

In girls Home Economics we have been studying good grooming and have also found it very interesting.

Reported by Ruth Lacey

JUNIOR NEWS

Reported by Paula Goll

The school bells have been ringing for two weeks already, and most of us are trying to like school. "Mom where is my pencil, or I'd like 50 cent please, is getting very familar again. Last Wednesday and Thursday, Sept. 3 and 4 we were taking state tests.

Friday, September 5th school really started. The Juniors are taking Economics, Sociology, English, Speech, Typing and Algebra. Most of us like typing and have learned to type these letters a s d f j k l r l u and h. Five Juniors have the advantage of having new typewriters to use.

In Economics class we have 19 members, and are learning about earning a living. We had an Economics quiz which was rather easy.

This year we have an hour of English and are learning how to use the library.

There are 35 members in Sociology class. About half of them are Seniors.

Thursday Klemme played the first game of the season with Kanawha. Kanawha beat the Klemme team 16 to 5

The freshman class has 20 members in it and they are all getting to like high school.

We have 3 new teachers in the high school who are, Mr and Mrs. Anderae and Mr. Bulka. We are certainly glad to have you here and hope you like Klemme High as well as we like having you here. Mr. Patterson, Mrs. Harvey and Mr. Kingery are hangovers from last year; but don't get us wrong. we still think old teachers are swell.

"This above all to thine own self be true, and it must follow as the night the day, though canst not then be false to any man." —Shakespeare.

Farm boy to social director of New York! Read Paul Gallico's story of Serman Billingsley, "Host of the Stork Club," in the American weekly, the great magazine distributed with SUNDAY'S HERALD-AMERICAN.

Fell From Roof, Tore Ligaments

John Eenhuis, young farmer west of Klemme, had his right arm in a sling last week as the result of an accident. John was shingling the hog house when he slipped on the roof and fell to the ground. The ligaments in his upper right arm were torn in the fall.

Will Move On Farm In Spring

The Ronald Barz family has rented the Edmund Josten farm east of Klemme and will move there in the early spring, or shortly after the holidays. Mr. Barz is now employed at the Jacobs Hardware store as their Mechanic and plumber.

Mr. Josten last week purchased the Lewis Radio Shop in Klemme.

HEARING ADJOURNED

The assessment and classification hearing on Hancock county drainage district No. 145, was held at the courthouse in Garner Monday. Hancock county supervisors heard proponents and objectors and adjourned the hearing until 2:30 p. m. Monday, September 15, to allow time to make further investigation of the matter.

Evangelical & Reformed Church

Calvin Grosshuesch, Pastor

Sunday:

Sunday School 11:00 A. M.

No Service at 10 o'clock. The pastor will preach at a Mission Festival at Marengo.

Confirmation Class will meet Tuesday and Saturday morning.

The Women's Guild will meet at 2 o'clock on Wednesday, Sept. 24th.

LAST BASEBALL OF THE SEASON HERE SUNDAY P. M.

The Klemme Merchants will play their last game of the season on the local diamond Sunday afternoon at 2:00 o'clock against Thornton. This should be a good game and a large crowd of fans is expected to turn out.

Fall Is Time To Plant Early Flowering Bulbs

Flower gardeners will be wanting to order their bulbs now, says Larry Grove, Iowa State College horticulturist.

Tulips, daffodils, hyacinths, crocus, grape hyacinths and hardy lilies are among the bulbs which should go into the ground shortly.

Daffodils are best planted in September, lilies in October and November. Most early spring flowering bulbs have an October planting date.

Tulips won't need to be lifted and divided so frequently if they are planted deeper than most gardeners usually plant them, Grove says. They multiply much faster at 4 and 5 inches of depth than they do at 10 and 12 inches.

Many hardy garden lilies, such as tiger lilies, are stem rooting as well as base rooting, and should be planted 10 to 12 inches deep. Semi-stem rooting kinds such as the Canada lily may be planted about 8 inches deep.

GET SILO IN TOP SHAPE FOR USING

With Livestock Feed Short It Is Essential To Have It Conditioned

With livestock feed short it is more important than ever to get your silo in top shape before filling this fall.

Ray Armstrong, Iowa State College agricultural engineer, points out that it is necessary to have a smooth inner surface on your silo. Corrosion and thawing and freezing action oftentimes cause the inside of a concrete or tile block silo to chip off.

Metal reinforcing is between courses in these types of structures. It must never be allowed to become exposed to the corrosive action of the silage acids. If the reinforcing ever rusts out, it can only be replaced by tearing down the silo, Armstrong says.

Cover Irregularities

Irregularities can be covered with a wash of cement and water. It should be about the consistency of thick paint and applied to the wall after it has been thoroughly cleaned and wetted.

After the wall has been smoothed it must be treated to prevent corrosive action by silage acids. Linseed oil and asphalt or coal tar thinned with gasoline is one of the best coatings to use. The usual precautions taken whenever gasoline is used should be observed.

Concrete and tile stave silos also must be similarly protected against injury from silage acid. A coat of rich cement to cover irregularities, followed by an application of linseed oil, asphalt or coal tar thinned with gasoline is recommended. Check to see if the rods are tight on these types of structures.

Check For Rust

Check for rust and corrosion on aluminum or galvanized silos Aluminum or metallic zinc paint may be used on the exterior, or even on the interior if there are signs of rust or corrosion. Coal tar thinned with gasoline or linseed oil should be applied on the inside wall to prevent corrosive action of acids. This coating is necessary regardless of previous treatment, Armstrong says.

Some farmers paint their silos year after year after the silage is fed out, using a low-cost preparation. Others apply a more lasting coating which will stay on from 2 to 5 years.

The most important thing in maintaining a wood silo is to keep the rods tight, according to Armstrong. To prevent rotting, keep the walls painted. Creosoting is recommended. Never use lead paints as they contaminate silage with poisonous lead, Armstrong warns.

From where I sit ... *by* Joe Marsh

Yes, I'm Guilty!

Folks sometimes criticize us small-town editors for the way we often play up "little things" ahead of big . . . human, local news in place of world events.

I can't deny it. Read the *Clarion* and you'll learn about the Martins' golden wedding anniversary . . . about the community sing down by the river . . . the husking bee at Sober Hoskins', where neighbors helped husk the corn, and later drank sparkling beer together.

"Little things?" Maybe. But from where I sit, they add up to the bigger things we call America: The friendliness of small towns . . . the helping hand . . . the respect for one another's rights. And above all the love of fellowship and freedom—whether it's freedom to speak one's mind or choose between a glass of beer or buttermilk.

I figure that if everybody looks after the "little things," maybe the bigger things will take care of themselves.

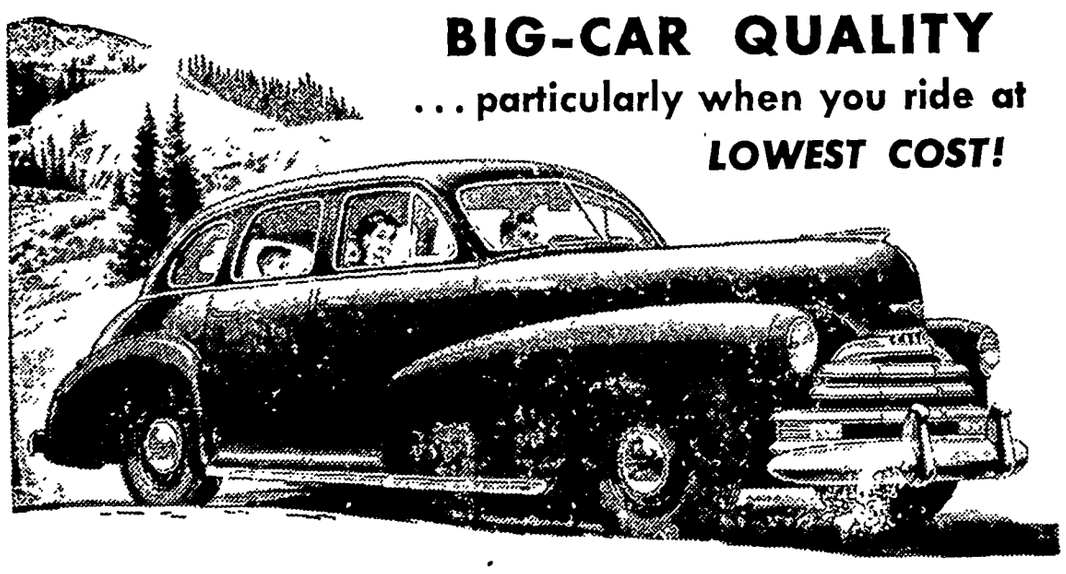
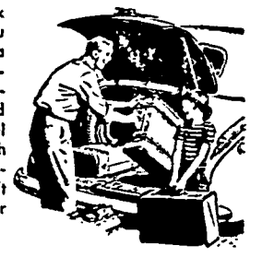
It's great to ride in
BIG-CAR QUALITY
. . . particularly when you ride at
LOWEST COST!





Even the spacious trunk compartment tells you that you can't get a body like this anywhere except on Chevrolet and higher-priced cars. It's a Unisteel Body by Fisher, with the most modern styling, genuine No Draft Ventilation, and other Comfort features.

CHEVROLET Yes, indeed, you'll enjoy *everything, including economy,* when you set forth in one of these bigger-looking, better-looking Chevrolets for 1947. It offers you BIG-CAR QUALITY AT LOWEST COST—big satisfaction at big savings—in all items of purchase price, operation and upkeep.

Leveling a hill—threading through traffic—streaming along the straightaway . . . you'll get plenty of action. From the *Valve-in-Head Thrift-Master Engine,* with the longest, *strongest* record of performance of any automotive engine built today.

With all its thrills for the eye—for the pulse—and for the thrifty pocketbook—Chevrolet also provides *all-round security* for its passengers—Fisher Unisteel construction — the Knee-Action Ride—Positive-Action Hydraulic Brakes.

Settle back, settle down—*and you'll settle for a new Chevrolet!* For your own thoughts will tell you there's no other car in its field that rides so smoothly, so steadily, so safely. That's because of Unitized Knee-Action—exclusive to Chevrolet and higher-priced cars.

Be sure your car is ready for winter! During September and October Chevrolet dealers are making a special point of fall service to demonstrate the excellence of our service facilities and quality workmanship. So bring your car in soon and let us get it ready for the bad weather days ahead.

Quality and Service Since 1919 Klemme,

HONEST MAN

Bob Acken, son of the Wayne Ackens of Waverly, lost his billfold on a vacation trip to California recently. Last week the billfold was returned to him by mail in an envelope with a state of Washington postmark. The $50 originally lost was still in it.

SMALL WORLD

Recently the Walter Busching family of Clarksville drove into a small cabin court in Elko, Nevada, while enroute home from California. Occupying a neighboring cabin were their friends from Clarksville, Mr. and Mrs. Fred Seitz, who were on their way to California. Small world.

EXCITEMENT

Mrs. Gale Bainbridge of Paullina heard some chicken thieves and went out after them with a gun. In the excitement, she shot herself in the foot, captured no thieves.

TO IRELAND

When 85-year-old John Cunningham of Carson won a Chevrolet in a southwest Iowa jubilee, he announced that he would "go to Ireland."

ROLLS HIS OWN

Lots of folks "roll their own" cigarettes but E. P. Griffins of Stuart goes them one better; he not only rolls his own cigars but grows the tobacco. Tobacco will grow any place corn will, Mr. Griffin says. It takes two years to cure tobacco so his 1945 crop is just now ready for rolling. Last year he "rolled" 800 cigars and prefers his own to commercial brands.

HERO DIES

A hero died at Algona last week Becky, a stout-hearted Pomeranian only a week before had chased a young bull away from the play-pen in which Becky's young mistress, Patty, was playing. A few days later, the dog was run over and killed by and automobile.

TIME MARCHES

At Swea City, a resident picked up an object on the street, showed it to a group of high school boys. Puzzled, they admitted they didn't know what it was. A teamster came by and identified the object; a horseshoe nail

Card Of Thanks

We wish to thank our neighbors and friends who came to our assistance when we had a fire; and thanking the Klemme and Goodell fire departments for their promptness in arriving and for the fine work they did in controlling the blaze and preventing loss or damage to our farm buildings. Mr. and Mrs. Paul Veldhouse. (1tp)

We wish to take this means of thanking all who offered their services when our barn burned to the ground. We especially want to thank the Klemme, Garner and Belmond fire departments for their promptness in reaching the fire and their efficient fire fighting which saved our other buildings. We also want to thank the Klemme telephone operator for her efficiency in sending us help. We thank our neighbors and friends who came to our assistant, both during the fire and for their help afterwards. Clarence Swalve and family, Mrs. Frances Swalve (1tp)

FOR PROFIT, CULL HENS. HAVE ALL-PULLET FLOCK

"Get rid of old hens—have an all-pullet laying flock this year," was the advice Howard Bayles, extension poultryman at Iowa State College, gave Iowa farmers this week.

Pullets lay 25 to 30 percent more eggs per year than do old hens, and do it without eating any more feed, he pointed out. Better still, they lay the extra eggs during the high price period of fall and winter when old hens usually are molting.

Old hens are more likely to be carriers of disease and parasites. The possibilities of disease outbreaks are lessened if older birds especially those which have been running in barn lots, are sent to market.

The pullets, hens under 1 year of age, should be housed in newly cleaned, disinfected laying houses when they are 5 months of age—or about September 15.

The all-pullet flock must be fitted to the size of the laying house Allow 3 square feet of floor space for Leghorns and 3½ square feet for other breeds, Bayles says. If more birds are put into the building, feed consumption and utilization will fall off And, as a result, profits will be cut because of the lowered egg production.

Follow a good system of feeding and management. To keep any of the pullets from "playing hookey," Bayles recommends confining the birds to the laying house and the sunporch at all times. The saving in waste feed that the birds might pick up around the barnyard is not worth the time spent in looking for hidden nests and in cleaning up dirtied eggs

RELIC OF THE PAST . . . Its 1828 building, old-fashioned fixtures and heterogenous display of merchandise make the Vermont Country Store an exact replica of the general store in grandfather's day.

IN THESE UNITED STATES

Country Store Museum Is Replica of 1880 Emporium

WNU Features.

WESTON, VT.—Walk into the Vermont Country Store here and immediately you are transported back into grandfather's day. For the Country Store, housed in an ancient building with hand-hewn rafters and with its shelves littered with an amazingly heterogeneous display of goods, is an exact replica of the 1880 Vermont emporium. In structure, fixtures and merchandise, this unique country store museum is typical of the general store which grandfather knew in his youth.

Although the present Vermont Country Store dates back only to June, 1946, its predecessor of the same name originally was founded at North Calais, Vt., in 1897 by Gardner L. Orton. This store later was moved to Weston, and it was in this same location that Vrest Orton, son of the founder, reopened the old-fashioned cross-roads general store in the summer of 1946.

Background of the store is authentic, most of the fixtures coming from the store of the original founder. Other fixtures were presented by nearby Vermont storekeepers interested in the project.

While the building itself, constructed in 1828, and the fixtures are as old-fashioned as it is possible to make them, the country store museum is not a dead, lifeless affair. On the old shelves and counters Orton has stocked as varied a display of goods as would have been found in his father's emporium a half century ago.

The place is redolent of mingled odors of spices, kerosene and cattle feed, while dim lights are a reminder of long bygone days.

Revived also around the old, high, wood-burning stove under the hand-hewn rafters is the old country store forum where people gather to express their frank opinions on subjects ranging from local politics to the state of the nation.

The Vermont Country Store is more than a typical museum. Orton's experiment, in a day when the stereotyped, chain-store, slot machine atmosphere prevails in grocery stores, may have far-reaching implications, for he is re-introducing the old-fashioned storekeeper's policy of knowing thoroughly the goods he was selling.

This type of store, Orton explains, makes it possible once again "for people to enjoy the experience of going into a store."

Nearly 30,000 people visited the novel store museum last summer and fall, and even larger attendance has been recorded during the present season.

Don't Yell 'Moron' At Reckless Driver; It's Overrating Him

MINNEAPOLIS, MINN. — When you mutter "Moron!" at the driver who just missed sideswiping your car, you may be temporarily overrating him, it is indicated in traffic fatality statistics assembled by Northwestern National Life Insurance company. The vast majority of our ghastly annual toll of automobile accidents occurs when drivers are devoting only part of their intelligence to driving, the report emphasizes.

The moron rates at from 50 to 70 per cent of average human intelligence, the imbecile level is between 25 and 50 per cent of average and the idiot rates below 25 per cent.

Thus, the report points out, when the driver of average intelligence puts from a quarter to one-half of his mind on his driving, and devotes one-half to three-quarters of his brain to conversation, scolding the children, listening to a quiz program or admiring scenery, the hazards are about the same as if a moron or submoron were doing his very best at the wheel. An average mind fogged by alcohol may have its driving capabilities actually at the imbecile level.

The splendid safety records of the railroads and the airlines would take a terrific nose dive, the report suggests, if engineers and pilots craned necks at scenery—feminine or otherwise—argued with wives, necked with the girl friend or were under the influence of alcohol, while on duty.

Yet the motorist constantly commits these driving sins, while airily piloting his passengers without the guidance of steel rails and through traffic a hundred times as dense as that of the railroads and the air lanes.

A probable 24,000 lives could be saved each year, the insurance company estimates, if all motorists could be convinced that piloting an automobile safely is a job worthy of their best intelligence on a full-time basis.

Rural School Pupils Pass Up Desserts To Aid War Victims

NEWTOWN, PA.—As a memorial to alumni who lost their lives in World War II, pupils of George rural school in Bucks county have launched a project to aid pupils of two German schools. Recipients of the aid are the Gertraudenschule, a girls' school in Berlin, and the Jacobi gymnasium, a school for boys at Dusseldorf.

Pupils are voluntarily sacrificing their mealtime luxuries to provide food, clothing and other necessities for the 800 German school children. Pennies saved by skipping ice cream and dessert are contributed to a special relief fund.

During the first six weeks of its operation, the relief chest amounted to $1,319. Collections included regular contributions as well as money saved by giving up some item on the menu.

Woman River Pilot Still Active at 79

CINCINNATI, OHIO. — An Ohio river pilot for more than 50 years, "Ma" Greene at 79 is "as good as ever."

When the coast guard renewed her five-year pilot's license for the 11th time, Lt. Comdr. Harry A. Voight reported that she passed her tests with ease.

Familiarly known as "Ma," Mrs. Mary Greene is the only woman pilot in the nation's inland waterways. She now takes the wheel "just to show the passengers I can do it." Her son, Tom, carries on the steamboat line her husband founded.

She got into steamboat piloting when her husband found himself with an extra boat and no skipper, she explains.

Future Teachers Instructed in Makeup

NEW YORK. — Although it may not solve the teacher shortage, the City College of New York believes it has taken a step in the right direction by teaching students of education how to dress, fix their hair and make up their faces for the classroom.

A series of lecture-demonstrations was devoted to teaching the students how to look like, as well as be, up-to-date teachers. To conclude the series students staged a style show, modeling classroom and other clothes for teachers.

In classroom clothes, one girl modeled an outfit suited to the classical old maid school teacher, a black silk dress complete with high lace collar. Other girls modeled softly tailored suits with ruffled blouse and tailored dresses considered appropriate for the modern school marm.

Roosevelt Family Turns to Farming

Elliott and Eleanor Begin Back-to-Land Movement

By BAUKHAGE
News Analyst and Commentator.

WASHINGTON.—Moses Smith, I understand, has retired. He is leaving the 140 acres he has been farming for 27 years. His landlord's widow and her son are going to work it from now on.

The last time I saw Moses Smith he was dressed in his Sunday clothes. We were both up in his former landlord's bedroom, with some of the neighbors. It was a sad occasion. It was the boss' birthday anniversary but he had been dead nearly two years. The room looked the same to Moses and his friends who had seen it often when they came up there to talk over farm and other business. The former occupant's dressing gown was lying on the bed, his slippers were by the courch. The boss was one of the landlords that tenants like. Moses told me that, five years before, when I visited him at his white-painted farm house.

"I've rented from him for 22 years (that was 1941)," he told me then, "and he has yet to find a fault. Whenever he gets a chance he comes over here to say 'hello' and 'goodbye' but he doesn't find fault. And I've made mistakes, too. Nobody is perfect."

Baukhage

The landlord had a pretty good opinion of the tenant, too, as I learned later. Smith knew that and was pleased, but it didn't go to his head. He is a typical, independent, self-respecting up-state New York farmer. I remember he said to me that day, sitting on the front stoop, in 1941:—

"The President drove over here a little while back, with Princess Juliana. He told her about this house being over 100 years old and I told him about the well-water. It had gone bad. So he said go ahead and dig a new well." Smith and I walked over to the new well. It was 100 feet deep. "It will last 100 years," said Smith with the pride you find up that way in good things that last.

By this time you have guessed that Smith was a tenant on the Roosevelt estate at Hyde Park, N. Y. I take it he is a comfortably retired farmer now, living in the nearby village of the same name. And Mrs. Eleanor Roosevelt and her son, Elliott, have taken over. I don't know who will live in the farm house. The old Roosevelt homestead is a museum now—but the Roosevelts have other dwellings.

They are going in for commercial farming, Mrs. R. said. Elliott hadn't been interviewed since the senate war investigating committee started looking into the Hughes airplane, and ended looking the other way and blushing. The testimony had a lot to do with the night club—cocktail-lounge side of young Roosevelt's activities but nobody could find a hole in his war record. Even his many critics admit that.

Elliott's friends are heaving sighs of relief to hear that he is going in for something constructive. War takes a lot of courage and skill, too, but it isn't very constructive. Neither is night life.

"This is a challenge," Mrs. Roosevelt explained in her column, "which Elliott and I will enjoy." Every farmer knows she's right about the "challenge."

They aren't going to try to raise wheat, corn, potatoes, or attempt to keep 14 cows, as Smith was doing when I visited him. They are going to continue raising Christmas trees, a venture which the late President started and seriously pursued for several years. Smith's 140 acres, which were devoted to general farming, are only a fraction of the more than 1,000 acres, much of which is wooded, and part of which has been devoted to a scientifically-cultivated evergreen crop, which make up the estate.

Mrs. Roosevelt explained that she and her son couldn't afford to keep the estate as a country place, as her mother-in-law had.

I noticed that the New York Herald-Tribune made editorial note of Mrs. Roosevelt's plans and mentioned that a lot of acres along the Hudson "were untilled."

It mentioned that Dr. Samuel Bard, a wealthy retired physician, had a place not far from the Roosevelt estate where he carried on valuable experiments which made an important contribution to agriculture. Mrs. Roosevelt hopes to conduct similar experiments.

"If Mrs. Roosevelt," says the Herald-Tribune, "does no more than fasten remembrance on the fact that land endures . . . that stability of farming is that of a renewable world in which seedtime and harvest are still more lasting than dynasties and dictators . . . the new farming partnership will have done much of value before the first furrows are turned."

I wonder if you feel the way I do. I think, regardless of the color of one's political sentiments, anybody who loves the soil can offer his well wishes to this venture with the hope that the young man will do as well with his hands in the earth as he did with his plane in the air.

Tragedy in the Forests

It was a coincidence that while I was reminiscing on the subject of the Roosevelts' new adventure in tree-growing, my neighbor in the building across the street presented me with a couple of typewritten pages containing some striking facts about tree destruction. They are apropos, I think, now, as we move toward the close (we hope) of the worst season of forest fires in a decade.

This period of holocausts began before the ink was dry on bills passed by congress making deep slashes in the interior department's appropriations for fire control. Many of the cuts later were restored, but not in time to save thousands of acres of timber in some areas of America, notably Alaska.

"The sawtimber burned in a single year in this country," says my friend's memorandum, "would be sufficient, if converted to building materials, to replace every private house in the cities of New Orleans or Minneapolis.

"If the wood below sawtimber dimensions could be manufactured for paper, it would provide a 25-year subscription to a monthly pocket-size magazine for every man, woman and child in our 142 million population.

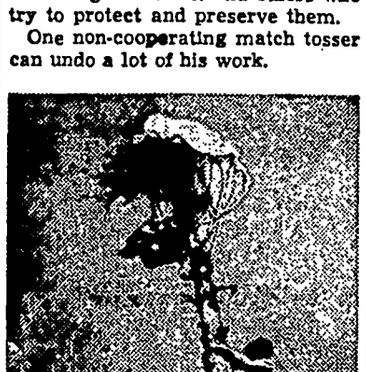
"If it could be converted to rayon pulp, it would provide material for more than a hundred new dresses for every woman and girl in America.

"In terms of dollars, our annual forest fire loss amounts to 35 million dollars in payrolls lost to woodworkers and three-quarters of a billion dollars worth of wood products.

"The tragic part of all this is that 9 out of 10 forest fires could be prevented. Nine our of 10 are traceable to human causes—to incendiarists, causing more than 25 per cent of all fires; to smokers, careless debris-burners, railroads, campers and woodsworkers who are responsible in the order named."

Well, those are the sentiments of my neighbor, who is trying to establish a "balanced cooperation" among the men who make their money out of trees, one way or another, the people and the birds and the bugs who need to have trees, and the government and others who try to protect and preserve them.

One non-cooperating match tosser can undo a lot of his work.



(U. S. Forest Service photo)

Parachute jumpers are one of the most important factors in getting forest fires under control swiftly. Here, Dick Tuttle, near top of 100-foot lodgepole pine snag, is about to be assisted by Francis Luskin, forest guard.

LESSON IN WARFARE . . . Army cadets and navy midshipmen observed combat battalion of marines stage mock beach landing operation as part of operation Camid II. After its completion, the observers inspected the phases and talked with the marines, some of whom were still in foxholes.

NEWS REVIEW

Joint Defense Pact Set; Fear Large Corn Loss

POLE-TO-POLE:

Mutual Defense

James Monroe, fifth President of the United States, had his say, in spirit, at least, at the inter-American defense conference at Petropolis, Brazil, in August, 1947.

When the conference agreed on a mutual aid treaty for North and South America and their territorial waters, and set up a vast, North Pole-South Pole hemispheric security zone, the celebrated Monroe doctrine was developed to its logical conclusion 124 years after its inception.

This was the burden of the Monroe doctrine in 1823: "It is only when our rights are invaded or seriously menaced that we resent injuries or make preparations for our defense . . . in this hemisphere . . ."

Today, the Americas are making preparations for hemispheric defense in advance of any menace or invasion of their rights. The mutual defense treaty embodies three main points:

1. In the case of armed attack from outside the hemisphere, all nations have the automatic right to meet the attack with military measures.

2. If military attack occurs inside the hemisphere, American nations may go voluntarily to the aid of the victim, with consultations to follow.

3. If attacks occur both inside the hemisphere and outside the security region, immediate consultations will be called.

Thus, despite the opposition of some Latin American nations to the U. S.-espoused "Monroe doctrinism," it appeared certain that the "hands off the Americas" policy was in for a big revival in the atomic age.

TORRID ZONE:

Corn Declines

Thermometer-happy Americans, struggling feebly in the moist clutches of a record heat wave, could take cold comfort from the fact that temperatures were being exceeded in height only by the price of corn.

With abnormally hot weather prevailing over most of the nation, grains continued to deteriorate from lack of moisture and prices of both corn and oats hit new record highs. September corn was selling at $2.45 a bushel and September oats zoomed to $1 08¾.

The grain market prices went through the roof following a department of agriculture report that the country's heat-seared corn crop would produce only 2,437,000,000 bushels, a 223 million bushel drop from the August 1 estimate.

Although agriculture department officials had hoped earlier this year for a 3 billion bushel corn crop to keep food production high, weeks of hot, dry winds shrivelled that hope, and the corn crops of Iowa and Illinois, major producing sections, continued to decline steadily.

HEADLINERS

IN WASHINGTON . . . John Sampson Kirby, 69, (above) of Tennessee was placed under observation after police had nabbed him packing a pistol in the capitol building and declaiming loudly that he had "just been elected president of the United States."

IN NEW YORK . . . Virginia Walton Brooks, 14, just returned from an African hunting trip with her parents, proudly revealed that she had shot not only an elephant and a lion but also such esoteric creatures as a kongoni, two gerenuks, an oryx, a bat-eared fox, an impala, two dik-diks and a klipspringer.

IN CHICAGO . . . Mrs. Anna Metzger, 47, had had a pain in her leg for 40 years, finally became curious, pressed the irritated area and pulled out a two-inch sewing needle.

SAY UNCLE:

Ford Gives Up

Abandoning his laudable, if nonconforming, efforts to stabilize automobile prices, Henry Ford II announced that prices on "most models" of Ford passenger cars and all truck models would be boosted from $20 to $97, effective immediately.

It was an average increase of 4.2 per cent, the announcement said, the rise being dictated by "the simple necessity of keeping Ford Motor company on a sound economic basis."

The action, following price increases by virtually every other automotive manufacturer, marked the defeat of Ford's lonely stand against the forces of inflation.

All this gave rise to a disturbing question: If the Ford dynasty is unable to hold the line against inflation, what, if anything, can?

THE SWIFT:

Oysters Lose

Oysters simply aren't fast enough to get away from predatory snails whose pace has been clocked officially at .000363005 miles an hour.

Plodding along on a treadmill at the University of Maryland fish and wildlife laboratory, a test snail covered 22 feet and ½ inch in 11 hours and 30 minutes — a pace swift enough, at least, to overtake an oyster.

Purpose of the laboratory's snail-timing experiments is to slow the little creatures up even more. As things stand now, they're doing too much damage to Chesapeake Bay's oyster crop.

FIRST VICTIM

Deflation a Threat to Farmer

Producers of farm commodities, although strongly entrenched in the present economy and apparently destined to remain so, at least for the immediate future, may be the first group to feel the full impact of any reversal of the current inflationary trend.

That warning was issued by federal reserve board researchers in a midyear study of the position of agriculture, indicating that, even in flush times, the well-being of farmers is in a state of delicate balance.

If the present boom were to develop into a tailspin, price falls in the agricultural commodity field probably would be greater than in other areas of the economy, the report points out. Record returns to farmers attributed to prosperous urban consumers and an almost unlimited demand from abroad could be reversed in a flash.

The federal reserve board survey explained the danger of deflation to farmers by citing three factors now operating to keep prices high.

1. The share of consumer incomes going to food consumption is much larger than has been customary.

2. Profit margins of producers and distributors are greater than usual.

3. Speculative factors play an important part in maintaining prices on numerous markets.

"Consequently, with any reversal of inflationary tendencies, food prices may be particularly subject to downward pressures."

While the financial position of farmers has undergone a vast, general improvement as compared with pre-war years, many individual farmers have increased their indebtedness, and the new debt is written on the basis of sharply advanced values.

In particular, the report declared that land values must start declining before much longer. Thus, while the farmer is enjoying a high level of income and prosperity as a result of the prevailing inflationary economy, the same forces which are now operating to his benefit appear as a lurking but altogether possible danger to his future security.

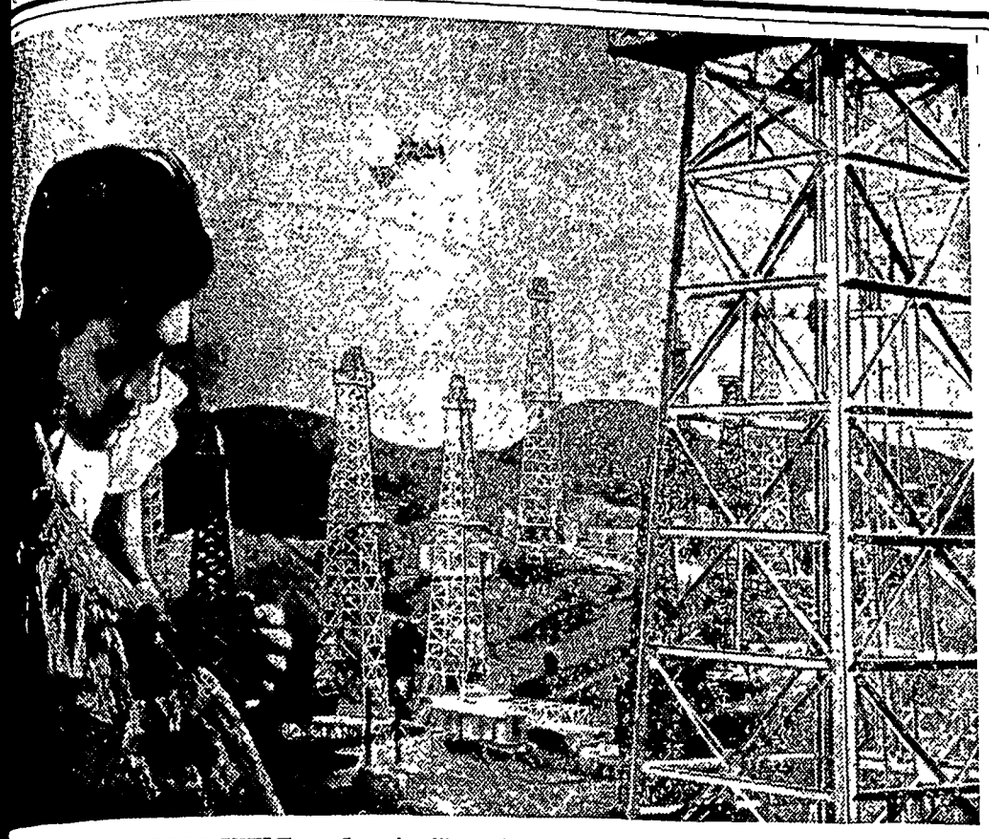
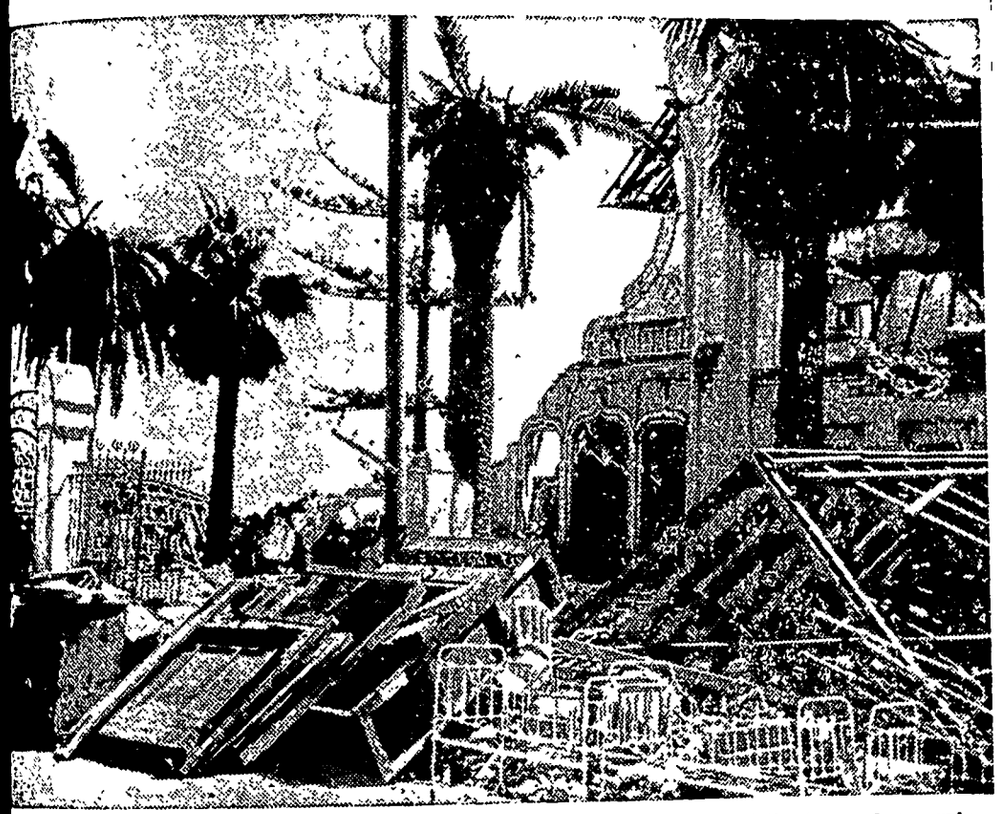
DOAN'S PILLS



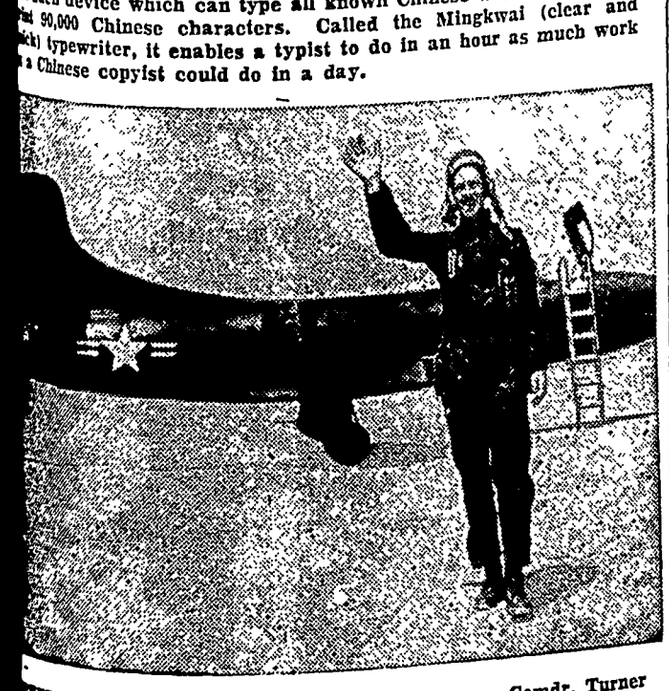
WELLS, HOLLYWOOD STYLE . . . Looming like a giant over this startlingly life-like miniature oil field, Hollywood technician makes a final adjustment on an oil derrick before cameras begin to roll. The oil field scene was used in a film, produced for Shell Oil company, which traces the growth of the oil business from a single well to the industrial colossus it is today. More than a year was spent in making the film, which takes but 23 minutes to show on the screen.



AST LEVELS FOUNDLING HOSPITAL . . . One of the more pitiful results of the tremendous explosion in Cadiz, Spain, when 2,500,000 pounds of explosives in the Cadiz arsenal and naval torpedo factory blew up was the destruction of this foundling hospital. In the foreground of the picture are some of the empty beds of children who died in the disaster, which claimed more than 200 lives in the district and brought injuries to additional thousands.

LAST, A CHINESE TYPEWRITER . . . Lin Yutang, Chinese author, is shown at his New York home as he introduced the Chinese typewriter, fruit of 30 years' work, which he invented. It is the first such device which can type all known Chinese words, and it can print 90,000 Chinese characters. Called the Mingkwai (clear and quick) typewriter, it enables a typist to do in an hour as much work as a Chinese copyist could do in a day.

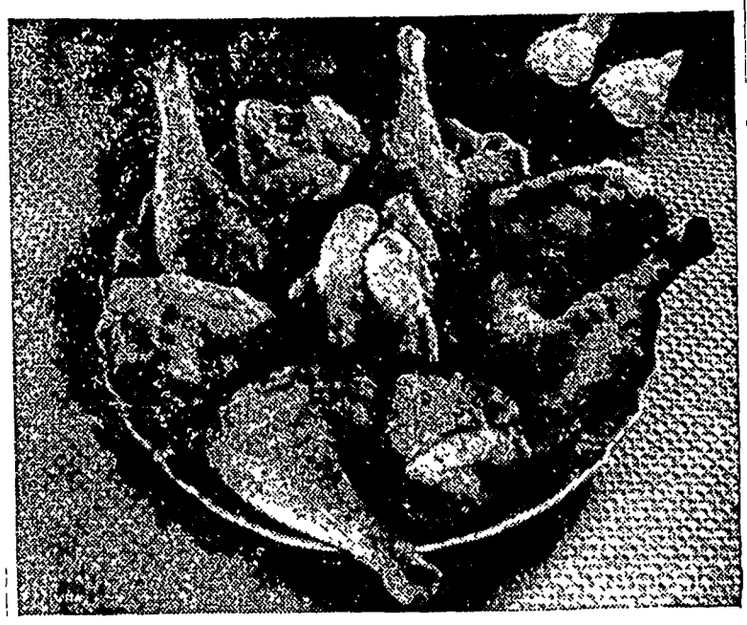
AIRBORNE . . . This is not a picture of a man taking pre-flight training. Ray Apolskis, member of the Chicago Cardinals professional football team, is working out at Waukesha, Wis., to get in shape for the grueling, bone-bruising season ahead.



SPEED RECORD BROKEN IN RECORD TIME . . . Comdr. Turner Caldwell Jr., shown here walking away from the Douglas Skystreak research plane in which he set a world's air speed record of 640.7 miles an hour at Muroc Field, Calif., held the title of the fastest man in the world for just five days. His record was broken by marine Maj. Marion Carl who piloted the same plane over the three-kilometer course for an average speed of 650.6 miles an hour.

PAWN OF WAR . . . The look of a hunted animal is on the face of this Indonesian woman as she searches in the dirt of a street in Batavia, Java, for grains of rice to eat. She is one of the nameless little persons who receive no glory from war, only horror and hunger.

HOUSEHOLD MEMOS... by Lynn Chambers



Serve Chicken for Economy's Sake

(See recipes below.)

Chicken Cookery

According to the Commodity Index, which records the rise and fall of wholesale prices, poultry today is selling at prices we were paying in 1926. Needless to say, this means that at a time when other foods have soared, poultry is at a low level

With a favorable supply and price, you can plan to use a lot of poultry now, and give your family something of a treat with unusually prepared chicken dishes.

Chicken should be cooked to "fork tenderness." There is little excuse for underdone or overdone chicken if you follow the recipes given today, with particular care to temperatures and time for the cookery. A moderate temperature is best to use for chicken so as not to shrink it too much, make it dry or tough.

Most people who like chicken say there's no better way to cook it than to fry it. The generally accepted method is as follows:

1. Rub seasoned flour into pieces. For each pound of chicken, blend ⅓ cup flour, 1 teaspoon paprika, ½ teaspoon salt, and scant ⅛ teaspoon pepper. Save left-over flour for gravy.

2. Heat enough fat in a heavy skillet to give a depth of about ½ inch, using any desired fat. A drop of water should sizzle when temperature of fat is just hot enough.

3. Start meaty pieces first, slipping less meaty pieces in between as chicken browns. Avoid crowding; use two skillets if necessary.

4. As soon as chicken begins to brown, about 10 minutes, reduce heat, and cook slowly until tender, 30 to 60 minutes, depending on size of pieces. Cover tightly as soon as it is a light, uniform tan.

5. Turn 2 or 3 times with 2 spoons or fork and spoon to brown and cook evenly. Avoid piercing with fork.

6. Add 1 or 2 tablespoons water before covering, especially recommended if pan cannot be covered tightly, or if bird is heavier than 3 pounds.

7. Uncover last 15 minutes to recrisp skin if desired. The liver and precooked heart, gizzard, and neck may be floured and browned with chicken the last 15 minutes.

8. Lift fried chicken to hot platter. Prepare gravy in pan drippings.

Huntington Chicken
(Serves 6 to 8)

2 cups macaroni
½ tablespoon butter
½ tablespoon flour
½ cup cream, scalded
1 cup cream cheese
3 tablespoons pimiento, finely cut
1 cup hot chicken broth
2 cups cooked chicken, diced
Salt
Pepper

Cook macaroni. Make cream sauce of butter, flour, and cream. Add cheese, pimiento, and chicken broth; mix. Add chicken and macaroni, add seasonings. Pour into buttered casserole. Bake in a moderate oven (350 degrees) 30 to 45 minutes.

Beverage
*Recipe given.

***Chicken Chop Suey with Mushrooms**
(Serves 6)

Cooked meat from 4 lb. fowl
2 tablespoons fat
1 cup sliced onion
1 cup shredded carrot
3 cups diced celery
1 green pepper, shredded
2 teaspoons salt
1 scant cup chicken stock or water
¼ to ½ pound mushrooms
1 cup sour cream
4 tablespoons flour
4 tablespoons water or stock
2 tablespoons soy sauce
3 cups boiled rice or fried noodles

Cook onion in fat until light yellow Add carrot, celery, green pepper, salt, and the 1 cup water. Cook until vegetables are barely tender and liquid is fairly well absorbed, about 15 minutes. Add mushrooms (sliced or whole), sour cream and chicken pieces and bring to a boil. Blend flour and 4 tablespoons water and stir into mixture. Cook until thickened, stirring constantly. Season to taste. Add soy sauce or serve it at table. Serve "bubbly-hot" with hot rice or fried noodles.

Barbecued Chicken
(Serves 2 to 4)

1 young chicken, 1½ to 2½ pounds cut in half
Giblets and neck

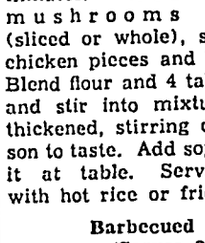
—*—

Barbecue Sauce

1 teaspoon salt
¼ teaspoon garlic salt
½ teaspoon pepper
1 tablespoon paprika
1 tablespoon sugar
1 medium onion, finely chopped
1 cup catsup
¼ cup fat
½ cup giblet stock or water
⅛ cup lemon juice or vinegar
1 tablespoon Worcestershire sauce

Clean and cook giblets by simmering in seasoned water for 1 to 2 hours or until tender. Prepare Barbecue Sauce by blending salt, pepper, paprika, and sugar in saucepan. Add onion, catsup, fat, and water. Heat to boiling. Remove from heat. Add lemon juice and Worcestershire sauce. For basting during cooking, blend ⅓ cup sauce and ⅓ cup giblet stock. Set aside remaining sauce for serving with cooked chicken.

Place neck and halves of chicken in skillet or Dutch oven. Baste both sides of chicken with the diluted sauce. Cover tightly and bake in a moderate oven (350 degrees) about 1 hour. Baste once or twice. Remove cover, baste with diluted sauce and continue cooking uncovered until chicken is tender and browned, about 1 hour.



Released by Western Newspaper Union.

LYNN SAYS:

Know Cookery Terms For All Recipes

To bake means to cook in an oven at a required temperature. Use an oven regulator or an oven thermometer if you have no other control.

To blanch means to dip in boiling water, usually for the purpose of loosening the skins.

To fricassee means to fry in a small amount of fat and to serve with a sauce.

To pan fry is to cook in shallow fat in a skillet. This is sometimes called sauteeing.

To broil or grill is to cook over or under a clear fire or in a broiling oven. Do not pierce broiled foods with a fork or they will loose their juices.

Creaming means letting food stand at room temperature until it is softened and then working with a wooden spoon or an electric mixer until it is creamy. The phrase is often used of butter,

SAVE TIME WITH THIS NEW RED STAR RECIPE

QUICK METHOD ROLLS

2 teaspoons sugar
½ cup warm water
2 packages Red Star Dry Yeast
⅓ cup sugar
2½ teaspoons salt
1 cup lukewarm water
2 eggs, beaten
5½ cups sifted flour
4½ tablespoons shortening

Dissolve 2 teaspoons sugar in ½ cup water. Add 2 packages Red Star Dry Yeast. Let stand 10 minutes. Place ⅓ cup sugar, salt and 1 cup lukewarm water in a large bowl Stir yeast solution thoroughly and add to this mixture Add beaten eggs and half the flour, mixing well. Add melted and cooled shortening, stirring vigorously Add remainder of the flour stirring until well mixed Place dough on lightly floured board and knead for 3 minutes. Shape into smooth ball and place in greased bowl. Brush top lightly with shortening Cover and let rise in warm place for 30 minutes. Punch dough down, then roll to ½ inch thickness. Cut the rolled dough with a 2½ inch floured biscuit cutter Make crease through middle of each piece with floured knife handle. Brush with melted butter and fold over pocketwise Place close together and let rise in warm place for 45 minutes. Bake in moderately hot oven (425° F.) 15 to 20 minutes. Makes 30 rolls.

Mr. and Mrs. M. D. Kubicek and daughter, Ann; Mr. and Mrs. D. S. Day of Mason City, and Terry Koerner were dinner guests at the home of Mrs. J. N. Day.

Mr. Joe Nyby of Lake View came Tuesday morning and visited until Wednesday afternoon with Mr. and Mrs Elwood Geary. Elwood is Mr. Nyby's nephew.

Kenneth Medin, Quentin Stille, and Ned Howard drove up to Steel Lake in Minnesota Saturday for a week end of fishing. They also stopped near Mankato to fish for catfish. The men had fair luck.

Wesley Patterson, Klemme high school coach, accompanied his father from near Bancroft to St. Louis Friday afternoon where father and son took in two big league ball games Saturday and Sunday.

A number of Klemme and Liberty people attended the afternoon and evening services at the Garner Methodist Church Sunday. The Garner Methodist Church was celebrating its 75th anniversary.

Mr. and Mrs. Earl Pethram and Bernice, and Mrs. Walker from Hampton were supper guests at the W. F. Pavey home Sunday evening. Mrs. Walker is a sister of Grandma Pavey who is staying at the Pavey home.

Mrs. C. A. Arnold, Miss Minnie Lenz, Mrs. Martha Ridder, and Mr. and Mrs. Harry Gibbs and Isabelle, were dinner guests on Sunday at the home of Mrs. Henry Kuppinger and Otto Meier at Mason City. They also visited Dr. and Mrs. C. B. Tice.

Mr. and Mrs. C. G. Waterman and their son-in-law and daughter, Mr. and Mrs. Lyle Wilcox, returned Monday evening from a week's vacation trip into Minnesota and Canada. They took the scenic North Shore Drive from Duluth to Port Arthur, Canada. On the trip they visited Mr. and Mrs. Conrad Quandt at Two Harbors and also saw Mrs. Fred J. Arnold and son, Bobbie. Bobbie is a hay fever sufferer and had to go north for relief this year.

If you dont want it, sell it with a Times want ad.

Jolly Workers Club Meets In September

The Jolly Workers Club met at the home of Lulu Dutheridge Wednesday, September 10, with 17 members present.

Luella Boelman, our Secretary, was ill and unable to attend the meeting so Lois Schlichting read the roll call. Mildred Gruis our chairman for buying the Christmas gifts for the family in Holland showed all the gifts the committee had bought. Everyone was well pleased so they were wrapped and ready to send for Christmas. Birthday songs were sung to those having birthdays the past month.

Lily Pearson dismissed the meeting and a nice lunch was served by Lulu Dutheridge with Maude Bachman assisting. The October meeting will be held at the home of Lily Pearson with Bell Karjens assisting.

Henry Smid Injured In Fall

Henry Smid received some cuts and bad bruises last Friday evening when he fell down cellar backwards at the Bernard Smid home in southeast Klemme.

Henry had not been feeling well that day and evidently he "blacked out" momentarily when he entered the house from a grade enterance. As he fell his arm hooked onto a bucket of water which fell on him and revived him as he lay on the basement floor. He received a cut on his face and bruises on his back and body which caused him to be off duty at the Northern for a few days.

GRADE TEACHERS TO ATTEND INSITUTE

There will be no school in the Klemme school for pupils from Kindergarten through the 8th grade on Friday, September 19. High school students will be required to attend as usual on Friday.

The elementary teachers of Hancock County will attend a County Institute at Garner on Friday and Saturday September 19th and 20th. The Institute is sponsored by the State Department of Public Instruction. The law permits the Department to require the presence of all grade school teachers.

ENGINEER WILL DECIDE NEED OF DITCH SURVEY

William Henschen has been appointed engineer to make a survey of lateral No. 10 of drainage districts No. 3 and 4 to determine the necessity and probable cost of a cleanout of the laterial petitioned for by A. Abele et al. The appointment was made by Hancock county Supervisors on Thursday.

Attended Father's Funeral

Funeral services were held at Forest City Wednesday for Mr. John Johnson, father of Kenneth Johnson of Goodell. The Johnson family attended the funeral.

Mr. and Mrs. Edd Schoenwetter of Garner had as their Sunday dinner guests Mr. and Mrs. Merle Schoenwetter and family, Mr. and Mrs. Russell Hanson and family of near Kanawha, Mr. and Mrs. Forest Cutshall, Mr. and Mrs. Elwood Geary and Wayne Schoenwetter.

Soft Corn Bulletin Available

The best time to cut corn fodder is when the ears are well dented and the leaves are green. Soft ears can be saved by making ear corn silage. It makes good feed for cattle and it can be stored in a regular or temporary silo.

This information, along with important points on harvesting, storing and utilizing this year's crop, can be found in a new pamphlet just sent out by Iowa State College.

The pamphlet, number 122, is entitled "When You Have Soft Corn." It is available in County Extension Directors Henderson's office. He has enough pamphlets on hand to supply all Hancock County farmers who want copies.

PROTEINS - Best Buy In History

•

At today's prices, the CASH savings you can make by using ration-balanceing Supplements are the greatest in history.

Also — conservation of feeding grains now, with present crop prospects, is really important. Those grains saved this summer might be worth much more this winter.

Remeber — one ton of FELCO FEEDS Protein Feed can save as much as 125 bushels of corn in a cattle ration and as much as 250 bushels of corn in a hog feeding ration. And even more on poultry rations! Supplement Feeds at present price levels have never cost less!

Methodist Conference Made But Few Minister Changes

REV H. E. HARVEY RETURNED TO THE KLEMME AND LIBERTY CHARGE

Kanawha Only Town Near Here To Get Change Of Ministers This Year

Northwest Iowa Conference Held At Fort Dodge Last Week

The Northwest Iowa Conference which met at Fort Dodge last week and which closed on Sunday, made very few changes. There were only six changes of ministers in the Algona District.

Of interest to the Klemme and Liberty people, H. E. Whyte remains at Rockwell City, J. L. Ralston remains at Somers, Wm. Zabilka remains at Vincent and Harvey Nelson remains at Sibley.

The Algona District

The Northwest Iowa Conference made the following appointments in the Algona District. The changes are marked with an * and the entire list follows:

Alexander, J. L. Norris
Algona, O. W. Brand
*Armstrong, (to be supplied)
Ayrshire, J M. Howdeshell
Belmond, W L. Patterson
Britt, F F. Robinson
Buffalo Center-Woden, E. R. Peterson
*Burt, W. S. Handy
Clarion, L. H. Preul
Clear Lake, W. M. Hubbard
Corwith, L. J. Gordon

West Bend-Cylinder, D. D. Samuelson

HELLO, FOLKS!

Graduates To Great Grandmother Class

Mrs. Herman Bridges received word Thursday that she is now a great grandmother as Mr. and Mrs. Claude Shirley are the parents of a baby boy born on September 18th, at De Ridder, Louisiana.

Mrs. Shirley is the former Virginia Stille, daughter of Mr. and Mrs. Paul Stille of De Ridder. Mrs. Stille was the former Miss Maude Bridges, daughter of Mrs. Herman Bridges.

Hancock County Teachers Institute

All elementary schools in the county were closed on Friday, September 19th and the teachers attended the two-day workshop County Institute held in Garner Friday and Saturday.

Two members of the State Department of Public Instruction staff, Mr. Arthur Carpenter Northeast Iowa Supervisor, and Miss Green, Supervisor of Rural Education, and three members of the Iowa State Teachers College Extension Service staff, Misses Shepherd, Sires and Holt, conducted the institute in cooperation with Charles S. Whitney, County Superintendent of Schools.

The entire workshop was built around reading including the Use of the Handbook in Reading, demonstrations by the instructor assisted by pupils from the Garner Schools, and a discussion of Best Books for Children by Miss Green.

We feel Hancock County is fortunate to be one of nine in the State of Iowa to have such a workshop type institute this year. One hundred eighteen teachers registered for the meeting. Many teachers expressed themselves as favoring this type of institute and consider it superior to the lecture type usually held.

JULIUS PRIEBE AND GRANDDAUGHTER HONORED AT FAMILY GATHERING

Julius Priebe was 80 years old September 13th and his granddaughter, Beulah Goll celebrated her birthday on September 14th, so those two important events called for a family gathering at the Priebe home. Those present besides Mr. and Mrs. Priebe and Buelah were Mr. and Mrs. Herman Priebe, Mr. and Mrs. Dean Rasmus and daughter, Mr. and Mrs. Herman Schmidt and son, Mr. and Mrs. Paul Goll and daughter, Mr. and Mrs. Erwin Priebe and daughter and Mr. and Mrs. Fred Schmidt and family. All enjoyed a fine time.

Mr. and Mrs. Julius Priebe celebrated their Golden Wedding Anniversary on June 8th of this year.

Ronald Barz Gets Fall Plowing Done In A Big Hurry

Ronald Barz, who has rented the Edmund Josten farm for the coming year got his plowing done in a big hurry Tuesday Ronald is employed at the Jacobs Hardware and so does not have time to do any farm work at present, so some of his relatives and friends ganged up on him Tuesday and went to work on the farm plowing.

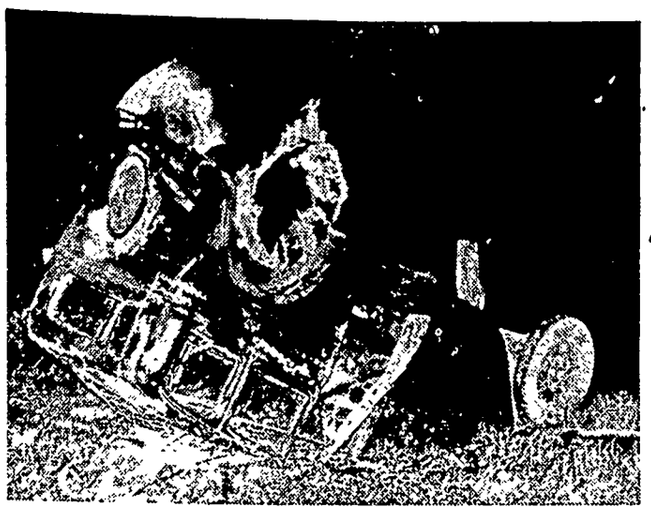
Those who were in the fields besides Ronald were Glenn Terhufen, Milvern Barz, Walter Rosendahl, Marvin Barz and Harvey Barz.

GIRL SCOUT NEWS

The Klemme Girl Scouts held their last meeting in the park, Tuesday, September 16th. The program consisted of playing games and singing songs led by JoAnn Hummel. The main business was election of officers for the coming year. They were as follows: President, Jo Ann Hummel; Vice-President, Lois Ann Jacobs; Treasurer, Charlotte Neurhring, Scrib, LaNelle Harvey.

The Misses Gertrude Grosshuesch and Doris Johnson are the leaders in charge.

—LaNelle Harvey



A driver who was not breaking any law, and two passengers with him, burned to death in this inferno when a reckless overtaking motorist tried to pass their car where the way was too narrow. His engine rammed into the gasoline tank, setting it afire, and the car was knocked off the road, end over end into a field, where it quickly turned into a molten furnace. The lawbreaker himself was not injured —such is the irony of highway accidents. National Conservation Bureau safety specialists report that improper passing ranked fifth as a cause of motor vehicle deaths last year; most often it was combined with excessive speed which accounted for at least 8,000 fatalities.

Former Klemme Youth Was Ordained A Minister

REV. EARL JOSTEN ORDAINED AT METHODIST CONFERENCE

Rev. Earl Josten, son of John Josten of Klemme, was ordained a minister and admitted to the Des Moines Conference Sunday at the Northwest Iowa Conference at Fort Dodge.

He has been a licensed local preacher and served congregations at Carlyle and Des Moines.

He is a graduate of Morningside College and for several years taught music in several high schools. He studied at Chicago a short time and then completed his theological course at Drake University. He has been preaching for the past three years.

Family Gathering Held

Mr and Mrs. Lyle Liebendorfer of Mason City, accompanied by Mrs. R. A. Jorgenson, Sr. drove to Kansas City Friday morning for a visit at the Hugh Chapman home. Other relatives at the Chapman home were a sister, Mrs. Everett Mendell and husband, and their son, Sheldon Mendell. wife and baby, all of Los Angeles, California, Mr and Mrs David Chapman of Merriam, Kansas. On Sunday Ray Jorgenson, Jr, R. A. Jorgenson, Sr. and Bob Liebendorfer of Clear Lake flew to Kansas City to spend the day at the Chapman home Sunday afternoon, Mr. and Mrs. T. E. Davis of Council Bluffs drove in. Mr. Davis, age 90 stays at the Chapman home. He is the father of Mrs. Hugh Chapman, Mrs. R. A. Jorgenson, Mrs. Everett Mendell, Mrs. Lyle Liebendorfer and Mr. T. E. Davis. Two other sons of Mr. Davis, David N. Davis and John C. Davis of Los Angles, were unable to be present.

The occasion was also the first time in ten years that the four cousins in the family group, Bob Liebendorfer, Ray Jorgenson, Jr., Sheldon Mendell and David Chapman had been together in ten years. All four young men were in the Army during the war.

DO YOU SING AS YOU DRIVE?

We suggest here a few appropriate titles—

At 45 miles per hour sing
"Highways Are Happy Ways."
At 55 Miles per hour, sing
"I'm But a Stranger Here, Heaven Is My Home."
At 65 miles per hour, sing
"Nearer My God To Thee."
At 75 miles per hour, sing
"When the Roll Is Called Up Yonder I'll Be There."
At 85 miles per hour, sing
"Lord, I'm Coming Home."

—Contributed.

KLEMME YOUNG PEOPLE ATTENDED METHODIST CONFERENCE

Had Largest Youth Representation Of Any Church At The Conference

Saturday was Youth Day at the Annual Methodist Conference at Fort Dodge and Klemme-Liberty had the largest group of young people from any charge. The adults accompanied them were Mrs. Wesley Patterson, Mr. and Mrs. Claude White and Miss Novella Bredbenner. Miss Bredbenner was on the program and spoke on "The Recreation School at Clear Lake."

The young people from Klemme and Liberty who were present were the following 14 girls: Erdene Nelson, Lois Stille, Rose Schaefer, Irene Menage, Marjorie Lau, Beverly and La Vohn Beier, Gloria Haefner, Ruth Smith, La Nelle Harvey, Jo Ann Hummel, Shirley Bisom, Isabelle Gibbs and Alice Anderson.

Shower Held In Honor Of New Baby

Ronna Ja Nelle Gibbs, baby daughter of Mr. and Mrs. Ronald Gibbs is starting out early to have parties. On September 12, her aunts, Mrs. Loren Gast, Mrs. Kenneth Zwald and Mrs. Kenneth Gast gave a baby shower in honor of their little niece, at the Ronald Gibbs home.

Those present besides the above mentioned were Mrs Harry Gibbs and Mrs. Herman Gast (grandmothers), Mrs Martha Ridder, Mrs. C A. Arnold, Miss Minnie Lenz, Mrs. Clara Stille, Mrs. James Fredin and Mrs. O. Fredin of Fort Dodge, and Mrs. Asa Gibbs of Garner.

The afternoon was spent informally and Ronna received many nice gifts and the hostesses served a nice lunch.

W. S. C. S. Will Meet On October 2nd

The W. S. C S of the Klemme Methodist Church will meet at the church Thursday afternoon, October 2nd. Mrs. Emil Beier is the Worship Leader and the Program is in charge of Mrs. Roy Jacobs. The hostesses are Mrs. C. A. Larsen, Mrs. Clarence Kluckhohn and Mrs. Vern Bisom.

A quilt will be on the frame for the ladies to work on.

Methodist Youth Will Meet Here

An all Methodist Youth Fellowship party will be held at Klemme on Septebmer 26th at 7:30 p. m. All young people in high school and over are cordially invited. This will be the kick-off party for the winter work. Come and get acquainted with your counselors and each other. Bring your friends along.

Relatives Held Picnic At Park Sunday

Relatives held a picnic in the Klemme Park in honor of Mrs. Ella Hartbeck and Mrs. Ella Holthaus of Manchester, Iowa, who came for a visit at the Esther Barz home and with other relatives over the week end. The two ladies are nieces of Grandma Wille.

Those who attended the picnic in honor of Mrs. Hartbeck and Mrs Holthaus were Grandma Wille, Mrs. Esther Barz and Edward, Mr. and Mrs. Milvern Barz, Mr. and Mrs. Fred Barz, Mr. and Mrs. Walter Rosendahl and family, Mr. and Mrs. Edmund Josten and family, Mr. and Mrs. Harvey Barz and family, Mr and Mrs. Marvin Barz and Darlene, Mr. and Mrs. Ronald Barz and two daughters, and Mr and Mrs. Eugene Greiman and family.

Abele Family Reunion At Liberty Church

The first annual Abele family reunion was held Sunday, September 14th at the Liberty Church. A picnic dinner was enjoyed at noon. The afternoon was spent playing games and visiting.

Those present were: Mrs. Edna Zwald; Mr. and Mrs. Merwin Zwald and Chalice; Mr and Mrs. Kenneth Zwald, Winola and Eugene, Mr. and Mrs. Lloyd Zwald, and Arlene; Mr. and Mrs. Delbert May and Russel.

Mr. and Mrs. Art Abele; Mr. and Mrs. Oren Abele, Larry and Rosalie; Mr. and Mrs. John Abele and Marby; Mr. and Mrs. Carlyle Abele, Robert, Beverly, and Dean; Mr and Mrs. Gordon Greiman, Patty and Janet.

Mr. and Mrs. Lewis Abele and Harry; Mr. and Mrs. Harold Abele, John, Robert, David and Linda; Mr. and Mrs. Bernard Pringnitz, Ruth Marie and Margaret; Mr. and Mrs. Dale Greiman, Florance and Stanley

Mr. and Mrs. Albert Abele, Iris and Lois; Mr. and Mrs Fred Griffen, Warren and Faye; Mr. and Mrs. John Schroeder, Eddie and Johnny and Leon and Betty Lou Griffen.

It is interesting to note when listing members of the families that there are 32 great grandchildren, 16 girls and 16 boys.

It is planned to hold the reunion the fourth Sunday in August next year

Klemme Merchants Defeat R. C. Soft Ball Team

Thursday night the Klemme Merchants soft ball team, who have been playing hard ball in league play this summer, went out to the Peace Reformed Church's lighted field and played the R. C. team. Klemme won 15 to 10.

Father Of Maurice Murray Died At Mason City

FIRST FROST!

North and Central Iowa recorded the first frost of the season Monday morning, September 22nd. In most parts of the state and in Hancock County the frost was light and evidently did little damage.

At Mason City, however, the government thermometer registered 31 degrees, one degree below the freezing mark. Most farmers and townspeople reported readings of 33 to 34.

WARNING! DON'T THROW LIGHTED CIGARETTES ON HIGHWAY

There have been a number of pastures afire this summer due to some careless motorist tossing away a lighted cigarette.

Tuesday the Carl Wille pasture caught afire, evidently from a cigarette tossed out along the road. Fortunately Carl saw the fire in time and had it under control before any damage was caused to buildings.

Watch your step . . . fires are easily started along the highways due to dry grass and weeds.

Mr. and Mrs. Emory Weaver Return From Trip To Ohio

Mr. and Mrs. Emory Weaver and Troy returned Friday evening from Ohio where they spent 15 days visiting friends and relatives. They visited relatives at Sidney, Mansfield, Botkins, Lakeview, Jackson Center, and spent some time at Dayton visiting with their cousins, Mr. and Mrs. Vic Greiman.

Mr and Mrs. Weaver accompanied Mrs. Weaver's brother Donald to Atlantic City where he was to report for his discharge from the U. S. Navy. Donald was delayed in Atlantic City, so Mr and Mrs. Weaver accompanied Emory's uncle, George Katterhenry to Iowa. He is visiting in the L. F. Weaver home and at the Louis Katterhenry home at Forest City.

Greiman Families Held Picnic In Klemme Park Sunday

The decendants of Fred and Dena Greiman, their families and relatives held a picnic at the Klemme Park Sunday. There was an immense crowd present as there were about one hundred cars parked around the park. All present had a fine time renewing acquaintances and talking over old times.

Attended Annual Conference At Fort Dodge Sunday

Those who attended the Annual Conference at Fort Dodge last Sunday from Klemme and Liberty were: Mr. and Mrs. Ben Coobs, Mr. and Mrs. John Chambers, Mrs. Martha Bredbenner, Mr. and Mrs. Roy Schaefer, Mr. and Mrs. Emil Beier, Bernice and Frances Tanner, Rev. and Mrs. H. E. Harvey, Mrs Vern Bisom, Mr. and Mrs. Herman Gast, Mrs. C. A Arnold, Minnie Lenz, Mrs. Martha Ridder and Mrs. Vivian Mace and Reverdy.

They heard Bishop C. W. Brashares preach in the morning; attended the Ordination service in the afternoon, and heard the Rust College Jubilee Singers give a concert. In the evening Dr. Roy L. Smith of Chicago was the speaker.

Garner Reformed Church

Rev. R. D. Stubbe

There will be choir practice in Zion Church on Thursday evening at 7:30.

There will be no services in either Zion or Peace Church on Sunday as the pastor will be gone.

THOMAS MURRAY SERVICE HELD AT BRITT

Military Rites Given At Graveside

Thomas J. Murray, 59, of 11 Adams N. W. Mason City, died September 16th at a Mason City hospital following a heart attack He had been a resident of Mason City about 4 years.

Mr. Murray was born Aug. 2 1888, at Postville, Iowa. In 1901 he moved with his family to Hancock County, where he resided on a farm until enlistment in the army at Garner, July 29, 1918.

He was assigned to the 26th Engineers at Camp Forest, Ga., and was discharged Feb. 4, 1919, at Camp Dodge. He was married to Hazel Mae Goepel, at Britt, February 16, 1922. They established their first home at Crystal Lake, where they continued to farm until 1941, when they moved to a farm southwest of Britt, where they resided for a short time before going to Mason City in 1943.

Surviving are his wife, a son, Maurice J. Murray, Klemme; twin grandchildren, Janet Ann and Jerry James Murray, of Klemme; 4 sisters, Mrs. Elmer Griggs, Crystal Lake; Mrs. Ella Mae Foster, Britt; Mrs. Frank Kilmer, Jacksonville, Fla.; and Mrs. Jack Stoner, Seatle, Wash., and several other nieces and nephews. He was preceded in death by his parents and two brothers.

Funeral services were held at 9:30 a. m. Saturday, Sept. 20, at the Holy Family Catholic Church, with Msgr. R. P. Murphy, pastor, in charge of requiem high mass, assisted by Father N. C. Barrett of Loras college, Dubuque.

Military services were held at the graveside at St. Patrick's cemetery at Britt, conducted by the American Legion Post 408 of Crystal Lake.

GARNER'S OLDEST RESIDENT DIED MONDAY

Jacob Olson, 95, died at his home in Garner Monday after a long illness. He was Garner's oldest resident. Mr. Olson is survived by his daughter, Miss Mabel Olson, of Garner, and one grandson.

Mr. Olson came to Garner in 1883 and resided there every since. He was employed as section foreman by the C. M. St. P. railway from 1883 until 1918 when he retired from active service.

More Blue Cross Enrollment Booths Set Up

The Hancock County Health Improvement Association announces the following enrollment booths for the Blue Cross Hospital and Medical Association Surgical plans, according to V. A. Cook, president. Central States office in Britt, October 3; Crystal Lake Bank, October 4; Pringle Store in Hayfield, Oct. 6; Goodell Bank, October 7; Garner Bank, October 9; Kanawha Bank, October 10; Klemme Bank, October 10; Corwith Bank, Oct. 11; and the Farm Bureau office any day Oct. 1 through Oct. 15.

The enrollment Period runs from October 1st through October 15th. This is your only chance to enroll in these health plans in Hancock County for at least one year. Anyone interested should be sure to be at one of the places mentioned for information and sign up.

Evangelical & Reformed Church

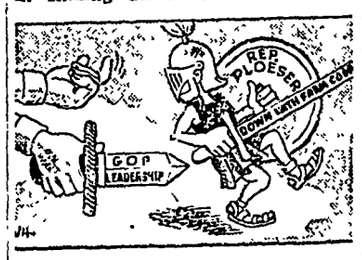
THE HOME TOWN REPORTER IN WASHINGTON

WALTER SHEAD, WNU Correspondent

Co-Op Probe Curbed

THE inside story is that farmers need not be unduly alarmed over the house small business committee inquisition against farm cooperatives. Despite advance promises of a battle to the death by Representative Walter C. Ploeser (R., Mo.) and pressure of big business and the National Tax Equality association, it is predicted that the outcome of hearings over the country will amount to little and the probe will be more or less a "face saving" device on behalf of Chairman Ploeser and the Republican party leadership

So if Congressman Ploeser had any dreams of becoming a knight in shining armor and a crusader



against farm cooperatives, either producer or consumer cooperatives, he has been effectively unhorsed by the GOP leadership

The reason is obvious. With a national election in the offing the Republican party does not dare alienate the traditional support of the farm and rural vote despite the tremendous pressure brought to bear by so-called independent business and the big business interests friendly to the Republican party.

As a matter of fact, word has gone out from farm leadership in Washington that the GOP is anti co-op and that unless this campaign against the farm organizations is toned down farmers will vote Democratic in 1948.

• • •

That Representative Ploeser was all set to take dead aim against farmer cooperatives until he was called on the carpet by the GOP leadership is indicated in his selection of lawyer Willis Ballinger as counsel for his committee. Ballinger is an out and out enemy of any kind of a cooperative, the author of a book called "A Vote by the People," in which he declares that cooperatives "are a technique for building a socialistic system in America," and of a pre-hearing statement that the house small business committee would prove that cooperatives were both communistic and monopolistic.

• • •

Study Farm Plan

The house agricultural committee, under chairmanship of Congressman Clifford R. Hope of Kansas, is scheduled to resume hearings October 7 on an over-all agricultural program to be considered by the second session of the 80th congress. At the same time the National Grange, the Farm Bureau federation and the National Council of Farmer Cooperatives are scheduled to meet to discuss general farm issues, particularly the question of changes in parity.

The outlook is that there will be no unanimous agreement on this subject since it is fairly obvious that any change in parity payments will be upward and there is reason to believe that with prices of all foods at the highest level in history further increases occasioned by higher parity payments would not be popular with the public.

• • •

Budget Requests Pared

President Truman has announced that all departments and agencies of government must hold their 1949 budget requests below the 1948 total. At the same time the president predicted a $4,700,000,000 treasury surplus in 1948, which he declared must be used to reduce the national debt and for an emergency reserve surplus. Despite this huge surplus, he still asserted he was against tax reduction because of the fact that this nation's commitments in view of the foreign situation could not be known at this time.

• • •

Although farm population has increased 2,360,000 in two years, the bureau of agricultural economics points out that present population is still 2,719,000 under the prewar level of 30,269,000 in January, 1940. The decline is attributed largely to wartime emigration from the farm to the cities and failure of many discharged servicemen to return to their farm homes.

• • •

Strategic Campaign

Strategy of the Democrats in the belated trust-busting campaign is to blame big business for high prices and since big business already is normally Republican, they will lose nothing and may gain votes by attacking big business. Even if the anti-trust suits go through the legal routine, it would take some five years to work the cases through the courts. In the meantime, it is likely that prices will have dropped but certainly not due to the anti-trust suits.

Worthy Objectives

Lesson for September 28, 1947

THE Book of Ecclesiastes, written by Solomon, B. C. 977, is profitable in the fact that it discloses the findings of a very remarkable man on life. Solomon tells us that he had tried every tempting offer of the world, but found it vanity. "Vanity of vanities, all is vanity," he declares.

Dr. Newton

Solomon is often referred to as the wisest of men. He does not make this claim, nor would I suggest it. As a matter of fact, Solomon was a very unwise man in many of the manifestations of his life. He had every advantage, but yielded to selfish pursuits of pleasure when he might have been serving his day and generation by the will of God.

Why do I point to Solomon as an unwise man? From his own testimony—"I gave my heart to know wisdom, and to know madness and folly; I perceived that this also is vexation of spirit. For in much wisdom is much grief; and he that increaseth knowledge increaseth sorrow."

• • •

Excellent Advice

EVEN so, Solomon was ready, by the time he wrote Ecclesiastes, to give some excellent advice. He had discovered that pomp and ceremony are meaningless—that they turn at last to ashes.

For example, "He (God) hath made everything beautiful in its time," chapter 3, verse 11. Solomon had dealt in the artificial. He had worn the most costly robes, lived in the finest palaces, had gardens set up to please any passing whim.

But now that he has come to see the vanity of men, he can at last open his eyes to the beauty which God creates. And now he has become a wise man, indeed. There is beauty everywhere if only we have eyes to see.

• • •

Words of Wisdom

THE next section of Sunday's lesson brings us to one of Solomon's greatest confessions. He says, chapter 3, verse 14: "I know that, whatsoever God doeth, it shall be forever; nothing can be put to it, nor anything taken from it; and God doeth it, that men should fear before him."

We do well to remember that God is, and that he is good, and that he is sovereign. "This is our Father's world," wrote Maltbie Babcock. Here is a truth for today. In our dismay over the atomic bomb, we are about to forget that God intended for man to discover atomic energy, and he expected man to have enough moral stamina to use this discovery for his good and God's glory.

Which brings us to the heart of the Preacher's message, chapter 12, verse 13: "Let us hear the conclusion of the whole matter; fear God, and keep his commandments; for this is the whole duty of man."

• • •

Seeking the Best in Life

SOLOMON, by his own testimony, missed much of the finer things of life, but he admonishes the reader to profit by his mistake and seek the best in life. For example, in chapter 2, verse 24, Solomon says: "There is nothing better for a man, than that he should eat and drink, and that he should make his soul enjoy good in his labour."

Every boy and girl in the world knows the joy of honest work, at least I hope so. Have you grown a beautiful flower? A vegetable garden? Cut a cord of fire wood? Then you know that work is one of the essential ways of seeking the best in life.

Then Solomon comes to the first eight verses of the last chapter—a golden section for memory. It is one of the first passages of Scripture I ever learned. I trust every young person reading this column will commit that passage to memory, if you have not already done so.

• • •

Testing Life's Philosophies

SOLOMON concludes his confessions with this probing declaration: "For God shall bring every work into judgment, with every secret thing, whether it be good, or whether it be evil."

What is he saying? He is reminding us that whatever may be our philosophy of life, such philosophy, together with our commitments thereto, will be tested out under the white light of God's ultimate truth. My conclusion is that I desire but one thing—to find and follow the will of God, which is always right and always best.

was ambling along in my car ting posts and watching my rrxas windshield - wiper as it ared out a clear segment of a d when I spied a smallish man king ahead. The back of his k seemed a bit scrawny and a e round hat sat on top of his head though a vagrant breeze had ged it there.

e was carrying a small bunch flowers. When I pulled alongside ked him if he wanted a lift. clothes were limp with the dy drizzle and he seemed to walked a long way. "I've only a short way to go now," he said. ain't hardly worth bothering ut"

limp in, anyway," I said, re all soaked."

All right. But I'm only going ed the bend there to Cypress ." As he got into the car he the flowers high so as not to k the stems.

Cypress Hills," I repeated by of showing a little interest. t's a cemetery, isn't it?"

Yes, it's a cemetery."

h," I said. Flowers, cemetery, I kept a respectful silence.

en we had driven a short dis- there was a great rumble of thunder through the low hills and the sky opened with a sudden torrent that made the surrounding landscape a wet blur

This Week's Best Fiction

"Guess I'll pull up alongside the road until it blows over," I told my nger. Neither of us spoke for le.

great clatter of the storm out- ndered the silence behind the windows a little oppressive. tly the little man said, "My buried over there." He point- the direction of Cypress Hills.

sorry," I answered. -"

st a few weeks ago."

s it sudden or—"

Ignored my unfinished ques- nd said absently, "It's strange a delicate thing life is. It can off by an accidental move a thoughtless word. Some- you say can snap it off just thin piece of thread"

e was a clap of thunder and rpour wrapped us in a fresh train. The little man told me ry. I give it to you in his as closely as I can remember ...

ha spent her whole life trying d me up into something. She right at the wedding. She out an inch taller than me e wore her flattest heels at dding and stooped over a ten the minister stood us up e ceremony. She looked so you'd think she was marrying naire. And me only a book- at the mill.

There wasn't much about me she could brag about, but she made up a lot of things. She said she won me away from a fancy blonde named Tillie and told how I saved the company's payroll when six armed bandits broke into the mill. Of course, there wasn't any blonde named Tillie and the six armed bandits were just two fellows who looked in when they saw a light and asked the road to Cloverdale.

Martha wasn't very strong and got spells now and then. They said it was her heart. I didn't pay much attention to what the doctor said.

I'd always make her rest after one of her spells and she'd come around fine. Jed Miley down at the post office told me his wife was like that and as long as they didn't get any excitement or shock they could live to be a hundred. Martha always rested when I told her but she never really rested even when she was lying down. Her mind was working. She was thinking how she could make the town know what a great husband she had. I tried to explain that it didn't matter as long as we were happy But she kept on being riled. I just kind of hoped something big would happen to me for Martha's sake.

"How did it go?" she cried. I shouldn't have told her.

Well, sir, it was like the hand of fate. Something big did happen at last. At least, it was big to Martha and me. Mr. Clawson, the president of the mill, was getting up a dinner in honor of the town council and asked me to make a speech!

When I came home and told Martha that evening she nearly jumped out of her skin. I had never made a speech before in my life. I was scared stiff at the thought of it. But Martha was going to prove everything she had said about me, through that speech. I just had to show Mister Clawson and the councilmen she was right.

The dinner was two weeks off and during that time Martha got some of the red back in her cheeks and she moved around more lively than she had in years. She made me get a dinner coat with all the fixings that went with it. She had the studs screwed in the shirt four days before the banquet.

After we wrote the speech we went over it here and there until it sounded right. Each evening after dinner we'd go to the kitchen where people couldn't look in and I'd stand on a chair and make the speech. I must have delivered that speech at least fifty times.

Well, the big night finally came. When I got dressed up I looked pretty good. Martha stood at the gate waving good-by and looked ten years younger. I was sort of choked up and happy. I was only sorry she couldn't come along. It was just for men, you know.

I left my car in front of the house and walked down to the Clifton Hotel so I could go over my speech just one last time. When I got there I said hello to everybody—even Longyear, president of the bank. I'd never spoken to him before. I felt pretty important.

THEY put me on the platform next to Charlie Simmons, who is quite a wit around these parts He has one of those ventriloquist dummies and also does card tricks. He told me a few jokes and I laughed although I didn't listen. I took a taste of the soup but after that I couldn't eat a thing. The speech kept pounding in my head.

After the ice cream Mister Clawson rapped for order and made a flowery speech about the town council. Then the head of the council said a lot of nice things about the mill and how much good it had done the town. More speeches followed. Each time the toastmaster got ready to call on the next speaker I shook all over thinking it might be me. It seemed that everybody in town was making a speech. My mouth got dry

Then Simmons got up and did his dummy act and some card tricks. He went over to the piano and sang some songs. People called for more. They all laughed and sang with him. I looked at my watch. It was eleven o'clock.

I managed to get my head clear and quickly thought over the first few paragraphs of my speech They were saving me for the last. A sort of surprise, I thought Then Mister Clawson got up and his voice sounded far off He said some of the boys wanted to play poker and others wanted to sit around and chat. It was too late for more speeches. After hearing Simmons any more talk would be tame. It was a wonderful evening and everybody had enjoyed it thoroughly. They all stood up and sang Auld Lang Syne. The dinner was over.

You can't blame me for not being able to think clearly after that. I was so disappointed I got kind of numb. I sneaked out through the back door and went home. Martha ran down to the front gate and grabbed me around the neck. She cried, "How did it go?"

I said, "They didn't call on me."

I shouldn't have told her the truth It was a dreadful blunder.

Painting Cellar Floor

Rubber base paints frequently are used for painting cement floors and basements, because they are resistant to alkali which would adversely affect some other types of paint. Before applying rubber base paints to a cement floor, any old paint should be removed with paint remover, all residue from the paint remover washed off with turpentine or mineral spirits, and the floor thoroughly dried out. A further precaution before painting cement cellar floors, either new or old, is to etch them with muriatic acid solution in the proportion of about one pint of acid to one gallon of water. If the acid solution is used the floor should be well rinsed to remove traces of the acid and then thoroughly dried before painting. Two coats of the rubber base paint then can be applied, being careful that the first coat is dry before the second coat is applied.

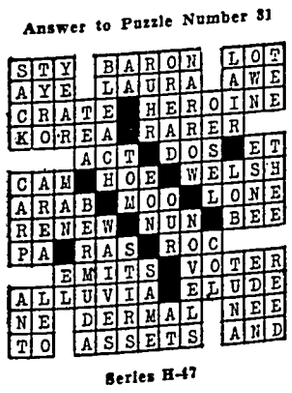
Answer to Puzzle Number 31



Series H-47

Sportlight

by GRANTLAND RICE

TIME, supposed to be endless, also can work in a hurry. It can make or break you in a week or a month. Or even in a day. In the course of a year it can turn everything upside down. Especially in baseball.

This thought happened along as we looked over the records of 1946 and 1947, as the roulette wheel of fate kept spinning.

Vernon

For one example, a year ago Mickey Vernon of the Senators led both big leagues with a .353 batting average. It was reported that Larry MacPhail had offered $150,000 for Vernon's contract, as at that time the Yankees had no hard-hitting first baseman in sight.

Vernon is now around 40th place among American league hitters, not including over 50 hitters in the N. L., which would leave Mickey in a spot close to the 90th mark. A year ago, there were wordy arguments as to whether Bob Feller of Cleveland or Hal Newhouser of Detroit was the greater pitcher. Bob Feller is now in about 20th place among the winners and Hal Newhouser's ranking is in 42nd.

A year ago, Dave Ferriss was on his way to winning 25 games. At this writing, Dave occupies the 26th spot on the pitching side.

A year ago, Howie Pollet and Murry Dickson were the two Cardinal stars, close to the top. Pollet was a 20-game winner. Currently, Dickson has been in the 45th slot and Pollet down as low as 50th place, among those who throw a baseball for a living.

These are just a few of many examples to show what the Old Doc with the sharp scythe can slip you, when he feels in the mood. He can lift you up—and he can also yank you down at even greater speed. He doesn't seem to care.

They Go Up and Down

Old Doc Time is a temperamental mug. He doesn't bother about names or reputations. He lets nature take its course. I interviewed him once, and this is all he had to say:

"As this old world goes roun' and roun',
Some go up — and some go down."

This can happen in baseball more than any game I know. Up and down—down and up. A year ago Vernon hit above .353 and George McQuinn was around .225. Now with Vernon at .273, McQuinn has been close to 300 most of the year. A combined shift of some 150 points. Even more.

But there are always a few who hang on, looking the Old Doc in the eye.

One of these is Ted Williams of the Red Sox. There seems to be a vague idea around that Ted has taken a dip this season. I'd like to take the same brand of dip.

They have built up a defense against Williams that was supposed to wreck him. He may not be the annihilator of other seasons, but he is still up there challenging for the home-run title in the A. L., the batting leadership and the runs-batted-in-honors.

I would say that in an off year for so many stars, Ted Williams is doing a great job.

Other Old Timers

So is Joe DiMaggio, in spite of numerous ailments. Joe DiMaggio is still the top artist in baseball.

A few of those who starred last season are still delivering.

One of these is Kiner of the Pirates, who led the National League in the home-run roundup a year ago, and is likely to lead it again. Johnny Mize, always a power hitter, is still shooting his salvos. So is Hank Greenberg.

But so far, 1947 has been featured by stars unknown a year ago. One is Ewell Blackwell of the Reds, with a 20-game season in his pocket. Blackwell has been rated far above Feller and Newhouser with a weaker ball club. The tall and lanky one, the human No. 1 iron, has been the pitcher of the year.

Another leading star is Harry Walker of the Phillies. Eddie Dyer, one of baseball's smartest, traded him to the Phillies in exchange for Ron Northey. At which point Harry Walker, Dixie Walker's brother, promptly took charge of the batting mark in both leagues. Working with a tail-end ball club, Walker has been one of the season's star performers. So has Blackwell.

You heard few rumors about Blackwell and Harry Walker a year ago. But they have driven the stars of 1946 into the gravel ditch.

* * *

Young Yankee Stars

The team feature of the year has been the number of winning performers George Weiss of the Yankee farm system has rushed to Yankee help. This list includes Yogi Berra, Frank Shea, Allie Clark, Vic Rashi and a few others who have carried the Yankees along.

With almost no advance build-up, the Yankee farm system has been far better than that of the Dodgers, rated, last spring, as the best.

Smart Well-Fitting Shirtwaist Frock

Australia to Standardize Rails Over 18,000 Miles

Australia's independent state railroads now plan to adopt the standard gauge, which means relaying the 18,000 of the 24,000 miles of tracks that are using other gauges. This chaotic situation, which requires passengers and freight to be transferred from one system to another as many as four times between certain cities, has existed for 94 years, incurred an economic loss of $2,400,000,000 and will cost to correct nearly $800,000,000.

HANCOCK COUNTY BOARD PROCEEDINGS

11TH ADJOURNED JUNE MEETING
Garner, Iowa
September 4, 1947

The Hancock County, Iowa, Board of of Supervisors, met pursuant to adjournment on above captioned date with F. J. Schoun, John Chambers, and Geo. Th. Gerdes, present.

The minutes of the last meeting were read and approved as read.

Supervisor Schoun is appointed a committe to investigate and cause repairs to be made in Drainage District No. 3 and 4, lateral 10; DD No. 48, main; DD No. 3 & 4, lateral 6 and 32; and DD No. 102, lateral 150.

Supervisor Gerdes is appointed a committee to investigate and cause repairs to be made in DD No. 44, Main.

On motion and second Wm. Henschen, is appointed engineer to make a survey and investigation as to the necessity and feasibility of a cleanout of lateral No. 10 of DD No. 3 & 4, petitioned for by Art L. Abele et al, and the probable cost thereof.

On motion and second the real property tax on Old Age Recipient Case No. 41-504, is hereby suspended as provided for by law.

WHEREAS, C. F Merten, County Engineer, recommends that all roads included in the Road Construction Program in the letting of May 8, 1947, be surfaced with gravel and further recommends a letting be held for such surfacing.

Be AND IT IS THEREFORE RESOLVED by the board of Supervisors of Hancock County, Iowa, that a public letting on gravel crushing and loading of approximately 30,000 cubic yards and the hauling of approximately 420,000 units. Said letting to be held at the Courthouse in Garner, Iowa, at 2:30 P. M. on the 22nd day of September A. D., 1947.

The County auditor be and he is hereby directed to cause notice of such letting to be published in the Garner Leader and Signal, a newspaper published at Garner, Iowa, which notice shall set out the time and place of letting, the kind and approximate kind of work to be done, a date for commencement and completion and that the board reserves the right to waive technicalities and to reject any of all bids

In the matter of the Guardianship of Edward Lurson, Probate No. 2785.

On motion and second the aggreement with Rush Gabrielson, Guardian, as approved by the District Court of Hancock County, Iowa, is approved.

BE IT RESOLVED that the claims hereinafter set out be allowed in amounts designated thereon and the county auditor be and he is hereby authorized and ordered to draw warrants on the several funds of Hancock County, Iowa, in payment of such claims in amounts set opposite each claim.

REGULAR SEPTEMBER MEETING
Garner, Iowa
September 6, 1947

The Hancock County, Iowa, Board of Supervisors met in session pursuant to adjournment on above captioned date with Supervisors John Chambers, George Th Gerdes, and Frank J. Schoun, present.

The minutes of the last meeting were read and approved as read.

On motion and second the contract with Concrete Products Corporation of Humboldt to furnish material on Drainage District No. 147 is hereby cancelled and a contract is awarded to Joe Needles for material. Said contract to be in the same amount and with the same provisions as the original contract awarded heretofore at a letting.

This being the 8th day of September A. D. 1947, a date heretofore fixed for a hearing on the classification and assessment on D D No. 146 as reported and filed by the commissioners heretofore appointed, the hour for said hearing having arrived and the board being fully advised, said hearing was held as scheduled.

The objection of Frank Pistek was read and considered and the following changes were hereby ordered made.

The assessment on the S 23.0 A SW ¼ SE¼ is reduced from .0740 to .0655 and the amount from $303.40 to $268.55.

The assessment on Hancock County Roads in Erin Township is increased from .0456 to .0541 and the amount from 186.96 to $221.81.

All other assessments to remain as reported.

BE IT THEREFORE RESOLVED by the Board of Supervisors in and for Hancock County, Iowa, acting for and in behalf of Drainage District No. 146, Hancock County, Iowa, that the changes listed heretofore in the assessments of benefits are hereby ratified and approved and all other assessments are approved as reported by the commissioners.

The foregoing resolution was offered and read by Supervisor Schoun, who moved its adoption, seconded by Supervisor Gerdes, whereupon John Chambers, Chairman, placed the motion on its adoption and upon roll call the vote thereon is F. J. Schoun, John Chambers and Geo. Th. Gerdes, aye. Nays, None, whereupon the chairman declared the resolution duly adopted.

This being the 8th day of September A. D., 1947, a date heretofore set for a hearing on the assessment and classification of Drainage District No. 145, the hour of said hearing having arrived, the proof of publication being on file and the board being fully advised, said hearing

From where I sit ... by Joe Marsh

We All Need Fun!

Nobody in Our Town is exactly lazy (even though Pete Swanson's missus claims he sleeps till seven A.M.). But the hardest working man of all is Doc Hollister—on call, morning, noon and night.

Funny thing, Doc's favorite prescription to his patients is: You ought to have fun. The pace of modern living, even on the farm, demands some relaxation.

And as Doc says—fun is a personal thing. For the missus it may mean a movie or a good book; for Dad, a mellow and refreshing glass of beer; and for the kids, parchees or the radio. Doesn't mean everybody has to like the same thing—so long as they relax, have fun, together, in the home.

Doc doesn't have much time himself. After a hard day, he'll relax before the fire with a glass of beer—and wait for the phone to ring again. And from where I sit, Doc deserves each well-earned minute of that relaxation.

Joe Marsh

ZONOLITE

Now is the time to think about INSULATION for this winter. Coal is going to be scarce and high in price and for that reason alone you should think more about INSULATION than ever before.

Many of our users report to us that they have saved 30% or more on their fuel bill every year since they have insulated. Not only does insulation cut down on your fuel consumption, but it also makes your house more comfortable both in winter and summer.

We have ZONOLITE and Johns Manville ROCK WOOL Batts in stock.

INSULATE TODAY

Northern Lumber Co.
Lloyd Sherwood, Mgr. Klemme, Iowa

It appearing that objections are on file which should receive the serious consideration of the board and in order to better acquaint themselves with the objections and the substance thereof, the hearing on the classification and assessment is hereby adjourned to Monday September 15, 2:30 P. M. at which time further hearing on the classification and assessment on Drainage District No. 16 will be had.

This being the 8th day of September A. D. 1947, a date heretofore fixed for a letting on the cleanout of the South Main of D D No. 1 and 2, Hancock County, Iowa, the hour for said letting having arrived, the proof of publication being on file and the board being fully advised, said letting was held as scheduled. The chairman of the board proceeded to open all bids on file and after duly considering all bids on file, the bid of H. C. Young of Monroe, Iowa, is found to be the lowest and best bid therefor.

BE AND IT IS THEREFORE RESOLVED by the Board of Supervisors in and for Hancock County, Iowa, acting for and in behalf of D. D. No. 1 and 2, Hancock County, Iowa, that the bid of H. C. Young of Monroe, Iowa, be and the same is hereby accepted as the lowest and best bid for the cleanout of the South Main of D D 1 and 2 and he is hereby awarded a contract, therefor all other bids are hereby rejected.

BE IT FURTHER RESOLVED that John Chambers, Chairman of the Board, be and he is authorized and ordered to execute said contract in behalf of Hancock, County, Iowa.

The foregoing resolution was offered and read by Supervisor Gerdes who moved its adoption, was seconded by Supervisor Schoun, whereupon the chairman placed the motion of its adoption and upon roll call the vote thereon is F. J. Schoun, J. A. Chambers, and Geo. Th. Gerdes aye. Nays None. Whereupon the chairman declared the resolution duly adopted.

Garner, Iowa
September 8, 1947

The board of Supervisors of the County of Hancock, in the State of Iowa, met in regular September session, on the 8th day of September 1947, at 2:30 P M. at the Courthouse in Garner, Iowa, pursuant to law to adjournment, and to the rules of said Board

The meeting was called to order by the chairman, the roll being called, there were present John A. Chambers, Chairman in the chair and the following named Supervisors, Frank J Schoun and George Th Gerdes Absent, none.

Supervisor Frank J Schoun introduced and read the resolution next hereinafter set out, and moved its adoption, seconded by Supervisor George Th. Gerdes After the Board had fully considered said resolution the Chairman put the question upon the adoption thereof, and the roll being called, the following named Supervisors voted: Ayes John A. Chambers, Frank J Schoun and George Th Gerdes. Nays, none.

Whereupon, the Chairman declared said resolution duly adopted as follows, to-wit.

Resolution

To confirm the action of the County Treasurer in sale of $100,000 County Public Hospital Bonds.

WHEREAS, Notice to Bond Buyers has heretofore been given in strict compliance with Chapter 75 of the Code of Iowa, 1946, as to the time and place of offering for sale One Hundred Thousand Dollars ($100,000) County Public Hospital Bonds of the County of Hancock, State of Iowa, and

WHEREAS, at the time and place named in said notice, open bids for said bonds were received and the substance of the best open bid duly noted in the minutes and

WHEREAS, after said best open bid had been noted in the minutes, sealed bids filed prior to the calling for open bids were opened and the substance of the best sealed bid duly noted in the minutes, and

WHEREAS, upon final canvass of all bids the said bonds were awarded by the Treasurer of said County to the First State Bank of Britt, State of Iowa, as the highest and best bidder, said bid being not less than par and accured interest, now therefore

IT IS RESOLVED by the Board of Supervisors of the County of Hancock, State of Iowa, as follows:

Section 1 That the sale to the First State Bank of Britt, State of Iowa, of the County Public Hospital Bonds of said County, in the total amount, of One Hundred Thousand Dollars ($100,000), bearing interest at the rate of 1¼% per annum, to be dated October 1, 1947, at a price of par and accrued interest plus a premium of $875.00 be and is hereby ratified and approved.

Section 2. That the formal contract of sale of said bonds to said bidder entered into pursuant to said bid be and hereby is ratified and approved.

Section 3 That all resolutions and orders or parts thereof in conflict herewith be and the same are hereby repealed

Passed and approved September 8, 1947

ATTEST

JOHN A. CHAMBERS,
Chairman Board of Supervisors

FRED C MISSAL,
County Auditor
(Seal)

Garner, Iowa
September 8, 1947

The Board of Supervisors of the County of Hancock, in the State of Iowa, met in regular September session, on the 8th day of September 1947, at 2:30 P M., at the Courthouse in Garner, Iowa, pursuant to law, to the rules of said Board and to adjournment.

The meeting was called to order by the chairman, and the roll being called, there were

Present, John A. Chambers, Chairman, in the Chair, and the following named Supervisors: George Th Gerdes and Frank J. Schoun. Absent: None.

Supervisor Frank J Schoun, introduced and read the resolution next hereinafter set out and moved its adoption, seconded by Supervisor George Th. Gerdes and after due consideration thereof by the Board, the Chairman put the question upon the adoption of said resolution and the roll being called; the following named Supervsiors voted: Ayes: John A. Chambers, George Th Gerdes and Frank J Schoun and Nays, None. Whereupon, the Chairman declared the said resolution duly adopted as follows, to-wit:

Resolution

To provide for the issuance of $100,000 County Public Hospital Bonds.

WHEREAS, the Board of Supervisors of the County of Hancock, in the State of Iowa heretofore pursuant to Chapter 269 of the Code of Iowa, 1939 as amended, and to a legal and sufficient petition in accordance therewith, signed by more than two hundred resident freeholders of said County more than one hundred and fifty of whom were non-residents of the Town of Britt, Iowa the Town in which it is proposed to locate such hospital, did legally provide for the submission at a special election, in said County, and did legally submit thereat to the voters of said County, to be by them voted upon, the proposition of purchasing a site and erecting and equipping a County Public Hospital in the Town of Britt, Iowa, in said County and borrowing money by the issuance and sale of bonds in the sum of One Hundred Thousand Dollars ($100,000) to pay the cost thereof, and levying a tax on all taxable property within said County at a rate not to exceed one-half mill on the dollar of the taxable value in addition to all other taxes year by year commencing with the 1947 levies to pay said bonds and the interest thereon until said bonds and the interest thereon are completely paid, and did provide for legal, sufficient and timely notice of said election, and the time, voting precincts and respective polling places and purpose thereof and

WHEREAS, said election was legally held and conducted on the 10th day of September, 1946, pursuant to said legal and sufficient notice given by publication in strict conformity with all the requirements of law, the publications thereof being made once each week for four consecutive weeks in the Britt News Tribune, a legal newspaper of general circulation printed and published in the Town of Britt, in said County of Hancock, all in strict conformity with the requirements of law and the orders of said Board, and a majority of the qualified voters of said County voting therein voted in favor of the aforesaid proposition, said vote in favor of such authorization being equal, furthermore to 60% or more of the vote cast for and against said proposition at said election and said proposition was duly carried, and

WHEREAS, said Board of Supervisors upon finding from a canvass of the returns of said election that the requisite majority of the votes were cast in favor of said proposition, caused the result of said vote to be entered at large in the minute book and caused notice of said result of said election to be published as required by law, and

WHEREAS, none of the bonds thus legally authorized by the adoption of the aforesaid proposition at said election has yet been issued; now therefore

IT IS RESOLVED, by the Board of Supervisors of the County of Hancock, in the State of Iowa, as follows:

Section 1. That there are hereby authorized to be issued One Hundred (100) negotiable County Public Hospital bonds of said County in the aggregate amount of $100,000, numbered consecutively from One (1) to One Hundred (100), both inclusive, in the denomination of One Thousand Dollars ($1,000) each, all of said bonds to be dated the First day of October, 1947, each bearing interest from and after the date thereof until paid at the rate of one and one fourth per cent (1¼%) per annum, payable semi-annually on the First day of April and October in each year, such interest being evidenced by negotiable coupons attached to each bond both principal and interest payable in lawful money of the United States of America, at the Office of the County Treasurer, in the Town of Garner State of Iowa. Said bonds shall become due and payable in their numerical order as follows:

Bonds Nos 1 to 10, both inclusive, $10,000 on the first day of October, 1948

Bonds Nos. 11 to 20, both inclusive, $10,000 on the first day of October, 1949

Bonds Nos 21 to 30, both inclusive, $10,000 on the first day of October, 1950

Bonds Nos. 31 to 40, both inclusive, $10,000 on the first day of October, 1951.

Bonds Nos 41 to 50, both inclusive, $10,000 on the first day of October, 1952

Bonds Nos. 51 to 60, both inclusive, $10,000 on the first day of October, 1953

Bonds Nos 61 to 70, both inclusive, $10 000 on the first day of October, 1954

Bonds Nos 71 to 80, both inclusive, $10,000 on the first day of October, 1955

Bonds Nos. 81 to 90, both inclusive, $10 000 on the first day of October, 1956.

Bonds Nos 91 to 100, both inclusive, $10,000 on the first day of October, 1957.

The right is reserved to said County of Hancock to call and retire bonds numbered consecutively from 51 to 100, both inclusive, in their numerical order on the First day of October, 1952, or on any interest paying date thereafter prior to maturity, all as hereinafter more particularly provided.

Section 2 That upon presentation at the Office of the County Treasurer of any said bonds, same may be registered as to ownership in the name of the owner on the books of said County Treasurer, such registration to be noted also on the reverse side of the bonds, and thereafter the principal of such registered bonds shall be payable only to the registered holder, his legal representatives, or assigns Such registered bonds shall be transferable to another registered holder, or back to Bearer, only upon presentation to the County Treasurer with a legal assignment duly acknowledged or approved Such registration of any of said bonds shall not affect the negotiability of the coupons attached to said bonds, but such coupons shall continue transferable by delivery merely.

Section 3. The bonds hereby authorized shall be in form and recitals substantially as follows, excepting that the recitals in the first paragraph thereof relating to optional payment prior to maturity and relating to giving of notice of redemption shall be omitted from bonds numbered consecutively from One (1) to Fifty (50), both inclusive:

(Form of Bond)

UNITED STATES OF AMERICA
STATE OF IOWA, COUNTY OF HANCOCK
COUNTY PUBLIC HOSPITAL BOND

No. $1,000

The county of Hancock State of Iowa, for value received, promises to pay to Bearer, or if this bond be registered as hereinafter provided, to the registered holder hereof, One Thousand Dollars, in lawful money of the United States of America, on the First day of October 1948, or at the option of said County before the last named date, on the First day of October, 1952, or on any interest paying date thereafter, together with interest on said sum from the date hereof until paid, at the rate of one and one-fourth percent per annum payable semi-annually on the First day of April and October of each year upon presentation and surrender of the interest coupons hereto attached as they severally become due. Both principal and interest of this bond are hereby made payable at the Office of the County Treasurer, in the Town of Garner, State of Iowa In the event said County shall elect to redeem this bond prior to maturity written notice of such redemption shall be given at least thirty days prior to such redemption date, by mail, addressed to the registered owner hereof, or if this bond is not registered as to ownership, to the purchaser and to any known holder hereof, and by publication at least once in a newspaper of general circulation within the State.

This bond is one of a series of County Public Hospital Bonds of like date, amount and interest rate, numbered consecutively from One (1) to One Hundred (100), both inclusive, and is issued by the Board of Supervisors of said County in strict compliance with the provisions of Chapter 347 of the Code of Iowa 1946 and all laws amendatory thereof and supplemental thereto, and in conformity with a resolution of said board duly passed and approved, and as duly authorized by the requisite majority of the qualified voters of said County, voting at an election legally called and held pursuant to legal, sufficient and timely notice duly published, and is payable only from the County Public Hospital Fund, as provided for in Section 347.7 of said Code.

This bond shall pass by delivery unless it has been registered in the name of the owner on the books of the County Treasurer of said County and evidence of such registration endorsed on the back thereof. Thereafter no transfer of this bond shall be valid unless made on said books and similarly noted hereon, unless the last registration shall have been to Bearer, in which case transferability by delivery shall be restored The registration of this bond shall not affect the negotiability of the coupons hereto attached, which shall continue negotiable by delivery merely, not with standing the registration hereof

And it is hereby certified and recited: That all acts, conditions and things required by the laws and Constitution of the State of Iowa to exist, to be had, to be done and to be performed precedent to and in the issue of this bond, were and have been properly existant, had, done and performed in regular and due form as required by law, that adequate provision has been made for the payment of the principal and interest of this bond as the same will become due, and that the total indebtedness of said County, including this bond, does not exceed the Constitutional or Statutory limitations.

IN TESTIMONY WHEREOF said County by its Board of Supervisors, has caused this bond to be signed by the Chairman of said Board and attested by the County Auditor, with the seal of said County affixed as of the First day of October, 1947.

ATTEST:

J. A. CHAMBERS,
Chairman Board of Supervisors

FRED C. MISSAL,
County Auditor.

(Form of Coupon)

HANCOCK COUNTY, IOWA

Date of Registration
... ...
. . . .
Registered Owner
. ...
. . ..
. . ..
Signature of County Treasurer
. . ..

Section 6 The bond hereby authorized shall each be signed by the Chairman of the Board of Supervisors and attested by the County Auditor, with the County seal affixed, and the coupons thereto attached shall each be executed with the signature of the County Auditor, or a facsimile thereof, and said bonds with coupons attached, when so executed, shall be delivered to the County Treasurer and shall be by him recorded in a book provided for that purpose and delivered to The First State Bank of Britt, Iowa, the purchaser thereof, at not less than par and accrued interest, and the sale of said bonds to said purchaser is hereby ratified and confirmed, and the proceeds derived from the sale of said bonds shall be lawfully used in conformity with the authority derived from the aforesaid election and for no other purpose whatever.

Section 7. That as required by Section 76 2 of the Code of Iowa, 1946, and in order to provide for the assessment and collection of an annual levy upon all the taxable property in said County in addition to the levy authorized for other purposes, sufficient to pay the interest coupons on the bonds hereby authorized as and when the same mature, and also to pay and discharge the principal as the same matures, as required by law, there shall be and there is hereby authorized and levied upon all the taxable property within said County, a direct annual tax for each of the years while said bonds or any of them are outstanding in amounts sufficient for that purpose, and in particular but not in limitation of the foregoing, the amounts levied during the respective years for such purposes shall be as follows:

For the year 1947 for collection during the year 1948, sufficient to produce the net annual sum of $ . . .. ; and all action heretofore taken in connection with said levy is hereby ratified and approved.

For the year 1948 for collection during the year 1949, sufficient to produce the net annual sum of $ ....

For the year 1949 for collection during the year 1950, sufficient to produce the net annual sum of $ . .....

For the year 1950 for collection during the year 1951, sufficient to produce the net annual sum of $ ... .

For the year 1951 for collection during the year 1952, sufficient to produce the net annual sum of $ ....

For the year 1952 for collection during the year 1953, sufficient to produce the net annual sum of $ . .....

For the year 1953 for collection during the year 1954, sufficient to produce the net annual sum of $..... .... ..

For the year 1954 for collection during the year 1955, sufficient to produce the net annual sum of $ . ... .

For the year 1955 for collection during the year 1956, sufficient to produce the net annual sum of $ .. . .

For the year 1956 for collection during the year 1957, sufficient to produce the net annual sum of $ . .

Section 8 The County Auditor shall annually in due time, manner and season certify the taxes herein provided for in addition to the levy authorized for other purposes, and without condition as to the various amounts as herein provided being included in the annual certification of taxes, the County Auditor shall annually enter said respective amounts for collection, and the moneys arising from such tax levies shall be known as the "County Public Hospital Bond Fund, Series October 1, 1947," and shall be used for the payment of said interest coupons and said bonds and for no other purpose whatever

Section 9 The interest or principal and both of them falling due during the year 1948 or during any subsequent year or years, shall, if necessary, be paid promptly from current funds on hand in advance of the taxes levied and when said taxes shall have been collected, reimbursements shall be made to such current funds in the sums thus advanced

Section 10 That in the event said County shall elect to exercise its right to redeem prior to maturity any of the bonds hereby authorized, which by their terms are redeemable prior to maturity, written notice describing the bonds called for redemption and stating the time of payment shall be given by mail at least thirty days prior to such redemption date, addressed to the registered owner thereof, or as to such bonds as are not registered as to ownership, to the purchaser and to any known holders thereof, and by publication of such notice of redemption, not less than thirty days prior to such redemption date, at least once in a newspaper of general circulation within the State.

Section 11 This resolution shall be irrepealable until all the aforesaid bonds, both principal and interest, are fully said and discharged

Section 12. All resolutions and orders or parts thereof in conflict herewith be and the same are hereby repealed.

Section 13 A certified copy of this resolution shall be filed with the County Auditor of said County who shall enter annually the herein-provided-for levy for collection until said bonds and the interest thereon have been paid in full.

Passed and approved, September 8, 1947

ATTEST:—

Old Age Need Hold No Terrors

Finding Useful Work Is Formula for Happiness

By BAUKHAGE
News Analyst and Commentator.

WASHINGTON.—Latest figures from the census bureau have revealed that the postwar period has produced a record baby crop—3,260,000 estimated for 1946, almost a million more than were born in 1940.

But it will take more than this belated burst of rejuvenation to keep the United States from becoming an "old" nation. Old in the sense that the average age will be high, with a heavy proportion of oldsters. There are two reasons for this: Nowadays people live much longer, thanks to medical science. And the size of the American family has shrunk.

In 1860 when the population was about 31.5 millions, 860,000 persons were over 65. In 1945 when the population approached 140 millions, 9,920,000 persons were over 65.

By 1970 there will be 16 million over that age, out of an estimated population of more than 151 millions!

This situation poses a number of problems for the nation, and also emphasizes the personal problem: The problem of growing old.

Like many of our troubles, real or imagined, the best cure is to bring this one out into the light, give it a good shaking. The result in many cases will be that it disappears or that it shrinks to unimportance (if that weren't so, psychiatry wouldn't be such a highly rewarded profession).

Wise men have known this for a long time and lived to a happy old age. Others (who didn't know it) have worried their friends and themselves to early deaths, by sitting down and weeping over their lost youth instead of getting up, learning to take old age in their stride and liking it.

Baukhage

Recently I read a very up-to-date little pamphlet called "When You Grow Older," written in straightforward English, based on modern, scientific ideas. The pamphlet outlines methods which make that famous poem by Browning, so often regarded as wishful thinking by the skeptical, ring true. "Grow old along with me," said Browning's Rabbi Ben Ezra, "The best is yet to be."

When I grasped the theme of this pamphlet, it stirred classic memories. I remembered that a gentleman who considerably predated Browning had said the same thing in his essay "On Old Age," written in the year 44 B. C. I refer to Marcus Tullius Cicero. He said (among other pertinent things) "qui autem omnia a se ipsi petunt, eis nihil potest videri, quod naturae necessitas adferat." Which, if you'll pardon my freedom with the text, means that those who seek their happiness from within can never regard nature's inevitabilities as bad.

Cicero wrote that essay when he was 63 years old and I have no doubt he would have lived what he preached for another decade or two if his vigorous old age had not produced the resounding "Phillippics" against Anthony which resulted in his being "purged" (Roman style) while still hale and hearty at 64.

Like Cicero, Messrs. George Lawton and Maxwell Stewart, authors of the pamphlet I mentioned, stress the psychological problems of old age. (The pamphlet is issued by the Public Affairs Committee, Inc., a non-profit, educational organization, 22 East 38th St., New York City—20 cents.)

Old age comes with a shock because we haven't prepared for it. Maybe we are ready for the "last day at the office" or at the work bench or when we sell the farm and move to the village or city, or in other ways break a lifetime's routine. But we may have failed to recognize "the need to feel important," a need which we must satisfy one way or another. Not "important" in the sense that we have somebody kow-tow to us, but necessary to somebody or some thing, some business, some undertaking, maybe not a big cog, but something that helps the wheels of life go round.

Avocations Help To Retain Youth

Anybody can develop an avocation of some kind. In many cases these avocations have turned into paying vocations after retirement. In any case they are literally lifesavers when it comes to making life livable.

Various skills permit varying periods of activity.

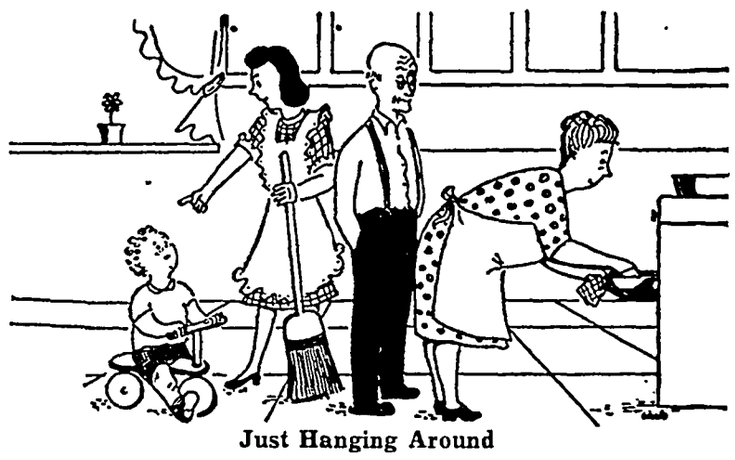
Many farmers are self-supporting at 70 or 75. Perhaps this is partly because of their environment—mental and physical. Cicero says farmers "are not hindered to any extent by old age, and seem to me to approach the ideal wise man's life."

Most jobs are of such a character that ability to perform them declines with the years. "When You Grow Older" cites as an example "speed work"—like the assembly line. Youth excels in this type of work. But age does almost as well as youth in the type classified as "power" work, the kind of job where skill is important.

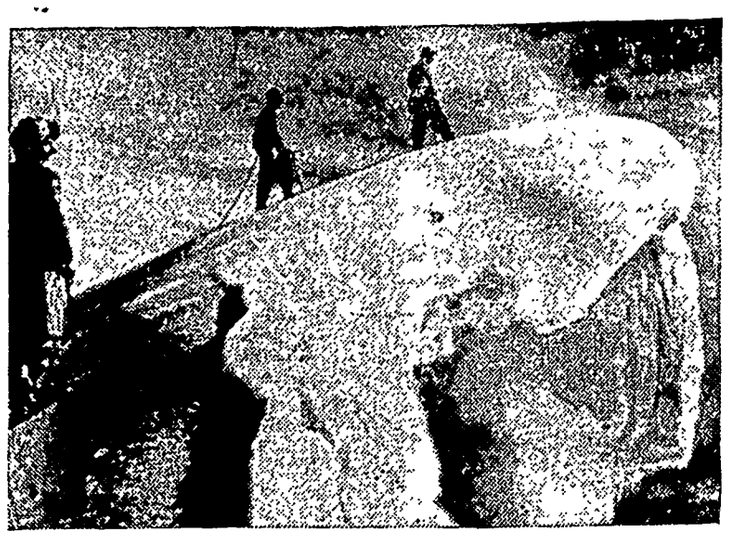
There is not space here to develop the theme of "When You Grow Older" as its authors do so compactly in their 30 pages. They discuss the questions, personal and political, of old age security. They offer a host of other specific examples to illustrate the statements, some of which I have quoted here. I have attempted to review rather than a summary, moved to comment partly because of the valuable suggestions offered, and also, partly because these pertinent paragraphs of "When You Grow Older" offer a perfect example of how modern science and experience confirm the verities expressed by poets and philosophers of the past.

It is still the habit of many critics to praise the style of Cicero's "De Senectute" but to toss its message aside as wishful thinking. Even Montaigne, who said frankly that reading the essay "made one long to grow old," pessimistically limited what he considered a useful lifespan to a mere 50 years and thought it wrong to contemplate further existence.

Cicero's physical world was bounded by the frontiers conquered by Rome's plodding legions but his view was long in time. Today the men of our scientific age echo the request in the last paragraph of the great statesman's immortal essay when he prayed: " . . . that you put my words to practical test."



Just Hanging Around



JUST A TUNE-UP CLIMB . . . Members of the Harvard university St. Elias expediton are shown atop 12,000-foot Haydon peak in Alaska which they scaled just as a preliminary maneuver before tackling 18,008-foot St. Elias, greatest ice-covered mountain in North America. The Harvard party was the second expedition to beat the mountain in 61 years.

NEWS REVIEW

Farmers' Income Zooms; New Crisis Hits Europe

FARM INCOME:

Great Gain

Latest round in a heavy barrage of statistics apparently destined to make the American farmer feel that he is an unbelievably fortunate man was an agriculture department report that the nation's farm owners are taking in more money than ever before.

It was estimated that total farm cash receipts during the first eight months of 1947 were 17.4 billion dollars, a 21 per cent gain over the same period of 1946, itself a record year.

The report said that the average farm operator realized a net income of $2,541 from agriculture and government payments in 1946, and this year farm income skyrocketed still higher as a result of continuing unprecedented demands for produce.

"An increase of 24 per cent in prices," was singled out by the report as the chief reason for the booming income.

But the picture has another side—that of farm expenses. Operating costs continue to increase and, although no estimate was made for 1947, the farmer's expenses went up 9 per cent in 1946. Nevertheless, if the agriculture department's estimates are accurate, the increase in farm income greatly outweighs the simultaneous rise in expenses.

CRISIS AGAIN:

Transfusion?

Life these days, Secretary of State George Marshall has discovered, is bounded on all sides by one crisis after another.

No sooner had he returned to the U. S. from Brazil with the mutual American defense treaty tucked safely under his belt than he was beset with calls for succor from debilitated Europe which apparently, was sliding swiftly down the ways toward utter ruin.

Insiders said the European situation really was desperate. Undersecretary of State Robert Lovett had sounded the first alarm shortly before Marshall's return when he said that Europe's economic structure was cracking up faster than anyone had expected.

The fear blowing in on the winds from Europe intensified. Precariously balanced Britain remained at the heart of the trouble, but more grief was added by the news that bad weather had struck hard at crops in many European countries this year. Most nations had been forced to use their meager produce for domestic consumption rather than for export. There was no profit in that, they said.

In the U. S., it began to appear more likely that a special session of congress would be called this fall to study the situation and perhaps set up the apparatus for another economic transfusion to give strength to the weakening old world.

BONDED

Vets Cash In

Draft time had rolled around again for millions of ex-G.I.s, but this time it was more in the nature of a bank draft as veterans all over the nation fell happily into line to cash their terminal leave pay bonds.

Virtually every city reported that hordes of veterans had descended on banks in an unprecedented rush

to convert their hard-won bonds into coin of the realm. Millions of former Joes stuffed millions of dollars into their pockets.

What would they do with the newly acquired money? A few put it back into savings accounts; others bought clothes, furniture and similar necessities; much of it was squandered immediately. But one surprising fact developed: A great many ex-G.I.s—family men now—were using the store of cash to get out from under worrisome debts. For them it was a case of "dire need."

ISOTOPES:

U. S. Offer

Radioactive isotopes—products of American atomic research—have been offered in limited amounts to all foreign nations for use in mankind's world-wide and unending fight against disease.

The gesture, marking the first sharing of the fruits of U. S. atomic ovens, loomed more significantly on the uncertain frontier of global peace than any loan or economic aid so far conceived.

Described as the most important medical research tool since the microscope, the isotopes—radioactive forms of basic elements—are utilized in the same manner as machine gun tracer bullets. Introduced into the body or blood stream, they can be used to trace life processes and plot the course of various diseases.

They are of paramount importance in current cancer research and one day may provide the clue leading to control and cure of that disease.

$3,000 FOR TRACTORS

Farmers Caught by Black Mart

Gradually deteriorating prewar machines and implements, plus a shortage of rural labor, are the two principal factors responsible for development of a flourishing black market in farm equipment, according to manufacturers and dealers groups who have pronounced the situation fairly widespread.

Secondary circumstances which support the existence of this particular black market are the unparalleled height of farm income and the apparent determination of the nation's farm population to advance to new levels of mechanization.

Thus, the demand for farm equipment continues to be almost insatiable. Even the heavy, uninterrupted output of the entire farm equipment industry has failed to still the clamor of the hungry market.

It has been common practice this summer for farmers to pay huge premiums on such pieces of equipment as tractors, hay balers and corn pickers, all of which have customers on dealers' waiting lists.

Tractors priced at $1,000 have sold for as high as $3,000 or $3,500. Hay balers, which are used on hay three times a season and have other farm uses, have been finding buyers at double or triple the list price.

Pointing up these malpractices on the part of individuals, one manufacturer referred to the particularly bad black market in combines.

"When one wheat farmer, for example, has his crop harvested, someone will drive up and ask him how much he paid for his combine. The farmer might say $2,000. When the stranger asks how much he would sell it for, the farmer, picking a number out of the hat, might say $3,000. Then, to the farmer's surprise, the stranger peels off 30 $100 bills and takes the combine off his hands.

"The farmer would have got $3,500 if he had asked it, because the stranger took the combine north and sold it for $4,000."

British Blame U. S. for Plight

THE latest good reporter to survey the British plight is Eugene Meyer, publisher of the Washington Post. Meyer reported to his paper recently the British public has not been told "the facts of life" regarding their plight, and also that socialism simply has failed to bring the needed production through which Britain could recover Everyone knows this outside Britain.

It has been evident almost officially since a British embassy official here conceded last February Britain had coal in the ground of workable thickness for a production at economic prices of 250 million tons a year for 200 years at least, but was not able last winter to mine enough of it to keep herself warm. (He blamed shortage of miners, of course, not socialism.)

The truth behind all this is, Britain's political crisis is worse than her economic crisis. Her socialist politicians are trying to save their own skins with the British people by blaming us, rather than themselves, for her condition.

With an unbelievable propaganda campaign, they even succeeded in saving themselves from blame for their food shortage by convincing the British we were not giving them enough food. They did not let the public know their own socialist experiments with land seizures had threatened private farmers and discouraged production. Now they are compromising slightly on their socialist planning (delaying further steps for a while, they say) and are trying to dig themselves out by focusing accusations against their leading and only benefactor, the United States.

H. I. PHILLIPS

The Play's the Thing

Dear Ed—Well, I am in the show business. A feller dropped in on the farm a few weeks ago and asked if I was using my barn. I thought he was just a city man who had sublet his apartment and couldn't get it back. I told him I had some livestock in it, some old buggies, quite a little hay, et cetera. He explained he wanted the barn for the drama.

—•—

I got them to sign a contract agreeing to return the barn in good condition, not to worry the cows and never to look for an egg until the hens got off the nests. Then they brought in as crazy a lot of folks as I ever seen and things began to hum.

Well, I haven't had any peace since. Both cows are sick, the horse ran away and every hen has stopped laying except a couple that are nesting in the woods.

—•—

Shakespeare said the play's the thing but he wasn't counting on fresh milk and eggs when he said it.

—•—

If I ever get my farm back the drama can stay in the city for the rest of my life. Next week they're putting on "Two Orphans" and the wife and I are in shape to play both parts.

Your loving uncle,
Chet Hostetters.

WALTER SHEAD

Lobbyists Lead Cooperative Fight

IF THE number of lobbyists involved is any criterion, a bitter fight is in the offing in connection with the effort to remove tax exemption of farm cooperatives.

The National Tax Equality association, which is spearheading the drive, has three registered lobbyists on the job. They are Paul L. Courtney, annual salary $10,000; Joseph F. Leopold, annual salary $8,500, and Clare A. Johnson, salary not specified.

In addition, there are registered lobbyists from tax equality committees of New York, Indiana, Kentucky, Colorado, Oklahoma, Nebraska, Michigan, Missouri, Louisiana, Pennsylvania, Wisconsin and Texas, with recorded expenditures ranging from $500 to $3,700 for the first six months of 1947.

Leading the fight on behalf of the cooperatives are six registered lobbyists, including John H. Davis, salary $11,000, William Heckendorn, salary $7,500, and John J. Riggle, salary $7,500, representing the National Council of Farm Cooperatives; Jerry Voorhis, salary $7,500, representing the Cooperative League of the United States; R. Wayne Newton, salary $10,000, representing the National Association of Cooperatives, and Russell Smith, salary $8,400, representing the National Farmers Union.

WALTER WINCHELL

Notes of a Newspaper Man

President Truman, in an interview, stated the problems of his office have not in the least affected his health. The Truman constitution wouldn't be quite so strong if he worried a little more about the seditionists undermining the American constitution. . . . The Republicans still are trying to find out who's responsible for the war. What Americans would like to know is who's responsible for this peace.

Our Oh, Lord! Dept.: It happened at the 25th anniversary dinner of the New York Newspaper Women's club. Mrs. F. D. Roosevelt was being introduced by one of the town's food editors, Edith Barber. Edith intoned: "And now, one of our members you all know—Mrs. THEODORE Roosevelt!"

Quotation Marksmanship: George Santayana: There is no cure for birth and death save to enjoy the interval. . . . D. C. Peattie: Noon, the hour when bushes tuck shade beneath them like skirts.

The 1935 University of Georgia yearbook, "Pandora," contains the photos of 12 of its graduating students on a page titled "All-American." The head shots of the students are carried along with the likeness of a huge jackass (which was the editor's way of showing the students pictured as the outstanding "jerks" of their class). Know whose picture leads all the rest? Herman Talmadge!

★ ★ ★ ★

DREW PEARSON

The Merry-Go-Round

THE supposedly economical senate spent $68,000 for telegrams in one month alone. The telegraph bill included thousands of words wired to local newspapers from the Congressional Record. . . . Four New Englanders, Speaker Joe Martin of the house, Sens. Henry Cabot Lodge and Leverett Saltonstall of Massachusetts and Ray Baldwin of Connecticut, are not averse to vice presidential promotion. . . . Looks as if the Puerto Rican government is playing politics with its taxes. After the P. R. government decided to go into the hotel business, it suddenly slapped a higherto unheard of tax assessment on the Condado Beach hotel—its future chief competitor.

Despite the fact that the long arm of the law is panting hotter down the back of organized labor, AFL's Bill Green and CIO's Phil Murray still can't get together on labor unity.

Alf Landon, ex-governor of Kansas, came a cropper in trying to get a radio station at Inglewood, Colo., largely because of Federal Communications commission rules that radio stations must be locally owned. After he applied for a license, more than 100 affidavits poured into FCC saying Landon's station was unneeded in Inglewood. Landon withdrew, later got a station in Leavenworth, Kas., on his own stamping ground.

WRIGHT PATTERSON

History Will Judge Debacle

ADMIRAL HALSEY, in his memoirs published in Collier's, calls a spade a spade in denouncing the sacrificing of Admiral Kimmel and General Short as the goats for the Pearl Harbor disaster. For Pearl Harbor, Admiral Halsey vaguely blames the American people. But it was not the American people or congress who employed an alien German to erect greatly needed radar equipment, and then countenanced needless delay in its erection; it was not the American people or congress who failed to give the commanders vital information. The American people or congress were not responsible for Pearl Harbor.

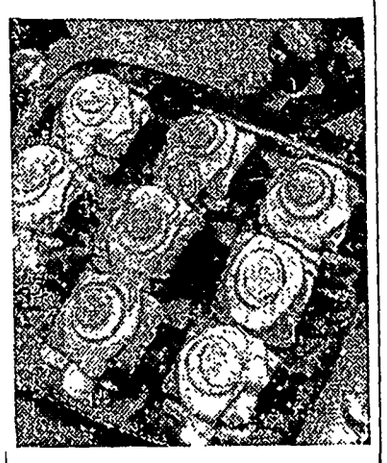
Transform Vegetables Into Savory Dishes For Lunch or Supper



Asparagus takes on a pleasing look as well as extra flavor when green tips are tucked in between layers of cheese biscuit, topped with sauce and garnished with slices of hard-cooked eggs.

Remember when we just cooked vegetables in boiling, salted water and put them on the table without any thought as to subtle seasoning or attractive serving? Thank modern cookery experts for realizing the infinite possibilities of vegetables and for transforming vegetables into one of the glamor groups of cookery.

First of all, there are innumerable sauces you can use with "perfection cooked" vegetables to bring out all their hidden flavors. Then, if you want to forego the sauce, you can combine vegetables with other foods to make them palate-pleasing and tempting.

Whichever way you prefer to serve your vegetables, always remember that the overcooked vegetable can never be guaranteed to make friends or influence eaters to come back for seconds, as they should. Cook vegetables so there is still a bit of their garden crispness left. If cooked to this point and served immediately, you will also lose less of their lovely colors.

Golden Cauliflower
(Serves 6)

- 1 medium head cauliflower
- 1 cup raw carrots, diced
- ¼ cup onions, chopped
- Salt
- Paprika
- 2 tablespoons butter, melted
- 1 cup rich milk
- 1 cup Wisconsin Natural American Cheese, grated

Break cauliflower into flowerettes. Arrange cauliflower and carrots in buttered casserole Cover with onion, seasonings, and butter. Pour milk over contents. Sprinkle with cheese. Cover. Bake in a moderate oven (350 degrees) 1 hour, removing cover the last 15 minutes.

***Red Cabbage and Apples**
(Serves 8 to 10)

- 2 quarts red cabbage, shredded
- 1 cup apples, pared and chopped
- 1 teaspoon salt
- ¼ cup butter
- 2 tablespoons flour
- ½ cup vinegar
- ½ cup brown sugar
- Buttered crumbs

Cook cabbage with apples 10 minutes in salted water, drain (save water). Melt butter, add flour, mix. Add ½ cup drained water, vinegar, and brown sugar, stir until thickened. Add apples and cabbage. Bake in buttered casserole in hot oven (400 degrees) until crumbs are brown.

Sweet Potato Cecelia
(Serves 8 to 10)

- 3 pounds sweet potatoes
- ½ cup butter
- Salt
- Pepper
- ¼ teaspoon nutmeg or mace
- ¼ teaspoon cinnamon
- ½ to 1 cup apple cider

Mash cooked sweet potatoes. Add ⅓ cup butter, seasonings, and cider, mix well. Put in buttered baking dish, dot with remaining butter. Bake in a moderate oven (375 degrees) 30 to 40 minutes, until top is brown.

LYNN SAYS:

Spice, Seasoning Lend New Tang to Foods

If you want a really delicious sauce for your fish, melt butter, add flour, and in place of milk, blend in sour cream. Add to this a bit of salt and pepper and chopped chives.

A blade of mace and a few cloves heated with the liquid when making orange or lemon jelly will give it added spice. Strain the liquid to remove spices.

LYNN CHAMBERS' MENU

Baked Spareribs
*Red Cabbage and Apples
Baked Sweet Potatoes
Molded Pear in Lime Gelatin
Cornbread Butter
Lemon Chiffon Pie
*Recipe given.

Stuffed Eggplant

Cut a lid from one large eggplant lengthwise, scoop out pulp and cook in boiling salted water until tender, drain and chop fine. Saute one small minced onion in butter until soft, not brown, add eggplant, one half cup of bread crumbs, one half cup of chopped pecans, and two well-beaten eggs. Mix well with seasonings. Lastly add enough water in which the eggplant was cooked to make the mixture quite thin. Fill shell and sprinkle with bread crumbs and dot with butter and bake about twenty minutes.

Spinach Balls

Wash one peck of spinach in several waters, then cover tightly and steam with just the drippings from the washing for about fifteen minutes. Squeeze as dry as possible. Chop and press through a coarse sieve. Into this puree mix two slightly beaten egg yolks, one tablespoon of grated onion, one tablespoon of olive oil, and salt and pepper to taste. Mix well and form into balls, dip in beaten egg, then in fine bread crumbs, and fry in hot fat to a golden brown.

Asparagus-Cheese Shortcake
(Serves 6 to 8)

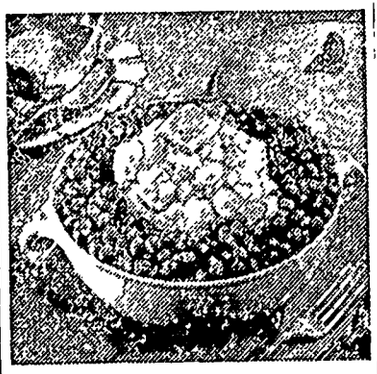
- 1 No. 2 can asparagus tips
- 3 tablespoons butter
- 1 tablespoon minced onion
- 4 tablespoons flour
- 1 teaspoon salt
- ⅛ teaspoon pepper
- 2 cups milk
- 2 hard-cooked eggs, sliced for garnish

Melt butter in saucepan; add minced onion and cook slowly for 3 minutes or until tender. Add flour and seasonings and blend. Gradually add milk, while stirring; cook over low heat until smooth and thickened, stirring constantly.

Cheese Biscuits

- 2 cups biscuit mix
- ½ cup grated cheese
- 1 cup milk

Add grated cheese to biscuit mix and blend. Add milk, mix with fork. Roll out to ½ to ¼ inch thickness on floured board and cut into squares or circles. Bake on a greased pan in a hot oven (450 degrees) 12 minutes. Split and place hot asparagus tips between biscuits. Pour hot cream sauce over the top and garnish with hard-cooked egg slices



A vegetable bowl of snowy white cauliflower surrounded with green peas is hard to resist.

Tasty butter sauce variations will add sparkle to humdrum vegetable dishes. Here are two possibilities:

Lemon-Butter Saude

- ½ cup butter
- Juice of ½ lemon
- 3 tablespoons parsley (if you prefer)

Melt butter, add lemon juice and blend thoroughly. Add parsley and serve hot with vegetables. An extra dish of the lemon-butter sauce may be served on the side.

Brown-Butter Sauce

- ½ cup butter
- 1 tablespoon chopped parsley
- Salt
- Pepper
- 3 tablespoons lemon juice

Melt butter in a frying pan and stir until a golden brown. Add chopped parsley, lemon juice, and salt and pepper to taste. Serve hot on vegetables or fish.

Released by Western Newspaper Union.

Don't forget that dates added to muffins make them a party treat.

When you're using clams, don't forget that a pinch of thyme will do wonders.

Crabmeat and mustard with mayonnaise makes a nice salad for a light luncheon.

When you want to add a different touch to frankfurters, they can be stuffed with all variety of things—mashed potatoes—strips of cheese, bread dressing, sauerkraut or pickle relish.

Household Hints

Before washing your bathroom floor use a sweeper attachment on it to remove dust particles and hair.

—•—

When starching a dark blue garment use a little bluing in the starch.

—•—

Two parts linseed oil and one part vinegar make an excellent dressing for leather upholstery.

—•—

Use a buttered muffin tin for baking stuffed apples and peppers. The muffin sections allow the food to keep its shape.

CHOICE is the keynote of today's caree

Would you go to Europe, Japan or Korea? Or would you stay near home? Any man who has had prior service in the Armed Forces may elect to do any of these things if he enlists in the Army now for 3 years or more. He can choose to be assigned directly to duty in Europe or with one of five famous Infantry divisions in the Far East. Or he may choose to be stationed near home for the first full year of his enlistment (where there are vacancies). Men with or without prior service may choose one of the famous combat divisions in Japan or Korea.

Would you select a career in aviation? This you can do, and be guaranteed the training you choose *before you enlist!* Only requirements beyond regular physical and mental examinations are that you be a high school graduate, or that you are in the Air Force and can qualify. It's today's great opportunity to write your own ticket in the Air Force.

Would you want to learn to fly? If you are single, 20 to 26½, and have had two or more years of college education or the equivalent, you can become an Aviation Cadet with the U. S. Air Force. Nowhere else can you get better training, for nowhere else is aviation advancing as fast or as far as in our own Air Force.

Would you go to a leadership school? If you have qualities of leadership, would you want to develop them to their fullest? U. S. Army Leadership Schools are now selecting likely candidates from servicemen to take these valuable courses.

The Army and Air Force are doing everything possible today to help each individual develop along the lines that he picks for himself. Army and Air Force training is thorough and take-home pay is better than most civilian jobs. Opportunities for advancement are wide open to every man in uniform. Make your choice today at your U. S. Army and Air Force Recruiting Station.

CAREERS WITH A FUTURE

Volume 52. KLEMME, IOWA, OCTOBER 1, 1947 Number 46.

Salvation Army Unit Has Been Organized In Klemme

DRIVE FOR FUNDS WILL BE HELD EARLY THIS FALL

Part Of Funds Collected To Remain Here For Relief When Needed

Mr. R. A. Jorgenson announced today the establishment of a Salvation Army Service Unit in Klemme, and the selection of a local committee to represent this well-know organization in this community. Mr. Jorgenson is chairman of the committee.

Other committee members include A. J. Kudje, Treasurer, Dr. A. H. Dulmes and A. L. Kingery.

The committee will conduct a campaign to raise funds for local and regional welfare needs. Special letters will be mailed to local citizens requesting contributions to be mailed to A. J. Kudje. The campaign will be conducted annually, and will get under way for 1947 within a short time.

On completion of the campaign a portion of the money raised will be left with the local committee for a program of health, welfare, and cultural activities. Such needs as clothing, for the school children, dental, optical and medical assistance, and for family welfare needs of all kinds will come within the scope of the local program.

There will be no restrictions on the use of the funds, and the local committee can render service at the point of need, to the limit of ther funds.

The remainder of the amount raised will be used to provide maintenance of maternity hospitals for un-married mothers, fresh air camp benefits for mothers and children, services to Veterans, and other regional services, including a reserve fund for emergencies and disasters. The regional program is available to Klemme whenever the need arises.

Mr Jorgenson urges everyone to give liberally when the Salvation Army drive is conducted here.

Brigadier A. S. Thomas, State commander for Iowa, expressed his deep appreciation to the Klemme committee for their expression of confidence and good will. He said, "The Salvation Army Service Unit will bring long over-due facilities to help meet long-standing needs in rural and open country areas in the county."

LIBERTY TOWNSHIP MEETS

Liberty Township's monthly meeting was held last Thursday evening, September 25, at 8 p. m. at the Center School with a large crowd in attendance.

Emil Blumer showed several films that he had taken on his southern tour which were greatly enjoyed by all. Paul Henderson showed the film, "The Insect." Chas. Jackson explained the new responsibility law which goes into effect the first of Oct. and also explained the value of the resolutions committee.

Lunch was served at the close of the meeting by the committee.

HELLO, FOLKS!

Mr. and Mrs. Lester Neuberger are the proud parents of a 7 lb. baby son born Friday, Sept. 26th. They have named the new arrival Mark Lester.

MARTIN BRINKMAN LOCATED IN HIS NEW BLACKSMITH SHOP

Martin "Slim" Brinkman has been busy the past few days moving his equipment into his new building across the street south of the Community Hall.

Mr. Brinkman will have his shop open for business Thursday of this week. He has purchased some new equipment and contemplates on installing more new machinery. For several years he has been located in the Etchen building, north of the Bank. The section of that building vacated by Brinkman will house the school busses.

Blue Cross Invites You To Enroll October 1 to 15

All Hancock County families are invited to join the many thousands of satisfied families who have the satisfaction of being covered with these health plans.

The following sign up booth have been set up: Britt, J. M. Townsend and L. S. Fisher, Oct. 3; Garner, Mrs. Jack Dethmer, Oct. 9; Klemme, V. A. Cook and Wm. Janssen, Oct. 10; Goodell, V. A. Cook and Wm. Janssen, Oct. 7; Corwith, Mrs. Harold Oxley, and Mrs. Clarence Jurgenson, Oct. 11; Crystal Lake, Lloyd Christianson and Julius Ingebritson, Oct. 4; Hayfield, Mrs. Rosa Clark, and Miss Riekena, Oct. 6; Kanawha, Mrs. Melvin Hill, and Mrs. John Eenhuis, Oct. 10.

Hancock Board To Let Contracts On Ditches

Hancock County Supervisors set October 13 at 1:30 p. m. as a time for a letting on the construction of 3 drainage districts recently petitioned for. The letting will be on the reconstruction of drainage district No. 101; construction of 144 added lands and 122 extension. The letting will be held at the courthouse in Garner and involves open ditch and closed tile drain work. Work is expected to get under way by Nov. 1.

SMALL BOY STRUCK BY BICYCLE MONDAY AFTER SCHOOL

Gordon Lassahn, small grade school boy, received a cut on his forehead Monday after school when struck by an older boy riding a bicycle. The accident happened near Mrs. Mildred Day's home and she took the small boy to a doctor for treatment.

On Trip To West And South

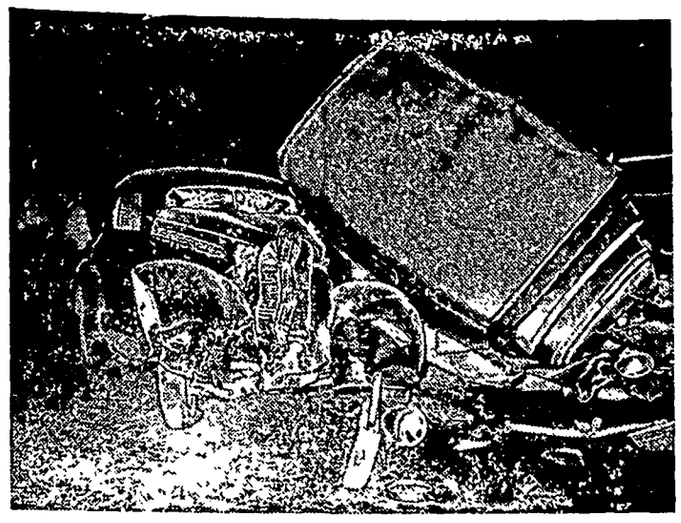
Mr. and Mrs. George Schoenwetter, Mrs. Howard Schoenwetter and Mildred Weisbrod are on a trip to the Dakotas and from there they will go south and will visit the Carl Suckow home in Louisinia.

Entertained Ministers And Their Wives Tuesday

Rev. and Mrs. H. E. Harvey entertained the Methodist ministers and their wives in this Ministerial Association at dinner Tuesday.

HAD GOOD SALE TUESDAY

The Edmund Josten farm sale held Tuesday was attended by a large crowd and everything sold at a good figure. Bidding was lively and farm machinery brought top prices.



Speeding through an intersection stop sign, one of these drivers collided with another car. The force of the crash entangled the two cars and they skidded together across the intersection and slammed into a stone wall. Both drivers and a passenger were killed, two were seriously injured. National Conservation Bureau reports that disregard of traffic control devices ranks third as a cause of death in motor vehicle accidents.

Mr. And Mrs. John Suckow Celebrate 31st Anniversary

Mr. and Mrs. John Suckow Honard On 31st Anniversary

A surprise party was held at the Arnett Waddingham farm Sunday, in honor of Mr. and Mrs. John Suckow's thirty-first wedding anniversary

A buffet meal was enjoyed by all and in the afternoon some moving pictures were shown by Louie Suckow.

Those who attended were Mr. and Mrs. John Suckow, Helen and Wesley, Mr and Mrs. Louie Suckow of Mason City; Mr. and Mrs. Herman Paul of Duncan; Mr and Mrs Vic Schoenwetter and family, Mr and Mrs. Wes Schuldt, Mr and Mrs. Wes Haefner; Dr and Mrs. D P. Anderson and Neva Ann; Mrs Anna Waddingham and Mr. and Mrs. Arnett Waddingham and family.

Birthday Dinner Sunday

Mrs Matt Smith entertained at dinner Sunday for her birthday, Mrs John Ahrenkeil, her mother; Mrs Louise Johnson, her sister; Mrs J Savogue, all of Goodell, Miss Esther Ghoske and Kermit Smith of Iowa Falls.

Mrs. Johnson had baked and decorated a nice birthday cake for the occasion.

Family Gathering Held At Wm. Meyer Home

Mr and Mrs Wm Meyer of Miller spent a very pleasant week end having all their children home for the first time in five years A turkey, duck and chicken dinner with all the trimmings was enjoyed by all. Those present were Mr and Mrs. Carroll Meyer; Mr and Mrs. Lester Paulson of Miller; Mr. and Mrs. Bernard Meyer of Albernett; Mrs Bartley Dunham and children of Texas, Mr. and Mrs. Bert Johnson of Goodell. In the afternoon Mr and Mrs. Jake Hess; Mr and Mrs. Geo. Thieman and Mrs. Chas. Fritzel of Klemme called to see the turkeys. Mrs Dunham and her children left Tuesday for Texas after spending a few weeks with her parents.

4-H ENROLLMENT DRIVE STARTS OCTOBER 1

Setting a goal of 325 4-H members was the first step taken by Hancock County 4-H club committees to inaugurate the 1948 enrollment activities, Paul Henderson, County Extension Director, announced today as more preparations of the October membership campaign were completed.

Plans are being made, Henderson said, to invite every eligible girl and boy in the county to become a 4-H member. The program will include the organization of new clubs in the Orthel and Britt communities.

GROWS BIG SPUDS!

When it comes to growing big potatoes Art Schoenwetter probably has the largest and best potatoes. Wednesday afternoon Art brought three potatoes to The Times office that he had dug from one hill. The three spuds weighed 3¾ lbs. The largest weighed 1½ lbs. Art says they all run about like that and that his garden produces enough for his winters use.

TRACTORS COME UNDER NEW LAW

Tractors as well as automobiles come under the terms of Iowa's new financial responsibility law, according to word received by County Extension Director, Paul Henderson, this week from Norval Wardle, Iowa State College farm safety specialist.

The law, which becomes effective October 1, provides the owner of a vehicle involved in an accident on the highway must post cash, securities or a bond of $11,000. unless he is insured for at least that amount by an insurance company licensed to do business in Iowa If he is insured for less than $11,000, he must be prepared to post the difference in cash or securities.

Wardle pointed out that most farm tractors are occasionally operated on a public highway, and when they are on the highway they are included specifically under the terms of the law.

NEIGHBORS AND FRIENDS HELP YOUNG FARMER WITH PLOWING

Mr. and Mrs. Leonard Kaduce will begin farming for themselves next spring on the farm now occupied by Mr. and Mrs. John Swalve southeast of Klemme.

In order to give the young couple a good start the following went to the future Kaduce farm Thursday to get the fall plowing done John Kaduce, Sr.; John Kaduce, Jr.; Carl Wille; Paul Lau; Glenn Wille, and of course 'Lindy" was there too.

Mrs. Carl Wille and Mrs. Leonard Kaduce prepared a picnic dinner which the men enjoyed at noon.

The farm on which Mr. and Mrs. Kaduce will move to in the spring is owned by Ed. Becker.

Mrs. Clara Barz Honored At Birthday Surprise Party

Mrs. Eldon Hagen planned a birthday surprise party for her mother, Mrs. Clara Barz at the latter's home Friday afternoon. The afternoon was spent informally and the group of ladies who had been invited were treated to a nice lunch.

Mrs. Barz's birthday is Sept. 30th, but the party was staged a few days early. Mrs. Barz received many nice gifts.

FUNERAL SUNDAY FOR FARMER NEAR GARNER

Funeral services were held on Sunday at 2:00 p. m. for Walter Anderson, 57, veteran of World War I, who died Thursday evening from self-inflicted wounds when he shot himself with a .22 calibre rifle. The Rev. Alton M. Miller officiated with the American Legion post of Garner assisting. Burial was in Concord township cemetery.

Mr Anderson was born in Denmark, came to the United States in 1910, settled near Klemme where he lived for 13 years, then moved to the farm 5 miles east of Garner where he lived at the time of his death.

He leaves his wife and the following children: Dagny, Calvin, Einar and Melvin; brothers; Chris Anderson, Forest City; Martin Jensen, Mitchell; Ferdinand Anderson of Denmark, and a sister, Shine, of Denmark.

FLOYD FRIEDOW & SONS TO HOLD POLAND CHINA SALE

Floyd Friedow & Sons are this week advertising their annual fall sale of Poland China Boars They will sell 40 head of fine boars at their sale Saturday afternoon, October 4th at their farm west of Klemme

The Friedows showed a herd of their Poland Chinas at the Fair this year and captured a big share of honors in a field of strong competition. Farmers who want to improve their hogs will do well to attend this sale and look over Friedow's offering.

Birthday Party For Fred Neuhring

Fred Neuhring had a birthday party Friday and in honor of the event his sons, Erwin and family and Earl and family, came to the Neuhring home Friday evening and helped Fred celebrate by having a nice lunch of cake, ice cream and coffee, and presenting Fred with some nice gifts.

Attended Plowing Contest

Several farmers in this community, including Wilbur and Roy Arnold, drove to Ellsworth Saturday to take in the State Plowing Contests. The crowd there was estimated to be around 40,000 people. Contests were held in level, contour and terrace plowing and was a very interesting demonstration to watch

Took In Foot Ball Game

Mr. and Mrs. J. A. Chambers, Jim Tabb and Mrs. Roy Arnold drove to Ames Saturday to attend the Iowa State College vs. Colorado football game. They also visited Mr. and Mrs. Jack Tabb and Bruce Arnold, who are attending college at Ames.

Return Home From The North

Mrs. Fred J. Arnold and son, Bobbie, returned, home Tuesday from Two Harbors, Minnesota, where they went a few weeks ago for relief of Bobbie's hay fever He attended school while there and the trip north benefited his health.

Home Economics Girls Entertained

The Home Economics girls have finished their course on "Good Grooming" so Friday they entertained at an afternoon Tea, honoring their mothers and Mrs. Patterson and Mrs. A. L. Kingery. The girls served at small tables attractively decorated and capably demonstrated what they had learned in this course, under Mrs. Andrea's direction. During the serving the mothers were entertained with piano music, furnished by several of the girls.

Home Economist Extension Worker For Hancock Co.

Financial Responsibility Law For Iowa Drivers Effective October 1, 1947

The Financial Responsibility Law for Iowa drivers becomes effective October 1, 1947, and provides for means of proving responsibility following accidents which result in bodily injury or death or damage to the property of any one person in excess of $50.00, according to Chas. F. Jackson, Hancock County General Agent for Iowa Farm Mutual Insurance Company.

The law provides that drivers of motor vehicles including tractors involved in accidents as described above must within 60 days prove that they are financially responsible for such damage, even though one of the owners or operators may be entirely blameless for the accident.

The four means of proving responsibility are: (1) By securing releases from all persons who might have claims against the owner or driver and filing such releases with the Commissioner of Public Safety. (2) By depositing security with the Treasurer of the State in a sum decreed sufficient by the Commissioner to satisfy any possible judgments for damages. (3) By depositing with the Treasurer of State cash or securities in the sum of $11,000. (4) By notifying the Commissioner that an insurance policy or bond with certain minimum requirements is in effect.

Jackson pointed out that the future financial responsibility may be met and proven by securing insurance protection against claims for death, bodily injury and property damage in amount as follows: for injury or death, one person $5,000; for injury or death, two or more persons, $10,000; for property damage, at least $1,000 However, Jackson said that $5,000 limits for property damage are most common. Other ways of anticipating such future responsibilities involve the depositing of $11,000 with the Treasurer of the State of Iowa, or by securing a bond in that amount from a licensed surety company in this state.

Penalties in the new law to owners and drivers failing to meet such responsibility include loss of license and registraction plates on all vehicles owned by him for one year, or until the owner and operator is released from all liability arising from an accident.

THOMPSON DISPLAYS MOUSE TRAPS AT CATTLE CONGRESS

Mr. and Mrs. Ed. Thompson left Sunday for Waterloo where they have a display booth at the Waterloo Dairy Cattle Congress.

Mr. and Mrs. Thompson will have their colorful Run-Way Mouse traps on display during the annual show. The Run-Way trap display always attracts a large crowd wherever Mr. Thompson has shown. In the past he has had booths at several state fairs.

Two Offenders Fined In Garner Justice Court

Justice R. J. Fritsch, Garner, reviewed 2 cases in court at Garner the past week.

Walter Vern Tanner, Garner, was fined $10 and costs for having no muffler and using a straight pipe. Five dollars of the fine was suspended on the correction of the fault. Arrest was made by highway patrolmen.

Ben Johns of Britt was fined $25 and costs for appearing in an intoxicated condition on the streets of Garner. He was arrested by Marshal Gilbert.

NAME HANCOCK COUNTY WORKER

Elsie Van Wert To Work With County Extension

Appointments of 4 home economists to serve in county extension service work were announced Friday by Dr. Charles E. Friley, president of Iowa State college.

Josephine H. Lund, who served last year as home econimcs teacher in Tripoli schools, will become county extension home economist in Pocahontas county October 1st.

Elsie Mae Van Wert will assume a similar position in Hancock county October 1. She has been teaching for the past 4 years at the Swea City consolidated school.

Verda Leigh Patterson is to take an appointment in Dickinson county November 1. A graduate of Iowa State college this year, Waneta A. Wittler, a 1947 graduate of Iowa State college will become county extension staff were also announced Friday by Dr. Friley.

Julia M. Faltinson will become assistant State Girls 4-H Club leader October 1st. She served during World War II with the U. S. Navy, and recently completed work for an advanced degree in home economics and education at the University of Washington.

Louis Rank is to become county director in Humbolt county effective October 15. Rank previously served as county extension director in Dickinson county from November 1, 1932, to Sept. 9, 1944. For the past three years he has been secretary of the Clay and Dickinson county Farm Loan association.

CRAIG LARSON CELEBRATED HIS 6TH BIRTHDAY WITH PARTY

Craig, son of Mr. and Mrs. Carold Larson was 6 years old on September 20th and in honor of the event his mother planned and carried out a party for him which was held in the Klemme Park.

About 25 little boys and girls participated in the party and had a lot of fun playing games.

Craig's grandmother, Mrs. Fred Kluckhohn, had baked and decorated a nice cake, all lighted up with candles. The cake and other delicacies provided a nice lunch after the games.

Craig received a number of nice gifts from his little friends and thought it was a great event.

Board Plans Highway, Also Channel Change

Hancock County and Wright County Supervisors have approved the construction of a new highway and changing of the channel of the Boone river where it enters Wright county and have ordered a letting on the construction of the improvement located between sections 35 and 36 in Magor township. The letting will be held at the Hancock county courthouse Monday, October 6, at 3 p. m.

SOME BEANS ALREADY HARVESTED AROUND KLEMME

Some soy beans have already been harvested around Klemme. A check-up at the local elevator reveals that they are yet somewhat green and wet. Manager Glen Bridges predicted that the annual soy bean harvest will get into full swing the latter part of the week if weather permits.

Another Glamour Probe Due

MOST folks would think that congress had had enough of Hollywood after that Brewster-Hughes fiasco. However, another big extravaganza is being cooked up by the house un-Americanism investigating committee that will outdo the Hughes probe in names and glamour, if not headlines.

Until the curtain goes up, a publicity blackout has been ordered by committee chairman Parnell Thomas of New Jersey. However, it is known that a swarm of big-name actors and actresses will be brought to Washington next month to testify on alleged communism in Hollywood.

Even if the probe doesn't prove anything—which it probably won't—it will keep Congressman Thomas' name on the front pages—always helpful when one aspires to be GOP senator from New Jersey.

Thomas and his investigators are mum about which movie stars and producers will appear. However, it can be revealed that those scheduled to be invited or subpoenaed include:

Charles Chaplin, who filmed "The Dictator"; Katharine Hepburn, who introduced Henry Wallace to a Los Angeles rally; Adolphe Menjou, Robert Taylor, Director Leo McCarey and Hans Eisler, a Hollywood composer and brother of Gerhardt Eisler, recently convicted of contempt of congress. Jack Warner, who produced Ambassador Joe Davies' book "Mission to Moscow," at a time when we were wooing Russia, also will appear.

★ ★ ★ ★

WALTER WINCHELL

The Washington Ticker

The administration is split right down the middle into two blocs—liberal and conservative. The conservatives are led by Secretary Forrestal, for whom the President has great respect, and include Harriman, Krug, Snyder and Clark. The liberals are Bob Hannegan, Gael Sullivan, Schwellenbach and Clark Clifford. . . . The conservative bloc wants to force the ouster of Prime Minister Clement Attlee in Britain by insisting the British will get no relaxation of the loan agreement or other financial aid until Attlee is out, a coalition government is in, and the socialization of industry is stopped. . . . With the elections coming on, Mr. Truman is listening to the liberals on domestic policy.

U. S. Ambassador Griffis is dwelling in a Warsaw hotel because the home provided by the Polish government was taken over by 30 squatters, who resist every effort to shoo them out.

Dwight Griswold will resign as head of Truman's commission in Greece. Because, he says, Greek monarchists (and our state department) are giving him "the finger." He bitterly adds that he "isn't gonna hold anybody's bag!" . . . Another Truman exec will quit and take an offer (at 60 Gs) in private industry, unless he inherits Hannegan's chairmanship of the Democratic national committee. Now why would any man want a thankless (hat-in-hand) job like that?

★ ★ ★ ★

PAUL MALLON

Treasury Juggles Its Figures

PRESIDENT TRUMAN found the lost figures in his fiscal midyear budget review. Although dollar volume of business and income have been increasing since January, no one around the treasury has been able to find the figures showing how much this would increase receipts, and thus justify the Republican tax reduction.

When the June 15 quarterly income taxes came in to the treasury till, the Democratic actuaries should have been able to estimate immediately how much more money they would take in this present year than they had figured. But the Republican tax reduction bill was then under consideration in congress, so the actuaries just looked dumb, and pointed to the daily treasury statement, which is an unrevealing generalization of matters fiscal.

By June 30, this statement showed receipts were actually down the first six months of this year over last, instead of up above the budget calculations. Even at the fiscal year end, Treasury Secretary Snyder merely estimated the surplus larger than expected for the closing year and warned against tax reduction, as you will recall.

By this little fiscal ruse, the Democrats caused the Republicans to use the six-month-old budget estimates of last January, which kept them on the defensive and forced them to justify any tax reduction by the amount of economies they could make.

There is this to be said of the liberation of India: Lord Mountbatten gave it an air that not even Tyrone Power could have improved on.

★ ★ ★ ★

WALTER SHEAD

British Squander Recovery Funds

SEN. RAY BALDWIN of Connecticut spoke truly when he chided his Republican colleagues: "If we are to remain the majority party we must act effectively in the interest of a majority of the people. If we act only in the interest of a minority of rock-ribbed Republicans, we shall again quickly become a minority party."

The record of the first session of the 80th congress bears out the Connecticut senator's charge, but the charge fits equally well the record of the 79th congress which legislated in the interest of a minority of rock-ribbed Democrats.

Our two-party system doesn't contemplate government by coalition, but during both the 79th and 80th congress it was evident the trend toward continued progressive government was halted and the clock turned back by this coalition of southern Democrats and Republicans, aided and abetted by the pressure groups of self-interest lobbyists.

The power of recall held by the voters of the nation is helpless against this kind of government and a return to strict party responsibility, essential in our democracy, will be the best insurance against the evils of communism and fascism spreading dangerously as a result of Tory irresponsibility.

★ ★ ★ ★

WRIGHT PATTERSON

Two-Party System Falters

THE American people are greatly interested in the survival of England. We fully realize her value as a strong and prosperous nation to us and to all free people. We evidenced our desire for her survival by advancing nearly four billion dollars to aid in her recovery from the terrific effects of the war on her production, her economy and her leadership. That four billion dollars has been spent in fruitless experiments and in supporting the British political party now in power. While we are willing to aid England, we are not willing to finance the experiments in national socialism which are being made by the British Labor party.

Kidneys Must Work Well-
For You To Feel Well
Hours every day, 7 days every week, never stopping, the kidneys filter waste matter from the blood.
Most people were aware of how the kidneys must constantly remove surplus excess acids and other waste matter that cannot stay in the blood without injury to health, there would be better understanding of *why* the whole system is upset when kidneys fail to function properly.
Getting up nights, scanty or too frequent urination sometimes warns that something is wrong. You may suffer nagging backache, headaches, dizziness, rheumatic pains, getting up at nights, swelling.
Why not try *Doan's Pills*? You will be using a medicine recommended the country over. Doan's stimulate the function of the kidneys and help them to pass poisonous waste *from* the blood. They contain nothing harmful. Ask your neighbor! Use today. Use with confidence. At all drug stores.
DOAN'S PILLS

THE FICTION CORNER

Lucky Punch

By ELOISE STONE

The stage for Benson's Gulch was ready to leave Tucson. Gilbert Bradly hurried up the dusty street and climbed aboard just as the driver whipped the horses and the coach lurched forward.

Once settled comfortably in his seat, he casually took inventory of his fellow passengers. Besides himself, the coach contained two people—a girl and a man.

The girl's eyes reflected the color of the violets which trimmed her bonnet. Her dress was of gray linen. Beneath the brim of the bonnet, several curls of auburn hair escaped to flutter in the draft from the partly open window.

The first thing Gil noticed about the man was his agate-hard yellow eyes. They were set close together under thick black eyebrows. The man was heavily built, with huge shoulders and hands. He wore twin gun belts crossed at his waist and the black handles of his six-guns protruded from open holsters.

"Since we're all going to Benson's Gulch, we'd just as well make ourselves acquainted," he said, flicking his yellow eyes over Gil and then resting them on the girl. "I'm Mort Cass, mayor of Benson's Gulch."

The girl's pale face turned even whiter. Her lips quivered ever so slightly as she looked with loathing straight into the yellow eyes.

"I'm Virginia Holmes. My brother wrote me about you shortly before he died."

The two had forgotten Gil's presence.

"I was mighty sorry, ma'am, when your brother met his untimely end," said Cass.

"Sorry," the girl flashed. "William was fighting you and your corrupt friends with his newspaper. He more than hinted that if an accident befell him, you would be behind it. I haven't the slightest doubt that you killed my brother."

The yellow eyes narrowed grimly. "Some of those words are mighty harsh, ma'am."

"I shall print some just as harsh," said Virginia. "You see, you didn't stop his paper. I am going to Benson's Gulch to publish it."

Virginia Holmes settled back into her seat, turning her body to face the window.

Gilbert Bradly had been about to introduce himself, but he saw that neither of his companions was interested. Gil would have been the first to admit that he wasn't an impressive figure. He was slight, barely five and a half feet tall. His gray eyes were mild and his clothes marked him as a newcomer to the desert country.

The trio rode in silence to Benson's Gulch.

Arrival of the stage was evidently an event in the town. The group of men gathered for the occasion reminded Gil of a similar band which assembled each evening to watch the train go through the Ohio village where he had spent his youth.

A nearby cafe beckoned and Gil went in to have a cup of coffee before going to a hotel. The waiter had barely slid his brimming cup down the counter, when one of the onlookers from the stage depot took the next stool. He, too, ordered coffee and took a deep drink before turning to Gil.

"Haven't I seen you some place before?" he asked. "You look real familiar to me."

"I don't recall meeting you," answered Gil. "I'm new to this section of the country."

"It's a good country, but I can't say too much for this town."

"Don't discourage me like that, when I've only been in town ten minutes," smiled Gil. "What's wrong with the town?"

The other grunted. "You've met our mayor. If you don't already know, you'll soon find out."

"Sorry," the girl flashed. "William was fighting you and your corrupt friends with his newspaper.

By the time Gil had been in town two weeks he had made friends with Virginia Holmes and incurred the enmity of Mort Cass for that reason. Cass had learned that Gil was in Arizona because of his health and he never failed to make a remark about "lungers" when he was certain to be overheard by the smaller man. Gil found that not many of the townspeople liked Cass, but, one and all, they feared and obeyed him.

It was common gossip in Benson's Gulch that Cass had either fired the shot that killed William Holmes, or ordered it fired. The body of the young editor had been found in his shop one morning. A group of wild cowboys from a Cass-controlled ranch had been drinking the night before and done a lot of wild shooting in the town's main street. One of the bullets had broken the glass window of the newspaper office and lodged in the owner. The coroner had given a verdict of accidental death. As Cass was all-powerful in Benson's Gulch, no one openly questioned the verdict.

Cass was proud of his record as a gunman and a fighter. He often boasted that whoever could lick him, either on the draw or with fists, could be the next mayor. Mort Cass wouldn't stay in a town where he had been whipped.

Two men he had bested at gunplay were asleep on Boot Hill, at the edge of town. The only man who had ever fought him barehanded might as well have joined them. His broken bones had not mended properly after the beating he had received and his six-foot body was shrunken and misshapen.

Virginia and Gil were making their way across the street one day to dine at the Western hotel. Cass swaggered out and moved toward them.

"Well, if it ain't the pretty schoolmarm turned editor and her pasty faced Don John."

Anger seethed through Gil, but he couldn't quite help being amused at the flagrant mispronunciation. He could smell liquor on Cass' breath. The man had been drinking heavily, but was far from drunk. He pushed between Gil and Virginia.

"Run along, tenderfoot," he said. "I'll take Virginia to dinner and see if I can't change her opinion of me a bit."

He started to take the girl's arm. She drew back and slapped him full across the face. He started menacingly toward her.

"I'll learn you to slap Mort Cass," he said.

Gil tapped him on the right shoulder. As Cass turned, Gil drove a hard left into his face. The crowd, which was beginning to gather, gave a startled gasp. Cass charged at Gil and for a moment it looked as if he would pummel him into the ground. Gil's rapid foot work saved him. His weaving body made a poor target for the larger man's bear-like blows.

Cass soon realized that this fight was not going to result in the easy victory he had expected. He stepped back and warily eyed his adversary. Then again he charged at Gil, who eluded him.

Wild cheers rang from the crowd later, when Gil stood with widespread legs over the sprawled figure of Mort Cass.

"Oh, what a lucky punch," someone roared, as bystanders rushed to congratulate Gil.

"Lucky punch, nothing," cried a deep voice.

Gil turned to face the man who had drunk coffee with him soon after his arrival in Benson's Gulch.

"I remember you now," he said, taking Gil's hand in a firm grasp. "I saw you fight once in Chicago. Recall the night you knocked out Motzi in the third round. You're Bradly, once holder of the world's lightweight boxing crown."

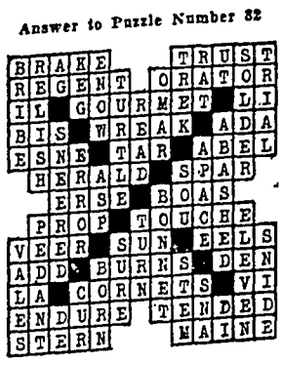
Answer to Puzzle Number 82



Series H-47

Don't Live a Self-Centered Life

Nine times in ten when you find a person who isn't getting as much out of his life as he should, who wants more friends than he has, who isn't altogether happy with his existence, you'll find, if you probe deeply enough, that that person is too self-centered.

Although they don't know it, usually this condition of being self-centered starts in childhood.

As a child the person was babied by his parents. He received so much notice that when he left home he felt letdown, neglected, disillusioned when the world didn't treat him as his parents had. So he retired in a shell.

In one office I know there was a girl who didn't have a friend. For three months she had worked there. Not one of the other girls had paid the slightest attention to her. One day she came to me, broke down, cried, said she was miserable. "They don't pay any attention to me," she sobbed. "Do you pay any attention to them?" I asked.

"No—no, I don't.

"Then that's the trouble. If you want to be friendly with these girls you have to show them that you are friendly with them."

If you are living a self-centered life now, the best thing for you to do is live more with other people and show them that they are important to you.

Jenny Lind's Concert Tour Created Greatest Furor

America's greatest furor was that created by Jenny Lind, the Swedish singer, during her concert tour (1850-1852) says Collier's.

Its extent is indicated by a collection of Lindiana owned by the New York Historical society which contains, among its thousands of items, scores of the countless articles on which her name and portrait were used as a trademark or decoration, such as bonnets, beds, whiskies, wallpapers and even men's fancy vest buttons.

SNAP! CRACKLE! AND POP! SAY...

Kellogg's RICE KRISPIES

P.S. Be sure you get America's favorite rice cereal, the one and only *Kellogg's* Rice Krispies!

Experience is the best teacher!

Remember?

All the different brands people smoked during the wartime cigarette shortage? Naturally, smokers compared.

Choice of Experience

That's how thousands of smokers learned from actual smoking experience that cool, flavorful Camels suit them best!

MORE PEOPLE ARE SMOKING CAMELS than ever before!

SEVENTEEN THOUSAND DOLLARS from 50 acres of single cross hybrid seed corn! That was one of the accomplishments last year of Champion Farmer John J. Gannon and his father, William P. Gannon, on their 785-acre farm near Valeria, Iowa. Hog sales totalled over 400 head. In a recent month, 16 purebred Guernsey cows, three of them dry, returned $504.78 over feed costs. Seventy head of purebred Aberdeen-Angus cows, and their calves, provide a profitable outlet for roughage. So does a flock of sheep. The Gannons bale 7000 bales of hay annually. Careful pasture management, manure and commercial fertilizers, and a soil conservation program keep the farm highly productive. For economy and efficiency in operating their farm equipment, Champion Farmer Gannon has found it pays to depend on Firestone tires. When he and his father buy new tractors, they specify Firestone Champion Ground Grips. In the photograph, Shelia Ann Gannon with her grandfather, William P. Gannon, and her father, Champion Farmer John J. Gannon.

For more information about Champion Farmer John J. Gannon, write to The Firestone Tire & Rubber Co., Akron, O.

Champion Farmers Specify Firestone CHAMPION GROUND GRIPS

TO GET extra pulling power . . . longer tire life . . . and smoother riding, Champion Farmer John J. Gannon and his father specified Firestone Champion Ground Grips for their new tractor.

Tests show that Firestone Champion Ground Grips clean up to 100% more effectively, pull up to 62% more, last up to 91% longer, and roll smoother over highways than any other tractor tires . . . important facts to cost-conscious farmers.

Only Firestone Champion Ground Grips are made with connected curved traction bars. These bars clean with a plowlike action . . . giving the Champions more pulling power. Extra tread rubber in the bar connections gives them a "Center Bite" in the heart of the traction zone. This, too, means more pulling power. The extra rubber in the connected tread increases tire strength . . . lengthens tire life . . . money-saving points you can't overlook when you buy new tractor tires. So when you buy . . . buy the best . . . buy Firestone Champion Ground Grips.

Listen to the Voice of Firestone every Monday evening over NBC

Copyright, 1947, The Firestone Tire & Rubber Co.

Only FIRESTONE CHAMPION Ground Grips take a "CENTER BITE"

Larry Wicks Entertained The Saturday Afternoon Club

Larry Wicks was hostess to the Saturday Afternoon Bridge Club at her home Saturday afternoon. Mrs. Orville Bridges won high score and Mrs. M. L. Harson was second high. A nice lunch was served by the hostess following the games.

KINDERGARTEN NEWS

We have been learning about the care, kinds and uses of dogs and cats.

Tuesday afternoon we had a little white bunny in our room.

Mrs. Clifford Anderson and Mrs. Lynford Back visited our room this week.

FIRST AND SECOND GRADE NEWS

—Teaacher, Miss Halfwassen

In the First Grade Reading we have been dramatizing stories. Tuesday Harlan Lee Baack and Virginia Kudje dramatized the story, "The Funny Bunny."

Last week Carroll Priebe had a birthday and he treated us to candy bars.

Linda Swalve and Craig Larsen had birthdays this week and treated us with candy.

In Art we have been coloring squirrels.

Those in Second Grade receiving a gold star in Spelling for the week are:

Sandra Medin
Larry Ulrich
Vernadeen Ter Hark
Jeanne Barz
Marcella Nuehring

THIRD AND FOURTH GRADE NEWS

The following Third Grade pupils received 100 in Spelling the past week:

Gary Baack
Beverly Christiance
Bob Larson
Barbara Thompson

Martin Brinkman and Sharleen Swanson each missed on word.

The following Fourth Grade pupils received 100 in Spelling the past week:

Shirley Barz
Margaret Haefner
Warren Terhufen
David Waddingham

Roger Bachman and Ione Rosendahl missed only one word.

Bobbie Arnold returned to school Wednesday afternoon, after being absent for two weeks. He had been troubled with hay fever and went to northern Minnesota for relief.

Janis Kalkwarf of Belmond, niece of Miss Tanner visited in our room Friday. Jerry Stokesbary visited in our room Friday afternoon.

The fourth grade Geography class is studying about Iceland.

Both the third and fourth grade Language classes are learning the correct usage of words.

FIFTH AND SIXTH GRADE NEWS

Our fifth and sixth grade made leaf men for Art on Friday.

The six grade have all paid their book rent. We have only two more in fifth and we will have 100 per cent.

The dental cards were sent home to be signed by the dentist to show that the child has had his or her teeth checked. We are working for all to come back signed. There is to be a health parade sometime in the spring for the boys and girls with signed dental cards.

To learn our explorers in fifth History we have made a game out of it. It is played with a caller asking questions and the children find on their charts the explorer. Who ever finds five in a row first wins.

SEVENTH AND EIGHTH GRADE NEWS

—Reported by Maxine Barz

The Science Club had another meeting Friday. There have been several insects added to our collection by members and also by the seventh grade. Among them was a rabbit which was brought by Luverne Heginger.

In Eighth Grade Arithmetic we have been learning about the Metric System of numbers. It isn't as difficult as we thought it would be.

In Seventh Grade Literature they have been reading stories orally in class. Some of them are so interesting that the eighth graders like to eaves drop.

FRSEHMAN NEWS

The Freshman class has llected their officers. They are as follows: President, Harley Barz; Vice President, LaNelle Harvey; Secretary and Treasurer, Ruth Lacey; Reporter, Mary Ann Blumer.

We've had several more experiments in Science this past week. We're now on the unit, Air, Fire, and Living Things.

In Algebra we've had a test over the unit on Formulas, and have started a new unit on equations. In English we've been studying conversing and Penmanship. The Freshman and Sophomore Home Economic classes are planning to give a tea for their mothers on Friday afternoon. We have started the unit on Foods, and we also are studying Etiquette

We were startled Monday morning when the fire buzzer sounded. It took us much to long to get out of the building, but we will do better next time.

Reporter, Mary Ann Blumer

SOPHOMORE NEWS

—Reported by Marian Kastler

Our second year of high has gotten off to about the same start as the first although I'm sure we're less nervous when called upon in class than last year. The new teachers, well, they're definately not new any more. In fact we find they know us pretty well already. Too well in some cases!

In English we just completed our letter writing unit. Now we are studying the parts of the simple sentence. Mrs. Harvey has found we still remember a few things from last year.

Geometry has become quite complicated for a few of us. No matter how complicated, we still manage to have a few A grade students. Aren't some people lucky?

Biology, well I'm afraid we're not studying as we should. In any case Mrs. Andreae finds it necessary to give us a test almost every day. One day a week we're sure of not getting a test, since we discuss our weekly readers; this consists of our national and government affairs. Most of us would rather have the tests. Do you blame us?

Mrs. Andreae's Home Economics girls have completed the "Good Grooming" course and now have begun on Etiquette. In this course we learn good behavior, how to set a dinner table, and rules for giving a tea. We are going to entertain our mothers at a tea party Friday afternoon.

All in all, high school is gobs of fun, isn't it?

JUNIOR NEWS

September 22-26

We have struggled through 4 weeks of school already, and find our subjects very interesting.

In English we are beginning on diagraming sentences. This, some of us find rather difficult, but after we get the "hang" of it it's lots of fun.

We have learned some new letters in typing class, and enjoy typing very much. The Algebra class has been slaving away at multiplying and dividing fractions. In Speech, we have been telling jokes and reading stories aloud.

The Sociology and Economics classes have been having interesting discussion, but of course Mr. Patterson has to spoil it all now and then with a quiz.

The highlight of the week for the Juniors has been the selecting of their Junior play. Mrs. Anderae will be the director.

—Reported by Isabelle Gibbs

SENIOR CLASS NEWS

Reported by Betty Kramer

The Seniors of K. H. S. are now getting settled down and making the best out of their last year of school. We have already had tests in about all the subjects and the grades show we need to work.

American Literature is getting more interesting as we get into the period of "The Growth of a Nation" We are studying such authors as Irving, Bryant, Cooper, Longfellow and Holmes.

In American History we have just finished the chapter on the early colonies; and we are now starting on their contributions to democracy.

Bookkeeping is getting easier as we are learning how to make a trial balance, profit and loss statement, and balance sheet in report form. Of course those mistakes we make in addition don't help any.

For Sociology, we have been studying why we have fears, and why we behave as we do. That is a good question for most of us.

In Speech class we are on the chapter of story telling. The past week we have told fairy tales, jokes, and some have told of some experiences. Speech is very interesting and is not hard unless we have an unexpected test.

The pins and needles we are sitting on are getting pretty dull as we wait for our class rings. Won't they please hurry!

STALKS WITHOUT EARS HAVE VALUE

For Most Feed Cut Earless Stalks Before They're Completely Dry

Barren cornstalks can furnish valuable feed. Agricultural experiment tests have shown that the earless stalks contains almost as much food nutrients, pound for pound, as normal corn plants with grain included.

So don't overlook the feeding value of drouth and heat-damaged cornfields this fall, Rex Beresford, Iowa State College animal husbandry specialist, suggests.

Get Most Growth

To get the best feed, cut the corn before the plants have completely dried out. Corn plants will lose protein as they dry in the field, Beresford explains.

But the corn should be left in the field if it will make further growth, even though the cance of ear production is gone. However, if the corn is burned at the top and fired at the bottom so that only about one-third of the plants are green, it should be harvested at once.

Can Pasture Field

Leaves will be lost if drouth-stricken corn is left in the field too long. Also, digestable nutrients are lost. If nothing better can be done, pasturing the cornfields will save some of the feed, Beresford says.

At the present price of 4 one-third cents per pound of digestible nutrients, a ton of green fodder is worth $10.40 to the operator if used properly. Each ton contains about 240 pounds of digestible nutrients.

A VACATION WITH HAY

Smart talk? Not a bit. Cows need a vacation to prepare for the next production job. And it needs to be a well fed vacation . . .6 to 8 weeks long. Good roughage and some grain will make strong calves and keep the cow in good condition at freshening time. It's a rebuilding process.

The cost of the feed will be more than repaid in more milk and larger milk and cream checks. Take care of the dry cows.

From where I sit ... *by* Joe Marsh

"It's Living That Counts"

I stole the title of this column from a magazine article that said a whole lot better than I can what farm and country life can mean.

We talk about farm profits, production, research, and mechanical improvements . . . but isn't it true, what we really value is the life country living offers us? . . . the chance to be close to our families and neighbors . . . children sharing in the chores . . . working with our own hands at a worthwhile job.

And country pleasures are simple: good talk at day's end, and a glass of mellow beer with friends . . . the companionship of man and wife, unruffled by distractions of the city . . . the mutual tolerance of one another's tastes—in choosing a friend, or a glass of beer, or a candidate for Governor.

Mind, I'm all for material improvements. But from where I sit the real goodness of our country life is that spirit of tolerance, moderation, and good fellowship.

Joe Marsh

HANCOCK COUNTY BOARD PROCEEDINGS

1ST ADJOURNED SEPTEMBER MEETING

Garner, Iowa
September 15, 1947

The Hancock County, Iowa, Board of Supervisors met in session on above captioned date pursuant to adjournment with Supervisors F J Schoun, John Chambers and George Th. Gerdes, present.

The minutes of the last meeting were read and approved as read.

On motion and second the application for a Class "C" Beer Permit of Milton Evanson is approved and permit is hereby ordered granted.

This being the 15th day of September, A. D., 1947, a date heretofore fixed for the hearing on the final estimate of Sylvan Oleson on Drainage District No. 10, the hour for said hearing having arrived, the proof of publication being on file and the board being fully advised, said hearing was held as scheduled.

There being no objections on file oral or written on motion and second the final estimate is apprved and the county auditor be and he is hereby directed to draw a warrant on D. D. No. 10 in payment of the final estimate as submitted by the engineer, all as by law provided.

This being the 15th day of September A. D., 1947, a date heretofore set for a further hearing on the assessment of D. D. No. 141, the hour for said continuation of the hearing having arrived and the board being fully advised, said hearing was held as scheduled.

WHEREAS, the construction of D. D. No. 101 will materially affect the outlet of Drainage District No 144 and added lands in Drainage District No. 144 should be included in the assessment of D D No. 141

BE AND IT IS THEREFORE RESOLVED by the Board of Supervisors acting for and in behalf of Drainage District No. 144, Hancock County Iowa, that the hearing on the assessment be and the same is hereby continued to October 6th, 1947 at 2:30 P M

In the matter of the hearing on the establishment of the reconstruction of Drainage District No 101 petitioned for by Rush Gabrielson, et al this being the date heretofore fixed for a hearing on the establishment of the reconstruction of D D. No. 101, the hour for said hearing having arrived, the proof of publication being on file and the board being fully advised, said hearing was held as scheduled.

WHEREAS the Chicago, Rock Island and Pacific Railroad have filed a claim for damages in the sum of $1,000.00.

BE AND IT IS THEREFORE RESOLVED by the Board of Supervisors in and for Hancock County, Iowa, acting for and in behalf of D. D No. 101, Hancock County Iowa, that C. F Merten, engineer William Boehnke and C. A. Frisbie are hereby appointed a damage commission as required in Section 455.30, Code of Iowa, A D., 1946, and laws amendatory thereto. Said commissioners are hereby ordered to view the premises and appraise damages and report not later than September 17, A D., 1947.

The hearing on the establishment is hereby continued to September 22, A. D., 1947, at 10 30 A. M., at which time claimants for damage may appear and show cause why such damage as reported shall not be accepted and improvement established as by law directed.

The foregoing resolution was offered and read by Supervisor Schoun who moved its adoption was seconded by Supervisor Gerdes whereupon the chairman placed the motion of its adoption and upon roll call the vote thereon is F. J. Schoun J A. Chambers and George Th. Gerdes, aye, Nays, none. Whereupon the chairman declared the resolution duly adopted

This being the 15th day of September, a date heretofore fixed for a continuation of the hearing on the assessment of benefits on D D. No 145, Hancock County, Iowa the hour for said hearing having arrived and the board being fully advised said hearing was held as scheduled. The report of the commissioners was read and all objections to the assessment of benefits as listed by the commissioners heretofore appointed to classify lands and assess benefits, were read and objectors heard

After duly considering all objections to the report of the commissioners and assessments the board finds that all assessments as set out in the report of the commissioners heretofore appointed just

BE AND IT IS THEREFORE RESOLVED by the Board of Supervisors acting for and in behalf of D D No. 145, Hancock County Iowa, that the report of the commissioners heretofore appointed to classify lands and assess benefits in D D No 145 Hancock County Iowa, be and is hereby ratified confirmed and approved as published in the Klemme Times a new paper published in Klemme Iowa on July 30 and August 6, 1947 proof of publication which is on file and the county auditor be and he is hereby directed to levy the assessments indicated therein as by law directed

The foregoing resolution was offered and read by Supervisor F J Schoun who moved its adoption was seconded by George Th. Gerdes whereupon J A Chambers Chairman in the chair placed the motion of its adoption and upon roll call the vote thereon is F J Schoun George Th Gerdes and J A Chambers, Aye. Nays None Whereupon the Chairman declared the resolution duly adopted.

On motion and second the board adjourned to September 22nd at 9 'clock A M

AROUND IOWA

LANDING FIELD

When an airplane buzzed him while taking a twilight dip in his gravel pit, Merle Otis of near Forest City thought the pilot might be his cousin so got out of his car and with the help of another autoist turned the two sets of headlights on a nearby pasture landing field. The plane came down alright, carrying 3 passengers in a surplus army plane They had mistaken Crystal Lake for Clear Lake, and therefore Forest City for Mason City

FANTASTIC SWINDLE

An unusual swindle has just been reported by Mrs. Johanna Olsen, 92, and son Rudolph, 52, of Mills county. A stranger came to the door and claimed to be representing an optical company of Omaha, a firm with which Mr. Olson was doing business. He claimed that Mr. Olson needed an operation and that he had been sent to perform it, using radium. They paid him $527. Doctors said later his eyes had received no treatment from the stranger and the Olsons are out their money.

ESCAPED

ArtMathers of Rodman drove in to a grain elevator recently to get a load of feed. In order to get his trailer into position to receive the load, he drove his car out onto an adjacent railroad tracks, right into the path of a backing freight train. The car was demolished. Mathers escaped without injury.

DOESN'T STRIKE

The courthouse clock at Toledo has temporarily ceased to strike the hours. Custodian J. B Tostenson found that the cable supporting a 750 pound weight, which operates the striking mechanism, was nearly worn through so has halted the works until a new cable can be secured. A 750 pound weight crashing through the courthouse floors might hit some one and give them quite a headache, Mr. Tostenson thinks.

WHERE'S SIMPSON

When a group of Stanford graduate students were introducing themselves recently, as being from Harvard, Indiana, Northwestern and other major schools, they professed never to have heard of George Barnett's alma mater, "Simpson College." Mr. Barnett pointed out that (1) the instructor of the class the group was attending, (2) the author of the text-book they were studying and (3) the dean of the entire Stanford graduate school, were all from Simpson. Then he added, "Now, where did you guys say YOU were from?"

WILD TRACTOR

Three Iowa men were injured recently by a "wild" tractor which backed into them while they were helping fill a silo. Bob Huskamp was backing the machine when the clutch broke and it rolled into Leo Huskamp, Gerald Cody and Marcus Saxton, pinning them against the silo blower. None were seriously injured, although Leo Huskamp needed 16 stitches. The incident happened near Fenton.

Read it first in The Times.

"SURE, it's a LIGHT BILL!"

"And I don't mean electric *light* bill, either. I mean a *light* electric bill. Because lights are only a small part of it. It's a cooking bill and a cleaning bill a heating bill and a cooling bill and a hot-water bill, as well. It covers food preservation and entertainment washing and ironing time-telling and sewing and a lot of other things besides. It's the biggest bargain in my family budget. When the cost of practically everything else has gone UP, the price of my electric service has stayed modestly LOW. I know I'm getting twice as much electricity for my budget dollar as Mother did 20 years ago—and electricity is doing many, many more jobs than it did then.

"It's a LIGHT bill, of course!"

Listen to the Electric Hour—the HOUR OF CHARM. Sundays, 4:00 P. M., BSt. CST.

History Lives in Washington Statues

Americans Dote on Nation's Monuments to Its Heroes

By BAUKHAGE
News Analyst and Commentator.

WASHINGTON.—If you haven't anything else to do, just take a seat beside me on this bench for a moment. I think this is one of the nicest "little parks" in the world. It doesn't take its name from the gentleman on the horse right over there in the center, behind the iron pickets. I don't know why. Of course, he is only a replica. The original is in a square in the city he defended from the British—in the "vieux carre" of New Orleans.

He was GENERAL Jackson then. We think of him as President Jackson now. And we make fun of the horse he's sitting on, that prancing steed with his feet planted so firmly in the air ("like a liberal congressman," as one of the old conservatives used to say). It took many pounds of lead in Andy's horse's tail to keep the two of them in balance, they tell me.

But don't think the horse's hind feet are not firmly planted! The one man who tried to move them brought down an avalanche on his head, and gave a President of the United States a real headache.

It happened this way: There is a statue of George Washington tucked off on a circle in a neighborhood which has neither the distinguished past nor the glorious present of Lafayette Square. Back in the regime of President Harding, that statue was taken down for a little repair. A newspaperman, hard up for a feature, sat down and wrote himself quite a piece. His name was John Russell Young, and he is now commissioner (mayor) of the District of Columbia. In his piece, he suggested that when Washington was prettied up and returned to public view, he should be placed in the center of Lafayette park. Andy Jackson, Young thought, could be relegated to Washington's former relatively obscure position in Washington Circle. Local officials agreed.

Baukhage

Then the deluge. The story was widely printed and it seemed that every Democrat in the United States was personally affronted. The presidential secretaries had bales of mail to answer. The climax came when a long-forgotten Andrew Jackson patriotic and marching club, which appeared to be very much alive and kicking, threatened to descend on Washington in a body. The President had to issue a public statement saying that Andy was safe.

But I didn't intend to run on about Andy. The park is not, as I said, named after him. It's named after that young man you see over there on the southeast corner — looking right across Pennsylvania avenue into the window of the No. 1 guest chamber of the White House. His name is Marquis Marie Joseph Paul Yves Rich Gilbert du Motier de Lafayette. Yes, we're in Lafayette park.

Over there on the northeast corner is another Frenchman, Field Marshal Jean Baptiste Donatien de Vimeur, Comte de Rochambeau. Over there on the northwest, opposite the Decatur House where Commodore Stephen Decatur died after being shot in a duel with a fellow officer (Commodore Barron) out at Bladensburg, is Baron Friedrich Wilhelm August Heinrich von Steuben, who was as useful to General Washington, in his way, as Lafayette was in his.

Kosciuszko Statue Stirs Reminiscences

But that brings me to the statue I was really going to talk about: Tadeusz Andrzeg Bonaventura Kosciuszko, standing on the fourth corner of the park across from the house which once belonged to James Madison. Dolly lived there after her husband died.

The other day, a dispatch came in from Warsaw which said that the minister of education of the Communist-dominated Polish government had ordered there would be no more "salacious chattering jokes and significant smiling" in Polish schools and universities.

I got to reminiscing on the air about how I had been told Polish students acted in the days when Poland was divided between Russia, Austria and Germany. Teaching of Polish history was suppressed, and the Russian secret police then were as brutal (if not quite as efficient) as the Communist police in Poland are today.

It seems a Polish teacher in those days occasionally would slip into his lecture some subtle anti-Russian or patriotic remark. There wouldn't be the slightest response from the students. The teacher would go right ahead, and then, after a perfectly innocent sentence of some kind, he'd pause (and probably do a little "significant smiling"). Then the students would fairly raise the roof with applause and cheers—delayed action.

I mentioned that on the air, as I said, and commented that every time I passed by the statue of Kosciuszko, I could hear a faint murmur. I had no doubt it was Kosciuszko telling what he would do today if he could just get down from his pedestal.

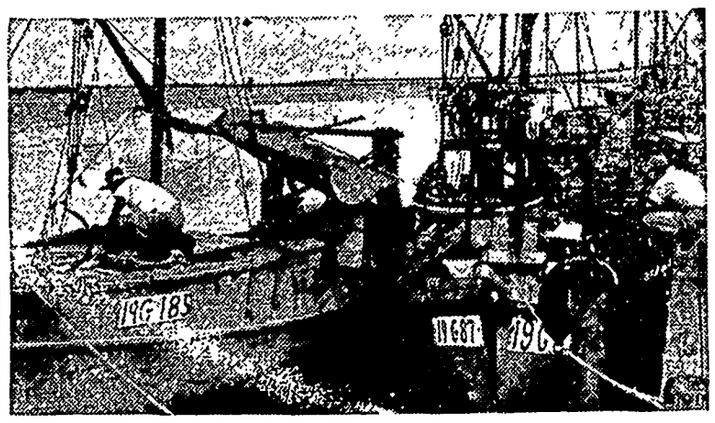
A number of people wrote in about that. They always do when I mention the statues. People are interested in statues even though they have gone out of style as monuments. You know, the Du Pont family took the bust of old Admiral Samuel F. Du Pont out of the famous circle named after him, and replaced it with the present beautiful memorial fountain. Some Washingtonians were deeply offended and the national parks service was kept busy for several days answering phone calls and letters from indignant citizens.

In fact about the only complaints the national parks service has been receiving of late years have been concerned with the upkeep of the 77 statues entrusted to its care. Some Washingtonians call up to rebuke the service for the greenish tinge creeping over some of them, like Kosciuszko's. It is bronze and weather turns it green, which most sculptors feel adds to its beauty, so the service doesn't worry too much.

There wasn't much money for the national parks during World War II to pretty up Washington's statuary. About all the service could manage was a yearly washing of each statue (it takes several men a whole day for the laundering job). But this year congress gave the service $10,000 for trucking equipment, hoses, masonry repairs, plumbing fixtures for the fountains and other monuments.

They have another $10,000 to spend on structural repairs—to replace missing arms, legs and chunks hacked out by souvenir hunters, for statues have their ghouls, too. But most of the finger breaking, it is believed, is done by perverted youth. On the whole, people like statues.

This is the Washington statue of Kosciuszko, Polish patriot, general and statesman, who served as George Washington's adjutant and laid out the fortifications at West Point. There is another monument to him at West Point.



FLORIDA OYSTER FLEET . . . Fishermen are busying themselves again along Florida gulf ports bringing in the first of the 1947-48 oyster haul. Here "oysterers" secure their craft after a long day's hunting in Apalachicola bay.

NEWS REVIEW

Corn Estimate Lowered; Aid Europe Now, Plea

REPEAT:

Less Corn

The 1947 corn crop, estimates of which have been shrinking like a $10 suit ever since August, was reduced by another 33 million bushels in the department of agriculture's September report.

Total estimate cuts since August 1 were 256 million bushels, and the expected outturn this year now has been placed at 2,403,913,000 bushels.

There was more potential bad news, said the department: In case an early frost should blanket the corn belt, another reduction would be likely.

Crop reporting board said that "it now seems likely that at least 75 per cent of all corn in the 12 corn belt states will have matured by the average date of the first killing frost," but warned that if it were a week early, it would catch about 40 per cent of all corn at an immature stage. If frost came a week later, only a 15 per cent loss would be registered.

Latest estimates also foretold a sharp reduction in the record wheat crop. Output was set at 1,408,602,000 bushels, as compared with the August 1 prediction of 1,435,551,000 bushels.

MEAT SUPPLY

Meat production can be maintained at a high level in the next year, despite the curtailed corn crop, animal feeding authorities declare. Extensive and efficient use of vegetable oil meal and other products will enable farmers to produce pork freely at less cost than if corn were used exclusively in feeding.

HEADLINERS

IN NEW YORK . . . Margaret Truman, coloratura soprano, was unanimously approved by the board of governors for membership in the American Guild of Musical Artists (AFL) as a junior vocalist in good standing.

IN TOKYO . . . Hidekei Tojo, former Japanese premier, now on trial for his life as a war criminal, peered into the future, chose an epitaph for his tombstone: "By Buddha's grace all sins committed while living are absolved."

Tojo

IN LONDON . . . Elliodor M. Libonati, visiting Legionnaire from Chicago, paused in front of No. 10 Downing street, the prime minister's residence, wickedly waved a handful of dollar bills in the air, attracted no takers.

IN TALLAHASSEE . . . Sen. Claude Pepper (Dem., Fla.) opened his mouth to say that if the Democratic party should feel that he could render 'greater service in some other way, I would be greatly influenced by that feeling," turned around to find that his friends were booming him for vice-presidential nomination.

IN MILWAUKEE . . . Mrs. Lucy Nostrand stepped from a bus at a busy intersection, was knocked to the pavement by a hit-and-run cow, a refugee from a meat company shipment.

URGENT:

Stopgap Aid

George Marshall, U. S. secretary of state, was trying his best to pile up pressure for a special session of congress this autumn to finance immediate interim aid to keep Europe on its feet until Marshall's 20-billion-dollar, long-range rehabilitation plan begins functioning.

Stymied by Republican leaders who were either downright opposed or indifferent to an emergency session before January, Marshall was taking his case to the people, attempting to rally public opinion behind him.

Intolerable cold and hunger are the immediate threats facing Europe, he said. The crisis calls for "urgent consideration."

What would it cost this time? Marshall said that there was as yet no estimate of stop-gap needs, but he didn't deny reports that William L. Clayton, undersecretary of state, had cabled from Europe a request for a special session of congress to vote 2.5 billion dollars for aid now.

The special session was far from assured. If it came to a showdown, GOP leaders probably would oppose it openly, and they could, if they wished, stifle any economic aid legislation.

GOP VICTORY:

Straw in Wind?

Jubilant Republicans were making much of Franklin H. Lichtenwalter's resounding victory over labor-supported Phil H. Storch, Democratic candidate, in a special election to fill Pennsylvania's eighth district seat in congress.

The issue, naturally, was the Taft-Hartley labor law, and the outcome was a two-to-one acceptance by the voters of the law and what it signifies. If Pennsylvania is as much a political weathervane as it is claimed to be, the Lichtenwalter victory forecasts a cold, bleak wind from the north for Democrats in 1948.

Republican hoop-la called the vote "a smashing rebuke to the radical labor bosses who chose to make the Taft-Hartley labor management act the paramount issue of the election."

Army Shrinking

Alarmed war department officials have estimated that the army's postwar strength has sunk to a new low of 965,000 officers and men, 105,000 below its authorized quota.

The army lost 75,000 officers and men during July and August and gained back only 50,000 through its recruiting campaign, thus suffering a net loss of 25,000 since July 1, when strength was 80,000 below the authorized level.

COLD-BLOODED FORECAST

Coal Shortage Looms for U.S.

Take a tip from the coal producers: Unless your furnace burns oil, it will be a good idea to keep a little sunshine in your smile and warmth in your heart this winter.

Because, from the standpoint of obtaining coal, it looks like the winter of 1947-48 will be the toughest in at least six years. Producers already are admitting drearily that there is little chance that fuel shortages, inconvenience and suffering can be put aside.

Reasons for this uninviting outlook are three, in particular:

1. Unparalleled demand in a peacetime period which even record production (600 million tons) will not fully satiate. Attempts are being made to stockpile, but to little avail. Industrial stocks are the lowest in years; retail supplies on hand are only fair.

2. Unprecedented shortage of railroad cars. Never, in history of the solid fuels industry, were so few cars available to move so much coal to so many consumers.

3. Domestic buyer indifference to pleas that they fill their bins during summer months. That apathy is accounted for by higher retail prices of coal, combined with the prolonged heat wave which lulled the householder into a false sense of security.

At the same time, paradoxical though it may seem, coal production this year will reach a level surpassed only by the output in 1944 when the nation was at the height of its war effort.

Even if miners dug and machined an average of only 10 million tons a week during the remaining weeks of 1947, production would be 45 million tons higher than the 532 million total in 1946.

Because of strikes, idle time, car shortages and a shorter work week, the mines have lost somewhere between 35 and 50 million tons of production so far this year.

Concerning prices, the most likely prospect is for them to go up again. Dealers say that the customer appears ready to take higher charges for his coal as something unavoidable, but he doesn't like it.

THE BIBLE TODAY

International Uniform Sunday School Lesson

By EGDIE D. NEWTON, D.D.

SCRIPTURE: Hebrews 1—2; 8:6-13; Matthew 3 16, 17; John 14 5-11.
DEVOTIONAL READING Psalms 40: 1-8.

Better Revelation

Lesson for October 5, 1947

WITH Sunday's lesson we turn into another field of Bible study for the concluding quarter of the year—messages from the Epistles, other than those of Paul.

This lesson, and the next two, are from the Epistle to the Hebrews—one of my favorite books in the Bible. The passages of study for this lesson are Hebrews 1—2; 8:6-13; with kindred passages in Matthew 3:16, 17 and John 14:5-11. Suggested devotional reading for the lesson is Psalms 40: 1-8.

Dr. Newton

The title of the lesson has reference, of course, to Christ—the better revelation of the Son of God in his appearance to bring the father's plan of redemption nigh unto all men.

• • •

The Father's Son

"GOD, who at sundry times and in divers manners spake in time past unto the fathers by the prophets, hath in these last days spoken unto us by his son, whom he hath appointed heir of all things, by whom also he made the worlds,' chapter 1, verses 1 and 2.

"And Jesus, when he was baptized, went up straightway out of the water; and, lo, the heavens were opened unto him, and he saw the Spirit of God descending like a dove, and lighting upon him; and lo a voice from heaven, saying, This is my beloved son, in whom I am well pleased," Matthew 3:16, 17.

Could there be a more beautiful and impressive manifestation of God's acknowledgment of Jesus Christ as his son?

• • •

Love Is the Key

IN THIS better revelation of Jesus Christ, we find that love is the key that opens the door into the brightly lighted room. "The father loved the son, and hath given all things into his hand," John 3:35.

Love is the key. It is ever so with all the revelations which God makes of himself to his trusting children.

And this revelation of God in Jesus Christ carries the further truth that "all things" have been placed in the hands of our blessed Saviour. We read elsewhere that "all things consist in him," which means that all things hold together in him—the world itself. Jesus said, "All power hath been given unto me, in heaven and on earth."

It is not a picture of passive love, but a picture of perfect love in action, with all things committed to his administration. Again we can sing, "This is our father's world."

• • •

Christ Reveals God

NOT only does Christ reveal himself, but also the father, for they are one. Reading now into the second chapter of Hebrews, we find these words: "God also bearing them (angels) witness, both with signs and wonders, and with divers miracles, and gifts of the Holy Ghost, according to his own will."

It is God's own will that he be revealed, and he must do the revealing. Turn to John 14:5-11, where we read again that revealing incident when Jesus patiently reassured Thomas and Philip, declaring "He that hath seen me hath seen the father."

The better revelation of God in Jesus Christ brings us far beyond the revelations of God in the Old Testament, dramatic and impressive as they were.

• • •

A New Covenant

THE better revelation means "a more excellent ministry," because Jesus Christ has now become "the mediator of a better covenant, which was established upon better promises," Hebrews 8:6.

The first covenant was imperfect, because it was manifest through humanity. Only the perfect son of the perfect God could manifest the better covenant. Jeremiah foresaw the better covenant. See Jeremiah 31: 31-34.

Now that the better revelation is our portion, what shall be our response? One cannot be excused today by claiming ignorance of God's proffered salvation unto all men. He has revealed his love in the death of his only begotten son on the cross. He has revealed his love in abounding and forbearing mercies.

"How shall we escape if we neglect so great salvation?"

Set Up a Fortune Telling Booth at Your Party and Keep the Crowd Entertained

Card Fortunes Thrill

WHETHER you're planning a charity bazaar or a party of your own, you can always count on a fortune-telling booth to keep the crowd entertained.

Bedeck yourself in a colorful turban and dangling earrings, get out a deck of cards, dice, dominoes, a crystal ball or the tea leaves—and you're set for some fun!

Our Weekly Newspaper Service No. 65 explains fortune-telling by cinating methods. Send 25 cents (c "Let Me Tell Your Fortune" to Newspaper Service, 243 West 17th S York 11, N. Y. Print name, addres let title and No. 65.

He Misunderstood

The Washington Biological Survey has changed the wording of the metal bands used to "ring" birds released in connection with its researches into American bird life. It now reads: "Notify Fish and Wild Life Services, Washington, D. C."

The old inscription was the abbreviated: "Wash. Biol. Surv." and the change was made after an Alberta farmer sent in a complaint to the U. S. government.

"Dear Sirs," he wrote, "I shot one of your pet crows the other day and followed instruction attached to it. I washed it and biled it and surved it. It was terrible. You should stop trying to fool the people with things like this."

ASK ME ANOTHER

A General Quiz

1. How many different c are there in India?
2. How long is the Pa canal?
3. Is the red fox a nati North America?
4. Where is the force of gr felt the least?
5. What is another name tuna?
6. Can a horse run faster a man for a mile?

The Answers

1. Between 3,000 and 4,000.
2. It is 40 miles from shor to shoreline.
3. There once was a n American red fox, but about the European red fox was i duced into this country, and present red fox is the resu this mixed breeding.
4. At the equator.
5. Horse mackerel.
6. Yes, for several miles. if they keep running long enc the man will ultimately win.

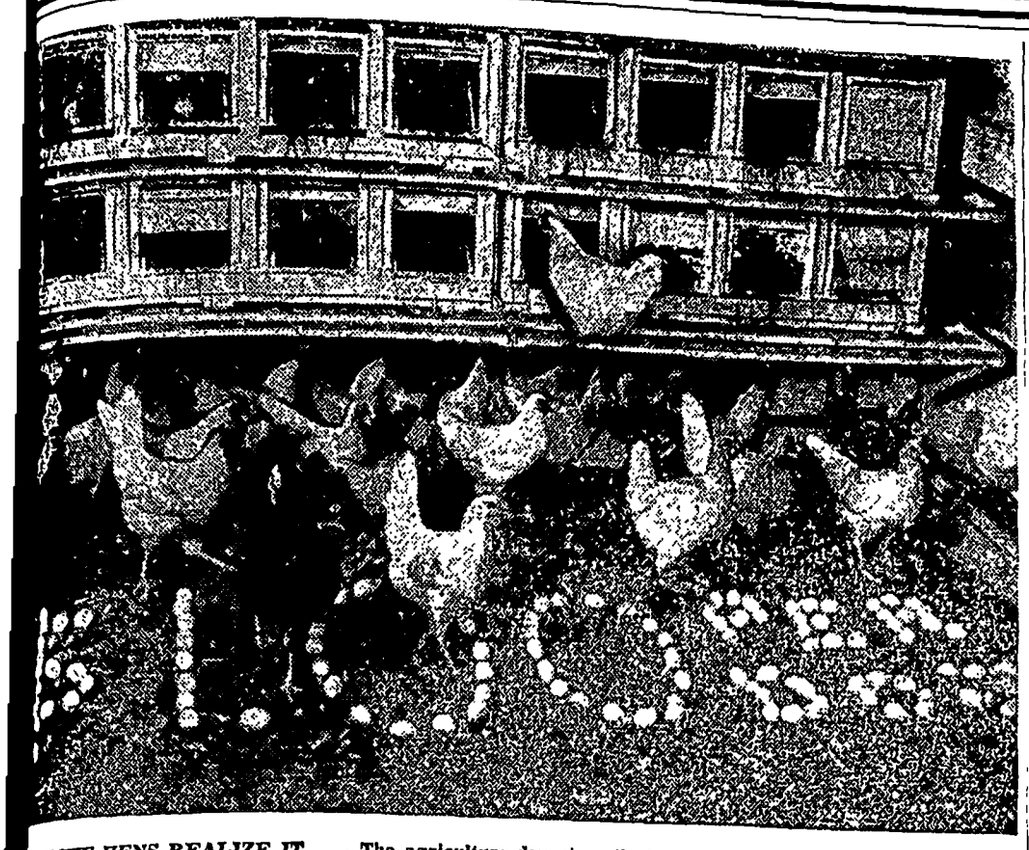
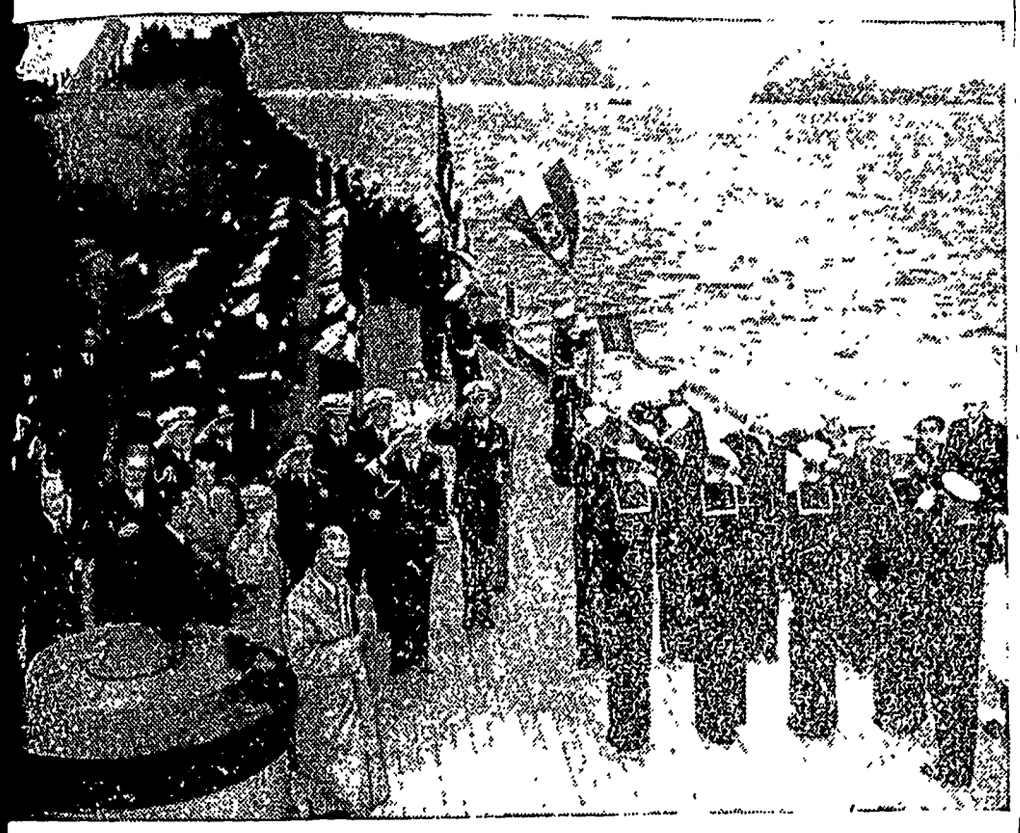
SHERWIN-WILLIAMS RESEARCH

THERE'S A KEM-TONE DEALER NEAR YOU!



EN THE HENS REALIZE IT . . . The agriculture department's bureau of agricultural economics re- ly announced that egg prices may reach a dollar a dozen, highest level in nearly 30 years, by the end this year. Pursuant to that announcement, and possibly hinting that they want their share, laying s at the agricultural research center at Beltsville, Md., obliged by putting it in writing. Or it could have n an accident.



N VOYAGE TO THE PRESIDENT . . . With historic Sugar Loaf mountain in the background, this arewell ceremony for U. S. President Truman was held aboard the battleship Missouri in Rio de Janeiro arbor. It climaxed the signing of the inter-American defense treaty in Rio. In background, a detach- ent of U. S. marines, and in right foreground two rows of sailors form honor guards for dignitaries.

IRST BOMBS, THEN FOOD . . . This is a picture of the com- ete irony of war and war's aftermath. Two homeless Japanese chil- ren sit among the ruins of Tokyo, probably feeling dimly grateful whoever sent them those relief packages. They were sent by a . S. organization, the Licensed Agency for the Relief of Asia.

UPER-SONIC WIVES . . . Some women hold to the theory that if y holler loudly enough their husbands will come running, just as matter of course—and if they've been well trained. That's why hus- and-calling contests were born. So who should win the Michigan e fair's contest of the same name but these three lusty-lunged es.

AIR CONDITIONED . . . Holly- wood had a heat wave recently, and although it was hot during the daytime it was cool in the knight. The knight was Louis Hayward, who had a built-in air conditioning unit in his iron suit. With a few pumps he could create his own breeze.

BILLIONS ON A STAR . . . Joe Jeffers, leader of a Los Angeles religious group, told judge he had only $1.53 in cash but that 400 or 500 billion dollars are waiting for him on star Orion.

IT'S NO YOLK

All Iowa's Eggs Are Not Confined to One Basket

WNU Features.

DES MOINES, IOWA.—If all the eggs laid in Iowa in one year were fried "sunny side up" and stitched together into a giant patchwork quilt, they would blanket an area eight times the size of the Chicago loop.

Known as "America's egg basket" because it ranks first in production of eggs, Iowa earned $119,105,000 from this product in 1945, latest year for which figures are available, according to a report compiled by the Iowa Development commission. In that year the state produced 4,327,000,000 eggs and grossed an income from eggs amounting to three times the gross income from all citrus fruit (lemons, oranges and grapefruit) produced that year in Texas.

Iowa produces 7 per cent of the nation's entire consumption of eggs, rated as one of the seven basic foods necessary to assure good health.

The state appears destined to lead all other states in production of this protein food for many years to come, the development commission maintains, pointing to Iowa's proper climate and enormous feed production possibilities as well as to the fact that producers are interested in exporting superior poultry and egg products.

Egg production in Iowa has encouraged considerable industrial development. Produce plants were organized in the state more than 60 years ago. With development of cold storage houses came introduction of refrigerator cars which deliver eggs in good condition to cold storage houses in various consuming centers. Iowa ships more eggs annually to Boston, Chicago, Philadelphia and New York, the four great egg markets of the country, than any other state.

Many of Iowa's eggs are reduced to liquid form, egg breaking plants having been established in 48 localities. Fourteen dried egg plants also are located in various sections of the state.

Trailing Iowa as top poultry states of the nation, on the basis of 1945 figures, are: Minnesota with 3,757,000,000 eggs produced, $107,557,000 gross income; Texas, 3,309,000,000 eggs produced, $94,084,000 gross income; Missouri, 2,890,000,000 eggs produced, $78,474,000 gross income; Ohio, 2,781,000,000 eggs produced, $88,306,000 gross income; Illinois, 2,757,000,000 eggs produced, $76,916,000 gross income, and Pennsylvania, 2,491,000,000 eggs produced, $93,526,000 gross income.

CHEEP! CHEEP! The feeble sound which these baby chicks emit is not representative of the egg output of Iowa, which ranks as the "egg basket of America." This picture, submitted by S. W. Lock of Mason City, Iowa, won honorable mention in the Greater Iowa photographic contest sponsored by Iowa Development commission at the state fair.

Old-Timers Tour East In Wheezing 1902 Car

PETERSBURG, VA. — "In their merry Oldsmobile," William A. Worth, 70, of Petersburg, and his sister, Eunice, 69, of New York, are making a 4,000-mile vacation tour of the East.

Their Oldsmobile, however, is an ancient 1902 model. It has only one cylinder, a lever for steering, and is devoid of top, sides or windshield. Operation costs, Worth figures, total a cent a mile.

Worth set out from his home here, picking up his sister in New York. At last reports they were whizzing through Greenfield, Mass., at a stately 15 miles an hour.

Pastor Preaches Sermon Without Saying a Word

MACON, GA.—One minister who admits that he preaches his sermons without saying a word is the Rev. James M. Johnston, 25-year-old assistant pastor of the Foursquare Gospel church here.

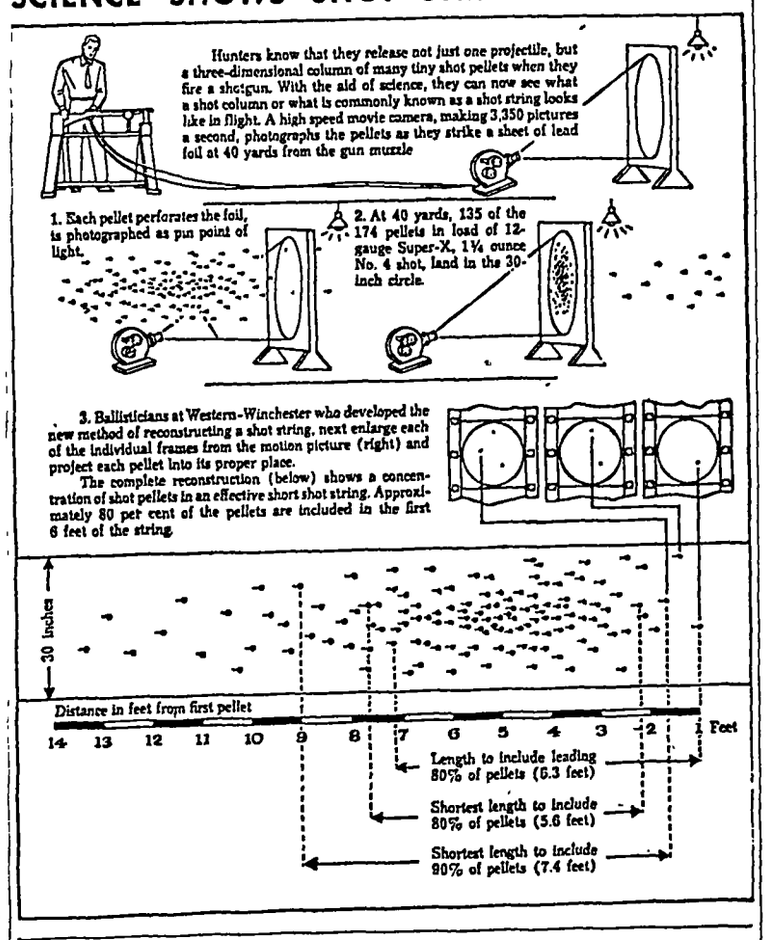
He has inaugurated special services for the deaf and dumb members of the congregation, delivering regular Sunday sermons entirely through the standard hand signal alphabet.

The plan started one Sunday when Johnson noticed several deaf and dumb people in the congregation listening to the pastor preach. But they weren't hearing a word. Johnson stood beside the pastor, translating the sermon into hand signals.

Johnson admits the method has its drawbacks. When his congregation "sings" hymns, you can't hear them. You have to be content with seeing what they mean, he explains.

In some respects, Johnson feels, his mute congregation has it all over their brethren who can hear and talk. Using hand signals, Johnson says, he has three different ways to say "Praise the Lord" and three more ways to say "Hallelujah."

SCIENCE SHOWS SHOT STRING IN FLIGHT



Hunters know that they release not just one projectile, but a three-dimensional column of many tiny shot pellets when they fire a shotgun. With the aid of science, they can now see what a shot column or what is commonly known as a shot string looks like in flight. A high speed movie camera, making 3,350 pictures a second, photographs the pellets as they strike a sheet of lead foil at 40 yards from the gun muzzle
1. Each pellet perforates the foil, is photographed as pin point of light.
2. At 40 yards, 135 of the 174 pellets in load of 12-gauge Super-X, 1¼ ounce No. 4 shot, land in the 30-inch circle.
3. Ballisticians at Western-Winchester who developed the new method of reconstructing a shot string, next enlarge each of the individual frames from the motion picture (right) and project each pellet into its proper place.
The complete reconstruction (below) shows a concentration of shot pellets in an effective short shot string. Approximately 80 per cent of the pellets are included in the first 6 feet of the string
30 Inches
Distance in feet from first pellet
14 13 12 11 10 9 8 7 6 5 4 3 2 1 Feet
Length to include leading 80% of pellets (6.3 feet)
Shortest length to include 80% of pellets (5.6 feet)
Shortest length to include 90% of pellets (7.4 feet)

Sidewalk Cattlemen Get Boot Privileges

SWEETWATER, TEX. — Unique boot privileges are enjoyed by members of the newly-organized West Texas Sidewalk Cattlemen's association.

Rules of the association allow the owner of at least two head of cattle to wear boots; the owner of three head of cattle may stuff the right leg of his pants in the top of his boot; and the owner of four head may stuff both pants legs in his boots, and the owner of six head may wear spurs.

Any infraction of the rules requires that the violator buy drinks for everybody within yelling distance.

The club, it is explained by its organizer, Ocie Hunt, is designed to acquaint members all over the United States and in some foreign countries with the west Texas style of humor.

Gagged Nagging Women

Women in the Seventeenth century were often tried for nagging. If they were convicted, they were led through the streets wearing iron muzzles over their heads with mouthpieces that formed a gag.

With the Roar of a Lion Steam Organ Was Born

An Englishman by the name of Dennis invented a musical instrument which, when it was first tested in 1859, frightened people to such an extent that they thought the Day of Judgment had arrived and fell on their knees in the streets to pray. It was the steam organ "calliope," meant to give music "the real strength and force it deserved."

A trial performance was arranged at the Crystal Palace in London. There, a clumsy iron construction stood on the platform; on its left side it had huge metal cylinders in which hot air and steam were produced by burning charcoal. This hot air and steam were forced through the pipes of the organ, and the tones were tenfold the strength of tones from an ordinary instrument. Critics said the music was comparable only with the roar of a lion, and considered it unnecessary to impress music upon listeners with such force.

Fleischmann's Dry Yeast *is ideal for quick baking*

lemme Couple To Observe Golden Wedding Oct. 13th

ED ON HOME FARM EAST KLEMME FOR FORTY YEARS

ed And Moved To Klemme On January 20, 1941

n Sunday, October 12th, Mr. Mrs. Albers will celebrate r Golden Wedding Anni- ary, and will hold open se at their home in Klemme n 2:00 p. m. until 4:00 p. m. eceive their many friends relatives.

r. and Mrs. Albers' children planning a big wedding din- and anniversary celebration be held at the Evangelical Reformed Church, on Mon- noon, October 13th. Invi- ons have been sent to rela- s and a few close friends.

n October 13, 1887 Miss Win- Wientjes and George Albers, young man of twenty-three e united in marriage in the rville Reformed church par- age northeast of Belmond, by Rev. Reeverts.

fter their marriage Mr. and George Albers settled on a n east of Klemme and later rchased a farm of their own re they lived continuously forty years and reared their ily of ten children:

Jennie (Mrs. Wm. Reuben) of r Kanawha; John who lives thwest of Klemme, Ted on arm near Swaledale, George Clear Lake, Menno, on the e farm, Lubbe near Ven- a, Winnie (Mrs. Edgar Buss) utheast of Klemme, Carrie rs. Fred Pringnitz), south- st of Klemme, Elsina Mrs. lter Lauster) southeast of mme, and Helen, who teach- school at Dumont.

Have Ten Grandchildren

One of the remarkable things ut the Albers family is the t that there has not been a gle death in the family or the scendents during the fifty ar period. Mr. and Mrs. Al- rs have ten grand children: lla Reuben and Doris Reuben ewes; Gene and Carol, child- n of John Albers; Connie and eorge, Jr., children of George bers; Eunice and Ronnie, ildren of Ted Albers; Phyllis, ughter of Lubbe Albers; and th Ann, daughter of Elsina bers Lauster.

chool Board Entertained The Faculty At Vets Club

The Klemme school board and eir wives entertained the ade and high school faculty a dinner at the Veterans enter at Clear Lake Tuesday ening.

ne Weather Being Enjoyed In Iowa The Past Several Days

Iowa is enjoying what some ople term "Indian Summer." he skys have been clear and e temperatures has been in e 80's. North Iowa is enjoy- some of the finest weather the whole year as this item being written.

HELLO, FOLKS!

Mr. and Mrs. Asa Arnold are e proud parents of twin girls rn Tuesday, October 7, 1947 the Allen Memorial hospital Waterloo. One twin weighed lbs. 9¾ oz. and the other 5 s. 1 oz. They are named Mari- n and Rosalyn.

They are also the par- ts of a 3 year old daughter, Clarice, who's birthday was al- on Tuesday.

WILL MAKE DRIVE IN HANCOCK COUNTY

Drive For Funds For Iowa Children's Home Society

Residents of Hancock County will be asked to give $1150.00 as their share of $165,000 being raised throughout Iowa for the Iowa Children's Home Society, it was announced this week by Mrs. G. W. Templeton of Garner, chairman of the Society in this county and head of the drive for this area.

The state-wide campaign is being held during the month of October and the dates for the solicitation here have been set as October 20 to 30.

Iowa Children Home Society, founded in 1888, provides boarding home and adoptive care for neglected or abandoned Iowa children from ever county in the State. More than 10,000 children have been cared for withnearly 500 under the supervision of the Society at the present time. Operating on the theory that family home care for these children is more desirable than committment to an institution or asylum, the Society finds family homes for them and provides for their care while they are in these foster homes.

The present campaign is the first state-wide appeal for funds by the society in the 60 years of its operation.

Of the $165,000 asked, approximately $40,000 has been assumed by the Des Moines Community Chest and Polk County. The remainder has been fairly apportioned among the other counties of the state on a quota basis.

Mrs. Templeton expressed the belief that Hancock County will more than meet its goal of $1160.00 in the coming campaign.

WILL BE BRIDE

Mr. and Mrs. Bruce Peck of Thornton, announce the engagement, of their daughter, Irene, to Paul Wordehoff, son of Mr. Charles Wordehoff of Cedar Falls.

Stanley Bridges Had Birthday Party Saturday Afternoon

Stanley, son of Mr. and Mrs. Glen Bridges, was 6 years old on Saturday, October 4th, and in honor of the event his mother planned a birthday party. The result was that 21 of Stanley's little friends came to spend the afternoon playing games and having a big time.

The kiddies were asked to come in costumes and they certainly turned out in a variety of styles. Mrs. Bridges served a nice lunch late in the afternoon. Stanley received many nice gifts.

Combining Of Soybeans On In Hancock County

Favorable weather for the most part of the past week was ideal for farm work and combining of soybeans is in full swing. Yields are a little under last year with quality reported excellent.

Corn is drying rapidly and some early husking will get under way in about ten days.

Sugarbeet, onion and potato harvest are under way and will be completed early if weather remains dry.

Recent rains have been beneficial to meadows and pastures and have conditioned the soil for fall plowing.

Mrs. A. G. Koerner and son, Kermit; Mrs. Lee Ridder, Maralee and Denny; and Sharon and Berleen Bridges drove to McGregor Sunday on a sight-seeing trip around that scenic Iowa spot.

DANCE TONIGHT

BASKET BALL BENEFIT DANCE TONIGHT AT COMMUNITY HALL

The Klemme Vagabonds independent basket ball team is sponsoring a dance to be held at the Community Hall tonight. The proceeds will be used to buy twelve new suits, basket balls and other equipment for the team.

Klemme Lady Was 88 Years Of Age Monday

Mrs. G W. Kluckhohn quietly observed her 88th birthday on Monday and Tuesday her many Klemme friends showered her with birthday cards and good wishes.

HOLD LIVESTOCK REDUCTION DOWN

Adjust Program To Meet Feed Supply But Keep All Stock Possible

Trim the livestock program to meet feed supplies, was the advice Rex Beresford, Iowa State College extension animal husbandman, this week gave Iowa cattle raisers.

But while excess stock should be sold, farmers can take an optimistic viewpoint in their livestock program. As much stock as possible shoud be kept This is especially true in areas like northwest Iowa where there is a chance of getting a corn crop. Where crop prospects are good, the livestock program shoud be cut.

Price Drop Possible

Animals which cannot be fed through the winter should be sold as soon as possible to save feed. Too, Beresford pointed out, as range cattle start coming into market and the feed situation becomes more acute, prices may drop off somewhat.

All corn should be saved this fall even though it doesn't make ears. Beresford reports some hay already being used in parts of the state and there is danger of a feeling of false security on the amount of roughage to be available this winter.

Can take Chance

With next year's meat supplies likely to be scarce and prices high, the man with plenty of roughage, hay and pasture can afford to gamble a little, Beresford thinks.

Of the 45 million motor vehicles in use throughout the world in 1946, nearly 34 million were in the United States.

WILL BE FALL BRIDE

(Courtesy Globe-Gazette)

WEDDING DATE SET — Mr. and Mrs. Emil Pringnitz of near Kanawha have announced the approaching marriage of their daughter, Verna Lucille, to Donald F. Ott, son of Mr. and Mrs. Ralph Ott of Clear Lake. The ceremony will take place at the Liberty Methodist church northwest of Klemme on Oct, 22.

PHEASANT SEASON STILL DOUBTFUL

Pheasant and Quail Season Still Undetermined

The State Conservation Commission is being flooded with inquiries as to when the pheasant and quail seasons will open this year. Census returns are not completed but will be in the hands of the Commission at its meeting October 20, shortly after which date bag limits and other 1947 game bird regulations will be made known.

Some confusion apparently exists as to the open season on migratory waterfowl. The regular law leaflet distributed by the Conservation Commission carries the bag and possession limits established by the state code. Because of the shortage in waterfowl, the United States Fish and Wildlife Service, under its regulatory powers, has shortened the season and reduced the bag and possession limit on ducks and geese. The State Conservation Commission has adopted an administrative order conforming with these Federal regulations.

The duck season during 1947 opens at noon, October 21 and closes one hour before sunset, November 19. After the opening day the season opens at sunrise and closes one hour before sunset. Bag limit on ducks is four per day with eight in possession after the first day. Only one wood duck may be had in possession. The bag limit on geese is four with the possession limit four Only one of the total may be Canada, Hutchins', or white-fronted. Three may be blue or snow geese.

Squirrel and rabbit seasons are open at the present time The daily bag limit on squirrels is six with a possession limit of twelve. The season closes on November 30 The daily bag limit on rabbits is ten with no possession limit. The rabbit season is open through February 29, 1948.

Held Meeting At Liberty

The Home Builders Class met at Liberty on Sunday evening with a good attendance, supper was served. A program of movies showing local scenes was given by Emil Blumer. The next meeting of the class will be the first Sunday evening in November.

Celebrated Birthday With Dinner

Louis Jurgemeyer and family were dinner guests Sunday at the parental Les Hartbeck home in honor of Mrs. Jurgemeyer's Birthday. Mr. and Mrs. Fred Barz were callers at the Hartbeck home in the afternoon.

TRADE IN KLEMME

TRY BUYING FROM YOUR KLEMME MERCHANT FIRST

Before buying that item out of town, try first to buy it from your local Klemme Merchant who is in business to serve you. If everyone would buy everything they possibly could from the local businessman it would help our town to grow. Your home business man is no fly-by-night peddler . . . he is here every day to serve you, to give you advice and to make good on any merchandise not found satisfactory.

It is not possible for a small town merchant to carry everything you need, but he will appreciate having your trade on what he does carry in stock. Your Klemme merchant does not object to you purchasing the things out of town that can not be procured in Klemme.

Your Klemme business man helps you support your schools, your churches and your community. He needs YOUR business and YOU need him in your community. Think it over. —Editor

TOO MANY AUTO DEATHS IN IOWA

KAHL ANNOUNCES HIGHWAY SAFETY PROGRAM

A five-point highway safety program, sharpened by "concentrated enforcement and aimed at a 15 percent reduction of traffic deaths in the state for the remainder of the year has been announced by Alfred W. Kahl, Commissioner of the Iowa Department of Public Safety.

The opening day of the Safety drive, October 1, was underlined by deaths of nine persons in Iowa traffic accidents in the 24 hour period. The five points by which the Safety Department will attempt to reduce traffic deaths are:

1. "Concentrated and more enforcement by the highway patrol."

2. Promote safety through a more complete public information program.

3. Develop a driver improvement program in Iowa.

4. Encourage driver training courses in all public schools.

5. Encourage organization and active operation of public support groups in the interests of safety

Explaining the enforcement point, Kahl said, "A number of all night cruiser cars will be put on the highway for criminal apprehension including the late hour drunken driver. Caravaning of trucks and failure to dim lights will be given strict attention," he added.

Warning or memorandum tickets and faulty equipment tickets will be given freely in an effort to correct the "minor violation habits of some drivers," Kahl said. He reminded drivers that a record of all violations will be entered on the back of the drivers license. "When these records reveal a poor driver," Kahl said, "he will be personally contacted by a member of the Department for assistance and instruction.

Methodist Women Will Meet In Klemme

Womans Society Unit Meeting in Klemme October 15th, starting at 10 a. m. Women will come from a dozen or more churches around Klemme. Mrs. L. H. Preul, Clarion, is the Persident and will have charge. Mrs. E. F. Broberg is one of the officers who will take a leading part. Dinner will be served by the local society at noon. Dr. F Earl Burgess, District Superintendent will give an address, as will also Mrs. W. M. Hubbard of Clear Lake.

Carl Wille Buys Angus Bull

Carl Wille of Klemme, Iowa, recently purchased one purebred Aberdeen-Angus bull from Addis Greiman of Garner, Ia.

Fatal Auto Accident Mile North Of Goodell Sat. Nite

POLSDOFER FAMILY HELD REUNION HERE

A family reunion was held in honor of the 27th wedding anniversary of Mr. and Mrs. Art Polsdofer at their home on Sunday, October 5th. The following people were present: Mr. and Mrs. Will Polsdofer of Eagle Grove; Mr. and Mrs. Frank Prazak and sons; Mr and Mrs. Clarence Polsdofer of Mason City; Mr. and Mrs. Biel Ruth, and Mr. and Mrs. August Dahlstrom of Janesville, Iowa; Mr. and Mrs. Albert Wonsmos and son of Meservey; Mrs. Hank Van Blaricom and Joy Ann; Mrs. Bertha Moorehead and son Delvin and daughter Kathern of Rockwell; Mr. and Mrs. Virgil Rice and children of Clear Lake; Mr. and Mrs. Art Hanson and children of Garner and Mr. and Mrs Glenn Bier of Goodell.

Mr. and Mrs. Polsdofer received many nice gifts.

RETURN FROM TRIP WEST AND SOUTH

Schoenwetters Describe 3,600 Mile Trip West And South

Mr. and Mrs. George Schoenwetter, Mrs. Howard Schoenwetter and Mrs. Mildred Weisbrod returned Sunday from a 3,600 mile trip through the west and south.

Their first stop was at Lake Andes, South Dakota, where they visited with Homer Schoenwetter and from there they went to Hugo, Limon and Denver, Colorado, visiting enroute at the Ray Yeager home.

Their next stop was at Jennings, La., where they visited at the Carl and Warren Suckow families and with Herman and Paul Stille families at De Ridder, La.

They enjoyed driving through the Rocky Mountains in the West and the Ozarks in the South.

Thershing Flax In Minnesota

Mrs. Paulina Wessels returned last week from a visit with her sister, Mrs. Joe Ptacek and family at Thief River Falls, Minnesota. Mrs. Wessels says they are threshing flax now, and many fields are still to be threshed. Threshing is delayed because of rain nearly every day. Farmers around there have a wonderful potato crop with potatoes running extra large.

Wm. Wessels and family of near Clarion were also visiting at the Ptacek home, enjoying a week's vacation.

Birthday Party Held For Klemme High School Girl

Sixteen high school chums and friends of Joan Smith gathered at the home of her parents, Mr. and Mrs. Earle Smith, Sunday evening in honor of her fifteenth birthday

Joan was presented with a radio by her friends and after the evening's entertainment a lunch was served. Mrs. Oris Lundy had baked and decorated a cake for the occasion.

Sunday School Class Has Party At Mrs. Elder's Home

Mrs. Ralph Elder entertained her Sunday school class of ten little folks at her home in the country Saturday afternoon. Her class is composed of little boys and girls of 8 years of age.

Games were played and the class had a lot of fun after which Mrs. Elder served a nice lunch.

Study Group Meets At Lester Stille Home Thursday

The Study Group of the Klemme Methodist Church will meet this week Thursday afternoon at the home of Mrs. Lester Stille.

THORNTON GIRL INSTANTLY KILLED IN CAR ACCIDENT NEAR GOODELL

Loretta Frohling, 18 Killed; Brother Donald Lost Arm In Mishap

In an automobile accident one mile north of Goodell Saturday night Loretta Frohling, 18, of Thornton, was killed instantly and her brother Donald Frohling, 20, lost one arm and three others were injured and taken to the Belmond hospital. The young people were coming to Klemme to attend a dance.

Coroner Kenneth Boughton, of Britt, reported that Donald Frohling, driver of the car, cut in sharply ahead of a car driven by Arthur Pals of Clarion to avoid hitting an oncoming car on highway 69.

Others injured were Francis Johnson, Helen Sharpe and Arnold Nelson of the Meservey community.

The Frohling young people are son and daughter of Mr. and Mrs. Herman Frohling. Tuesday it was reported in Klemme that Donald Frohling was still alive but in serious condition. at the Belmond hospital.

Celebrated 85th Birthday Wednesday, Oct. 1

Wm. C. Schmidt was honored on his 85th birthday last Wednesday, October 1st, when his children and their families met at the Fred Schmidt home and all enjoyed an oyster stew. Mr. Schmidt makes his home with his son, Fred and family.

Others present besides those above named were Mr. and Mrs. Albert Schmidt; Mr. and Mrs. Herman Schmidt and Luverne; Mr. and Mrs. Eugene Kluckhohn and family; Mr. and Mrs. Luther Schmidt and Roger; Mr. and Mrs. Julius Priebe; Mr. and Mrs. I. D. Rasmus and Judith.

A fine time was enjoyed by all.

Twin Lake Twp. Farm Bureau Elects Wm. Janssen, Director

The members of the Twin Lake township Farm Bureau elected Wm. Janssen, director and Francis Sandry, secretary for 1948 at a meeting Thursday evening, October 2nd. This election will give Twin Lake members a representative on the County Farm Bureau board of directors.

Charles F. Jackson gave a short talk on the new responsibility law as it pertains to motor vehicles on the highway. Mr. Jackson also discussed the importance of township meetings and resolutions.

Paul Henderson, county extension director, discussed the Blue Cross health plans and the educational program for their township. Mr. Henderson also showed a colored sound moving picture on Oat Diseases.

Mrs. Alvin Goll Honored At Birthday Party Sunday Eve

A birthday party was held at the home of Mr and Mrs. Werner Schlawin Sunday evening in honor of Mrs. Alvin Goll. The evening was spent informally after which a nice lunch was served. Mrs. Schlawin had baked a birthday cake for the occasion.

Those present were Mr. and Mrs. Alvin Goll and family; Mr. and Mrs. Roy Jacobs and family; Mr. and Mrs. Edgar Buss; Mr. and Mrs Ed. Christians and family.

Methodist Postponed Meeting

The meeting of the Klemme Adult Bible class has been postponed until Sunday, October 19.

CROSS TOWN

By Roland Coe

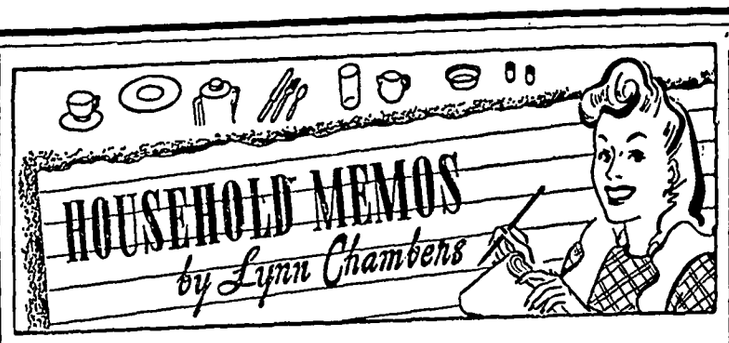
BOBBY SOX

By Marty Links

"Oh, I'm not worried 'bout losing Alvin—it's losing face that bothers me!"



Quick Breads Take Little Mixing Time

(See recipes below.)

Tempting Breads

There is no aroma more appetite-provoking than that tantalizing one which comes from the oven in which bread is baking. And what is more of a treat than eating the bread itself?

Piping hot muffins add interest to the simplest supper; hot coffee cake is a delight to both early and late risers, while thick and thin slices alike — as long as they are of homemade bread—make superb sandwiches for school lunches or late snacks.

Many homemakers don't bother to make homemade bread because they think it is a time-consuming procedure. Actually, it's far simpler than mixing a cake or even cooking a vegetable, and the pleasure of it is so great, it's more than worth the little effort.

Orange Oatmeal bread is good when sliced thin for sandwiches. Moist and tender, it keeps its flavor easily and slices readily. The flavor actually improves when the bread is kept for a day before being cut.

Orange Oatmeal Loaf.

(Makes 4-by-7-inch loaf)

- ⅔ cup evaporated milk
- ⅓ cup orange juice
- 1 teaspoon grated orange peel
- 1 cup quick-cooking oats
- 1 cup sifted flour
- ½ teaspoon salt
- 1 teaspoon baking powder
- 1 teaspoon soda
- ¼ cup sugar
- ⅓ cup chopped nuts
- 1 egg
- ⅓ cup molasses
- 2 tablespoons shortening, melted

Mix milk, orange juice and grated peel and add to oats. Let this mixture stand for an hour. Sift flour, salt, baking powder, soda and sugar. Add chopped nuts. Beat egg into oatmeal mixture. Add molasses and beat thoroughly. Stir in melted shortening. Add flour mixture and stir just to blend. Pour into a greased loaf pan and bake in a moderate (350-degree) oven for about 50 minutes, or until done.

Pecan Wheat Muffins.

(Makes 12 to 16 muffins)

- 1 cup sifted whole wheat flour
- ¾ cup sifted white flour
- 4 teaspoons baking powder
- ¾ teaspoon salt
- 1 egg
- ¼ cup brown sugar
- ⅓ cup evaporated milk
- ⅔ cup water
- 3 tablespoons melted shortening
- ½ cup chopped pecans

Sift first four ingredients twice, returning bran in sifter to sifted mixture. Beat egg, add brown sugar, milk and water. Stir until mixture is dissolved, then add shortening. Stir liquid quickly into dry ingredients. With the last few stirs, add chopped nuts. Pour batter immediately into greased muffin tins. Bake in a hot (400-degree) oven about 20 minutes.

Released by Western Newspaper Union.

*Recipe given,

Raised Luncheon Muffins.

(Makes 1 dozen 3-inch muffins)

- 1 package yeast, compressed
- ¼ cup lukewarm water
- ¼ cup milk
- 2 eggs
- ¼ cup sugar
- 1 teaspoon salt
- ¼ cup melted shortening
- 1 teaspoon grated orange rind
- 2¼ cups flour, sifted

Crumble yeast into lukewarm water to soften. Scald milk. Cool. Beat eggs in mixing bowl. Add sugar, salt, shortening and orange rind. Mix well. Add cooled milk and 1 cup flour. Beat smooth. Add softened yeast. Mix well. Add remaining flour. Beat 2 minutes. Fill greased muffin pans half full. Let rise in warm place until doubled (about 45 minutes). Bake in a moderate (375-degree) oven for 18 to 20 minutes.

Date and Pecan Ring is an attractive as well as novel bread.

Date and Pecan Ring.

- Dates, halved
- Pecans, halved
- Honey
- 1 cup sifted white flour
- 2½ teaspoons baking powder
- ¼ teaspoon soda
- 1 teaspoon salt
- 1 cup unsifted whole wheat flour
- ¼ cup brown sugar
- ¾ cup pitted dates, chopped
- ¾ cup pecans, coarsely chopped
- 1½ cups rich milk
- 2 tablespoons vinegar
- 2 eggs, beaten
- 2 tablespoons shortening, melted

Grease an 8-inch ring mold thoroughly. To prepare decorative topping, alternate halves of dates and pecans on bottom of mold and drizzle with honey. In a mixing bowl, sift flour, baking powder, soda and salt. Add whole wheat flour, brown sugar, dates, nuts, and mix thoroughly. Combine milk and vinegar. Add shortening, then add beaten eggs. Stir in dry ingredients. Mix just until flour disappears. Pour into prepared ring mold and bake in a hot (425-degree) oven for 15 minutes, then reduce heat to moderate (350 degrees) and continue baking for 20 to 25 minutes.

***Swedish Pancakes With Berry Sauce.**

(Serves 4)

- 1 cup sifted enriched flour
- ¼ teaspoon baking powder
- ¾ teaspoon salt
- 1 tablespoon sugar
- 1 egg, beaten
- 1 cup milk
- 1 tablespoon melted shortening
- Sweetened berries or jam

Sift together flour, baking powder, salt and sugar. Combine egg, milk and melted shortening. Mix well. Add to flour mixture. Mix smooth. Using 2 tablespoons of batter for each cake, bake on hot griddle or skillet. Spread each cake with butter, then with berries or jam.

Released by Western Newspaper Union.

LYNN SAYS:
Flavor's the Thing In Sandwiches

For a tasty as well as a nourishing sandwich, spread sliced luncheon meat with cream cheese mixed with chives. This tastes very special on rye bread.

For a well-seasoned sandwich spread that you can keep in the refrigerator, cream butter and mix with one of the following: sweet pickle relish, horseradish, onion juice or mustard.

For a different egg salad, add a few capers to the chopped egg and a few herbs to the dressing used for moistening the mixture.

Leftover weiners can be chopped or ground with pickle relish to be used as sandwich filling Add a bit of mayonnaise or sandwich spread, if desired.

When you can't slice cooked tongue any longer, cut off the meaty pieces and mix with chopped hard-cooked egg and boiled dressing for a very good sandwich filler.

But there was a pink ...the end of the moist black ...d the eyes themselves sparkled, giving a pert look to the whole tangly bundle.

Hennessy stopped pondering, Delany tossed his book aside, and both ambled over. Reide turned his head from the card table.

"The mutt probably has fleas," he remarked. "Keep it offa my desk."

As if understanding, the puppy turned to its critic appealingly. Melsner laughed gruffly, ignoring the complaint.

"It's a cute-lookin' mutt at that, ain't it, kid?" the Old Man winked to Hennessy. "Send out and we'll give it a feed."

One of the ever-present bootblacks was dispatched across the street. In a minute or two, the pooch was sipping milk and sniffing chopmeat, oblivious to further criticism, or his audience.

"Hennessy caught the clerk with a hard left to the jaw."

"We'll call him Ginger," Hennessy suggested. "Lookit the fire in his eyes, will you?" Ginger yapped appreciatively, provocatively. That finished the card game. Reide, the most die-hard of the players, threw down his gummy cards, and with the others, gathered around Melsner's desk. Fondly they watched the grimy little mutt push his snoot into the worm-like chopmeat.

Two days later, Ginger was part of the life of the shack. A bootblack had been commissioned to give him a bath, to provide a lined box for a bed, to continue general caretaking. While the men were out on stories—holdups, suicides, fires, whatnot—Ginger tripped around impatiently, until they came back. Then he greeted them joyously, with quick, short barking yelps.

* * *

The pressroom was crowded one sultry afternoon, crowded with sweaty men in shirtsleeves. At the card table, next to Reide, was Al Brown, a thick-necked hardware clerk who spent his idle hours with what he called the "newshounds."

Ginger, temporarily deserted, sniffed in and out of the chair legs, feeling for Reide, who always petted him. The dog rubbed against Brown's trousers by mistake.

"Why, the —— ——," the startled clerk swore. He reached down, picked up the pup clumsily, and tossed him carelessly to the floor about a yard away. "Wonder you guys wouldn't keep animals outa here," he growled, drawing a card. "You'd think it was a zoo."

Nobody replied. Hennessy looked up queerly from his typewriter.

Ginger, not having sensed the rebuff, returned to the table Again he brushed Brown's trousers. As if having anticipated the annoyance, the clerk kicked vigorously. There was a sharp squeal, then Ginger, living up to his name, bit.

Brown roared, grabbed the pooch from his leg, and before anyone could protest, hurled him with crushing force against the wall. There was a crunch, then a whimper.

Every eye in the place turned to the battered little body on the floor. But in a split second, every eye was glued on the centre of the room, and Ginger was forgotten. Hennessy has sprung from his chair like a starting sprinter, yanked Brown from his seat, overturning the table at the same time—and smashed a hard fist to the outsider's jaw.

Brown reeled, regained his footing, swung, and missed. Nason and Delany started to intervene, but Melsner, who had taken everything in quietly, stopped them with a move of his hand. "Let 'em go a while," he said, grimly. The others backed away.

Thoroughly aroused, Brown lunged at his lighter rival, who danced aside just fast enough. As the clerk plowed by, the reporter grabbed him by the scruff of the neck, swung him around, and sent him sprawling away with another punch that cracked against his jaw.

Brown shook his head, spat, then went for Hennessy again. The result was still another crack; he could feel his eye swell as if air had been pumped around it. Clearly he was no match at boxing for the fire-eyed "newshound" who sidestepped and stung him so deftly. He dropped back, then plunged low like a football player and threw Hennessy to the floor.

Again Nason and Delany leaped forward to interfere, but the Old Man, an intense gleam in his eyes, restrained them.

It looked bad for the reporter. Brown pressed his advantage, bore down with his full weight. One of the newspaperman's shoulders was down, the other twisted consulsively as the panting fellow on top sought to wrench it into the dirt of the floor-boards. Then suddenly one of Hennessy's legs appeared, entwined about the body of his foe, the other leg applied pressure from beneath, and a perfect wrestler's "scissors" hurled the heavier man to the side, almost reversing the positions.

The knotted pair whirled crazily across the floor like a two-headed fiend. They crashed into Melsner's desk, upsetting a bottle of purple ink, which spilled over both of them. Then they tore apart, and each staggered to his feet, a livid mess.

Brown wiped his brow, smearing it grotesquely with sweat, ink, and blood. He lunged again, but for the last time. Hennessy, his whole frame taut for one blow, poised like a matador and as the clerk rushed in, brought his left fist forward and up like a lead mallet. It caught the hardware clerk on the point of the chin, and he went down for good. From the corner, a faint bark signalized Ginger's approval, and jolted the wide-eyed onlookers to their senses.

* * *

Ten minutes later, a few blocks down, Brown was telling his boss how he'd been "mobbed" in a card game brawl with a "half-dozen" reporters.

"I told you to keep away from those fellows," he was told. "They're hard guys."

In the pressroom, Reide held a blue bowl and Delany held Ginger. The others were clustered around, beaming. The puppy's bruised side was bandaged clean around his fat little middle, and tied with a funny bow on top, like a Christmas parcel.

"Will ya look at the runt go for that milk, will ya?" Melsner grinned at Hennessy.

BIBLE TODAY

International Uniform Sunday School Lesson

By LOUIE D. NEWTON

SCRIPTURE: Hebrews 3:1—6:5; 9—10. Matthew 4:1-11.
DEVOTIONAL READING: Philippians 2:1-11.

Apostle of Better Things

Lesson for October 12, 1947

THIS lesson opens, Hebrews 3:1-8, with the explanation that Jesus Christ is the minister of better things in that he is the apostle and high priest of our profession, perfectly faithful to him that appointed him. The comparison is made with Moses, who was also faithful, but within a very small circle as contrasted with the Son of God.

Called to God an high priest after the order of Melchisedec, Christ, the author of eternal salvation, dealt no longer with symbols, but offered himself as the perfect lamb to take away our sins. "And for this cause he is the mediator of the new covenant (testament), that by means of death, for the redemptions of the transgressions that were under the first testament, they which are called might receive the promise of eternal inheritance," Hebrews 9:15.

Dr. Newton

* * *

Jesus and the Bible

JESUS is introduced in Matthew 4:1-4, as he quotes the Old Testament to Satan in the wilderness temptation. Having been reared by a God-fearing mother, Jesus was familiar with the Bible as a child.

What is the best thing any parent can do for his or her child? I would answer without hesitation: Teach them to hide God's words in their hearts in the impressionable years of youth. A Bible verse learned in youth will serve through all life's testing situations.

"I will not forget Thy Word," Psalms 119:16.

* * *

He Helps Us Use the Bible

THE better ministry of Jesus is reflected in the fact that, "We have a great high priest, that is passed into the heavens, Jesus the Son of God . . . For we have not an high priest which cannot be touched with the feeling of our infirmities; but was in all points tempted like as we are, yet without sin. Let us therefore come boldly unto the throne of grace, that we may obtain mercy, and find grace to help in time of need," Hebrews 4:14-16.

Study the example of Jesus in his answers to Satan in the wilderness temptation, and He will teach us when and what to say to Satan. We are not dependent upon our wisdom and words. Our great high priest will supply wisdom and words to match any situation that Satan ever presents.

I think of a story of a junior boy, recently accused of stealing. The boy was the victim of a wicked man who sought to turn circumstantial evidence upon him to cover his own sin. The boy told me that he was innocent. I went with him to the juvenile court. The judge asked him if he was guilty. He looked straight into the eyes of the judge and said:

"Sir, I have not sinned. Who convicteth me of this charge?"

The man dropped his head, and said:

"Your honor, I ask for the privilege of withdrawing the charge."

* * *

His Laws in Our Hearts

"I WILL put my laws on their hearts, and upon their minds also will I write them," Hebrews 10:16. Jesus declares, "I do always the things that please him," and he enables us, by his grace, to do the father's will by his indwelling in our hearts. Thus, his will becomes the law of our lives, through the grace of Jesus Christ.

It is impossible for us to keep the law perfectly, but Christ, the better Christ, becomes our righteousness, and then his law is kept by his grace. In the olden times, men claimed to keep the letter of the law, without the spirit, as in the case of Moses. Now, through the offering of Christ, we are enabled to satisfy the spirit of the law.

* * *

The Sufficient Christ

THIS lesson should enhearten every trusting child of God, since it makes clear that, "He is able to save unto the uttermost them that draw near unto God through him," Hebrews 7:25.

He is not only able, but yearns to save unto the uttermost. He wills to save everyone. God has done everything he can do to save every sentient soul on this earth. Those who go to hell do so because they decide to go to hell. It is not the pleasure of God that any should perish, but that all should repent and be saved.

Klemme School News

FIRST AND SECOND GRADE NEWS

—Teacher, Miss Halfwassen

Larry Ulrich had a birthday Monday and treated the children to frost sticks.

Judith Gilpin had a birthday Wednesday and she treated the children to candy bars.

Carroll Priebe has been absent from school this past week.

Those in Second Grade receiving a Gold Star in Spelling are:

Gordon Johnson
Jeanne Barz
Sandra Medin
Marcella Nuehring
Linda Swalve
Rosalie Rosendahl
Joan Christie
Vernadean Ter Hark
Joyce Lassahn
Larry Ulrich

Richard Swalve had a birthday Friday and he treated the children to frost sticks.

THIRD AND FOURTH GRADE NEWS

The following received 100 in Spelling this week:

Third Grade

Gary Back
Fonda Beier
Martin Brinkman

Eva Theimann and Barbara Thompson each missed one word.

Fourth Grade

Bob Arnold
Shirley Barz
Margaret Haefner
Warren Terhufen
David Waddingham

Carol Bridges and Roger Bachman missed only one word.

We are learning to write reports in the fourth grade Language.

The Third Grade are learning to write letters.

We planted some narcissus bulbs in a bowl Friday.

The Third Grade have been studying about animals and insects that hibernate in their Science class.

Wednesday we used the victrola for our music class.

FIFTH AND SIXTH GRADE NEWS

The fifth and sixth grade Art class tried their new water paints last week. Some were very successful and some found that it takes a little time to learn how to use them.

Sixth grade boys and girls are finding how to be map makers. We are making early Egyptian and Babylonian maps. We have also decided that the punishment used in our homes today is much better than in these periods before Christ.

We have celebrated two birthdays this week. Daisy Shaffer and Lois Ann Christians treated us to candy.

SEVENTH AND EIGHTH GRADE NEWS

In seventh science we are completing our unit on Rock and Soil. Several boys and girls have brought rocks to school for class study.

We have been working on the organization of reports in our eighth English this week. Next week we will begin work on paragraph building.

Art period was used for lettering Friday. Next week we plan to apply our skills on courtesy posters.

FRSEHMAN NEWS

The most important event in Freshman class, for the girls, was a tea. It was given for the mothers by the ninth and tenth grade Home Economics classes, under the supervision of Mrs. Andreae. The tea was given on Friday, September 26th from three to five o'clock, in the High School gym. Many of the mothers were present, and also most of the teachers. The girls served sandwiches, cookies, tea, nuts and candy. There was a musical background during the tea, with girls taking turns playing the piano. Gloria Haefner played a solo and LaNelle Harvey, Jo Ann Hummel and Shirley Bisom sang the song, "Surrey With The Fringe On Top." The serving table had an Autumn center piece, and bouquets of flowers were on the tables. All the mothers got acquainted and had a chance to meet our Home Economics teacher. Everyone had a good time, and enjoyed it very much.

Reporter, Mary Ann Blumer.

SOPHOMORE NEWS

By Jerry Finders

The Sophomore class has been working hard on their studies the past week.

In English we have once again taken up the task of diagramming sentences. Most of us remember a few things from last year, but there are always those who have to learn all over again.

In Biology we have had a very enjoyable time performing various experiments on all sorts of plant life. We have also been studying various objects through the microscope. We find this very interesting.

We have been racking our brains figuring out theroms, proofs and propositions in Geometry. Mr. Andreae has been very considerate in helping us with our problems.

Manual Training has kept the boys busy on drawings and scales. We hope to be able soon start work on the building and construction of useful things from wood.

In Home Economics the girls have been studying Etiquette and recently gave a tea party for their mothers.

SENIOR CLASS NEWS

By Kathryn Velau

Every day now is bringing us closer to our first six weeks test. Perhaps after we receive our first report cards of the year, and our parents have a little chat with us, we will study harder.

In American Literature we finished studying about authors and have started short stories; it is a little more interesting to us than authors.

The History class is studying about The Life and Culture of the Colonists. Friday our notebooks are due.

It seems to Mr. Kingery that this is the only class in which the telephone rings continually.

What we don't find out to be true about ourselves in Sociology is whether we are the type that talks too much or not enough. Also how we establish a position in our social world. I guess that every one agrees that this is a very interesting subject.

ANNOUNCEMENT . . .

We wish to announce to our customers and friends that we have sold our business in Klemme to Edmund K. Josten and that he is now in possession of the same.

At the same time we want to assure our former customers and our friends that we are not leaving Klemme, but will still be here to back up our merchandise and service you have enjoyed. We are also retaining our SURGE MILKER SERVICE and will continue to do business in that line.

Mr. Josten will retain our former employees and you will be assured of good service. He will continue to handle the standard lines of merchandise which we have featured and will also continue to serve our large list of SHELLANE bottled gas customers as we have done in the past.

We also wish to take this opportunity of thanking each and every one of you who were our customers and our friends who have helped us establish the fine business now being taken over by Mr. Josten. It is our wish that you continue to patronize him in the same manner that you gave us your business and good will. Again we say

THANK YOU, FOLKS!

HANCOCK COUNTY BOARD PROCEEDINGS

2ND ADJOURNED SEPTEMBR MEETING
Garner, Iowa
September 22, 1947

The Hancock County, Iowa, Board of Supervisors met in session on above captioned date pursuant to adjournment with Supervisors F. J. Schoun, John Chambers and George Th. Gerdes present.

The minutes of the last meeting were read and approved as read.

On motion and second the bond of H. C. Young of Monroe, Iowa, is approved.

On motion and second the bond of Milton N Evanson for a Class C. Beer Permit is approved.

WHEREAS, C. F. Merten, Engineer, has to report that Concrete Products Corporation of Humboldt has completed its contract for material on D D. No. 144 to his entire satisfaction and there is due on said contract a final estimate in the sum of $317 97.

BE AND IT IS THEREFORE RESOLVED by the Board of Supervisors in and for Hancock County, Iowa, acting for and in behalf of Drainage District No. 144, that the report of C. F Merten, Engineer is hereby tentatively approved and the 13th day of October A. D. 1947, at 10 o'clock A. M. is the time fixed for hearing thereon Said hearing to be held at the Courthouse in Garner.

The county auditor be and he is hereby directed to cause notice of hearing on said finnl estimate to be published in the Britt News Tribune as by law directed.

On motion and second the agreement and waiver with Stanley Nedved on Drainage District No. 122 is approved.

Supervisor F. J. Schoun is appointed a committee to investigate and cause repairs to be made in D D No. 37-39

WHEREAS, C. F. Merten, County Engineer, has recommended the straightening of a highway between sections 35 and 36 in Township 94, Range 26 and Sections 1 and 2 in Township 93, Range 26 Wright County and the changing of the channel of the Boone River and

WHEREAS, this improvement has the approval of Wright County Supervisors and they have agreed to defray their proportionate share of the cost of said improvement and it is deemed for the best interests of the public and conducive to public health, utility, welfare and convenience that said improvement be made.

BE IT THEREFORE RESOLVED by the Board of Supervisors in and for Hancock County, Iowa, that the report of the engineer referred to in the preamble hereof be approved and the improvement is hereby ordered made.

BE IT FURTHER RESOLVED that a letting on the construction of said improvement be and the same is hereby ordered held at the Courthouse in Garner, Iowa, on the 6th day of October at 3 o'clock P. M. The county auditor be and he is hereby ordered to give notice of such hearing by publication in the Garner Leader and Signal a newspaper published in Garner, Iowa, which notice shall state the time and place of letting, the time for commencement and completion and that the board reserves the right to waive technicalities and to reject any or all bids.

The foregoing resolution was offered and read by George Th. Gerdes who moved its adoption was seconded by Supervisor Schoun whereupon the chairman placed the motion of its adoption and upon roll call the vote thereon is F. J. Schoun, John Chambers and Geo. Th. Gerdes aye. Nays. None. Whereupon the chairman declared the resolution duly adopted.

On motion and second the amended report of C. F. Merten, Engineer on D. D. No. 144 as filed on August 18, 1947 is approved.

WHEREAS, there is now in the hands of the treasurer the sum of $126,655.64, credited to the Road Construction fund, and

WHEREAS, there is now in the hands of the treasurer the sum of $8,907.25, deficit to the Road Maintenance fund, and

WHEREAS, it is desired to transfer $25,000.00 from the Road Construction Fund, for the following reasons: demands on the Road Maintenance are excessive due to rising cost of operation of equipment and wages, and

WHEREAS, said transfer is to be permanent in accordance with Section 888, Code of 1935, and

WHEREAS, there is sufficient money in the Road Construction Fund to meet all demands thereon, and

WHEREAS, all laws relating to municipalities have been complied with,

NOW THEREFORE, be it resolved by the Board of Supervisors of Hancock County, Iowa, subject to the approval of the State Comptroller, that said sum of $25,000.00 be, and the same is hereby transferred from the Road Construction Funds to the Road Maintenance Fund, and the county auditor (secretarial officer) is directed to correct his books accordingly and to notify the treasurer of this transfer, accompanying the notification with a copy of this resolution and the record of its adoption. The vote thereon was as follows: Ayes Frank J. Schoun, John Chambers and Geo. Th. Gerdes. Nays None.

J A. CHAMBERS
Presiding Officer

FRED C. MISSAL
Secretarial Officer

I hereby certify the above to be a true and correct copy of resolution passed by the Board of Supervisors on the 22nd day of September, A. D. 1947.

FRED C. MISSAL
Secretarial Officer

This being the 22nd of September A. D. 1947, a date heretofore fixed for a hearing on the final estimate of Sylvan C. Oleson on his contract for a cleanout of the main open ditch in Drainage District No. 26 Hancock County, Iowa, the hour for said hearing having arrived, the proof of publication being on file and the board being fully advised said hearing was held as scheduled. There being on objections on file and no objectors appearing at the hearing,

BE AND IT IS THEREFORE RESOLVED by the Board of Supervisors in and for Hancock County, Iowa, acting for and in behalf of Drainage District No 26 that the report of the engineer recommending the final payment on said contract be paid, is approved and final payment ordered made as by law directed

This being the 22nd day of September A D. 1947, a date heretofore set for a letting on the gravel crushing, loading and hauling of approximately 30,000 cubic yards of gravel, the hour for said letting having arrived the Proof of publication being on file and the board being fully advised said letting was held as scheduled. The Chairman of the Board proceeded to open all bids on file and after duly considering all bids on file the bid of the Clermont Brick & Sand Co. of Clermont, Iowa, is found to be the lowest and best bid therefor.

BE AND IT IS THEREFORE RESOLVED by the Board of Supervisors in and for Hancock County, Iowa, that the bid of the Clermont Brick & Sand Co., of Clermont, Iowa, be and the same is accepted as the lowest and best bid for the crushing, loading, and hauling of approximately 30,000 cubic yards of gravel and a contract is hereby awarded to the Clermont Brick & Sand company. All other bids are hereby rejected.

Chairman John Chambers is hereby authorized and ordered to execute said contract in behalf of Hancock County, Iowa.

This being the 22nd day of September A D 1947 a date fixed by resolution of this board on September 15th A. D., for a continuation of a hearing on D. D No. 101 Hancock County Iowa, and a hearing on the report of the commission to appraise damages in Drainage District No. 101, which commission was appointed by the county auditor on September 15 and whose report was filed in the office of the County Auditor on September 17th, the hour for said hearing having arrived and the board being fully advised, said hearing was held as scheduled The county auditor read the report of the commissioners and no objections oral or written were filed

BE AND IT IS THEREFORE RESOLVED by the Board of Supervisors acting for and in behalf of Drainage District No. 101 Hancock County, Iowa, that the report of the commissioners to appraise damage be and the same is hereby approved ratified and confirmed as reported and reconstruction of D. D. No. 101 petitioned for by the Trustees of Ellsworth College be and the same is hereby established and confirmed as prayed in the prayer of the commissioners and as provided for by law

In the matter of a letting on the construction of Drainage District No. 101, 144 added lands and D. D. No. 122 extension

BE AND IT IS HEREBY RESOLVED that a letting on the construction of D D. No. 101, D. D. No. 122 extension and D. D 144, be and the same is hereby ordered held at 1:30 P. M , on the 13th day of October A. D., 1947, at the Courthouse in Garner, Iowa

The county auditor be and he is hereby directed to cause notice of said lettings to be published in the Britt News Tribune a newspaper published in Britt, Iowa, which notice shall set out the kind and approximate amount of work to be done, the date for commencement and completion and that the board reserves the right to waive technicalities and to reject any or all bids.

The foregoing resolution was offered and read by Supervisor Schoun who moved its adoption was seconded by Supervisor Gerdes, whereupon the chairman placed the motion of its adoption and upon roll call the vote thereon is F. J Schoun, John Chambers and George Th. Gerdes aye. Nays None. Whereupon the chairman declared the resolution duly adopted

On motion and second the board adjourned to October 3rd at 9 o'clock A. M.

FRED C. MISSAL
County Auditor

Hay Crop Best Way To Handle Late Soybeans

Late soybeans that will not mature sufficiently to be harvested for grain can best be handled as hay, E. S. Dyas, agronomist at Iowa State College, told Iowa farmers this week.

In many cases, it will be a race between the beans and the frost, Dyas says. It is best to cut them before the freeze if it can be anticipated a day or two ahead. Next best thing is to cut them immediately after the freeze.

Normally beans should be cut just before the lower leaves start dropping and when the pods are partially filled. The protein content of the pods will increase as they fill. Dyas points out that about one-third of the hay will be made up of pods if the beans are cut at the right time.

Curing and saving the leaves is more difficult with soybeans than with ordinary hay crops. For that reason many farmers like to harvest bean hay with a grain binder and shock them in the field, Dyas says. This makes the best hay but requires more man hours than mowing, raking and loading with a hay loader.

There is less worry if the hay is cured in the shock, Dyas says. The shocks can stand indefinitely in bad weather and still make high-quality leafy hay.

Beans can be put up as silage if some carbohydrate material is added to keep the silage from spoiling. Corn or sorghum fodder is the handiest material to use at this time of year. A mixture of one-third to one-half of corn or sorghum fodder, all put in at the right stage with soybeans, should make excellent silage, Dyas says.

Check Feed For Foreign Matter Before Buying

"Check feed oats very carefully for excessive amounts of weed seed and other foreign matter before you buy," advised county extension director Paul Henderson this week.

He reports that some oats being bought for feed has a lot of weed seeds in it. Quack grass, Canadian and sow thistle, and mustard are especially bad.

According to E. P. Sylwester, plant pathologist at Iowa State College, these weed seeds can infest a farm very quickly. They pass onto the fields through the manure.

Even grinding does not eliminate the danger entirely. Many of the seeds are so small that they are not cracked and will still germinate.

There is a law which requires that commercial feeds be treated by heat or ground finely to destroy the weed seeds before the grain can be sold. This, however, does not go far enough and the individual farmer will have to buy discriminately, Henderson says.

Adult Bible Class Met Monday Eve At Reformed Church

The Adult Bible Class of the Klemme Reformed and Evangelical Church met at the church Monday evening. Rev. and Mrs. Calvin Grosshuesch and Mr. and Mrs. Fred J. Arnold served a nice lunch after the meeting.

HOMECOMING

Last week at Whittemere, Eugene Vaudt returned home from navy service. Forty-five minutes after his arrival his car crashed into another car which was making a left turn, doing some damage and dampening Eugene's homecoming.

From where I sit ... *by* Joe Marsh

How to Tell You're Getting Old

Doc Walters gave me this formula: It's a sure-fire sign you're getting old when you resent other people having a good time.

And the Doc means it hasn't much to do with age. There are old folks in our town who get a big kick out of seeing other people enjoy themselves—seems to keep them young in spirit, with a twinkle in their eyes!

And there are some others who resent the young folks going fishing; who feel that community games and dances are just a waste of time; or who criticize temperate people for enjoying a mellow glass of beer with friends.

They're often well-intentioned folks, too. But from where I sit, the minute we criticize our neighbors for enjoying wholesome pleasures—like a game of horseshoes, a glass of beer, or an afternoon's fishing—it's a sure sign we're growing old (in spirit anyway) no matter what our age is.

Joe Marsh

Clear Lake Girl Bride Of Klemme Farmer

MR AND MRS HAROLD ALBERS

MARRIAGE VOWS SPOKEN

Lighted candelabra and tall baskets of gladioli and baby mums, bouquets of fall flowers in smaller baskets and potted ferns formed the setting for the wedding at the First Methodist Church at Clear Lake Sunday afternoon, September 28, of Miss Norma Holmes, daughter of Mr and Mrs Clarence Holmes of Ventura, and Harold Albers of Klemme The Rev. Warner M. Hubbard, pastor, read the double ring service at 3 o'clock in the presence of a large group of relatives and friends.

The bride, who was given in marriage by her father, wore a white chiffon wedding dress made with shirred bodice, net yoke, long sleeves and graduated peplum Her fingertip veil of net was pleated into a cap and the edge was finished with rows of satin ribbon. She wore a single strand of pearls, a gift of the bridegroom, and carried an arm bouquet of roses and baby mums.

Mrs. John Albers, of Mason City, sister of the bride, was matron of honor. Bridesmaids were Miss Patricia Dunkbar, Clear Lake, and Miss Barbara Clark, Ventura. They wore orchid, yellow and pink formals respectively and each carried a colonial bouquet of white baby mums with ribbon shower Mrs Holmes, mother of the bride, wore a dress of soldier blue with black accessories and a corsage of chrysanthemums in autumn shades.

John Albers, Mason City, was his brother's best man The other attendants were George Rose, Jr, cousin of the bride, and DuWayne Holmes, brother of the bride. Robert Thieman, Klemme, nephew of the bridegroom, carried the rings on a white satin pillow. Gordon and Jay Grimm, Ventura, were ushers.

Miss Darlene Brager, Ventura, sang "Because" before the ceremony and "The Lord's Prayer" at the close. She was accompanied by Mrs. Harry Mason, organist, who also played a prelude of nuptial music and the traditional wedding marches. Mrs. Bernard Orcutt was in charge of the guest book.

Following the ceremony a reception for 150 guests was held in the church parlors which were decorated with autumn flowers. A 4-tiered cake baked and decorated by Mrs. Chadd Baker, Clear Lake, cousin of the bride, centered the serving table.

Mmes. Homer Brimm, Baker, Hans Alsen, George Roge, Sr., and Jim Tomkins and Miss Hilda Bohn served. They were assisted by the Misses Maxine Grossbeck, Lorraine Abel, Shirley Bacon, Thema Bohn, Betty Trimble and Delores Thieman.

Mr. and Mrs. Albers have gone on a short wedding trip after which they will be at home on a farm southeast of Klemme. For the going away Mrs. Albers, who was graduated from Ventura high school last May wore a black taffeta suit with red accessories and a corsage of red and white roses.

WHICH FARM LEASE?

When soil improving or soil conserving practices are started on rented farms, several questions come up. First, what contributions to these practices should be made by the owner and what by the tenant? How should government payments be divided? If the tenant has to leave before he gets full use from an improvement he has made, what unused value should he receive?

To answer these questions a conservation lease "rider" was prepared at Iowa State College this year. Tenant and landlord, by working together through this rider, can help stop soil losses and soil depletion on rented farms. An aggressive soil conservation program can be carried on with both parties contributing proportionately.

The rider can be used whether the lease is oral or written.

The first requirement is getting the rider operation is the determination of, and agreement between, the owner and tenant to go about soil saving in a systematic way.

After the landlord and the renter see eye to eye on their needs, these steps can be followed:

List the soil building practices to be started on the farm during the year.

List the contribution to each practice to be made by the owner and by the tenant.

Estimate the cost of value of the tenant's contribution to each practice.

List the compensation due the tenant for unused value if he leaves the farm before he has full return on his investment from a good soil building or soil saving practice.

A copy of conservation lease rider is available from the Soil Conservation Service, the county extension director or Iowa State College.

DON'T BURN DOWN CRIB TO DRY CORN

Driers Not Properly Built And Installed Can Be Real Fire Hazard

Don't overlook the safety factors when building corn driers and adapting cribs for mechanical drying, Norval Wardle, farm and home safety specialist at Iowa State College, warns Iowa farmers.

Construct the corncrib so that corn will be distributed evenly over each air chamber. Then none will have to be overdried to get some dry enough, Wardle points out.

Cool Gases

Combustion gases can be safely used with an oil heat unit. They should be reduced in temperature to at least 150 degrees F. or preferably to 130 degrees.

When combustion gasses are used there is danger of sparks going into the crib. Best way to prevent this is to place a ½-inch mesh screen on the air intake of the oil heat unit. The screen will keep husks and other spark-producing material from entering If the screen is used to filter the combustion gases as they leave the heat unit, it tends to clog, Wardle says

Need Thermostat

Thermostat controls on the fuel supply are important. If the blower stops or the air supply is blocked, overheating will result. It is especially dangerous if the flame blows out in an oil unit and fuel continues to be supplied.

Wardle warns not to set the heating unit next to the crib. A fire resistant air duct at least 6 feet long should be used to carry the heated air to the crib. Before doing any drying, check with your insurance company to see whether your drying setup meets its specifications.

HOW TO POISON RATS

There's quite a trick to poisoning rats. Paul Henderson says that Iowa State College entomologists have learned a number of things from rat control campaigns throughout Iowa.

Rats will eat anything that humans do. They also will attempt to balance their diet. Any food that rats don't get in large quantities will make good bait. On the average farm, ground meat or fish seems best. At a slaughterhouse fish, cereals or fresh vegetables give good results. Best results come when rats are "prebated" for three nights before poisioning. This means leaving unpoisoned bait around where rats will become accustomed to eating it.

Bait should be put out at sundown on short lengths of boards or pieces of cardboard. By putting the bait on clean boards in plain sight it is easy to collect what is uneaten the next day. Don't attempt to place bait during stormy weather. Rats tend to hole up them. Don't put out bait in freezing weather. Rats won't eat frozen bait.

Keep livestock and pets securely penned during prebaiting and poisoning periods.

Protect baits from livestock by placing a slating board against the wall of any building and placing the bait board underneath.

LOTS OF PODS

By actual count, one soybean stalk grown by A. L. Courtney of near New London, has 328 good-sized pods. Anybody want to challenge that as a record?

"HARVESTER'S 100 YEARS IN CHICAGO"

See the big Exposition depicting the agricultural progress of the past century!

CHICAGO, SOUTH END SOLDIER FIELD
EVERY DAY
OCTOBER 18 to NOVEMBER 2

Interesting Exhibits of Old Time and Modern Equipment

MUSIC AND ENTERTAINMENT

ALL FREE

A CENTURY ago—in October, 1847—Cyrus Hall McCormick built the first reaper factory in Chicago and founded the International Harvester Company's business of today.

This month, Harvester is celebrating the 100th Anniversary of this event with a big and colorful exposition on Chicago's lake front at the south end of Soldier Field—a fascinating, informative portrayal of growth and progress in the mechanization of farming, truck transport, industrial power and refrigeration—topped off with music and entertainment.

A special railroad excursion to Chicago is being arranged to attend an exposition commemorating International Harvester's 100 Years In Chicago on October 29th, a one day trip. Anyone interested in going should contact us.

U. S. Farmer Will Beat Communism

American Food Can Halt Chaos Threatening Europe

By BAUKHAGE
News Analyst and Commentator.

WASHINGTON.—The American farmer is going to lick communism!

That's what your worried capital is saying today. American representatives abroad and at home are submitting one report after another which register gains in the Soviet battle to build a Communistic world out of chaos.

The reports come in from Prague, from Belgrade, from Sofia, from Budapest, showing how each day the iron grip of the Russian-dominated secret police is gradually choking off democracy in the little countries. Reports from Rome tell us of a planned coup of the Moscow-directed Communistic party in Italy to overflow the government there. The open record of the meetings of the United Nations reveals the consistent attempt of the Russian delegation to block the efforts of the struggling, still-free governments in Greece and France.

Some American political leaders still look askance at the huge program of aid to western Europe envisioned in the Marshall plan Part of the country seems unsympathetic, or at least indifferent, toward the effort to win the "cold war" against Russia with purely economic weapons, because it means sacrifices on the part of the American citizen. Some officials in the administration, supporters of the Marshall plan in congress, and a few diplomats at home and abroad, are frightened by this attitude.

Baukhage

Until recently this correspondent has been pretty much distressed, too. But I feel better after talking with certain officials whose names seldom appear in the news. These men are not cabinet officers, they are not diplomats, they are not the leaders in congress whose faces appear in the news pictures and whose adumbrations are quoted in the daily dispatches. They are just the men who do the work for which Uncle Sam "pays the wage."

They are paid for knowing about American farms and American farmers. Their consensus is embodied in the first line of this dispatch: The American farmer is going to lick communism. I believe the farmer will do it, not because he knows it will pay him in dollars now, but because he is going to be convinced before very long that it will pay America. The American farmer will do it by providing the food necessary to halt chaos in Europe just as he proved the verity of the slogan: "Food will win the war."

The history of Europe since the war is that every government falls when the bread ration is reduced. The men who know tell me that whatever the total amount in goods or dollars demanded by the Marshall plan, it is safe to say that two-thirds of it will be for food—either the food commodities themselves or the dollars with which to buy them.

American dollars are growing very scarce in Europe but there are three things which the European purchaser hesitates to quit buying—grain, coal and fats. You will notice that France, when it reduced its imports (as all European countries are doing as their dollars decline) tried to hold on to her grain, coal and edible fats as long as possible.

Even if the Marshall plan were not put into effect in time to provide extra dollars, for their grain purchases, there will be a lag of some months before the farmer is touched in his pocketbook. By that time, if nothing is done, the European countries starve.

Free World Is at Stake

Exports to Europe already have been cut down. That will affect first employment of people in this country in such export industries as radio, electrical appliances and like gadgets which can be spared. It is quite possible that there may be a sufficient increase meanwhile in employment in construction or other domestic industries which will absorb this unemployment and keep up the purchasing power of the consumer sufficiently to maintain present farm prices. In any case, there probably will be a six months lag before prices are greatly affected.

Eventually, the marginal surplus would be touched (if Europe is not stimulated) as it was in 1920. Then, you recall, grain prices dropped, although exports were still heavy. However, the demand at that time was not great enough to absorb the entire American output. It is this "marginal surplus" which decides the prices at home. When the demand for the first bushel over and above the domestic surplus ends, it affects the whole price structure.

Before such a situation arises, it is firmly believed that the "realistic" side of the picture will be brought home forcibly to America. The average citizen, as well as the farmer and the exporter and others directly dependent on international trade as a whole, will realize that what is at stake is something far greater than the dollar—America's stake in the preservation of a free world—a world which will perish if Europe is underfed.

Russia has only about one-sixth of the amount of wheat which the United States is able to spare, according to current estimates. The United Nations food and agriculture organization estimated it as 70 million bushels against our 400 million bushels, as stated above.

Our own situation, we admit, is not too good. Nevertheless, we are in a much better position on a competitive basis, than Russia. There appears little doubt in the minds of the men most familiar with the facts that when the full force of this situation and what it means is realized in this country, Europe may be saved for democracy — and the American farmer will have at least two-thirds of the credit due him.

• • •

"Please, kid, don't EVER go collective on me."

What do the Russians think of "collective farming," communized agriculture under the Soviets? Well, I asked a friend of mine, Paul Ward of the Baltimore Sun, who got this story from a Russian, a good Communist, whom he met in Moscow. After a few vodkas the Russky used to tell stories. This was one: Stalin and Roosevelt were driving through the countryside. A cow got into the road in front of them and wouldn't move. The driver tried to shoo it away but it wouldn't budge. Finally, Stalin got out, went up to the cow and whispered into its ear. The cow gave one frightened look, jumped over the fence and disappeared in the distance.

"What did you say to the cow to make it do that?" Roosevelt asked.

Stalin smiled. "Don't tell anybody, but I said to her: 'If you don't get out of here, but quick, I'll put you on a collective farm!' "

NEWEST FIGHTER PLANE . . . The Curtiss XP-87, AAF's newest fighter airplane, is the first ever powered by four jet engines. Operated by a two-man crew, the plane has a wingspan of approximately 65 feet, about equal to its overall length. Currently, it is being ground tested.

NEWS REVIEW

Showdown Near in U.N.; Grain Exports Reduced

SHOWDOWN:

Russia's Choice

Secretary of State George Marshall sounded like a man who was getting a lot of things off his chest. What he said in an address before the U. N. general assembly of 55 nations amounted to a call for a showdown with Russia.

The Soviets, he intimated, have held to their stubborn, veto-bound course in the United Nations long enough.

To make the delinquents come to time, Marshall proposed a four point plan of action to the general assembly:

1. He suggested creation of a new assembly committee of 55 countries which would operate without veto and would remain constantly in session to consider world security questions and function as a board of appeals. Potentially, the committee would be a rival to the security council.

2. He announced that the U. S. was ready to relinquish, in all but the gravest cases, its veto privilege and implicitly challenged Russia to do likewise.

3. He blamed Russia for the U. S.-Soviet deadlock in Korea and said that America would submit the case to the general assembly for action.

4. He blamed Russia for using vetoes to protect Yugoslavia, Albania and Bulgaria from being pronounced guilty of meddling in Greece. He said the U. S. would ask the assembly to vote guilt for the three satellites and to demand that they refrain from interfering in Greece.

PRICE BATTLE:

Exports Cut

Secretary of Agriculture Clinton P. Anderson had a "Horatio at the bridge" air about him as he announced that the government had made a drastic cut-back of grain and flour allocations for export in November.

The move generally was accounted as another noble stand against the forces which are causing domestic food prices to spiral dizzily. This one, however, had the blessings of the grain trade as "a step in the right direction."

Reducing the export allocations for November was in line with the government's surprise revision of the nation's 1947 export goal from some 450 million bushels of grain down to 350 million.

(In a significant sidelight, Anderson scoffed at the prospect of returning to rationing by pointing out that such a program could not be put into effect before the need for it would be over.)

Next move, it was hinted, would be an attempt by Secretary Anderson to put through a sharp reduction of total food exports—not just grain—as the only practical way of pulling down prices.

The U. S. state department, however, committed to its "save Europe" program, no doubt would object vehemently to any such action.

Atom After-Effects

Although the atom bomb explosions in Japan have caused some sterility among the people, they have not affected the soil adversely and may even have brought about an improvement in the rice crop.

Dr. Shields Warren, Harvard professor, recently returned from Japan where he studied after-effects of the bomb, said that its effects on human beings may carry into the third generation, producing freaks

WHOSE FAULT?

Taft Talks

Sen. Robert Taft (Rep., Ohio), who had to crash a sign-toting picket line to get to his audience, told a Republican rally in Los Angeles that if President Truman had not jumped the gun in scrapping price controls the current inflation spiral might have been delayed a while longer.

Taft

Exactly how Taft arrived at that rather hazy conclusion was not immediately clear. The senator himself last year was denounced by Mr. Truman for his part in writing a price control extension bill which the President branded as being worse than no controls. Mr. Truman's subsequent veto of the bill allowed price controls to expire automatically.

Nailing down the first plank in what apparently is designed to be his campaign platform for the 1948 presidential nomination, Taft assailed the administration's record on taxes and spending.

The country must elect a Republican president next year if it is genuinely interested in reducing taxes and spending, Taft observed.

SPEED-UP:

Forrestal In

James V. Forrestal wasn't due to be sworn in as U. S. secretary of defense for another week, but President Truman, manifestly alarmed over the trend of world events, ordered the former secretary of the navy to jump the gun in taking over his new job.

Forrestal

Mr. Truman observed that in view of conditions abroad, the nation should have its secretary of defense in office and functioning. The conditions, which he did not specify, probably were the current unrest in Trieste and the U. S.-Russian stalemate in the United Nations, topped off by Secretary of State Marshall's challenging speech before the general assembly.

Now presiding over the unified army, navy and air forces, Forrestal is the armed forces' only representative on the President's cabinet.

NO EXPLOSION POSSIBLE

Science Now 'Spalliates' Atoms

Scientists now can split the atoms of five more metals—lead, bismuth, thallium, platinum and tantalum—achievements destined to open new roads toward man's ultimate mastery of the atom.

However, there's no need to worry about the possibility that a "cheap" atomic bomb could be made by splitting the atoms of such a common metal as lead, according to Prof. Glenn T. Seaborg, University of California physicist, who played a dominant role in development of the first atom bomb.

The day has not yet come when atomic bombs could be made with common elements such as lead and bismuth, Dr. Seaborg said, emphasizing that the fission of such elements "opens no possibility for the production of self-sustaining chain reaction."

As a matter of fact, he added, they can't even be used as sources of atomic energy for purposes less violent than that of blowing mankind to bits. They don't emit enough energy for that.

Actually, the atoms of the five metals are not split—they're splintered. Scientists call this splintering process "spalliation" to distinguish it from plain ordinary fission.

What good is the spalliation of atoms if they can't be utilized directly for atomic bombs or energy? Their purpose is humanitarian. They will greatly enrich the field of scientific and medical research by adding at least 100 new radioactive isotopes to the more than 500 already produced.

It is the beginning of a new phase of nuclear development, he said. Next step is to create machines that develop such high energies that man will be able to create matter out of energy, thus reversing the process of the atom bomb which turns matter into energy.

"Apparently the prospects for entering this next energy region are good. Thus we may look forward to even more amazing developments in the fields of nuclear science," Dr. Seaborg predicted.

Sportlight

by GRANTLAND RICE

SOMETHING like 20 years ago, or close to that spot on the calendar, Chick Meehan and N.Y.U. came up with one of the greatest football players the game has ever known.

Slightly over 6 feet, weighing 205 pounds, he was a brilliant ball-carrier, a smashing blocker, a fine forward-passer and, above all, one of the best kickers that ever applied shoe leather to a pigskin. His name happens to be Ken Strong. Barring possibly Jim Thorpe, Ken could do more things well than any back I ever saw in action.

S. Chandler

When Ken Strong practically wrecked a fine Carnegie Tech team, a team that already had crushed Notre Dame, Judge Wallie Steffens, Carnegie's coach said to me that night:

"At last I've seen a back greater than Willie Heston. Strong is the only back I ever saw who could run over one of my best teams, pass, kick, block and tackle. I've never seen his equal."

It was about that time that Coach Gwinn Henry of Missouri wired me—"I've got your All-America this year. Don't bother any more. Just Ken Strong. Forget the others."

Recently I ran into Ken Strong again. Ken is now around 40. What's his job? Well, one of his jobs is playing for the New York Giants. Ken isn't running, blocking or passing any more.

"But I've still got the toughest job in football," he said.

'Like Kicking an Eel'

"I'm kicking," Ken explained. "Did you ever try to punt, place kick or drop kick this cigar-shaped ball they have today? It's a ball shaped entirely for the passing game—thin and long. Compared to the ball we used to kick 20 years ago, it is like kicking an eel.

"The old football was much rounder. It was easy to get your toe into it. It was easier to punt or to drop kick or place kick. It was far easier to kick off—to drive one beyond the goal line. But today you have a target to hit that is about the size of a silver dollar—and I'm having a tough time betting a kicking shoe that has the proper kicking space. You need a square-toed shoe that can drive into the limited space the modern football has to offer the kicker.

"No wonder so many college teams have so much trouble getting anyone who can kick off or place kick. And no wonder there are so few fine punters left, either in the college or the pro game. Naturally the pros with their greater experience, have more good punters. But I can promise you it's a tough job. But I still hope to get a few over the crossbar—or over the goal line on a kickoff, It's a good thing for me that I have all these kicking years to call on."

Ball Made to Throw

Ken Strong is quite close to being 100 per cent right about the modern football. It was arranged for the passer. It is long, thin—easy enough to throw—but harder to kick than a hot dog or a pretzel.

I've asked at least 20 leading college coaches why they used so many varieties of action on the kickoff—such as placing the ball sideways.

"We have no one who can kick off," is the usual answer.

I've asked them why they had no first-class punters. "There's no one who can kick this ball," they tell you.

Then we began looking back to the old days of football—with its great kickers—George Brooke of Pennsylvania, Sweeley of Michigan, Herschberger of Chicago, Brink Thorne and Bull of Yale and one of the greatest—Kercheval of Kentucky. "He was the best of all," Shipwreck Kelly tells me, "60 or 70 yards on a dime." Not bad kicking.

The old game was packed with fine kickers, and one of these was Spud Chandler of Georgia, long with the N. Y. Yankees as a brilliant pitcher.

Among the half-modern group I'd name Frank Reagan of Pennsylvania, now with the Giants, and Harry Kipke of Michigan.

Hurry-up Yost was a great believer in the kicking game, both as a form of attack and defense. It was here his slogan came along—"A punt, a pass and a prayer."

Baugh Can Kick, Too

One of the best modern kickers is a lean, thin, somewhat aging Texan known as Sammy Baugh, formerly of T.C.U. and now with the Redskins. Sammy has always been a great passer. He has been just as good a kicker. He is one of the masters.

Ward Cuff of Marquette, the Giants and the Packers is still an able marksman with the right toe.

The best all-around kicker I ever saw was Jim Thorpe, who could punt, place kick and drop kick.

Annual Observance Seeks Curb On Skyrocketing Fire Damage

Careless Habits Blamed as Toll Hits High Peak

WNU Features.

With the dual objective of ...ding homes and communi... ...s of the hazards which ac... ...nt for the majority of fires ...d of focusing attention on ...careless habits which take ...increasingly alarming toll ...life and property, Fire Pre...ention Week will be observed ...a nationwide scale during ...week of October 5-11.

During an average year, ...e:

Takes 10,000 lives . . .

Maims or scars 40,000 per...ons . . .

Destroys or damages 350,...000 homes, 2,700 churches, 2,600 schools, 9,500 hotels and boarding houses, 10,500 restaurants, 1,000 hospitals, 3,100 amusement places . . .

Destroys 90 million dollars worth of farm property . . .

Burns forest lands equal to an area the size of Virginia . . .

Destroys enough timber and lumber to build 150,000 five-room houses.

...n intensive campaign to curb ...e mounting fire loss will be con...cted during National Fire Preven...n Week, which is held annually ...ing the week containing October ...anniversary of the great Chicago ...e of 1871. National Fire Protec...n association, with headquarters ...Boston, a world-wide, non-profit ...e control information center, has ...en official sponsor of Fire Pre...tion Week since its inception ...ing President Wilson's adminis...tion.

...e 1947 fire toll is zooming to an ...time peak of 700 million dollars, ...increase of 25 per cent over 1946, ...previous peak.

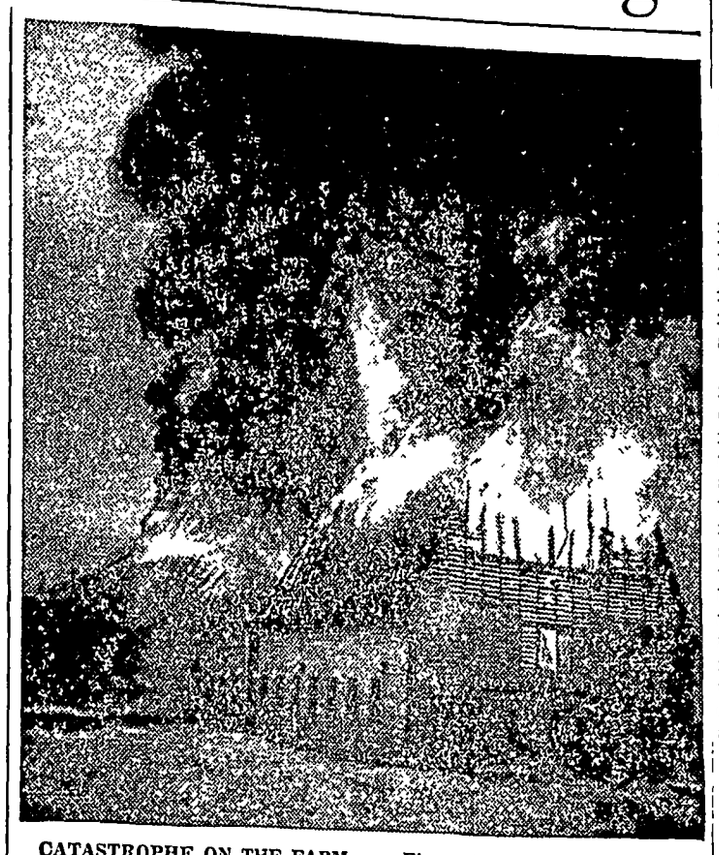
...ntending that the fire loss fore...t for 1947 will be a 17-year high, ...PA blames the skyrocketing ...age on substandard construc..., public indifference, inadequate ...ection and maintenance, under...ed and underequipped fire de...tments and a let-down of periodi...fire inspections.

Careless fire is upping the ...S. cost of living, NFPA ...arges, adding that a study by ...e association reveals that the ...rage American family of ...e will pay a 1947 fire tax of ...re than $50 on the basis of ...e 700 million dollar fire loss ...ecast.

...re causes waste of thousands of ...s of food urgently needed to feed ...hungry here and abroad. An...ly fires occur in 2,000 flour mills ...elevators, 200 packing plants, ...bakeries, 10,500 restaurants, 32,...barns, 500 creameries and dai...and in thousands of groceries, ...houses and farms.

...ief causes of fire, according to ...National Board of Fire Under...ers, are matches and smoking, ...h account for 30 per cent of all ...from known causes. Other ma... causes are defective or over...ed stoves, furnaces and flues, ...se of electricity, flammable ...s and open fires.

...ildren are the most frequent ...ms of fire, with children under ...years accounting for 20 per cent ...ll fire fatalities.



CATASTROPHE ON THE FARM . . . Fire guts a farm barn, one of the many blazes which cause an estimated 90 million dollars property damage on farms every year.

PATH OF DESTRUCTION

Toll of Farm Fires Estimated At 90 Million Dollars Yearly

Death and destruction follow in the wake of farm fires, the catastrophic blazes taking the lives of 10 farmers every day and causing property damage estimated at 90 million dollars a year. The 1947 dollar loss from farm fires would permit construction of 50,000 barns costing $2,000 each, it is estimated by National Fire Protection association. Placed end-to-end, the barns would form an unbroken wall 500 miles long.

Insisting that the increasing fire loss is not inevitable to life on a farm, NFPA contends that "90 per cent of the fires which are taking such a high toll of life and property are caused by the farmer himself.

"Farmers who are interested in protecting their property, their family and themselves can eliminate the causes of all but 10 per cent of these devastating fires practically overnight," NFPA declares. "All that's needed is common sense and constant vigilance."

During Fire Prevention Week, October 5 to 11, NFPA in cooperation with the U. S. department of agriculture urges farmers to become cognizant of the hazards which threaten to engulf their farmsteads in flames.

The causes of 90 per cent of fires on farms are almost equally divisible between faulty building construction and bad habits, NFPA reports. Emphasizing that farms normally are far removed from organized fire protection, NFPA advises farmers to give first consideration to use of fire-resistant materials in building construction and suggests inspection of the farm home and other buildings to eliminate these structural hazards:

1. **Be sure the heating plant is properly installed with adequate safeguards. Keep it clean and in good repair. Use only metal barrels for ashes and rubbish.**

2. **Don't use flammable wood shingles on the roof of any farm building. In new construction, repair and remodeling work, use only fire-retardant roofing, such as asphalt shingles or some other fire-resisting material. Sparks from the chimney or brush fires falling on flammable wood shingle roofs are a major cause of farm fires.**

3. **Check the wiring system to make sure it is adequate and ready to carry the expanded electrical load needed to service the modern farm and that newly installed systems meet the requirement of the national electrical code.**

4. **Build chimneys with sturdy foundations. Set them on the ground, not on timbers, and build of fire-safe materials. Clean the chimney at least once a year.**

5. **Install and properly maintain lightning rods on all main buildings.**

If these fire-breeders were eliminated, NFPA insists, the number of farm fires would be cut in half.

Among the bad habits which account for the rest of preventable fires, NFPA lists the following:

1. The careless smoker. He smokes in bed and in the barn; discards lighted cigarets and matches; fails to keep matches out of reach of small children.

2. The thoughtless farm wife who stacks papers, rags, old clothing, broken furniture and toys in the attic, closets, barn or other outbuildings — debris which is tinder for any spark and often the source of spontaneous ignition.

3. Dangerous storage of gasoline and kerosene, and use of flammable cleaning fluids. Store flammable liquids in metal containers away from main buildings; never use kerosene to quicken a fire, and be sure cleaning fluids are non-explosive.

4. Clean dust and cobwebs away from motors, appliances and machinery to avoid the danger of flash fires. Don't attempt to operate defective electrical equipment, and replace frayed cords promptly.

5. Properly cure hay and keep it under a weathertight roof to avoid spontaneous ignition. Water seeping through a roof and dripping into hay can start the heating process.

...OTHER NEEDLESS BLAZE . . . Destruction like this is unneces..., maintains National Fire Protection association, sponsor of Fire ...evention Week. NFPA insists that 90 per cent of all fires are pre...ntable. Common sense and constant vigilance will solve the problem.

...S. Termed World's No. 1 Fire Trap

...ch American homes being at...ed by fire at the rate of about ...00 a year, the U. S. continues ...ate the title of No. 1 fire trap of ...world.

...ntaining that 90 per cent of all ...can be prevented by exercising ...w common-sense precautions, ...nal Fire Protection association ...ends that good housekeeping is ...remedy for a large part of the ...headache. It's the cluttered ..., the neglected basement and ...r poor housekeeping condi...tions that spell fire trouble.

The majority of fires in the home can be traced to seven major causes:

1. Rubbish.
2. Defective chimneys.
3. Combustible roofs.
4. Defective heating apparatus.
5. Matches and careless smoking.
6. Gasoline, kerosene and other flammable liquids.
7. Electrical defects.

Smoking Labeled No. 1 Fire Hazard

Careless smoking was labeled fire hazard No. 1 by Percy Bugbee, general manager of National Fire Protection association, in urging a concerted Fire Prevention Week campaign to halt this practice.

Quoting department of agriculture reports disclosing that Americans smoked 327 billion cigarets last year, Bugbee insisted: "Every one of these cigarets when lit is a potential fire hazard unless careful smoking is practiced."

The careless smoker is responsible for more than 100,000 of the approximate 650,000 building fires which ravage the country every year, Bugbee charged. Nine out of ten of the approximately 200,000 annual forest fires are man-made, most of them resulting from careless smoking in the woods.

FOXHOLE DREAMS COME TRUE

Marine Club Serves Living While Honoring War Dead

WNU Features.

SAN FRANCISCO, CALIF.—Many a foxhole dream comes true as marines and former marines gather in the congenial and swank atmosphere of the Marine Memorial club, which was established here a year ago as the only living memorial to the gallantry of all marines.

The lush surroundings of the Memorial club, located in a former swank hotel at Sutter and Mason streets in the heart of downtown San Francisco, are a far cry from the filth and deprivations of foxhole living, which was the lot of so many marines.

But it was the unappetizing PX rations, the warm beer and the generally stale candy bars munched in foxholes which are responsible for the Marine Memorial club. Profit accruing from these sales went to the post exchange fund, but in reality belongs to the marines who spent it. Usually such money is used to buy recreational equipment that Uncle Sam doesn't furnish. This time, however, marine headquarters in Washington felt that the money should be used in a way that would honor marines who died in combat by serving those who fought and lived.

The solution is the Marine Memorial club, where all members meet on an equal footing; where name, rank and serial number pull no weight; where the famed "esprit de corps" of the service enters into civilian living.

San Francisco was selected as the location for the club because so many marines passed through the Golden Gate on their way to the Pacific, felt at home here and wanted to return.

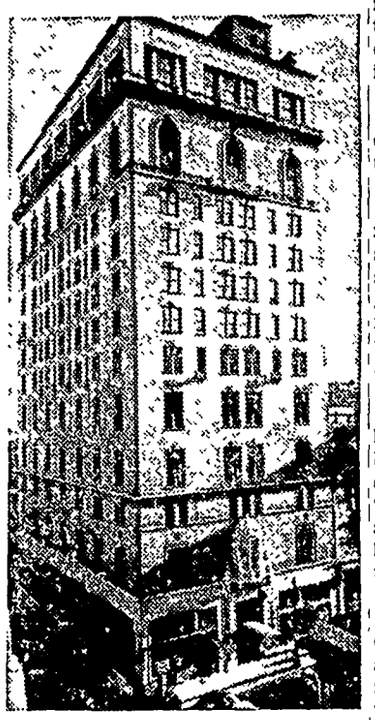
The man behind this club is the man who was behind the 21st regiment of the 3rd division in the battle for Hellzapoppin bridge on Bougainville island—Brig. Gen. Evan Orchard Ames (retired). The club is his baby. A fighting man himself, he has helped to make many a foxhole dream a reality by creating a club where marines can take it easy, have the shave and steam bath they once longed for, in an exclusive town club atmosphere.

For the men and women of the corps who did return, the club is unique in its exclusiveness, for only marines and civilian marines may belong. Their families, wives, parents (including Gold Star parents) and children over 21 are eligible for guest memberships. Old friends in other services once attached to a marine unit may have an associate membership. Marine identification serves as both dues and initiation fee.

In the Skytop room prodding the clouds, in the swimming pool 12 stories below and on all the floors in between, marines and former marines can relax and enjoy club life. All the facilities of a first-rate hotel are available for a very low tariff.

For travelers, there's a choice of 250 rooms fully equipped with all hotel facilities; for those who just want to relax after a hard day at the office or exercise before breakfast, there is the tiled swimming pool with water blue as the Mediterranean and not nearly as cold.

Three dining rooms, three cocktail lounges, a steam room, barber shop, library and writing room, and a ballroom provide all the facilities of a swank hotel. But, although it's a million dollar layout, a man can spend a little instead of a lot. The club is operated on the policy of many spending a little rather than a few spending a lot.



LIVING MEMORIAL . . . Termed the only living memorial to military men, the Marine Memorial club in San Francisco offers congenial and lush club life to present and former members of the corps.

Dog Completes School With Perfect Record

McKEESPORT, PA. — Although aged and nearly blind, Spotty, a woolly black and white dog, left an almost unmatchable record behind when he was graduated from grammar school into retirement.

Providing a climax for the graduation exercises, Principal H. E. Remaley called Spotty to the stage after diplomas had been presented to all the pupils. Gingerly, the dog trotted up the steps to receive a real diploma and a certificate of perfect attendance.

The dog trailed to school behind members of the Stanko family for 10 years. First he followed John, then Roselle and finally young Robert Stanko, who was graduated just a few minutes ahead of his master.

In August Mien

TOMAHAWK, WIS.—It just had to be a summer wedding when May June, daughter of Mr. and Mrs. John July, became the bride of Frank Welke, son of Mr. and Mrs. August Welke.

Country Doctor Remains Active At Age of 90

BURLINGAME, KAS — One of the last of Kansas' horse-and-buggy doctors, 90-year-old Dr. F. E. Schenck hails modern medical techniques and the latest drugs but sadly recalls "the good old days."

When the venerable old doctor was in his early years of practice here, his use of horses often spared him some physical strain in an almost 24-hour daily schedule. His team, he recalls, could be trusted to take him home without guidance.

"That's one advantage we had over the present-day doctors," he maintains. "The team would just head for home and I could sleep during the ride."

Despite the weather, the hour or his advanced age, Dr. Schenck still will answer a call from any of the townsfolk. He has reduced his practice considerably and should cut it down more, but he says it's just habit for him to minister to the medical needs of the people of Burlingame.

The habit is so firmly entrenched, in fact, that Dr. Schenck has become an institution in this small Kansas town.

Some of the people he has brought into the world are babies nursing in their mother's arms. Others are more than 60 years old. Dr. Schenck doesn't have any idea how many births he has assisted.

"I do know," he says, "that I have brought the third generation of some families around here into the world."

A large man with good posture and firm voice, Dr. Schenck is partly bald but has a thick gray mustache. He keeps well posted on all new developments in the medical profession, his medical library being considered one of the largest in the country.

Advancements in medical techniques and development of new drugs will be responsible for an ever-increasing rise in the nation's health standards, he believes.

Evicted Takes House Along

HAGERSTOWN, MD. — When Jesse Young, a carpenter, received an eviction notice, he was not downcast. Instead, he went down to his basement and built himself a new house out of army surplus trunk crates.

In two months the story and a half dwelling was completed. Modeled after an English cottage, the house has two rooms and a bath downstairs with enough space to make rooms upstairs.

When moving day came, Young and a son, Frank, who is a mechanic, loaded the floors, walls and other parts of the new house onto a truck. It took two hours to put the house together, six more hours to apply the finishing touches.

Street Names Confuse Tourists

NEW ORLEANS.—It's no wonder tourists are confused, although fascinated, by street names in New Orleans. The city has about 2,100 miles of streets and 1,100 street names.

Take Tchoupitoulas, for instance. It is the oldest street name in New Orleans and has been spelled officially 20 different ways.

Burgundy once was Craps street. Churches forced renaming of the street but for 30 years after the change city directories continued to list a "Craps Street Church."

Lafitte street crosses Claiborne avenue by design, since pirate Jean Lafitte and Gov. William Claiborne were always at cross-purposes.

Basin street, probably the most famous thoroughfare, once was renamed Saratoga street but citizens demanded the return to Basin street.

Money in Gayer Colors

Every few days somebody else comes out in favor of the proposal for vari-colored paper money. Norman Rockwell, the artist, has just indorsed the idea. It seems to be the feeling that money goes through our hands so fast today it can't be identified under the old plain hues.

—•—

In fact, we can't hang onto it long enough to depend on anything but the sense of touch.

—•—

"I'm for rainbow dough," said Elmer Twitchell today as another ten spot went through his hands at high speed and after one bounce. "We've got to do something to currency so it will hit the eye and leave a distinct impression on how much it was and in what direction it went.

—•—

"We Americans have a right to know whether it is money, lettuce, beet greens or box tops we are handling so briefly," he continued. "There was a time when the passage of a five dollar bill through the human hand was not quicker than the eye.

—•—

"I have never found fault with the color of money before. The sample standard shades were okay. But now the public needs cheering up with regard to money—and new, bright colors might turn the trick.

"What colors would you like to see our dough in?" we asked

"Anything gay and festive," Elmer replied. "I think anything under a ten dollar bill should be in bright polka dots so we could identify it in flight."

• • •

It was notable on the list of big income men (not that they had much left) that the top boys were in the movie, liquor or racetrack business. We were just about to lecture junior on the importance of hard work, high morals, a good education and the nose to the grindstone when this switched us to a stern, "Oh, the heck with it!"

• • •

CAN YOU REMEMBER—

Away back when it was hard to find an American not glad to swear that he was not a Communist and never had been?

• • •

Synthetic Mutton Chops

Prepare for the production-line steak. Science, says Dr. Gerald N. Wendt, editor of Science Illustrated, one day will manufacture meat, dispensing with livestock entirely. It will discover how to duplicate all the elements in meat and reproduce the taste and nourishment.

—•—

We were afraid of this. That somebody would come up with the family hamburger, the F.O.B. order of ham and eggs and the Detroit pork chop has been our recurrent nightmare. We had a dream the other night that we got a sirloin from the National Association of Manufacturers and an offer of a pot roast from the Chamber of Commerce.

• • •

LIFE

Some fun, some hurts,
Some parking tickets—
Then age, the grave—
And no more PICKETS!

• • •

VANISHING AMERICANISMS

"Let's take a dime and see a good movie."

—•—

"That salesman was here again urging us to buy a new car."

—•—

"Cars Washed—$1 00."

—•—

"What do you care how your hair looks? You're a man."

—•—

"Don't talk to the motorman!"

—•—

"No women allowed."

• • •

It was Oscar Wilde who foresaw the next war away ahead of anybody. It was in the eighties that he quipped this one on the ultimate battle: "A chemist on each side will approach the frontier with a bottle."

• • •

The ICC has given permission to the Pullman company to jack up sleeping car rates as high as 49 per cent. That's fair enough. Where else can a man stay awake all night any cheaper?

• • •

One striking thing about the national situation today is that it is becoming harder and harder to take to drink. The high cost of liquor is discouraging the rumpots everywhere. Carry Nation, were she around today, could throw away her ax. All she would need to flourish would be a price list.

Household Hints By Mary Jane

When darning socks at night use a flashlight as a darning ball. The light shining through the fabric makes it easier to see and helps produce a better job.

When you take the screen off the windows number them and in the Spring go to your number one window and you will always have the right screen, for the right window.

Add ½ teaspoon of soda to your frosting and it won't run.

Coat the keyhole with mucilage and dust with sand. The keyhole will be easily found in the dark by it's rough feeling.

Quality and Service Since 1919 Klemme, Ia.

What Is A Customer?

A CUSTOMER is the most important person ever in this office . . . in person or by mail.

A CUSTOMER is not dependent on us . . . we are dependent on him.

A CUSTOMER is not an interuption of our work . . . he is the purpose of it. We are not doing him a favor by serving him . . . he is doing us a favor by giving us the opportunity to do so.

A CUSTOMER is not an outsider to our business . . . he is part of it.

A CUSTOMER is not a cold statistic . . . he is a flesh-and-blood human being with feelings and emotions like your own, and with biases and prejudices.

A CUSTOMER is not someone to argue or match wits with. Nobody ever won an argument with a customer.

A CUSTOMER is a person who brings us his wants. It is our job to handle them profitably to him and ourselves.

Mr and Mrs Albers were united in marriage on October 13, 1887 in the Palsville Reformed Church northeast of Belmond by the Rev Reeverts

They lived continuously on their own farm near Klemme for forty years when they retired and came to Klemme on January 20, 1941 They have ten grandchildren

Auto Deaths Mounting In Iowa; Must Cut Down Speed

CONSIDER SPEED ZONES IN IOWA

Kahl Reveals Certain Highways Are Not Safe

Al Kahl, Iowa commissioner of public safety, told a safety conference in the governor's office Friday that "serious consideration" was being given to the use of speed zones on certain sections of 18-foot highways to cut down traffic fatalities.

Kahl said accident records show that certain highways are less safe than others. He listed parts of No 6, No 30 and No. 75 highways where the larger percentage of accidents had occurred

For the first 9 months of 1947 Kahl told the conference there were 18 deaths on highway 6, 12 on 30 and 11 on 75

Kahl said the department was considering a tentative speed limit of 60 miles per hour in daylight and 55 at night for the dangerous sections of these highways. He said it was possible that limits of 50 or 55 miles per hour for daytime driving would be placed on the more dangerous sections.

Directs Livestock Disease Control In North Iowa Counties

Dr. H. G. Voetberg of Garner, was in Klemme on business Saturday. Dr. Voetberg is employed as a government veterinarian and has been assigned 4 north Iowa counties, Kossuth, Hancock, Winnebago and Worth His duty is to supervise livestock disease control in this area. Before the War Dr. Voetberg was employed by the government in various kinds of work and during the war served in the U S. Army as a food inspector in the states and overseas.

Eastern Stars Invited To Attend Forest City Chapter

Friendship Chapter, O. E. S. of Forest City has invited the Klemme and Garner Stars to attend their chapter Wednesday, October 22nd.

Ell Township Women Have Tea

The Ell Township Women's Home Project Tea was a very successful meeting It was held at the home of Mrs. O. A Steward, on Tuesday, October 7. Nineteen women were present to elect the officers for the coming year. The officers were named as follows:

Towship chairman, Mrs. A. A. Steward; Publicity chairman, Mrs Clark Lackore; Library chairman, Mrs. Verner Stromer; Music chairman, Miss Ruby Schram; Health chairman, Mrs. Emery Weaver.

Miss Harriet Oxley, Hancock County Nurse gave a talk on the immunization program for our county.

Mrs. Harold Oxley, County Women's Home Project Chairman and Miss VanWert, County Extension Home Economist, were present to discuss the 1948 program for the club.

The adult reading program was discussed and Mrs. Verner Stromer is making plans for an active reading group made up of both men and women in the township.

Tea was served at the close of the afternoon session

Mr. And Mrs. Will Riemer Celebrated Twentieth Anniversary

Mr. and Mrs. Will Riemer of near Miller, celebrated their twentieth wedding anniversary Sunday by having as their dinner guests, the following:

Mr and Mrs. Lawrence Holsher of Iowa Falls; Mr. and Mrs. Ben Riemer; Carl Riemer; Mr. and Mrs. Emil Blumer; Mr. and Mrs. Will Kraus; Mr. and Mrs. Carol Brager and Daryl; Mr. and Mrs. Merlin Neuberger and Dean; Mr. and Mrs. Emil Beier; Mr. and Mrs. George Kern and Mary Kathryn which made 23 in all.

Work Circle Will Meet Thursday

The Work Circle of the Methodist Church will meet Thursday afternoon for work. They will get the rugs ready for the annual fall bazaar. Hostesses are Mrs. Vern Bisom and Mrs. H. E. Harvey.

Methodist Plan Home For The Aged

The Rev. Clarence W. Tomkins, Fort Dodge, was the guest speaker last Sunday at the Klemme and Liberty Methodist Churches. Rev. Tompkins was recently elected the Superintendent of "Friendship Haven Inc" A new home for retired elder people which is in the process of being built at Fort Dodge by the Methodist of North Iowa. The new home when completed will accommodate 300 guests.

Besides the main building individual cottages and homes will be built on the forty acre plot of wooded land located immediately west of the Lutheran Hospital. The home will be open to all needy folks irrespective of race or creed who give ample proof of good character and congeniality Rev. Tompkins will spend his entire time in promoting the new project for the conference.

Youth Rally Held Here

The Methodist Youth Fellowship Rally was held at the Klemme church on Sunday, was a grand success. Young people and pastors came from the contingent churches of the locality. Alice Mae Anderson, the youth president, was in charge of most of the program. She was assisted by Gloria Haefner, the secretary-treasurer. Claude White, local counselor for the youth, was the main spoke in planning for the rally. Local women, mothers of the Youth Fellowshippers served the supper. The next Rally will be held at Garner about the first of the year.

Hancock County Organization Committee Meets

The Hancock County Organization met last Tuesday, Oct. 7th at the Farm Bureau office to make plans for the coming membership drive for 1948 Those present were Jennings Anderson, Organization Chairman, Frank Bredlow, Harold and Mrs Oxley, Jack Dethmers, county president, Chas. F. Jackson, Organization Director, Elsie Mae VanWert, County Extension Home Economist, Paul Henderson, Count Extension Director and Harry Storey, Farm Bureau fieldman for the second district.

It was decided to split the county in half with Bill Phillips of Woden as chairman of the north half of the county and Chas Jackson as chairman of the south half with the possibility of a contest between the two groups. The captains meeting has been set for the night of December 9th. Captains and leaders meet December 29th. Kickoff has been set for the night of January 5th with the drive the next day. Check ups will be held in each township either the night of January 7 or 8 So let's make the week of January 5th Farm Burau Membership Week and give every farmer in the county a good, honest chance to join the Farm Bureau and make our quota of 1575 members in three days.

Mrs. Naska Bock Entertained Her Neices At Afternoon Party

Mrs. Naska Bock held an informal afternoon party at her home Saturday afternoon at which time she entertained her several neices. The afternoon was spent in playing "Bingo," after which she served a nice lunch. She was assisted by her daughter, Mrs. Lyle Burr of Ogden and her daughter-in-law, Mrs. Mitchel Bock of Klemme.

Mrs. Bock's neices present were Mrs. Werner Schlawin, Mrs. Leonard Kaduce, Mrs. Lloyd Gordon of Rowan, Mrs. Art Schlawin, Mrs. Raymond Wille, Mrs. Ed. Blanchard, Mrs. Kenneth Greiman and Mrs. Harold Rockow.

We specialize in printing Wedding Announcements.

Another Business Change Made On Main Street Here

WILL CELEBRATE GOLDEN WEDDING ANNIVERSARY OCTOBER 22

Mr. and Mrs "Bill" Johnson will celebrate their Golden Wedding Anniversary on Wednesday, October 22, 1947 and will hold open house at the Klemme Methodist Church on the above date from 2 until 4 p. m at which time they will receive their friends and neighbors of the community.

Methodist Parsonage Improved

The past couple of weeks the Methodist Parsonage was improved. Part of the house was re-wired and convenience outlets and switches installed; new wall paper was hung and Venetion blinds installed.

Professor H. D. Hughes To Speak At RYP Banquet October 28th

Professor H. D Hughes from Iowa State College will speak at the Hancock County Rural Young People Banquet Oct. 28th at the Britt Legion Hall at 7:00 p. m.

All R. Y P. members and also those interested in RYP work are invited to take part in this banquet and hear the very interesting Philosophy of Professor Hughes, singing by Missal, Piano Solo, Catherine Cosgriff and other numbers are in the planning stage such as square dancing after the formal part of the program.

Committees in charge are: General committee chairmen, Catherine Cosgriff, Carol Fox, Mildred Sweeney, Gertrude Harle, Alvin Swanson, George Osterkamp, Herman Harle, Evelyn Colter and Geo Stevens.

Ticket committee: Iris Abele, Chm, Arvin Larson, Helen Formanek, Blanche Anderson and Glen Sloan.

W. S. C. S. Meeting Held

The September meeting of the W S. C. S. was held in the home of Mrs. Lester Stille on Thursday, September 9, with 32 ladies present.

The meeting opened with the chairman, Mrs. E. J. Arnold, giving the history of the song "The Voice Of God Is Calling." Mrs. C. A. Larson had the Devotions on Stewardship.

The lesson on Restless India was ably given by Mrs. Lee Ridder. Questions were in charge of Mrs. Frank Sandry.

A "Thank You" letter to the group from Florence Prouty was read.

A delightful lunch was served by the hostesses, Mrs. Clarence Lemke and Mrs. Lester Stille.

Jolly Worker Club Meets

The Jolly Worker club met at the home of Lily Pearson on October 8th. Bessie Marshall, vice president, took charge of the meeting. Due to the absence of our Secretary Luella Boelman, Maude Bachman read the roll call. Sixteen members were present. Mildred Gruis sent our Christmas box to Holland to our family we remembered with clothing and needy items. The club members have ordered Christmas cards from Irene Marshal, who has charge of the cards.

The meeting was dismissed by Bessie Marshall.

The November meeting will be held at the home of Irene Marshall.

A delicious lunch was served by Lily Pearson with Bell Karjens as co-hostess.

Mrs. Melvin Pearson was presented with some nice gifts from the club members. The new bride extended her thanks to the members of the club.

Mrs. Kenneth Zwald and her children, Mrs. Ronald Gibbs and Mrs. Herman Gast were Forest City visitors Saturday afternoon.

EDMUND K. JOSTEN JOINS MAIN STREET BUSINESS MEN

Now In Possession Of Former Lewis Radio Shop Appliance Store

As announced in a previous issue of The Klemme Times, Edmund K. Josten had purchased the Lewis Radio Shop. Mr. Josten took possession of the business October 15th and after completing the inventory the store was open to the public under the new management the latter part of the week.

Main Street welcomes Mr. and Mrs. Edmund Josten into the business section of Klemme and extend to them best wishes and success.

Mr. Josten will continue to handle the entire line of appliances that have been featured by the store in the past, with the exception of the Surge milking machines, which Mr. Lewis will continue to handle in this territory.

Klemme And Garner Eastern Stars Entertained At Belmond Chapter

Last Wednesday evening the Klemme and Garner members of Relief Chapter, O. E. S., were entertained by the Belmond Chapter. Those from Klemme who attended were Miss Marie Blank, Mrs. E. F. Jacobs, Mr. and Mrs. Fred J. Arnold, Mr. and Mrs. E. J. Thompson, Mrs. Marvin Isvik and Mrs. W. F. Missman. Mrs. Isvik took the part of one of the officers in the work.

The Belmond Chapter served a nice lunch after the work.

KLEMME MEN OPERATE GARNER SERVICE STATION

Alvin Larson and Donald Schaefer, both of Klemme, are operating Pritchard's Red Star Service Station near the Buntenbach sales pavilion at Garner.

Alvin is a brother of Carold Larson, operator of the Larson Highway Service west of Klemme and Donald is a son of Mr. and Mrs. Roy Schaefer of Klemme. Donald was recently discharged from the U. S. Navy.

Bridal Shower Held

A miscellaneous shower was held Wednesday, October 8th at the Carl Pearson home honoring Mrs. Melvin Pearson, formerly Miss Louise Albers.

The guests wrote recipes and gave advice to the bride. She also had her share of entertainment as she had to darn one of her husbands socks. The bride received many nice gifts.

Entertained Sunday School Class With Party

Miss Minnie Lenz gave her Sixth Grade Sunday School Class of the Methodist Church a party on Saturday before their promotion. The class enjoyed a variety of games after which Miss Lenz served a nice lunch. The class presented her with a nice pin.

Saturday Bridge Club Met

The Saturday Bridge Club met with Mrs. Sumner Trumbell Saturday afternoon. Mrs. George Lawhorn was a guest. High score was won by Mrs. Ray Jorgenson, Jr. and second high score in bridge was won by Mrs. Kenneth Medin. A nice lunch was served by the hostess after the games.

CARL WILLE SOLD PURE BRED BULL TO MINNESOTA FARMER

Saturday, Carl Wille accompanied by LeRoy Johnson delivered a purebred yearling Black Angus bull to F. V. Baker, farmer near Kiester, Minn.

The Once Over

by H.I. Phillips

There Is No Disappointment Like Home

Veterans' administration, flooded with complaints from G.I.s, has come out with a blast at the high percentage of defective, inferior, shoddily built homes sold to them and which already have begun to unravel and come apart at the seams. "Already," says the administration, "as a result of failure to follow blue prints and specifications and the use of shoddy material and poor workmanship many have shown structural weakness impossible to be cured."

—•—

This discovery that plenty of these G.I. houses were built for glider service in the first stiff wind comes a little late. People who watched them go up knew the truth long ago. To them it often looked as if the workers were uncertain whether they were building a home, a box-kite or a turkey run.

—•—

In too many cases the timbers would have been inadequate for rabbit coops and some of the roofers seemed to feel they were either repairing a net or demonstrating a new type of cross ventilation at chimney levels.

• • •

Yes, we know it was not easy to get good lumber and that there were other shortages, but the big shortage was too often in those old-fashioned virtues: Pride of workmanship and a determination to do any job right.

• • •

The war heroes are not the only victims. Plenty of others who have tried to build a house in the last few years can testify to the "anything-goes" technique, the "never use two nails when one will hold the board in place six months" mood and the great increase in the ranks of home builders who cut corners, confuse blueprints with strip cartoons and think anything is a door that has a knob on it.

• • •

"There is no place like home" is still being sung, but the implications are different and a note of gratitude creeps into it.

• • •

CAN YOU REMEMBER—

Away back when all men were a little reluctant to strike?

• • •

America's Real Rulers

John Gunther, justly blitzing James W. Gerard's statement that Morgan partners run the U. S., lists 64 men who do and he puts the President of the country on top and includes Senator Vandenberg, John L. Lewis, Bill Green, Philip Murray, the Rockefellers, etc. It is a convincing list of men whose influence over our lives is terrific. But Gunther overlooks others who also have a powerful influence. We would add:

1—Fibber McGee and Mollie
2—Burns and Allen
3—Break the Bank
4—Flicka
5—Lassie

• • •

Howard Hughes has produced "The Outlaw" but can't get it off the ground. The critics seem to hold that if it had been shown two months ago Brewster would have won.

• • •

On one of those radio prize programs the other day a woman, asked what she would like more than anything in the world if she won, replied, "To swim out beyond the breakers." "Why?" asked the master of ceremonies. "Every time my husband takes me to the beach he goes out beyond the breakers and keeps yelling for me to try it. It's been going on for 25 years!" she replied, wowing the audience.

• • •

Margaret Truman has been given a union card as a singer. She now has a paid up voice in good standing. There is not, in fact, an open-shop note in her system.

• • •

The Albany, N. Y., Farmer

Gov. Tom Dewey says his corn crop has been a terrible failure. Things will be better when all the campaign speeches get into swing. Was the corn deaf to his plea of "Lend me your ears?"

—•—

Tom says he has been forced to sell off more cows than usual. Oh, well, in days like these "no moos is good moos."

• • •

Shares in a dog track have been put on the New York stock exchange. A fellow tried to get us to go after some by using an electric rabbit.

• • •

Our chief delegate at the U. N. meetings seems inadequate when it comes to scaring Russia. How about firing him and sending in Boris Karloff?

• • •

Believe it or not, 24 years ago Branch Rickey, Eddie Dyer and Bert Shotton were in a crucial series in St. Louis against Brooklyn. Know how? Rickey was part owner of the St. Louis club, Shotton was his assistant manager and Eddie Dyer, fresh from Rice institute, was being used as their rookie pitcher.

HERE'S A RED STAR RECIPE YOU'LL LO

TEACHER LEARNS A LESSON ABOUT RED STAR DRY YEAST

HALLOWEEN DOUGHN

2 teaspoons sugar
½ cup warm water
2 packages Red Star Dry Yeast
½ cup milk, scalded
1 teaspoon salt
⅓ cup sugar
2 eggs
4¾ cups sifted flour (approximately)
½ teaspoon mace
3 tablespoons shortening
Fat for frying

Dissolve 2 teaspoons sugar in warm water. Add 2 packages Red Star Dry Yeast. Let stand 10 minutes. Place scalded milk, salt and ½ cup sugar in a large bowl. Cool to lukewarm. Stir in yeast solution thoroughly and add to this mixture. Add half the flour which has been sifted with the mace and beat well. Add eggs and melted and cooled shortening, stirring vigorously. Add remainder of flour stirring well. Place on lightly floured board and knead for 3 minutes. Shape into smooth ball and place in greased bowl. Brush top lightly with shortening. Cover and let rise in warm place for 45 minutes. Without punching down turn dough onto lightly floured board and roll to ½ inch thickness. Cut dough with 3 inch floured doughnut cutter. Place doughnuts on floured baking sheet. Let rise in warm place until very light (about ½ hour). Do not cover. Fry in deep hot fat (350° F.) on both sides. Drain; cool and roll in sugar. Makes 2 dozen.

ADVENTURE LIMITED

By IDA BREED

But today, as she looked at her delightful self in the mirror, it was not to dream; it was with a plan for action. She was back in New York after an absence of two years. Nearly every Spring since her marriage, she had made the trip, and had always stopped off for a brief visit in her old college town. This time she was planning to follow the same course, but with what a difference! One of her old school friends had written her last year that Lee Towne had returned to their alma mater to direct the research work there. So Lee was back and Carolyn was going to see him. Accidentally, of course. She had it all planned.

Carolyn had to keep reminding herself that it was earth she lived on, not really heaven.

There would be a casual drifting about the campus in her flattering new Spring suit, lingering over a table in Crofton House, where everybody dropped in at tea time. Then when Lee appeared—Carolyn had this part rehearsed in her mind—she would give just the right look of pleased surprise, just the right degree of invitation to remember. Lee would see what he had missed all these years. What would happen after they met—what did she want to happen? That Carolyn did not quite know, and she stopped short of trying to decide. This was to be an adventure.

The adventure proceeded as if acted from a well prepared script. Carolyn chanced into Crofton House at tea time. Two men at a nearby table stared at her with obvious admiration; they were younger faculty members that she did not know.

Then, somehow, without the fanfare of trumpets that would have seemed fitting to her, there was Lee in the doorway. Without glancing around, he went to a table straight ahead. He passed so near to Carolyn that she could have stopped him with a word, but she did not speak it. This was the Lee whom she had treasured in her heart for eleven years! Lee, still tall, but with shoulders stooped; still lean, but with a hollow-chested look. Lee, his blue eyes intent now only with a near-sighted, peering expression; his hair no longer unruly, because there was not enough of it to be, just some wisps "borrowed" from one side to cover a pale bald spot. And it was obvious that for all he saw of the life humming around him, he might have had his eye bent to a microscope as he walked.

Carolyn sat and stared, helpless to force her gaze away from this changed Lee. What of the distinguished gray at the temples, the impressive look of the scientist that she had pictured!

The men at the next table were noticing her concentrated gaze; she finally forced herself to look away. The next minute, with no more poise than a school girl, she jumped up and hurried away into the next wing of the building to the telegraph blanks.

"Leaving for home tonight instead of next week," she began to write. There was something reassuring about the thought of Jeff's bulk; she was glad that her husband was such a substantial person in every way. Such nice, thick hair, too, and straight shoulders. She had never been as sweet to him as he deserved, but she would make it up from now on. Why, he was the finest person that she had ever known!

Back at their table, the two curious young men continued to speculate after they had watched Carolyn rush from the room.

"Did you see her staring at Johnny Towne as if she were fascinated? If it had been Lee, now, you could understand it—he's a handsome devil."

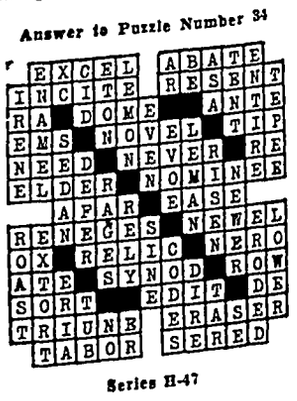
Answer to Puzzle Number 34



Series H-47

Sportlight

By GRANTLAND RICE

J. Gordon

THERE seems to be an opinion around that major league baseball's playing standards reached a new low in the season just closed. This is a point hard to prove, and I doubt that it is true.

In the ebb and flow of the last 40 years, we've looked at a long parade of stars. We also have peered at a still longer parade of pretty sour ball clubs, and that goes for hitting, pitching and fielding.

No one can doubt that the four war years held back many a budding rookie, lifted from minor league training to war service. Some of these were killed. Many more were wounded. All were removed from training action at vital years—19 to 23.

This doesn't include such veterans as Hank Greenberg, who lost five years, Bobby Feller, Johnny Mize and so many others who were halted in their prime.

Many of these have had remarkable comebacks—Greenberg leading the home-run makers last season; Ted Williams, three years away from baseball, leading his league in practically every department where a bat figures; Joe Gordon; Johnny Mize, challenging Babe Ruth's incredible figure of 60 home runs in a year; not to overlook Walker Cooper.

And what two seasons—meaning 1946 and 1947—can you recall that produced a longer list of young stars: Ewell Blackwell, Ralph Kiner, Yogi Berra, Bobby Thompson, Jackie Robinson, Spider Jorgenson, Spec Shea, Earl Torgerson, Bruce Edwards and many other first or second-year men?

Always Been That Way

There have been bad major league ball clubs this season, and many rather sour big league ball players. But this has happened since Uncle Abner Doubleday had his dream.

The Phillies, in last place, are a far better bunch than the tail-end Phillies of years we still remember. And I could give you the names of many other clubs in the past that were strictly moth-eaten, of many other ball players who were not even good minor leaguers.

To listen, and to read, you might think at times there were no good ball players left. What about Harry Walker, Williams, Joe DiMaggio, Pee Wee Reese, Ed Stanky, Pete Reiser, Mize, Willard Marshall—most of the Cardinals—Cooper, Gordon, Bob Feller, Tommy Henrich, Augie Galan, Bob Elliott, George Kell, Grady Hatton, Johnny Sain, Warren Spahn and many more who would have been good in any past baseball season?

It is pleasant for those growing older to look back on the glories of the past when they, too, were young. But they overlook one major point—that practically every athletic achievement that can be timed or measured has known a long run of broken records.

Modern Athlete Better

Practically every past athletic record has been smashed year after year. You can't measure football, baseball, golf or tennis by the clock or the tape. But in all games that can be timed and taped, there has been a big improvement. Other games must depend upon opinions, which are about as stable as will-o'-the-wisps.

Those talking and writing of baseball's past glory have forgotten teams that couldn't draw 300 into the gate—teams that couldn't draw 300,000 in 154 games.

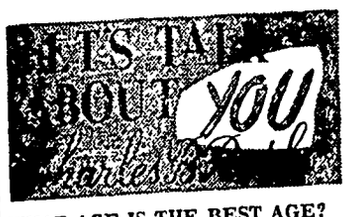
Baseball in 1947 has been far from flawless or spotless, but it has been one of the most interesting campaigns yet offered. One answer is an attendance total for all parks that will reach or pass 20 million, where in many past years a nine million total was rated an exceptional turnout.

Baseball always has had one weakness. This was the average condition of its players. Few ball players keep in the condition needed to play 35 exhibition and 154 pennant games—a total close to 190 games a year. Poor condition accounts for so many bad legs, arm trouble, back trouble and other ills and ailments that afflict so many of the hired men.

Keeping in Shape

One famous athletic trainer told me recently that he could take a tail-end team and get it into condition that would net a pennant. He probably meant: "If I could get it into condition." Which he probably couldn't.

"A ball player should live on his legs just about all the year round." This statement was given me by Ty Cobb and Joe Medwick. Cobb went in for hunting. Medwick for golf. I don't believe either ever got out of shape. You know Cobb's record. And look at Medwick's amazing work this season, long after he was supposed to be through.



WHAT AGE IS THE BEST AGE?

Personality knows no age limits, and a developed personality can go on with undimmed lustre as long as life endures. Indeed, the full fruition of a personality seldom comes much before middle-age or older, because it is a long time in building and each successive day adds a bit of charm.

Women famed for their beauty are seldom the very young. Quite often as not they have passed middle-age. Frequently they will be what the world calls old.

Consider Ninon L'Enclos, perhaps the most beautiful and charming woman of history. She was unheard of until she was fifty, yet at eighty she was still sought after by rich and fashionable gentlemen, who could have taken their pick of the court beauties. It wasn't her youth that gave L'Enclos charm. It was her ageless personality.

But perhaps the crowning achievement of personality in a woman is the career of Elizabeth Browning, wife of the English poet.

Elizabeth was an invalid from childhood, bed-ridden, but illness couldn't quench her spirit nor rob her of her beauty, and the long hours she spent in solitude had enabled her to develop something into her personality that made her irresistibly beautiful.

Then came young Robert Browning, six years her junior, to fall madly in love with her, and she with him. She was bed-ridden, mind you, but she arose from her sick bed and they eloped into the night and were married.

For sixteen years they passed a life of unbelievable happiness together. And when she died, at the age of 56, with her head on her husband's arm, he wrote the next day that her face was the face of a young girl.

Step by step through the quiet years personality develops. And it is never too late to start or to create one out of what you have, out of what you are. That is the fascinating thing.

SHERIFF BROWER ARRESTED TWO MEN ON PETTY LARCENY CHARGE

Waterloo Man Fined $100 And Sentenced To 30 Days At Hard Labor

Sheriff L. M. Brower recently apprehended two men for petit larceny. Thomas F. Roth's Jr., Klemme, was arraigned in the court of Justice F. J. Fritsch of Garner and sentenced to 30 days in jail with a fine of $100 which was suspended upon good behavior and because of his confession of guilt prior to apprehension by the sheriff. County Attorney Curtis Riehm was the prosecuting attorney.

Jack McWilliams, Waterloo, was apprehended by Sheriff Brower on a similar charge and was fined $100 or 30 days in jail at hard labor, and costs. Fine was paid through assignment of wages.

Waterloo Man Fined For Truck Overload

Jack McWilliams, Waterloo, driver of the Olson Construction Company, was apprehended by the Iowa Highway Commission weighing crew and arraigned in the court of Justice R. J. Fritsch at Garner and fined $65 for truck overload. Sixty dollars of the fine was suspened upon raising of the license classification from "H" to "K".

Klemme School News

FIRST AND SECOND GRADE NEWS

—Teacher, Miss Halfwassen

The pupils that have neither been absent or tardy for the first six weeks are:

First Grade

Myrna Barz
Judith Gilpin
Edna Heginger
Craig Larson
Cozette Lau
Roger Meints
Mardell Stadtlander

Second Grade

Joan Christie
Carl Heginger
Mehle Marshall
Diana Masterson
Sandra Medin
Marcella Nuehring
Rosalie Rosendahl
Linda Swalve
Vernadean Ter Hark

It was Gerald Kothenbeutel's birthday Monday and he treated the children to cookies. Mrs. Kothenbeutel was a visitor in our room Monday afternoon and helped Gerald celebrate his birthday.

Stanley Bridges had a birthday this week and he treated the children to candy.

Those in Second Grade receiving a hundred in Spelling for the week are:

Jeahne Barz
Sandra Medin
Joan Christie
Gordon Johnson
Rosalie Rosendahl
Linda Swalve

THIRD AND FOURTH GRADE NEWS

Beverly Christiance has been absent several days this past week.

We had six weeks tests in Arithmetic and Georgraphy.

The Third Grade have finished reading their first reading book, Lost and Found. Now we are reading Streets and Roads. We have a work book to go with our new reader.

We are beginning the study of Indians. We have found all the books in our library that are about Indians. On our bulletin board we have Indian pictures. We also have some Indian dolls and toy canoes.

FIFTH AND SIXTH GRADE NEWS

The fifth and sixth grade have organized a science and hobby club called the "Pee Wee Thirty Club." Roger Terhufen was elected President, Janice Swanson, vice president, Graydon Barz, secretary, and Cecil Jacobs, treasurer. We have had the following pets brought to school: Thomas Waddingham's rabbit Fluffy; Vernon Larson's rabbit; Lee Gruis a crab and 2 chickens; Gerry Kastler's dog Skippy; Terry Koerner's ducks Whitey and Snowball; Ronald Karjen's rooster Louie; Melmourne Trampel's two pidgons; Mary Ter Hark a pidgon; Delwyn Breade's cat Fluffy; and Dick Dulmes's gold fish, Mabel, Margaret, Sam and Harvey still remain in school.

Dennis Ridder brought some different sand from Pikes Peak and Faye Jenssen brought an Indian doll. We have a few stones and grasshoppers added to our collection.

In Art this week we painted leaves. The boys and girls are learning to use paints real well.

The fifth grade drew pictures of a sea lion for Reading. We had nine A's.

SEVENTH AND EIGHTH GRADE NEWS

By Delores Thiemann

This past week we have put on three experiments in Science showing how water expands, and expands, and showing how much moisture there is in the soil.

In Eighth Grade Arithmetic we have been finding the areas or rectangles, trapagoids, parelelograms, and triangles. We find it isn't as hard as we thought it would be.

The seventh graders have been reviewing addition and subtraction of fractions in their Arithmatic.

In Literature the eighth grade has been reading the story of Evangeline.

Our room has gotten many new books for our library.

We had our height, weight and vision checked and recorded this week.

SOPHOMORE NEWS

By Beverly Beier

The sophomore class has been craming rox six week's tests, trying to get all our excuse slips signed and all our tests made up.

In geometry we have been working out theorms, prepositions, etc. Some find it very difficult. In fact we all do.

In biology we have been studing the parts of a plant, the two main classes which are monocotyledons and decotledons, and roots and stems.

One day we went on a short hike to look at the different parts of a tree.

English has been rather hard for some while for others it is just a snap. Diagraming sentences and the different parts of a sentence is the topic.

The home economics class has been studing etiquette.

FRSEHMAN NEWS

The end of the six week, which we have so anxiously awaited, has finally rolled around. Six weeks tests have come and gone. We take a long breath and are ready to tackle some more school work.

In Algebra we will probably study more equations. We are beginning to like Algebra, better than Arithmetic.

In English we will study literature. For the last six weeks we have been studying grammer. We welcome the change for we were getting just a little tired of subjects and verbs. Our English test was nice and easy.

In Home Economics, we girls have been studying Emily Post's "Etiquette". We have learned proper manners when is a restaurant, on a date, at the theatre, on the street and many other things. This was very helpful and we all enjoyed it.

In science we have studied water, air, fire and such things. Science is very interesting this year.

—LaNelle Harvey

JUNIOR CLASS NEWS

By Mildred Meinders

For the past week the juniors have been very busy choosing their class play and the cast. The play which is entitled "Never Too Late" is a three act comedy about a modern family and their troubles. Mrs. Andrae is directing the play.

Because this is the week for tests, we have been studying extra hard so that the grades will look good on our report cards which we will receive on Wednesday.

The Typing class has now learned all the letter-keys on the typewriter, also we are having our first speed tests.

At eleven o'clock Thursday, we had the pleasure of hearing Mr. Hamilton of the Hamilton School of Commerce of Mason City. We enjoyed having him with us in our assembly.

SENIOR CLASS NEWS

As reported by Carolyn Albers and Ralph Neuhring.

This week is the end of the six weeks, as everyone probably knows (just thought we would remind you of it.) I'm sure we (the Senior class) are all happy to see it come. It will be a great pleasure to take home a report card with such very fine grades, we hope.

In Literature we have been studying the short story and its structure. The authors of these stories are not very familiar to us because they are of recent writings. These stories are very interesting because they are short enough so we do not get tired of reading them.

We have just completed our six weeks test in American History, taught by Mr. Kingery. This is one of the hardest tests, because history events seem to be hard to remember. Our History notebooks are also due, and those that come in late will probably get a reduction in grade. Up to now we have studied our Cultural Background up to Colonial Life and Culture.

InBookkeeping we have finished with the Bookkeeping cycle, and will start on the use of banking services. This, we hope, will not require so much work and time.

Sociology, our most interesting subject, taught by our most interesting instructor, Mr. Patterson, is our easiest subject, mainly because we do not have to keep a notebook, but we probably learn just as much, because it is interesting. We had two class periods of review, so we should get good grades (above c,) but there are always a few inattentive pupils that receive lower grades.

BARGE TOW

Guttenberg, on the Mississippi, reported the largest tow of barges ever to go through the government locks there recently, when the Alexander Mackenzie pushed 15 barges through at one time. The load, which included 14 barges of coal and one of superphosphate, was the equivalent of 450 railway cars. The Mackenzie was averaging four miles an hour.

Mystery of the Missing Farms

Yep, the number of farms in America is shrinking (by a quarter-million in the last five years!). What's happened to the missing farms? The land has been taken in by other farms, increasing the average size by twenty acres!

Does this growth mean farming's no longer a family enterprise? Just the opposite! More families own farms today than ever—only with labor-saving equipment they can handle more land, more work.

That's as it should be. The family farm is a fortress of democracy—where our free, American li secure. Where every membe operates and shares the wor living together in temperan tolerance—temperance that fers a moderate beverage like and tolerance for a taste that be different from one's own.

From where I sit, our Fa Farms (and they're 96% o farms) are something that country can be proud of!

SPEAK VOWS IN LAKE CEREMONY

Miss Dolores Elaine Wood, daughter of Mr. and Mrs. Walter A. Wood, Clear Lake, and Roger B. Bamman, son of Mr and Mrs. Richard Bamman, Klemme, were married at the First Methodist Church in Clear Lake at 3 o'clock Sunday afternoon, October 5, in a double ring ceremony performed by he Rev. Werner M. Hubbard, pastor.

Mrs Irvin Boyd, Mason City, sister of the bride, was matron of honor and Robert Bamman, twin brother of the bridegroom, was bestman. Ushers were Irvin Boyd, brother-in-law of the bride, and LeRoy Bamman, brother of the bridegroom. Miss Dorothy Sowles, Mason City, cousin of the bride, took charge of the guest book.

Mrs. Leland Jacobson, Clear Lake, sang "Because," I Love You Truly" and "O Perfect Love." She was accompanied by Mrs. Harry Mason, orgainst, who also played a program of wedding music and the traditional wedding marches Mrs. Gerald Laskowski, counsin of the bride, arranged the gifts. The church was decorated with candelabra, tall baskets of yellow and white mums and vases of seasonal garden flowers

The bride, given in marriage by her father, wore a brown dress with gold sequin trim and matching accessories Her corsage was of bronze rose buds and she wore a double strand of pearls at her throat. Mrs. Boyd wore a grey dress with matching accessories and corsage of pink rosebuds.

Mrs. Wood, mother of the bride, wore black with black and white accessories and a gardenia corsage. Mrs. Bamman, mother of the bridegroom, wore a plum colored dress with matching accessories and a corsage of yellow roses and chrysanthemums.

A reception in the church parlors followed the ceremony. The bride's table was centered with a 4-tiered wedding cake with diminutive bride and bridegroom ornamenting the top. On the serving table was a bowl filled with yellow and white chrysanthemums, yellow roses and bouquet candles. The Misses Doris Lee Medin and Ardelle DeSpain poured. Mmes. A. G. Jordan and Harvey Wood served the cake and Mmes. Shirley Watts, Milton Carr, Orville Olson and Virgil Allen and the Misses Marilyn Olson and Esther Way the other refreshments.

Mr. and Mrs. Bamman have gone on a wedding trip to Minnesota and from there to the Black Hills of South Dakota, terminating the journey at their new home on a ranch 30 miles from Rapid City.

Out of town guests included: Mr and Mrs Pearl Hickok of Ventura, Mr. and Mrs. Elmer Nelson, Mr. and Mrs. Irvin Boyd, Mr and Mrs. Glenn Argetsinger, Miss Arlene Wood, Mr. and Mrs. Gerald Laskowski, Henry Crosby, Mrs. Mary Sowles, Miss Dorothy Sowles, Mr. and Mrs. Elgar Haight and Shirley, Harold Bamma and Darlene, Mr. and Mrs. Virgil Allen and Carolyn Jo and Russel Schuldt, Mason City; Mr. and Mrs. Karl Kraus, Herman Schuldt and Mabel, Mr. and Mrs. Hilary Grieman, Mr. and Mrs. William Greiman and Earl and Mr and Mrs. Aaron Stromer, of Garner.

Miss Elizabeth Faust and Carl Faust, Eagle Grove; Miss Lucille Kraus, Peoria, Ill.; Miss Lillie Wilson, Fort Dodge; Mr. and Mrs. Reuben Brandau, of Rudd; Mr and Mrs. Arthur Baker, Rockford; Mr. and Mrs. Richard Bammau and LeRoy and Robert, Mr. and Mrs. Hermon Stromer, Joe Schudt, Miss Frieda Schuldt, Harold Stromer, and the Rev. and Mrs. Calvin Grosshuesch, Klemme; Paul Schuldt, Maxwell, and Ted Dunemeyer, Titonka.

WASN'T SO BAD

. . . FORWARD — THA'S A GOOD SLOGAN

It means many young people who belong to Hancock County 4-H clubs will be community leaders in the near future.

Reaching the county's goal of 325 members will add that many more potential leaders.

. . . We're for the 4-H program because:

It gives sound training in agriculture and home economics.

It provides competition between individuals based on skill acquired in project work.

It gives youths an organization of their own.

It provides wholesome recreation.

It develops the confidence and poise of members.

It gives experience in being a member and an officer of an organized group.

. . . Here's how you can join a club

You are eligible if your tenth birthday comes before Jan. 1, 1948, and if you haven't passed your twenty-first birthday by that date. To get more information about the 4-H program talk to a 4-H member, a leader or someone in the county extension office. Obtain an enrollment card from one of these persons, fill it out and return it to the person from whom you received it. Start attending meetings of the local club in your community. Begin work on a project, keep the required records and take part in the club's activities.

. . . That's all there is to it!

* • *

Hancock County Coop. Oil Association

This Month's Hit Tune

"We're Marching Forward With 4-H"

Yes, that's the tune we're all singing this October. We hope there'll be more than 40,000 Iowa girls and boys joining in the chorus, come the end of the month. And right here at home we're plugging for Klemme's young people to swell the volume of the song.

To add your voice just sign a 4-H enrollment card today. Get it from a local club leader, a 4-H member or the county extension office.

General Assembly Gets Under Way

U. N. Delegates Convene At Town Hall of the World

By BAUKHAGE
News Analyst and Commentator.

WASHINGTON.—At the opening of the current session of the United Nations general assembly I made the usual rounds greeting friends from far corners of the earth whom these meetings bring together. Two converged upon me and one of them began to discourse on the fact that we three were becoming conference veterans.

He started to say "... let's see how many is it, there was the first Quebec, then the second Quebec. . . ." But the other man interrupted him and remarked gently: "Oh, no, it goes further back than that. This is my forty-fourth. Remember there was a League of Nations, too?"

The younger man stopped. Of course, his gray haired colleague was right. "And you still believe," the younger man asked earnestly, "that some day they'll work?"

"Certainly," was the reply. And it was made with such simple sincerity that we "youngsters" felt a little reproved.

The next day I walked to a railway station across the beautiful Flushing Meadows in the twilight, the scent of new-mown grass all about us, with one of those prodigies, an "instant translator." She was one of the female of the species who are quite as efficient as the males. But it was not her feminine charm which attracted me, if such were to be discovered.

Baukhage

I tried to ask her a little about her work, my first question being: "Isn't it interesting?"

"Interesting? Oh, for a while," she answered, "but one would like to get around a little more. I have been here since spring. I'd like to get back to the Orient and—other places."

I mentioned that we had had simultaneous translation at Nuernberg. "Oh, I was there," she said, "and always cold. One could never get warm, anywhere." I agreed. "And," she added, "I went there direct from India."

I tried to get some observation from her on the idea behind these conferences and their effort to bring about world understanding and world peace. "Do you think that they are worthwhile?" I asked. (We're always asking that, hopefully if a little wistfully.)

"Oh, yes," she replied quickly, "they are much better than none at all, much. But I feel that the men here do not really wish to make sacrifices to have peace. The men in their own governments do not wish them to make enough concessions to rob the officials in the different governments of their own power. And so the beautiful words they use are only rationalization. They express idealistic thoughts, but when it comes to acting to implement them, they do not wish to go that far. They already have satisfied that feeling they know they should have, to do the right thing. Then they do not have to do it. Just as all of us rationalize our own misconduct."

That gave me a pause.

It also gave me some hope for this session for I believe that the powers of the assembly will be strengthened so that they can enforce what the people want. The fine words and idealistic plans will have more force if the permanent committee of the assembly on peace and security, which Secretary of State Marshall proposed, is created. It will be in session all the time. Its voice, unmuffled by the overuse of the stultifying veto, will be heard continuously; not merely when the assembly itself is in session.

• • •

Words Contain Great Significance

Words still are making trouble, as they always have. It isn't what we say so much as what people think we mean. For instance, there was a long discussion of the word "impinge," on the second day of the assembly meeting. This was just the English meaning, discussed among English-speaking reporters. Secretary Marshall had said this new permanent committee of the assembly would not "impinge" on the security council. The great argument about the committee has been that it was intended to by-pass the security council itself, and thus duck the veto.

If the English-speaking reporters weren't quite sure how far you go, or don't go, when you "impinge," it's no wonder there was confusion when it was translated into half a dozen other languages.

It was the translation of one word which nearly caused a revolution in Korea and made the work of the American commission there infinitely more difficult. It also has affected the whole course of action by the assembly on Korea. It was the word "trusteeship."

There is no word which properly translates "democracy" in Russian. When using the term the Russians merely give the English word its Russian form. But what a gulf between their meaning and ours. Liberty of the individual is not implied at all in the Russian concept.

Indeed, many people have said there is no real desire for liberty on the part of the modern Russian generation. And yet they constantly describe their country and their satellites as "democracies."

• • •

There was a good deal of electioneering before and during the close battle over the election for the presidency of the assembly. At first the American delegation had intended to vote for Oswaldo Aranha of Brazil. He is an old and staunch friend of the United States. But he felt that Brazil had had enough honors at the recent conference in Rio, that he had served one term before and that it would be best not to run. He said he didn't want the job. So our delegates pledged for Evatt of Australia, who was exceedingly anxious to be elected. But the Latin-Americans would have none of it. They demanded Aranha run. The contest narrowed to him and Evatt. This put Russia on the spot. Latin-America wants to liberalize the veto, Evatt would tear it to pieces. And the veto is the Russian pet. But the United States was for Evatt so Russia voted for Aranha and he won.

The Russian delegation went into a huddle on the floor. The Russian stooges had to be told just how to vote. And who should be the man who ran around, taking orders—or shall we say suggestions—from the Russian delegation to the various groups, Albania, Poland and the others under the Russian thumb?

It was Sarge M. Koudtiavtsev, a member of the staff of advisors to the Russian delegation. That name didn't mean much to me but I was reminded by Paul Ward of the Baltimore Sun, who always has a sharp eye out for such matters, that this active gentleman was the man named as the "architect" of the Russian spy system, in the report on the plot to obtain official secrets from the Canadian government.

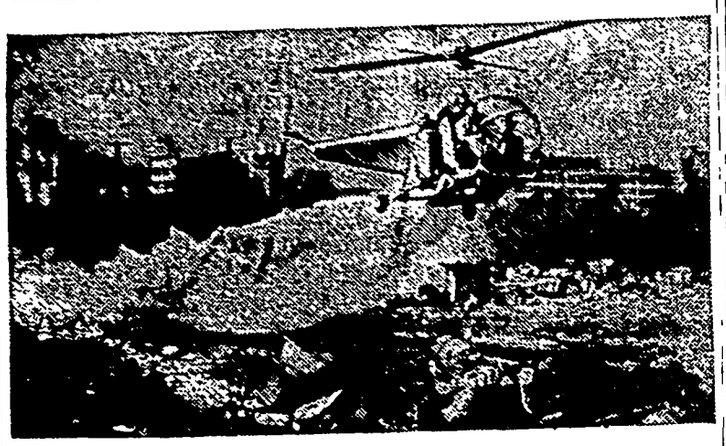
• • •

Two women are exceedingly popular at the assembly meetings and their popularity seems to grow. One is Mrs. Pandit Nehru, wife of the Indian leader, and one is Mrs. Eleanor Roosevelt. They are both active

MRS. PANDIT NEHRU

and intelligent. Mrs. Pandit (last names come first in India, as in many other countries) has been named ambassador to Russia by her new government.

I couldn't help thinking, considering the recent emancipation of women in India that Mrs. Pandit was more like Mrs. Roosevelt, than Mrs. Roosevelt herself, when you consider the unconventionality of both judged by the standards of their respective older generations.



FIGHTING POLIO FROM THE AIR . . . If, as many medical researchers believe, flies are responsible for carrying polio, the practice of spraying fly-breeding areas from helicopters may become an important factor in preventing spread of the disease. Here, helicopter sprays DDT powder on dumps in Buffalo, N. Y.

NEWS REVIEW

Conserve Food: Truman; U.N. Adopts Agenda

FOOD PLANS:
Conservation

It wasn't hard for President Truman to figure out: Europe is in desperate need of food from the U. S., but the U. S. will leave itself wide open for even greater price spiralling if it boosts its exports much higher.

The answer, he told a special press conference, is food conservation by all Americans. It is not a matter of eating any less, he said, but of wasting less.

In line with that, he announced the setting up of a citizens food committee to develop a food conservation program in the nation. Charles Luckman of Cambridge, Mass., president of Lever Brothers, was named president.

Regarding Europe, Mr. Truman said the food and fuel situation there is too critical to allow time for detailed study. Thus, apparently in an emergency frame of mind, the President called together congressional leaders to discuss possible steps that could be taken immediately to aid the starving continent.

If possible, he said, he would not call a special session of congress if stop-gap aid for Europe could be pushed through without resorting to that step.

Americans could start preparing for a heavy barrage of food conservation propaganda.

TOUGH AGENDA:
No Dodging

United Nations general assembly proved at least one thing in the first week of its current session—it isn't going to dodge any issues.

After riotous preliminary sessions in which they heard the U. S. and Russia flay each other verbally and U. N. Secretary General Trygve Lie call for an end to feuding, the delegates voted doggedly to take on the entire list of tough, almost insoluble problems standing as a barrier to world accord.

Among the items admitted to the agenda were the partition of Palestine, peace in the Balkans, independence of Korea and Marshall's proposal to reorganize U. N. machinery to hold a tighter rein on the turbulent peace.

Soviet delegate Andrei Vishinsky's resolution calling on member nations to take criminal action against warmongering propagandists was whole-heartedly admitted to debate, probably because it will provide a chance to mull over the concept of freedom of the press.

ABSOLVED:
Hirohito

Even while five high-ranking Japanese army and navy officers were being hanged by the neck in payment for their crimes of cannibalism, torture and murder of U. S. prisoners, Emperor Hirohito was being publicly absolved of any responsibility for the Pacific war by the chief U. S. war crimes prosecutor.

Joseph B. Kennan told the international war crimes tribunal that "The prosecution believes the people in the dock are really responsible for this war. If there had been anyone else, they would be in the dock too."

HEADLINERS

IN CAMDEN, N. J. . . . Joseph Valentino, hailed into court for belaboring March McGhee, 22, on the jaw, explained apologetically to the judge that he thought Miss McGhee was his wife, got 10 days.

IN HOUSTON . . . Lt. Gen. Ira C. Eaker, former deputy commanding general of U. S. air forces, retired, readjusted himself to civilian life by taking a job as vice president of Hughes Tool company.

IN HAMILTON, ONT. . . . Mrs. Marshall Lounsbury, no art authority, bought an oil painting at an auction for "a song," later discovered it was "Palm Sunday Morning" by 19th century master Calisano, valued at $20,000.

IN PITTSBURGH . . . City Councilman E. J. Leonard, longtime advocate of sidewalk repair, cited the danger of increased spills as a result of a combination of the new long skirts, high heels and broken pavements, frightened the city council into passing a ruling that all walks be repaired immediately.

ELEANOR:
An Old Note

"Dear Sumner — This Eisler case seems a hard nut to crack. What do you suggest? Sincerely, E. R."

That, Sumner Welles, former undersecretary of state, told the house committee on un-American activities, was a note he received from Mrs. Eleanor Roosevelt in 1939 when the then first lady was interested in obtaining an open hearing on the passport application of one Hanns Eisler, Austrian refugee from Hitler.

The note, an almost forgotten memento of the prewar era, was hailed resoundingly in newspapers across the land because Hanns Eisler was

Mrs. Roosevelt Hanns Eisler

accused of being a Communist. He is the brother of Gerhart Eisler, No. 1 agent of the Kremlin in the U. S.

Eisler and his wife finally were issued visas in Mexico City to cover their entrance into this country. He has taken out naturalization papers and is a song-writer in Hollywood.

In 1926, Eisler told the committee, he had applied for membership in the German Communist party, but had dropped out. A department of labor report made in 1938 said of him: "The evidence establishes preponderantly that Hanns Eisler is a Communist."

Mrs. Roosevelt's attitude toward the affair was lackadaisical. The note to Welles on behalf of Eisler was strictly routine, she said, adding that she neither knew Eisler nor remembered the note.

SIX BILLION A YEAR

Farm Co-ops Do Huge Trade

If volume of trade is any indication, America's farm cooperatives are establishing themselves ever more firmly as a significant force in the realm of agriculture.

In the 1945-46 marketing year, farm cooperatives, with more than five million individual farmers participating, did a record six billion dollar business, according to an estimate by the farm credit administration of the department of agriculture.

(The FCA report came at a time when a house small business subcommittee was investigating any possible advantages the co-ops might have over other business because of the fact that they are tax-exempt and private enterprises are not.)

Leading in dollar volume of trade were some 2,256 grain cooperatives which handled 1.45 billion dollars worth of business during the year covered by the report. Dairy marketing associations previously were the leading organizations in the co-op field.

The record business of all types represents a 400-million-dollar increase above the cooperative volume in the 1944-45 marketing year, FCA reported. It was emphasized, however, that "part of this increase is undoubtedly due to the rise in prices of products farmers sell and of supplies that farmers buy."

Minnesota again led all states in the number of farm cooperatives, 1,352 of them reporting memberships totalling 506,000 farmers. Illinois was second in membership with 485,000, while Wisconsin was second in the number of associations with 1,002, most of them dairy groups.

In dollar volume, the huge California cooperatives led the field with 652 million dollars, while Minnesota was second with 477 million dollars.

Grains, dry beans and rice marketing coopepatives accounted for 2,256 associations, 536,000 members and 1.49 billions in dollar volume to take first place for the year among commodity groupings.

THE BIBLE TODAY

International Uniform Sunday School Lesson

By LOUIE D. NEWTON, D. D.

SCRIPTURE: Hebrews 11—13; Genesis 12:1-9.
DEVOTIONAL READING: Romans 5:1-8.

Creative Power of Faith

Lesson for October 19, 1947

THIS lesson takes us to the Westminster Abbey of the Bible—Hebrews, eleventh through the thirteenth chapters—to meditate for a season upon the valiant souls in the long ago who obtained a good report as they stood at the passage of destiny and sounded the trumpets of triumph, even the trumpets of faith.

Dr. Newton

The reader will be richly rewarded to stop right here and open his or her Bible and read these three chapters. Your attention will be riveted to the word, **faith.**

"Now faith is the substance of things hoped for, the evidence of things not seen. For by it the elders obtained a good report. Through faith we understand that the worlds were framed by the word of God, so that things which are seen were not made of "things which do appear." Hebrews 11:1-3.

* * *

A Journey to a New Land

I WANT the boys and girls to look at the passage which describes how Abraham, "when he was called to go out into a place which he should after receive for an inheritance, obeyed; and he went out, not knowing whither he went."

How could Abraham leave his pleasant situation in Ur? Through faith in God, and that alone. A memory verse is here suggested: "I will trust, and will not be afraid," Isaiah 12:2. Abraham might well have been afraid of unknown enemies, of disease, of poverty. Men do become afraid of these things, unless their faith is in God. But Abraham believed in God—had faith in God. And he went forth, holding the hand of God.

There is creative power in such a faith. Abraham discovered that every step he took was accompanied by God. He built altars. He talked with God, and God talked with him. Such will be the experience of every boy and girl who stakes his or her all upon implicit faith in God.

* * *

What Faith Can Do

INTERMEDIATES are considering what they will do with their lives. It is the vitally important period when they are wistfully considering a life career. This lesson would seem to clearly indicate that God has a purpose and plan for each life. He will reveal that plan to those who trust him for guidance. Faith in God at this point is absolutely essential if we are to live victoriously.

Read again the eleventh chapter of Hebrews and see how these heroes of faith in the long ago cast themselves wholly into the will of God for their lives. We can have no doubt about their ultimate success.

Parents and teachers are here reminded of their solemn responsibility in pointing intermediate boys and girls to the truth of Sunday's lesson. Life is too valuable, too fleeting, to be frittered away in purposeless drifting.

Faith is the bright shaft of God's presence and power to guide young people into his will. It is the unfailing light to direct their steps daily. It is the creative power to sustain them each step of the way.

* * *

This Power at Work

TAKE any one of the characters portrayed in these three chapters of Hebrews and see how faith in God produced men and women who changed the course of history.

Young people are interested in biography. I would commend to you the lives of the great men and women of modern times, who lived in the creative power of faith in God.

John Wesley, for example. There was a man whose life, when strangely warmed by the spirit of God, lifted England from the depths of secularism and set her feet once more on the highway of worthy achievement.

Martha Berry is another splendid example. Miss Berry devoted her life to God's will and purpose to open doors of opportunity to the under-privileged boys and girls of the southern mountain areas. Today, at Mt. Berry, stands a school with the largest campus in the world—a school which reveals what one life can accomplish when that life is built by the creative power of faith in the Living God.

"Take my life and let it be,
Consecrated, Lord, to Thee."

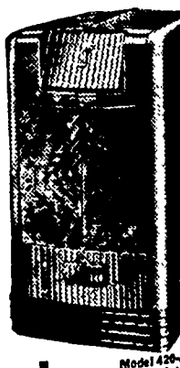
Amazing HOME HEATER Cuts Fuel Costs!

WARM MORNING COAL HEATER

NAME REG. U. S. AND CAN. PAT. OFF.

Model 618
60 lb. Coal Cap.

- Amazing, patented inner construction.
- Start a fire but once a year!
- Heats all day and all night without refueling... holds fire several days on closed draft.
- Burns any kind of coal, coke or briquets.
- Semi-automatic magazine feed.
- Low in cost... big fuel savings.
- The home is WARM every MORNING, regardless of weather.



Model 420-A
With Built-in Automatic Draft Regulator
100 lb. Coal Cap.

Start a Fire But Once a Year!

If you want modern heat for your home . . . if you want healthful, clean, low-cost heat . . . then get a WARM MORNING Heater. More than a million in use . . . that bespeaks its heating merits! WARM MORNING Heaters are sold by leading Furniture, Hardware, Appliance, Lumber and Coal Merchants throughout the Nation.

Model 526-B
100 lb. Coal Cap.
Also Model 524-B
200 lb. Coal Cap.

SPECIAL OFFER—Small Homes PLAN BOOK!

ANCIENT RIVALRY RENEWED . . . Mayhem was the password of the day when Cherokee Indians renewed the game of stickball, a sports competition hundreds of years old, at the annual Cherokee, N. C., fair.

IN THESE UNITED STATES

Mayhem Prevails as Indians Renew Ancient Competition

WNU Features.

CHEROKEE, N. C.—Cherokee Indians smile politely at "hoary" football traditions which have pitted teams against each other, at the longest count, for only two generations. Before De Soto came through this country in 1540, ancient Indian clans for centuries had been competing in stickball, a competition so honored in time and custom and so intent in purpose that the annual games were surrounded by secret rites and ceremonies.

A renewal of that ancient rivalry is staged annually as a highlight of the Cherokee fall fair, although later-day games lack a lot of the blood-letting of aboriginal days. An innovation at this fall's fair was a stickball game in which children's teams competed for the first time publicly.

Rough Is Right.

The game itself, also played by other Indian tribes in America, is one of the roughest sports in the world. Forerunner of lacrosse, it is played with a small ball, with 10 players on a side, each armed with two small home-made rackets. The idea is to propel the ball across a goal line, represented by two willows stuck in the ground. The ball may be advanced in any manner whatever — carried, thrown, passed or kicked. Once on the ground, however, it may not be picked up except with the rackets.

What makes Indian ball so exciting is simply the absence of rules. Once a player has the ball, he is fair game for any sort of treatment, including mayhem. Stripped to trunks, the Indians run, tackle, wrestle, choke and bite without let or hindrance. The rackets sometimes are used in whacking opponents over the head or across the shins.

What the spectators see is something like this:

Opposing teams march on the field and face each other in two lines where individual opponents are "matched," sometimes after much wrangling. Each man has a personal opponent and they are mutually responsible for guarding their opposites. The ball, formerly a hickory nut, is tossed into the air, and the game is on.

When a player gets the ball, he usually pops it into his mouth and lights out for the goal. Opponents are privileged to run him down, choke the ball out of his mouth or otherwise discourage him. The team first getting 12 goals is winner.

A game might last 30 minutes—it might last all day. A player attempting to tackle a ball-carrier is liable to prompt tackling by his "guard" or anyone, and sometimes the game comes to a stalemate with 10 wrestling matches going on at once. There are no rest periods and no substitutions. If a player is disabled, the opposing team must discard a man and the game continues.

On the field are "drivers," elderly men who are armed with long switches. With these they point toward the small and often obscure ball or to the player hiding it, crying "hahni! hahni!" ("here! here!"). They also are empowered to beat any laggard player, but this privilege seldom is exercised nowadays.

Some surreptitious betting is done as the teams meet in midfield. In former days, the squaws were the heaviest bettors, putting up wagers of beads, blankets, cattle, baskets and even their shorn locks.

Element of Culture.

The ball games were important in ancient Cherokee culture. Originally there were six clans, of which there are vestigial remains of four. The clans had a blood revenge pattern, and there was one town of refuge (Echota) in which prospective victims were inviolate. Many social taboos, including marrying, joking and other relationships, were defined by clan rules, which heightened rivalry of the ball games.

Teams were carefully prepared for the contests, the rites including a purification of rackets at the river's edge, sacrification of players with rattlesnake fangs and all-night dances. Today little remains of this, although elders sometimes still gather team members for conferences, the nature of which are not freely discussed. Young bucks, sophisticated by overseas service, laugh at the old superstitions, but the teams nevertheless usually emerge as a unit from the banks of the Occonaluftee just before going into action.

Even Lowly Hole In Donut To Rate Special Centennial

In the maze of special weeks and observances eventually there should be a limit, even in the giddy postwar world. But now comes forth announcement of a celebration in October to note the centennial of the hole in the donut. Impetus for the event, as you'd undoubtedly suspect, comes from the baking industry.

Although the celebration itself may rate only passing notice, historical significance is attached to that lowly hole in the donut. That, at least, is the contention of Camden, Me., where the celebration will get its official start. Part of Camden's fame emanates from the fact that it is the birthplace of the late Capt. Hanson Gregory, acknowledged inventor of the hole in the donut.

Prior to 1847, all donuts or round cakes, as they were known then, were made without the hole. Sometimes a round cake had a nut in the center and historians attribute the origin of the name "donut" to this fact.

At any rate, during the year 1847, Captain Gregory was sailing his sturdy vessel in northern waters. He and his men liked the round cake with a doughy center, eating it not only at mealtime but also as a snack when they were at the steering wheel. One October day in 1847, Captain Gregory himself was at the steering wheel with a handful of donuts or round cakes. He had no place to put the cakes so he rammed the soft cakes over the spokes of the steering wheel, thus forcing a hole through each of them.

He and the men liked the cake with the hole so much that Captain Gregory ordered the ship's cook to make all future donuts with holes in them and thus—according to the New England Legend—the hole in the donut was born.

The celebration of the 100th anniversary of the donut hole will take place at the home of the late Captain Gregory. There late in October, a permanent plaque will be placed at his old homestead.

From Maine, straight across the country, various celebrations are planned in California, Oregon and Washington to honor the memory of the Maine captain.

Virginia Marks Site of 'Wreck of Old 97'

DANVILLE, VA.—Famed in song and story, the site of "the wreck of the old 97" finally has been marked as an historical site by the state conservation commission.

An historical site sign has been erected at the point on Danville's outskirts where the Southern railway's fast mail-express train plunged from a trestle into a ravine that September day in 1903. Nine were killed and seven injured in the wreck.

Reason most widely given for the state's delay in putting up the marker designating the famous wreck is that until recently the ravine where the 97 came a cropper was almost inaccessible. The Southern railway changed its main line roadbed several years ago and later tore down the trestle. A new highway now crosses the ravine.

Plea for Hiring Handicapped Highlights Annual Observance

Physical Defects Prove No Barrier, Survey Indicates

WNU Features.

It's ability, not disability, that counts.

That message is being broadcast throughout the nation this week in connection with the annual observance of National Employ the Physically Handicapped Week.

Objective of the observance is to seek national action in behalf of the handicapped, the action being spurred by official figures disclosing that at the present time there are 500,000 employable handicapped job applicants who have not been able to find jobs even though employment nationally in the last two years has thrust upwards to the all-time high of 60 million. Estimates of the total number of men, women and children in this country who have physical defects of one sort or another range as high as 25 to 28 million.

Launched in 1945.

National Employ the Physically Handicapped Week was first observed officially in 1945. In that year congress passed a joint resolution designating the first full week in October each year as the date for the observance. In this act it was requested that the President issue annually an official proclamation calling upon public officials and all citizens to make every effort to enlist public support for a sustained program aimed at employment and full use of the capacities of handicapped workers.

It is estimated by the federal interagency committee for employment of the physically handicapped that a total of six million handicapped persons are now in the civilian labor force either working or seeking employment. Of this number, all but 500,000 are employed. Not all handicapped persons who want to work, however, are in the labor force. It is estimated that a million disabled persons not now ready for employment could be rehabilitated so they could do useful work if suitable job openings were available.

Last year 29,000 job placements for physically handicapped workers were made by local offices of state employment services in October, the month in which NEPH Week was observed. This represented a sharp increase over average monthly placements.

Seek Sustained Drive.

In issuing his proclamation for National Employ the Physically Handicapped Week, President Truman directed attention to the reservoir of unused skills and strengths represented in the thousands of handicapped workers now unemployed. Stating that handicapped workers have demonstrated their ability to do good work, the President called upon the whole nation not only to observe the week but also to carry on a sustained drive to open up employment opportunities for the handicapped job applicant.

The President said that new studies by the department of labor had demonstrated that physically handicapped workers have made excellent records in terms of low absenteeism, small turnover and high safety records. Thousands of handicapped workers have demonstrated, he added, that physical handicaps are no insurmountable bar to efficient and productive labor.

This year's National Employ the Physically Handicapped Week objectives, as outlined by Edward L. Keenan, deputy director of the United States Employment service and chairman of the federal interagency committee for employment of the physically handicapped, are:

1 To promote employer acceptance of men and women with impairments as workers in jobs for which they have been prepared and for which they are qualified.

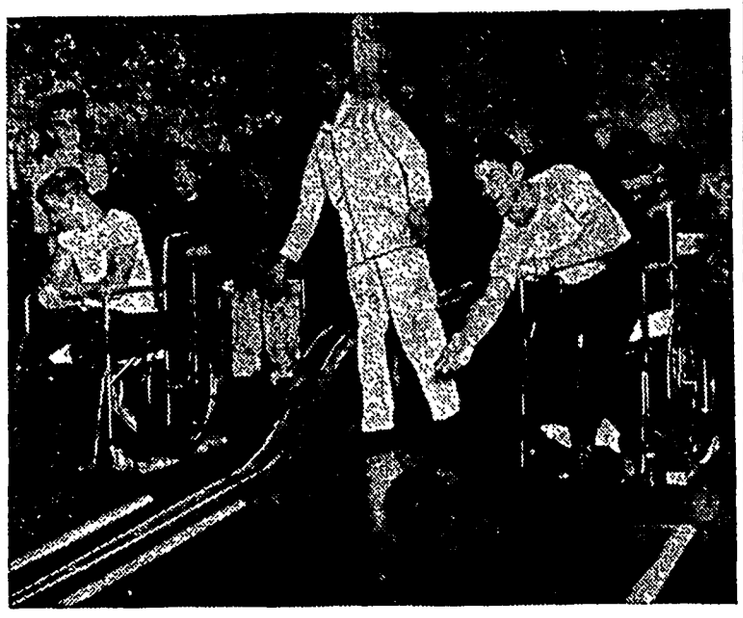
2 To find jobs promptly for the 500,000 handicapped workers now unemployed.

3 To effect better job adjustments for those handicapped workers who are capable of doing better jobs.

4 To develop rehabilitation, training and job opportunities for the 1,000,000 handicapped persons who can be made employable.

The slogan for the week is "Hire the Handicapped — It's Good Business." The campaign this year stresses the proved fact that handicapped workers, when placed in jobs they are qualified to do, are as good or better workers than the able-bodied.

Color posters which will appear in store windows and other prominent places throughout the observance feature the names of Thomas A. Edison, Charles B. Steinmetz and other noted persons who succeeded despite disabling handicaps that once would have deterred employers from giving them jobs.



UNDAUNTED, AT WORK OR PLAY . . . Physical handicaps prove no barrier at recreational activities or at work. These disabled veterans, although severely handicapped, still are able to participate in a strenuous bowling game.

While employers today demonstrate much more interest in hiring handicapped workers than ever before in the nation's history, employer prejudice against hiring workers who have lost arms or legs or are otherwise physically impaired is still the greatest obstacle to full employment for this group.

War Shatters Prejudice.

Employment service officials state that three things have helped to break down this employer prejudice and make it possible for the disabled to obtain gainful employment. First and foremost was World War II. Employers exhausted all the able-bodied in the struggle to produce war supplies and turned to the disabled as a source of labor supply. The employment service alone placed more than 1,000,000 disabled workers in jobs during war years. The fact that these disabled workers made good convinced large numbers of employers that they should give employment to the handicapped in normal times.

Surveys of the abilities of handicapped workers also have helped to break down employer resistance to hiring the disabled. These surveys conducted in employer establishments compared the work abilities of the handicapped with able-bodied employees working on similar jobs. They disclosed that handicapped workers placed in jobs where their disabilities were not a handicap did as good work as other employees, that their production records were as good, and their absenteeism and turnover records better than able-bodied workers.

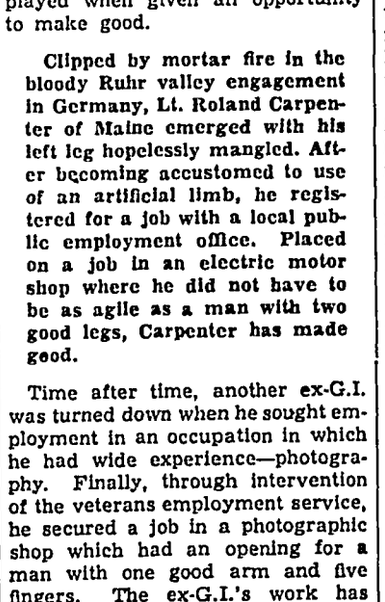
A third factor is the ability which handicapped workers have displayed when given an opportunity to make good.

Clipped by mortar fire in the bloody Ruhr valley engagement in Germany, Lt. Roland Carpenter of Maine emerged with his left leg hopelessly mangled. After becoming accustomed to use of an artificial limb, he registered for a job with a local public employment office. Placed on a job in an electric motor shop where he did not have to be as agile as a man with two good legs, Carpenter has made good.

Time after time, another ex-G.I. was turned down when he sought employment in an occupation in which he had wide experience—photography. Finally, through intervention of the veterans employment service, he secured a job in a photographic shop which had an opening for a man with one good arm and five fingers. The ex-G.I.'s work has proved so satisfactory that the employer now has hired other disabled workers.

Story of Success.

Two years ago a college graduate lay on a cot in the amputee section of Walter Reed hospital thinking of the future which did not appear too bright. Like thousands of other ex-G.I.s, he was wondering if he ever would get his chance to make good. His chances were not too encouraging, he decided after considering the leg which he has lost in the bitter fighting on the Italian front. An official in charge of the disabled veterans section of the veterans employment service called at the hospital in search of a likely young man who could be trained as his assistant. The amputee got the job. Today he is head of the disabled veterans section. His job is to stimulate employment opportunities for disabled men who, like himself, returned from war with a physical impairment.



STILL IN ACTION . . . Struck by a land mine in the terrific action at Hertgen forest, this ex-G.I. lost a leg and incurred multiple wounds on his body. But he's still in action, despite an artificial leg, carrying on his work as a clerk in a large chemical plant and enjoying such hobbies as dancing, bowling, golf and horseback riding.

But peace as well as war leaves its victims in the realm of the physically handicapped. In New England a young woman with a bad heart condition combined with partial paralysis spent long hours learning how to retouch photographic film. Constant rebuffs, however, met her quest for a job. All the photographic shops in her home town were on the second and third floors, and she couldn't make the steps every day because of her physical condition. Through intervention of the interstate labor clearance machinery of the employment service, a place finally was found for her in another city where she did not have to climb stairs. She is still holding down the job, and her service has been most satisfactory.

New Work Opportunities.

State employment service personnel charged with finding jobs for the handicapped often have found that simple changes in the arrangements of a work room or a machine have developed job opportunities for the handicapped.

Suggesting these minor alterations illustrates what the personnel in hundreds of local public employment offices of state employment services are doing to improve employment prospects for the disabled men and women who are unemployed.

These local offices—1,800 in all—are spearheading the National Employ the Physically Handicapped Week activities in local communities from Maine to California and from Texas to the Canadian border.

Airline's Weather Data Aids Farmer In Wheat Harvest

KANSAS CITY, MO. — From his desk almost a thousand air miles away, an airline meteorologist has been contributing heavily this summer to production of a bumper wheat crop in North Dakota.

The meteorologist is 22-year-old David J. Bata, assigned to Trans World airline headquarters in Kansas City. By transmitting detailed weather reports to his father and other wheat farmers at Langdon, N. D., Bata has enabled them to keep a jump ahead of the weather, with highly profitable results.

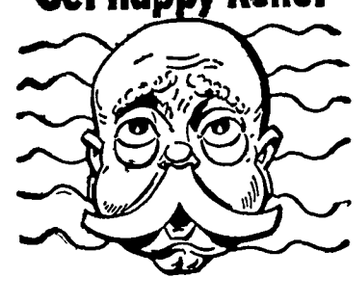
Bata began sending his father twice-weekly detailed weather forecasts covering North Dakota when he was located in TWA's Chicago offices. With the reports went advice on when the weather would best suit planting or harvesting needs. This supplemented radio and newspaper reports which are not enough in detail, particularly at harvest time when unexpected rains can cause great wheat-rot damage.

Bata says his father viewed the reports with some skepticism at the outset.

"He didn't care much for expressions like 'adiabatic lapse rate,' 'dew point' and 'isobars,' but he caught on in a hurry, and now he's very impatient if I don't get the reports in on time."

While still on his father's farm, Bata became interested in meteorology through studying upper air mass circulation, noting in particular how a storm could approach from the northwest while strong southerly winds prevailed on the ground.

How Sluggish Folks Get Happy Relief



WHEN CONSTIPATION makes you feel punk as the dickens, brings on stomach upset, sour taste, gassy discomfort, take Dr. Caldwell's famous medicine to quickly pull the trigger on lazy "innards", and help you feel bright and chipper again.

DR. CALDWELL'S is the wonderful senna laxative contained in good old Syrup Pepsin to make it so easy to take.

MANY DOCTORS use pepsin preparations in prescriptions to make the medicine more palatable and agreeable to take. So be sure your laxative is contained in Syrup Pepsin.

INSIST ON DR. CALDWELL'S—the favorite of millions for 50 years, and feel that wholesome relief from constipation. Even finicky children love it.

CAUTION: Use only as directed.

DR. CALDWELL'S SENNA LAXATIVE
CONTAINED IN SYRUP PEPSIN

Get this quick 3-WAY RELIEF!

Cough due to colds, smoking? Get this prescription-type formula of cough-relief ingredients long used by doctors. Long-lasting relief 3 important ways:

1. Eases throat tickle
2. Soothes raw, irritated membranes
3. Helps loosen phlegm

America's favorite for 100 years.

HOT FLASHES?

Women in your "40's"! Does this functional 'middle-age' period peculiar to women cause you to suffer hot flashes, nervous, highstrung, weak, tired feelings? Then do try Lydia E. Pinkham's Vegetable Compound to relieve such symptoms. It's *famous* for this purpose!

Taken regularly—Pinkham's Compound helps build up resistance against such distress. Thousands have reported benefit! Also a very effective stomachic tonic. Worth trying!

LYDIA E. PINKHAM'S VEGETABLE COMPOUND

Watch Your Kidneys!

Help Them Cleanse the Blood of Harmful Body Waste

Your kidneys are constantly filtering waste matter from the blood stream. But kidneys sometimes lag in their work—do not act as Nature intended—fail to remove impurities that, if retained, may poison the system and upset the whole body machinery.

Symptoms may be nagging backache, persistent headache, attacks of dizziness, getting up nights, swelling, puffiness under the eyes—a feeling of nervous anxiety and loss of pep and strength.

Other signs of kidney or bladder disorder are sometimes burning, scanty or too frequent urination.

There should be no doubt that prompt treatment is wiser than neglect. Use *Doan's Pills*. Doan's have been winning new friends for more than forty years. They have a nation-wide reputation. Are recommended by grateful people the country over. *Ask your neighbor!*

After 28 Years In Business Jacobs Sells Hardware Store

TWO OHIO YOUNG MEN ARE NEW OWNERS OF LARGE BUSINESS HERE

F. Jacobs Closed Deal Here Last Week Thursday

One of the biggest business deals on Klemme's Main Street took place last Thursday when F. Jacobs sold his hardware business to Wm. Fuss and Harry Schuster of Osborn, Ohio. The Jacobs Hardware was one of the largest hardware businesses in North Iowa.

Ed. Jacobs was on his 29th year in business in Klemme, coming here on August 14th, 1919, shortly after he was discharged from the army after World War I, at which time he purchased the business from Hahn and George Gruetzmacher. The business was then housed in a double front frame building on the corner. This store burned to the ground in March of 1947 Ed. immediately began plans for a new building and in the fall of 1947 moved into a double brick building, one of the finest in North Iowa and enlarged his stock of merchandise. This new building burned to the ground on Nov. 11, 1941 together with a stock of merchandise valued at over $40,000.

Mr Jacobs intended to rebuild the large store, but first he planned to put up a smaller building, the present location and moved his stock into that building on February 7, 1942 Since that time building restrictions and scarcity of material delayed plans for a larger store.

Mr and Mrs. Jacobs and their family of two sons, Elwyn and Dean, both in college, and Lois Jean at home, expect to remain in Klemme Mr Jacobs has not been well for the past few years and expects to take a well earned vacation rest before making plans for the future.

The new proprietors are fine young men Mr. and Mrs. Fuss are now in Klemme invoicing. Mr. Fuss is a graduate electrical engineer and served 41 months in the Army as Electronics Engineer at Wright Field, Dayton, Ohio.

Mr Schuster is also married and Mr and Mrs. Schuster are the parents of two children, a 22 months old girl and a 2 week old baby boy They expect to come to Klemme soon. Mr. Schuster is also a graduate engineer and served in the Army along with Mr. Fuss at Wright Field.

The new owners are now in possession of the business and will open the store as soon as the inventory is completed. Klemme welcomes these two fine families to our community and to our Main Street.

Both Mr. Fuss and Mr. Schuster had business experience before the war.

Adult Bible Class Dinner October 19th

The Adult Bible Class of the Methodist Church met at the church parlors after Sunday School for a fine dinner, Sunday. Forty-nine were present.

After the dinner a fine program was given, followed by the election of the following officers: President, C. A. Larsen; Vice President, Roy Schaefer, Secretary and Treasurer, Mrs. O. W. Lemke; Teacher, Dr. D. P. Anderson; Ass't Teacher, E. G. Beier, Flower Chairman, Mrs. P. J. Arnold; Visiting Chairman, Mrs. J. A. Chambers, Program Chairman, Mrs. E. G. Beier and Kitchen Chairman, Mrs. Henry Busse. Mrs. Henry Busse has been the teacher for several years, but asked to be released.

Mr. And Mrs G. A. Goll Celebrate Silver Wedding

About 125 friends, relatives, and neigbors gathered Sunday noon, October 19 in the basement of the Evangelical and Reformed Church to help Mr and Mrs G A. Goll celebrate their Silver Wedding Anniversary.

The church basement was decorated in pastel colors. The center-piece of the honoree's table was a beautiful cake baked and decorated by Mrs. Alvin Goll.

In the afternoon every one gathered for a short program consisting of musical numbers and a reading by their grandchildren and daughter, Elizabeth and Darwin and Aaron Wille Rev. Grosshuesch gave a short talk. The honorees were presented with a set of silverware and other gifts.

KLEMME FOLKS ATTEND FAMILY GATHERING AT CORWITH SUNDAY

Sunday a family gathering and dinner was held at the Armond Tabb home at Corwith, with the following present from Klemme and vicinity Mr. and Mrs. John Chambers, Mr. and Mrs. Roy Arnold and son Bill, and Mr. and Mrs. Roy Jacobs and children

Others present were Mr. and Mrs. D W Hakes and Mr. and Mrs Ernest Coyle of Dana, Ill.; Mr and Mrs. Jack Tabb of Ames, Jim Tabb, Art Tabb, and family, Clarence Aitchison and family, Mrs. Oma Jacobs, Mrs. Will Perkins, Mrs. Mary Aldridge, Milford Aldridge, all from around Corwith and Britt, Stanley Stafford of Waseca, Minn., Mrs. Joe Olson of Northwood, Shirley Oleson and June Jacobs of Mason City, Dallas Atwood of Eagle Grove and Eunice Tabb.

KLEMME FIRE DEPT. MADE TWO RUNS SUNDAY

The Klemme Fire Department made two runs Sunday The first call they answered was at the Bert Jones house in northeast Klemme where a roof fire was discovered at 11:00 a. m. Chemicals were used to extinguish the blaze with little damage being done.

At about 4:00 p. m. an alarm was sent in from the Mrs. C A. Arnold farm where a tool shed and another small building had already burned to the ground. No one was at home at the Arnold farm wehe a small building burned to the ground. The Fire Dept. took precautions to see that the embers were extinguished in order not to endanger other buildings.

JACK DETHMERS WILL SPEAK AT MEETING OF METHODIST MEN

Jack Dethmers, who recently returned to the United States with a group of farmers who toured Europe to study the food situation and agriculture in the war-torn countries, will speak at the Methodist Men's Meeting at the Klemme Methodist Church on Monday evening, October 27th.

The meeting begins at 7:30 o'clock and lunch will be served after the meeting. Ben Ridder of Liberty, is chairman. This will be an interesting meeting and all men and young men are urged to attend.

CATFISH

If you catch a catfish with a clipped fin, chances are he has a small metal tag in his abdomen, placed there by the conservation commission. They'd like to have it back.

ETCHEN—RADICS, JR.

Mr. and Mrs. Paul Radics, Jr.

At the Klemme Methodist Church Betty Etchen, daughter of Mr. and Mrs. John Etchen of Klemme, became the bride of Paul Radics, Jr., only son of Mr and Mrs. Paul Radics of Detriot, Michigan, on Friday evening, October 17th, 1947, with the Rev Herschel E. Harvey officiating at a double ring candlelight ceremony.

Nuptial music was played by Mrs. Oliver Potter of Mason City, who accompanied Rev. Harvey who sang "Because," and "Through The Years."

The church was beautifully lighted with 120 candles placed along the aisles leading to the altar and with candles forming a background across the chancel together with large baskets of white bronze chrysanthemums.

The bride, who was given in marriage by her father, wore a gown of ivory satin with a finger-tip tulle veil fastened with mock orange blossoms. She carried a bouquet of white mums and red roses. She also carried a handkerchief, a gift from the groom's aunt in Detroit.

Mrs La Rayne Stille, of Clear Lake, Matron of Honor, wore a chartruse dress and the Bridesmaid, Miss Fern Harvey, wore a fuschen dress Their corsages were white and bronze 'mums.

Mrs. John Etchen, mother of the bride, wore a black dress with black accessories with a corsage of white gardenias and pink rose buds.

Carol Bridges, flower girl, wore a white satin dress like the bride's and Suzanne Lawhorn the ring bearer, wore a white satin dress. The bride and her attendants approached the altar walking on a flower-strewn white carpet.

Mr Fred Herr of Detroit was best man, and the ushers were Jim Pusch of Milwaukee, Wis., and Andrew Radkins of Chicago. The groom wore a blue suit. All of the men wore white carnation boutoniers

Her grandmother, Mrs. Oscar Swanson was present at the ceremony and her corsage was the same as the bride's mother.

Following the ceremony a reception was held in the dining room of the church which had been decorated in white and yellow for the occasion. A large wedding cake served as the center-piece at the Bride's table. The Misses Ruth Stille of Des Moines, and Gertrude Grosshuesch poured. Lunch was served to a large number of guests.

Mrs. Keith Stille was in charge of the guest book and Doris Johnson and Lorraine Wicks were in charge of the gifts.

The bride is a graduate of the Klemme high school and attended the A. I. B in Des Moines in 1943 and was employed by the Brown Camp Hardware Co. as assistant cashier for the past 3½ years.

The Groom is a graduate of the Southwestern High School in Detroit and attended the Iowa State College at Ames. He was with the Armed Forces for 2½ years. He is employed in the Research Labratory in the General Motors Co. at Detroit.

The bride's going away suit was of black and white sharkskin.

Out-of-town guests at the wedding and reception included Jo Ann Kolseim of Iowa City; Jo Ann Lyons of Des Moines; William Kalseim of Jewel; Gerald McCullough of Los Angeles; Mr. and Mrs. Fred Henry of Des Moines; Alice Stevens of Des Moines; Mr. and Mrs. Ivan Nielsen of Mason City and Mr. and Mrs. Stanley Thada of Thornton.

JOHNSONS WILL OBSERVE GOLDEN WEDDING ANNIVERSARY OCT. 30

The Times made an error in reporting the date of Mr. and Mrs Will Johnson's 50th wedding anniversary last week The correct date is Thursday, Oct. 30th

Mr. and Mrs Johnson will hold open house at the Klemme Metnodist Church next week Thursday afternoon from 2 until 4 p m.

A dinner is also being planed in their honor which will be served at the church at noon.

CORN HUSKING IN FULL SWING

Hancock county farmers have completed the soybean harvest and are husking corn. Some early fields have been cribbed with reports stating that quality is excellent and corn drier than any time in the past three seasons. Yield has been curtailed by the prolonged drought of the summer.

Much fall plowing is left to be done due to the hard, dry condition of the soil. More soybeans are being stored than in previous years. Vegetable growers have practically completed their harvest and the sugarbeet crop will be taken care of shortly.

Corn husking will be in full swing next week.

Liberty Township Women Have Open Tea

The Liberty Township open tea was held to discuss the Family Program and elect officers for the coming year.

The officers elected were as follows:

Township chairman, Mrs. Verner Haberkamp; Township Vice Chairman, Mrs. Clarence Lenz; Library Chairman, Mrs. Ben V Greiman; Music Chairman, Mrs. Robert Stuebbe; Health Chairman, Mrs Frank Bredlow and International Relations Chairman, Mrs. Richard Brouwer.

Elsie Mae VanWert, County Extension Home Economist, was present to explain the Family Living Program which is set up for the coming year.

Plans were made for purchasing new books for the Adult Reading Circle in the township. An announcement was also made that our reading circle had the most readers completing the 1947 reading project in the county.

Tea was served at the conclusion of the meeting.

Liberty Township Farm Bureau Meeting Was Held Oct. 16

Liberty Township held their annual meeting last Thursday evening, October 16 at School No. 6 with large number in attendance. A fine program was given by the pupils of schools No 6 and No. 7, after which election of officers was held. Frank Bredlow was re-elected director and Mrs. Wiley Weaver as secretary for the coming year.

Lunch was served after the meeting.

BIG EGG

A hen belonging to Mrs. Arthur Schulz of Latimer did her share for the egg shortage last week and produced a six and one-half ounce egg, measuring nine inches around the long way and seven and three-fourths inches the short way.

Open Season On Ringnecks

PHEASANT HUNT OPENS ON NOVEMBER 11TH

The state conservation commission Monday announced the shortest pheasant hunting season in Iowa since 1941 and the smallest bag limit in history.

The 1947 season will be for 10 days in 64 counties, from Nov. 11 to 20 inclusive.

Shooting hours are from noon until 4:00 p. m. daily.

The daily bag limit is two cocks and the possession limit is 2 cocks.

Last year pheasant shooting was open in 59 counties for 21 days. The 1946 bag limit was 3 cocks and the possession limit was 6.

Hunters have not been permitted to take hen pheasants since the spring of 1943.

The commission said its reason for sharply limiting the season and daily bag and possession limits was the relative scarcity of birds this year.

O. W. FRIEDOW WILL HOLD FALL BOAR SALE THURSDAY

O. W Friedow, breeder of Poland China hogs will hold his fall boar sale at his farm northwest of Klemme on Thursday afternoon, Oct. 23rd at which time he will offer 40 boars, sons of Real Perfect and Investigate

Special Attraction

Mickey Owen, former catcher for the Brooklyn Dodgers, will be at the sale assisting Auctioneer H. S. Duncan.

TWO OFFENDERS IN JUSTICE COURT

James M. Moberg of Mason City was apprehended by highway patrolmen for failure to have his car under control. He was arraigned before Justice R. J. Fritsch of Garner, where he pleaded guilty and was fined $25 and costs of which $10 was suspended on good behavior.

Gerhardt Harmdierks of Garner was arrested by Deputy Sherriff James Cooper and Marshall Raymond French and charged with malicious injury, damage and destruction to public property. He was fined $100 and costs and sentenced to 30 days in jail. Defendent is to pay costs of repairing property and the jail sentence was to be suspended pending good behavior.

Klemme Man Taken On Drunk Driving Count

Weert Loger, 60, of Klemme, was arrested by highway patrolmen on a charge of operation of a motor vehicle on a public highway while intoxicated. He was arraigned in the court of Justice R. J. Fritsch of Garner, Saturday afternoon, bound over to the grand jury and released on a $500 bond.

Celebrated 50th Anniversary

G. P. "Zip" McCullough, of Los Angeles, Cal., came last week to spend a couple of weeks with his parents, Mr. and Mrs. C. V. McCullough at Garner, and with his many old friends around Klemme and Garner. Mr. McCullough came east at this time as his parents celebrated their Golden Wedding Anniversary Saturday. All of the children and their families were present.

"Zip" was a former Klemme barber and for several years has been a barber shop inspector in California. As a side line he also manufactures supplies for magicians.

Mrs. Ed. Schaefer returned home Thursday from Marble Rock where she spent several days visiting with her son-in-law and daughter, Mr. and Mrs. Herold Ridder.

4-H Club Membership Drive Goal Set At 325 Members

SERVICES HELD TUESDAY FOR CHAS. BREDLOW AT LIBERTY CHURCH

Funeral services were held on Tuesday afternoon for Chas. Bredlow, 84, of Swaledale, former Liberty township farmer, at the Liberty Methodist Church with Rev. Fred C. Griewe of Garner, officiating, assisted by Rev. Walker of Swaledale.

Burial was in the Ell Township Cemetery.

OBITUARY

Charles August Bredlow, age 84, died peacefully at his farm home, 15 miles east of Klemme, on Saturday, October 18, 1947.

He was born January 16, 1863 in Brandenberg, Germany, and at the age of six years his parents, Mr. and Mrs. Carl Bredlow, and their family of six children migrated to America and settled on a farm near Lowell, Wisconsin Here Charles Bredlow attended the rural schools, learned the business of farming by working for various farmers and grew to manhood.

In 1888, at the age of 25, Charles Bredlow came to Liberty township, and the following year was married to Minnie A. Stille. They purchased a farm in Liberty Township, built up the buildings, and became the parents of ten children all born on this Liberty Township farm

After 27 years they sold the farm and moved to Vinita, Oklahoma, where they farmed for 11 years, then they came back to Iowa and farmed two miles west of Klemme for 12 years. It was on this farm that the wife, Minnie, passed away at the age of 65 in 1928.

And now for the past five years, Charles Bredlow, together with two sons, Curtis and Lester, and one daughter, Edna, have farmed together on their Cerro Gordo County farm east of Klemme

Mr Bredlow became a member of the Liberty Methodist Church three years after the church was built and taught the young mens class in Sunday School for a quarter of a century.

Mr Bredlow was a capable man, modest and unassuming. His long life was spent in being helpful to his family and to his community

He is survived by his six sons, Walter, Clear Lake; Herbert, Garner; Elmer, Hayfied; Clarence, Rockwell and Curtis and Lester, Swaledale. Three daughters, Helen, Mrs Wm Suckow, Van Meter, Iowa; Mable, Mrs Geo White, Big Cabin, Oklahoma, and Edna at home, Swaledale, also 19 grand children and one sister, Mrs Aug Nuehring, Garner

GRANDMA SCHLAWIN DIED TUESDAY AT THE AGE OF 96 YEARS

Grandma Caroline Schlawin, who was 96 years old last March, died Tuesday morning, October 21st at the home of her son, Otto Schlawin at Garner.

Funeral services for Mrs. Schlawin will be held at the Klemme Evangelical and Reformed Church this Thursday afternoon at 2:00 o'clock.

HELLO, FOLKS!

Mr. and Mrs. Melvin Schlei are the proud parents of a baby boy born Sunday, October 19, 1947 at the Garner Nursing home. He has been named Douglas Lee and weighed in at 8 lbs. 4 oz.

Mr. and Mrs. Karl Loeffler, of Belmond, are the parents of a 6 lb. baby boy born at the Belmond hospital on Tuesday, October 14th, 1947. The new arrival has been named Craig Dwight.

Mr. and Mrs. Louis Stahl who live southeast of Klemme, are the parents of a baby boy born Saturday, October 18, 1947.

325 MEMBERS IS SET AS THE GOAL FOR CAMPAIGN DRIVE THIS YEAR

All Girls And Boys Between 10 And 21 Years Of Age Are Eligible

The Hancock county 4-H enrollment campaign is in full swing with 325 members the goal for the drive this year. The membership last year numbered close to 225.

All girls and boys between the ages of ten and twenty-one are eligible for membership in 4-H clubs.

An invitation to join a local club will be given to all boys and girls by leaders and members of the county organizations. Enrollment cards may be obtained from any of the county leaders or from the county extension office in Garner.

The 4-H project is the basis for individual membership. The motto of a 4-H members is learning by doing. Boys will carry an approved livestock or crop project and the girls will enroll in home furnishing.

New members will affiliate an organized club where they have an opportunity for fellowship with other members, for recreation and for studying better methods. Each club develops a program which helps the individual with his project and gives him additional training and experiences for personal living and community service.

The Avery Sunbeams Met

The Avery Sunbeams 4-H club met at the home of Mary Ann Blumer on Saturday, Oct. 11, 1947.

New officers were elected for the coming year. They were as follows: Prseident, Harriet Ostendorf; Vice President, Betty Ann Kramer; secretary and treasurer, Iris Rosendahl; and historian, Lillian Wille. Plans were made for the coming year.

Liberty Busy Bees Met

The Liberty Busy Bees met at the home of Mrs. Aaron Stromer, Saturday, October 11. The meeting was called to order by the president Marjorie Bredlow. Roll call was answered by 10 members. There were two visitors.

The club elected new leaders and officers for the coming year. They were Mrs. Stromer, leader; Mrs. Schultz, assistant leader. Officers are Gloria Haefner, president; Mary Jo Haberkamp, vice president; Marjorie Bredlow, secretary - treasurer; Dorothy Moll, Beverly Haberkamp, reporter for Garner, and Sheryl Bredlow for Klemme.

Darlene Schultz was in charge of entertainment. Lunch was served by the hostess.

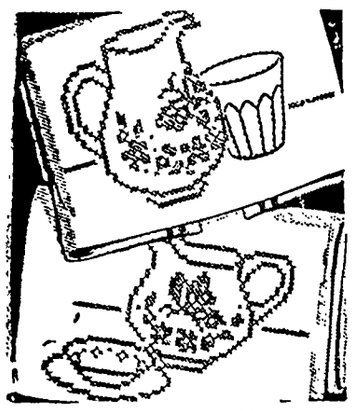
Next meeting is to be held at the home of Mrs. Haberkamp, Saturday, November 15th.

Rural Youth Banquet Oct. 28th

The Hancock County Rural Youth banquet at Memorial Hall in Britt, October 28, 7:00 p. m. will feature Prefessor H. D. Hughes of Iowa State College. Every Rural Youth member will want to hear professor Hughes. The ticket committee is as follows: Iris Abele, Chairman, Arvin Larson, Blanche Anderson, Glen Sloan and Helen Formanek.

E. Lee Hunt of Kirkman was the first man to sign up for the recent Blue Cross hospitalization plan in Shelby county. Recently he set another record for "firsts" he was the first member to be hospitalized, entering the hospital at Carroll for an operation.

Gay Cross-Stitch Beautifies Kitchen



Pattern No. 7032

A LITTLE embroidery goes a long way toward beautifying your kitchen! Look—what simple cross-stitch! Look—what gay designs for towels!

* * *

Here's embroidery youngsters love to do! Pattern 7032 has transfer of 6 motifs about 5½ by 7½ inches.

Our improved pattern — visual with easy-to-see charts and photos, and complete directions—makes needlework easy

Due to an unusually large demand and current conditions, slightly more time is required in filling orders for a few of the most popular patterns

When Your Back Hurts - And Your Strength and Energy Is Below Par

It may be caused by disorder of kidney function that permits poisonous waste to accumulate. For truly many people feel tired, weak and miserable when the kidneys fail to remove excess acids and other waste matter from the blood.

You may suffer nagging backache, rheumatic pains, headaches, dizziness, getting up nights, leg pains, swelling. Sometimes frequent and scanty urination with smarting and burning is another sign that something is wrong with the kidneys or bladder.

There should be no doubt that prompt treatment is wiser than neglect. Use *Doan's Pills*. It is better to rely on a medicine that has won countrywide approval than on something less favorably known. *Doan's* have been tried and tested many years. Are at all drug stores. Get *Doan's* today.

Another Probe Boomerangs

THE inside story is that since investigations of farm cooperatives conducted by the house small business committee, chairmaned by Congressman Walter Ploesner (Rep., Mo.), have become "politically embarrassing," the hearings will be dropped by this committee with the west coast cases. The plan now is for the house

ways and means committee to take over any further probes concerning farm cooperatives.

The chances are that American farmers are more ruggedly individual than any other class of citizens in this country. And you cannot be a rugged individualist and believe in either socialism or communism.

This being true, the fact that a half million more farmers became members of cooperatives the past year, bringing total membership to 5,010,000, may be a refutation of the charge from the small business committee that co-ops are either socialistic or communistic.

On top of increased memberships, although the number of co-ops remained the same at 10,150, business of farm marketing and purchasing co-ops was upped almost a half billion dollars from $5,645,000,000 to $6,070,000,000.

Speaking of cooperatives, the golden jubilee of the Independent Telephone association, held in Chicago on October 14, showed that a large proportion of 6,000 independent companies are mutual or cooperative companies.

* * *

Better Roads Foreseen

Under the federal highway act of 1944 enacted by the 79th congress, approximately 350,809 miles of farm-to-market roads have been designated for inclusion in the federal-aid secondary road system.

The public roads administration reports, however, that of this huge mileage only about 4,600 miles were completed during the 1947 fiscal year at a cost of $55,334,000, of which the federal government contributed $28,768,806. At close of the fiscal year, June 30, work was under way on an additional 12,970 miles which, when completed, will cost $270,420,784, of which the federal government will pay $133,535,561.

The act of 1944 provided appropriations of 150 million dollars in federal funds in each of the first three postwar years for this class of farm-to-market roads and, according to federal officials, it is expected that approximately 430,000 miles of this type of roads eventually will be included in the system.

So it would seem that although the machinery in this federal-state matching road program is moving somewhat slowly the prospects for better farm roads are looking up.

* * *

POLITICAL FACTS—

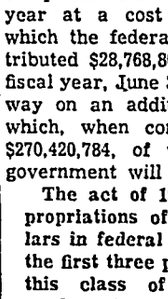
Only three Democrats have been elected to the presidency since the Civil war — Cleveland, Wilson and Franklin D. Roosevelt.

Every Republican president since the Civil war, except Hoover and those taking over the White House from the vice presidency like Theodore Roosevelt and Coolidge, were either born in or elected from Ohio. These include Grant, Hayes, Garfield, Benjamin Harrison, McKinley, Taft and Harding.

* * *

Indispensable Woman

It would appear that Martha Taft, gifted wife of the senator from Ohio,



grabbed off more publicity on the western tour of the Tafts than did the sober, precise senator. Mrs. Taft is considered a much more accomplished speaker than the GOP boss of the senate and, as a matter of fact, is much better liked in official Washington than is the senator himself. However, Mrs. Taft always has campaigned in the senator's bids for office and, recognizing her abilities, he considers her indispensable to his political welfare.

* * *

Farm Fire Toll

In connection with the annual fire prevention observance, the National Board of Fire Underwriters points out that annual destruction by fire of farm and rural property amounts to approximately 90 million dollars. Increases in the use of gasoline-burning farm machinery and electrical equipment have created additional fire hazards. Lightning, however, continues to be the leading cause for farm fires, being responsible for one out of every three rural blazes.

NEWS FOR A PEEPER

By PETER LANGDALE

...was as curious as any ...e'd be who's left her hub... telling him he can look ...y in the future, because ...up with his bad temper ...comes home evenings, and ...first about had enough of ...od polishing and cooking ...room flat for a guy who's ...ch sense of gratitude as ...her has a sense of humor.

...curious because she'd ...this before; she'd never ... They'd only been mar... months, and that's not ... really long enough ... for a girl to know all about what hap... pens when a wife gives her husband the air in writing. She wanted to see how Bill reacted to that note on the dressing-table; ...e took it on the chin and ...to face the world, daunt... wifeless, or whether he ... She hoped he'd crumple.

...the best way to see a ...decided logically, was to ...place where it was hap... keep your eyes open.

...two-fifteen in the after... she had written the note, ...three-fifteen she'd changed ...a few score times, packed ...with a few clothes, just ...ance, and closed the front ...d her with a firm resolu... to darken the threshold ...d Bill went down on his ...d craved pardon.

...Bill was due home at, ...k, the thought occurred to ...nless she hurried she'd ...show, and if she did that ...ould forgive her, least of ...

...reshold was darkened once ...she entered the flat, but ...t look at it that way. After ...e she'd been a little harsh ...darling boy; perhaps there ...thing in this jaded busi... notion, or else why did ...gnates make pictures of ... And then — the spectre ...ke a lively nightmare ... her mind—there was a ...n awful chance, that Bill ...himself with that gun he'd ...during the burglar scare. ...even take to drinking his ...with his pay envelope, or ...ead in the oven.

...there were quite a num... ...gs he might do, and Stella ...think she'd been led back ...by some Fate which had a ...interest in the destiny of ...ples.

...ked into the bedroom and ...d that her missive was still ...t where she'd placed it on ...ing table. So Bill hadn't ...k yet. She was in time to ...disaster and that ugly fol...gh about insanity which ...ays printed in the papers whenever anyone put himself on the spot.

Glancing around the room, the only place she could think of to peek from was under the bed. From this angle, by lifting the frills of the bed-cover, she had a ringside view of the note on the dressing-table.

She'd be able to watch Bill's reaction when he read the note, and then, if he didn't stage a horizontal but went to the drawer where the gun was kept instead, she'd jump out and do her stuff.

She crawled floorwards and wriggled her way into position. Too bad she couldn't have a cushion or two to help her get comfortable, but there wasn't space. The floor was mighty hard, and it wasn't possible maybe . . . maybe he'd make a date with a pre-marriage sweetheart! She hadn't thought of dames before.

But the horror of the idea was crushed out of her by Bill's weight as he sat heavily on the bed and changed his shoes. When he'd got the second shoe on he began to hum. It was a snappy, light hearted tune, the kind a man hums when his spirits are on the boom.

Anger welled up in Stella's heart. He wasn't in the least repentent. A hard, insensitive brute who could watch his quarter-year-bride walk out on him like so much laundry. He had no feelings, and she felt she wouldn't care a hoot if he dropped dead on the floor beside her.

When he'd dressed she saw him,

She wriggled under the bed—a perfect vantage spot for some peeking.

to move much, because the underside of the mattress was so close; an inch lower and she couldn't have squeezed in at all.

Just as her pose was reproducing the first stage of paralysis, the front door opened and Bill came into the hall with a hearty "Hello, darling! You there?"

A few strides and he was in the bedroom. He saw the note and, squinting between the frills of the bed-cover, Stella watched him read it, peer at it, turn it over, and finally fold it away in his pocket.

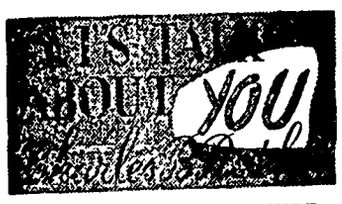
There was dead silence while he stood beside the dressing-table staring blankly into space; deciding whether to use a gun or the gas meter, Stella supposed. She was all set to haul herself out the moment he made for the drawer where the weapon lay. Instead, he opened his wardrobe and, with a deep sigh, took out a suit—a good suit, which he put on.

Stepping out to discuss the problem with a friend, thought Stella, or still humming, write something on the back of her note, fold it in reverse way, and replace it in its original place on the dressing table.

Then he brushed his suit carefully, fixed his tie straight, gave himself the once-over in the mirror, and went into the hall.

Immediately the front door closed Stella wormed her way out from underneath the bed and snatched at the note. This must be some kind of clue to his movements.

She read: "It's much softer ON the bed."



BECOMING A GOOD LISTENER

He's gay, he's debonair, he's popular, he's sought after for his wit and charm. Among his friends are many attractive young women. The other day he was telling me about how he evaluates the personalities in deciding whether to continue their friendship or not, for he is a critical judge of personality and apparently is a man who is hard to please

My friend says that the one quality he looks for, the great quality of attractiveness in a human being, is simply that of showing interest in the other person and in what he is saying.

"Whenever I take a young woman out to dinner for the first time," he explained, "I begin talking. She doesn't know it, but I am giving her a personality test.

"I tell her of some experience of mine. I don't talk about things I'm sure would bore her, but I try to make one of my experiences interesting to her.

"I say something like this: 'I had an interesting weekend a couple of weeks ago. Some amazing things happened to me. It was really funny.' And then I interrupt myself. 'Is that draft bothering you?' I'll ask."

"Then what's the next step?" I asked him.

"Why, I wait to see if she'll ask what happened to me on my trip or whether she will forget it and talk about something else."

"Most of them ask you to go on, don't they?"

"They do not. That's just the trouble. That's why I say that the average man or woman misses a fine opportunity to develop lasting and interesting friendships by not taking a deeper interest in the other person and in what he is saying."

I think that this man has hit upon one of the most vital subjects in the whole field of improving your life—an expressed interest, a sustained interest, a lively interest in the other person.

If you develop that, though you may have none of the other attributes of charm or appearance, you will have a priceless aid in becoming more popular.

And if you want to see how few people actually have developed it, give those with whom you are thrown into contact the same personality test that this man described to me—talk to a person about yourself a little while, then interrupt. Probably six out of ten won't ask you to get back on the subject.

I'll wager that the four out of ten who do are the ones you like and respect the most.

Halloween's the Time for a Party; Plan Your Games for Happy Evening

HALLOWEEN is the night when the witches ride and little children ring doorbells. It's a wonderful time for party-giving and the games you plan should suit the occasion.

* * *

Call your scavenger hunt a witch hunt with dancing paper skeletons and cross-eyed cats among the items to be found. Give a pumpkin to the winners.

Dress your fortune teller up as a witch and watch your guests flock around.

Our booklet No. 60 has party games of all kinds—ice breakers, pencil-and-paper stunts, team games. Send 25 cents in coin for "Games for Good Parties" to Weekly Newspaper Service, 243 West 17th Street, New York, N. Y. Print name, address with zone, booklet title and No. 60.

Law on Stolen Aircraft

The U. S. government had no law that specifically applied to persons involved in interstate flights of stolen aircraft until September 24, 1945, when the National Motor Vehicle Theft act was amended to cover such cases.

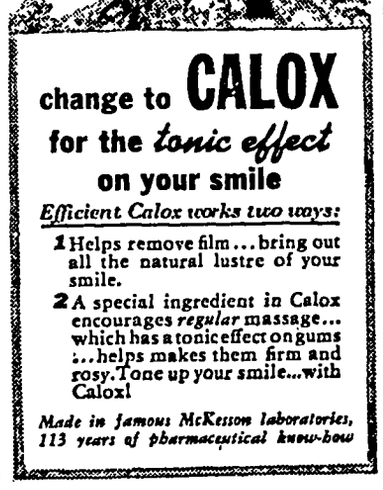
Russia's First Railroads Carried 'Church Cars'

For several decades after Russia's first railroad began to operate between St. Petersburg and Moscow in 1851, the trains running on Sunday and holy days carried, for religious services, one or two "church cars" whose special equipment included stained-glass windows and sacred paintings.

Beware Coughs from common colds That Hang On

Creomulsion relieves promptly because it goes right to the seat of the trouble to help loosen and expel germ laden phlegm, and aid nature to soothe and heal raw, tender, inflamed bronchial mucous membranes. Tell your druggist to sell you a bottle of Creomulsion with the understanding you must like the way it quickly allays the cough or you are to have your money back.

CREOMULSION
for Coughs, Chest Colds, Bronchitis



change to **CALOX** for the *tonic effect* on your smile

Efficient Calox works two ways:

1 Helps remove film ... bring out all the natural lustre of your smile.

2 A special ingredient in Calox encourages *regular* massage ... which has a tonic effect on gums ... helps makes them firm and rosy. Tone up your smile ... with Calox!

PROFITS COME IN MANY WAYS

Some profits are in money saved or earned.

Other profits are in the skill and the knowledge gained from study, experience and training.

Still other profits come from companionship with others.

4-H offers these and many other chances for profit.

Large Number Of Relatives Gathered At Meyer Home Sunday

Mr and Mrs. Eric Meyer had as their guests for dinner Sunday at their home southwest of Klemme:

Mr. and Mrs. Harold Dobbins and son, Mr. and Mrs. Arlo Hall, Mr. and Mrs. Lowell Christensen and daughter, all of Iowa Falls.

Mrs. James Christensen and family, Mr. and Mrs. Clarence Christensen and children, Mr. and Mrs. Otto Meyer and children, all of Deering, Iowa.

Mr and Mrs. LuVerne Christensen and children of Goodell, Bob and Bernell Meyer of Sheboygan, Wis., George Kiutert of Fon du Lac, Wis., Gene Schaefer of Klemme and Mr and Mrs Frank Hougland and Sue Ellen of Klemme.

In all there were 41 people present for the big dinner at the Meyer home Sunday.

Klemme School News

THIRD AND FOURTH GRADE NEWS

—Teacher, Miss Tanner

Every one has decided to work harder this six weeks on Spelling, consequently the following received 100 in their Friday test:

Third Grade
Gary Baack
Martin Brinkman
Beverly Christiance
Janice Stokesbary
Sharleen Swanson
Ronald Trampel

Fourth Grade
Bob Arnold
Roger Bachman
Carol Bridges
Margaret Haefner
Lois Heginger
Ione Rosendahl
Warren Terhufen
David Waddingham

Ray Jennings has been absent from school three days the past week.

The fourth grade have been enjoying funny animal stories in their reading class.

The third grade have been studying about the nests of birds in Science. Several nests were brought to school

Only five of our dental cards have been returned so far.

SEVENTH AND EIGHTH GRADE NEWS

—By Lucille Priebe

We are very proud of the number of peolpe who are taking band work in our room. Maxine Barz and Maurice Jacobs are members of the band and there are 14 others who are taking lessons.

In eighth grade English we are studying parts of speech.

Wednesday we received our report cards. Some were good and others not so good.

In Art we have been making posters on being courteous.

In seventh grade Geography we are beginning to study the Latin countries.

FRSEHMAN NEWS

—By JoAnn Hummel

We are slowly recovering from the shock of our report cards. After test grades we decided most anything could happen to report cards.

In Science, most of us have found the chapter "Sources and Control of Heat," very interesting. During the past six weeks we have done eleven experiments.

The girls in Home Economics have started a new book called "The Girl and Her Home." We have also received five pamphlets from Mrs. Andreae, a dessert magazine, how to bake, and others.

Algebra is now quite easy as we are on the solving of equations.

In English Literature we have been reading short stories. We were particularly interested to learn about the author of one of them, Ruth Suckow, as we have found that she was well known by many people in Klemme and has many relatives here.

The boys in Manual Training have learned how to make mechanical drawings of the sides of a block, and how to use a triangular ruler.

SOPHOMORE NEWS

In English class, we have started on the subject of Literature. We are now studying the short story as one of our stories this week have been on the subject of education. Below are some of the quotations that we have liked:

"You'll find education is the only thing lying around loose in the world, and that it's about the only thing a fellow can have as much of as he's willing to haul away. Everything else is screwed down tight and the screw driver lost."

"The first thing that any education ought to give a man is character, and the second thing is knowledge."

"It isn't so much knowing a whole lot, as knowing a little and how to use it that counts."

SENIOR CLASS NEWS

The six weeks tests are over and we are again settling down to normal. The results proved that some of us would have to study a little harder.

Our Literature interest has picked up some since we stopped studying early American authors and started reading stories.

Religion is one of our many topics in Sociology. We found that the Methodist body was the largest Protestant body.

In Bookkeeping we are learning how to keep personal accounts.

The Speech class is planning a play, and judging by the characters and the director it really should be excellent.

We are all looking forward to our school party Friday night. We are going to have a magician, dancing and lunch. Doesn't that sound like fun?

—By Shirley Stille

Household Hints By Mary Jane

By placing cut drinking straws in a berry or fruit pie before you put it in the oven, the juice will rise through the straws while baking, and will not spill over the edge of the pie in the oven. Any woman who has had to clean spilled juice in an oven will welcome this tip, because it saves a messy disagreeable job, keeping juice in the pie where it belongs.

When you wash the children's corduroy clothes, turn them inside out to avoid lint, and just rinse them and hang on the line to dry, never wring them in the wringer or by hand, as it spoils the ribbed effect.

When you wash your washable gloves, get them nice and clean and rinse them and fill them with clean water and hang on the line to dry. This way the fingers will be in shape and dry nice and smooth.

Hancock County Farm Bureau Annual Meeting

The annual meeting of the Hancock County Farm Bureau will be held November 3, at the Garner High School according to President Jack Dethmers.

Mr. Jack Dethmers of Garner who recently returned from a trip to Europe has been chosen as main speaker of the evening.

An important part of the annual meeting program will be the discussion and adoption of the official resolution for the county organization. All members are urged to be present and to participate in the discussion concerning the resolutions, Jack Dethmers said.

He emphasized the fact that the resolutions make up the official policy of the county organization and that after they are adopted it is too late to change them. "If we are to have unity of purpose in carrying out our Farm Bureau Program," he said, "it is necessary that we have unity of thought in developing it."

"It is from the 100 county Farm Bureau resolution that the official policies of the Iowa Farm Bureau are developed," he said. "Therefore, it is doubly important that all members know what their county organization has recommended," he concluded.

If the resolutions pased by the county Farm Bureau relating to statewide problems are accepted by the majority of the delegates at the I. F. B. F. annual meeting, they become the official policies of the Iowa Farm Bureau.

Thieman-Beiber Wedding

Miss Stella Thieman, eldest daughter of Mr. and Mrs. Geo. Thiemann was married Saturday, October 18th to Mr. Earl Beiber of Marion, Iowa.

Mr. and Mrs. George Thiemann have issued invitations to a reception honoring the couple, to be held at the Klemme Community Hall Sunday afternoon, October 26th, at 2 p. m.

Picnic Held

The following enjoyed a picnic dinner at the home of Glenn Bier Sunday: Mr. and Mrs. Warren Bier and Fonda of Klemme; Mr. and Mrs. Carol Enobnit and family of Swaledale; Mr. and Mrs. Mel Ver Helst and family of Goodell; and Mr. and Mrs. Ed. Houpe and Margaret of Goodell.

FIRE CAUSES $15,000 LOSS NEAR GARNER

Fire causing a loss estimated at $15,000 destroyed two large barns, a granary containing the entire 1947 oats crop and all the farming implements on the place except those being used in the fields at the Elizabeth Meinders farm tenanted by Vic Simmons a mile west of Garner at 2:30 a. m. Friday.

The fire also damaged a silo, all the hay and straw, a John Deere tractor valued at $2,000 which he just got Monday after waiting 2 years, and it spread to an adjacent corn field, but this blaze was extinguished by the Garner fire department and neighbors. They also saved a double corn crib.

The barns had just been freshly painted Thursday but it is thought this had nothing to do with the origin of the fire even though it may have hastened its spread.

The cause of the fire had not been determined Friday morning. It was discovered by a Fort Dodge trucker who happened to be passing by and awakened members of the family.

MEET THE MIGHTY MOKO!

He bends iron bars like hairpins. He makes confetti out of telephone books. He tosses bar-bells around like paper-weights. He's terrific! He's colossal! He's the strongest man in the world!

But not even the Mighty Moko—with all that fabulous strength—can do as much work in a day as 4c worth of electricity!

Truly, giants leap to your bidding every time you flip a switch—willing *electric* giants ready to take the burden of hard work from you. Ready to help you sew and cook and clean—to guard your food—to make life easier, healthier, more comfortable for all your family.

And these giants work for the lowest wages in history! Never has electricity done so many tasks—for so little cost—as it does for you **today.**

Listen to the Electric Hour—the HOUR OF CHARM. Sundays, 4:30 P.M., EST, CBS.

Central States Electric Company

BURNED

Rosalie, 4 months old daughter of Mr. and Mrs. Ronald Fraser of Algona, has so far found it rather rough going in this vale of tears. First, she was born prematurely and her health was a matter of toush-and-go for awhile. Last week she grabbed for her food, spill a pan of hot water on her and was scalded from waist to chin. She is now on the mend.

Check and repair roofs to cut down danger of fire from sparks.

Card Of Thanks

I wish to thank my relatives and friends who remembered me with cards and letters sent to me while I was a patient in the University hospital at Iowa City, and also at home.

Mrs. Erwin Nuehring. (1tp)

We wish to thank all who sent us cards and letters and who paid us visits while we were at the Hampton hospital. Also thanking all who helped us in any way. Mrs. John Howell and son, Michael John. (1tp)

I want to take this means of expressing my sincere thanks to all who sent me cards, letters and gifts and who visited me while I was a patient at the Mercy hospital. Your kindness is greatly appreciated.

Mrs. Hemo Beek. (1tp)

We wish to thank the Klemme Fire Dept. for their promptness in arriving at our home Sunday when the alarm was turned in when the roof was ablaze, and which was quickly extinguished with but slight damage. We also thank Mrs. Lloyd Lau for relieving Mrs. Jones at the telephone exchange following the fire. Mr. and Mrs. Bert Jones. (1tc)

We wish to take this means of expressing our sincere thanks to all who helped make our Silver Wedding Anniversary a day we will always remember. We also want to thank those who presented us with gifts and who planned and prepared the dinner and program at the church.

Mr. and Mrs. G. A. Goll. (1tp)

CARD OF THANKS

We wish to thank everyone who remembered us with cards, letters, flowers and gifts during and after our stay in the hospital. Your thoughtfulness was greatly appreciated. Mrs. Asa Arnold, Rosalyn and Marilyn. (1tp)

I wish to use this means for expressing my sincere gratitude to the Klemme Fire Department and to the many other friends who responded to the call Sunday afternoon when fire destroyed a small shed and threatened other buildings.

Mrs. C. A. Arnold. (1tp)

STATEMENT OF THE OWNERSHIP, MANAGEMENT, CIRCULATION, ETC.

Required by the Act of Congress of August 24, 1912, as amended by the Acts of March 3, 1933, and July 2, 1946.

Of The Klemme Times published weekly at Klemme, Iowa, for Oct. 1, 1947

STATE OF IOWA ss.
COUNTY OF HANCOCK

Before me, a Notary Public in and for the State and county aforesaid, personally appeared R. A. Jorgenson, who, having been duly sworn according to law, deposes and says that he is the Publisher and owner of The Klemme Times and that the following is, to the best of his knowledge and belief, a true statement of the ownership, management (and if a daily, weekly, or triweekly newspaper, the circulation), etc., of the aforesaid publication for the date shown in the above caption, required by the act of August 24, 1912, as amended by the acts of March 3, 1933, and July 2, 1946 (section 537, Postal Laws and Regulations.)

That the names and addresses of the publisher, editor, managing editor, and business managers are R. A Jorgenson, Klemme, Iowa.

That the owner is (If owned by a corporation, its name and address must be stated and also immediately thereunder the names and address of stockholders owning or holding one percent or more of total amount of stock If not owned by a corporation, the names and addresses of the individual owners must be given. STILL RUNS

About two years ago Francis Kerr of Harlan lost his watch; a prized heirloom which had been carried by his father. A few days ago, while clearing some ground for building a shed, he turned up the watch with his spade. He wiped it off, gave the stem a few turns. It started running again and hasn't stopped since. Mr. Kerr is state representative of Shelby county.

Use care in burning weeds and trash around your buildings and fences.

Phone your news to 12.

Christmas Cards

The Times Office again features a full line of Christmas cards of all descriptions: Religious, Every Day, Comic, Cards for the Kiddies, too. From the lowest price to the most expensive engraved style. (tfc)

From where I sit ... *by* Joe Marsh

"Take Pen in Hand"

This column has been running for so long that its readers, in towns like ours all over the country, are beginning to "take pen in hand" and write us what they think.

Some of them take me over the coals for what I say—like the column I ran on planting alfalfa. Others write, "I liked your column yesterday, *but*...." All of them have different points of view.

From where I sit, that's the way it should be. Everybody's entitled to an opinion—and it's those very differences, and friendly criticism, that make for [illegible]ance and better understanding—whether it's ideas on planting alfalfa or choosing between beer and cider.

The more folks air their differences right out in public, with a neighborly respect for the other person's liberties and point of view, the closer we are to the American principle of individual freedom—whether it's in a choice of crops or beverages.

World Council Will Stand Or Fall on Public Opinion

By BAUKHAGE
News Analyst and Commentator.

WASHINGTON.—Here are some more notes from a reporter's notebook (of course, reporters don't really carry notebooks—they write on whatever is handy—this is a menu) at the United Nations.

Some of the people who are reading this column attended sessions of the United Nations. I think I recognized some of you. It was hard to get in because so many nations felt this session was so important that they brought much larger staffs than ever before. These "extra" workers couldn't sit in the seats reserved for delegates, nor the news people's, so they were given seats ordinarily handed out to the public.

For those of you who stayed home and listened to the radio or read the reports in the paper—well, what impression did you get?

Your impression is highly important, as I'll try to point out later.

There was, and is, this danger, which Trygve Lie, secretary general of the United Nations, pointed out in a speech which stirred all the delegates who heard it (and you, too, I imagine, if you were listening) when he summarized it afterward over the ABC network.

Baukhage

Lie said: . . . "the peoples of the world, and many governments as well, are shocked, frightened and discouraged to find that those same nations which created the United Nations so openly disagree." He called for a rebirth of the "San Francisco spirit," the spirit which we all felt in those hopeful days when the United Nations was born.

A colleague of mine, a most restrained and thoughtful commentator (Pauline Frederick, with considerable experience here and abroad) told me something which is worth repeating. She was interviewing Eleanor Roosevelt at a luncheon at Hyde Park. Whatever you may think of Mrs. Roosevelt's domestic politics you must know in what high regard she is held as a member of the American delegation to the United Nations.

My colleague asked her if her heart weren't heavy over the world situation today. I haven't her exact words here, but Mrs. Roosevelt replied in the negative. She said we had expected too much too soon from the United Nations. And then she went on to point out what so many of the delegates have said, namely, that faulty and ineffective as the United Nations may be, it is far better than nothing. How many times have I heard that from even the most cynical of the reporters and observers here!

As the New York Times remarked in a recent editorial, "it cannot be stressed too often that the struggle brought to a head in this session of the general assembly is not against the Soviet Union but FOR the United Nations." The most striking thing, the editorial added, is "the determination of the United Nations (that means the member nations) to survive.

• • •

One strange phenomenon which appears to persons not too well acquainted with the ways of such gatherings is the friendly and entirely normal manner in which the delegates to the United Nations who attack each other on the rostrum, consort in the corridors and lounges provided in the two buildings which now temporarily house the executive council and the general assembly, respectively. That's nothing new to people who have covered congress.

• • •

Dispensing of News Is Vital to U. N.

The longer I serve, covering these meetings, the more I realize that the most important of all the groups, not excluding the delegates themselves, are those which serve to dispense the news and information concerning the United Nations.

It would be impossible, of course, for enough people to visit the sessions to affect public opinion greatly. But many of the people who do come go back with a message which stirs great interest in the organization in their communities. Proof of this interest was contained in the report of the secretary general, Lie, when he said that information had been sent out and other steps taken in cooperation with a thousand meetings in the past year.

But more important than anything else are the actual reports of press and radio direct from one or the other of the two headquarters, or as a result of the many interviews with members of the permanent secretariat.

Here is what they've done with radio alone:

During the general assembly, the radio division of the department of public information will broadcast for 12 hours a day, while visiting radio commentators, using facilities leased by the United Nations, will cover the debates for listeners in 16 countries.

The French, Spanish, Chinese and Russian sections of the radio division also are preparing to broadcast adaptations of one of the U. N. programs which will be offered in transcription to stations unable to relay the original broadcast.

The two services most widely relayed, because of the high quality of reception, are those in Spanish (to Latin America) and in Chinese. The programs all carry the latest news on work of the assembly and other United Nations bodies, interviews with delegates, background talks, recorded excerpts from speeches in debate and short features.

• • •

As the bickering and obstructionism increased at the current session and it became clear that confidence in the United Nations was being undermined, the importance of the work of the agencies distributing information concerning the topics discussed by the general assembly, became more and more evident. The reason was this: It became clear

TRYGVE LIE
". . . San Francisco spirit . . ."

that under the present structure of the United Nations, where a unanimous agreement on the part of the major powers before major steps could be taken, is required, the only force behind the whole idea is the force of public opinion.

As this is being written, the question of the report of a committee on tele-communications is being discussed. The plans envisioned by the men on the United Nations who realize the importance of strengthening the opinion-forming force of the organization, are not too grandiose to be practical but they do involve expenses which make their completion uncertain. Nations of the world are all feeling the pinch of poverty and there is a strong move to cut expenses.

A part of the tele-communications plan was a radio network which would dispense objective world news for all the world. To show you how well the meagre efforts along those lines already have succeeded, I was told by the radio liaison division that even the Russian reporters who, as you know, work for newspapers which are under a strict censorship, which permit no news which doesn't suit their needs, have begun to ask for items issued by the United Nations because they are so fair, so objective that no one could accuse them of containing propaganda for any one nation.

The men on the staff of the United Nations are not all perfect. There are a number of weak sisters. But on the whole, it is surprising to see how the majority of them has been able to develop a world-wide viewpoint, an attitude whose whole policy is based on world understanding and the perpetuation of peace.

PAST AND PRESENT PRESIDENTS . . . Unusual indeed is a picture of the President of the United States chatting with a predecessor in his office. The occasion here was the naming by President Truman of former President Hoover to the chairmanship of a 12-man commission to study plans for reorganizing the federal government.

NEWS REVIEW

Urge Food Conservation; New Battle Shakes U.N.

DIATETICS:

Waste Less

Lips that sincerely frame the words "food conservation" will not touch such sturdy edibles as meat, poultry and eggs quite so often hereafter.

Charles Luckman, head of President Truman's citizens food committee, opened the widely heralded "waste less" campaign by calling on the American people to cut their consumption of those three items, thereby effecting a conservation of grain for Europe.

At the same time, it was disclosed that stop-gap aid for Europe this winter may run as much as 800 million dollars—220 million more that Mr. Truman had estimated earlier.

The appeal for Americans to cut down on the amount of foods requiring grain feeding was couched in a five-point program which, if followed, will eliminate the traditional race for the last chop on the platter—it won't be there.

Those five diatetic commandments were: 1) Buy cheaper meat cuts) 2) Don't serve too much; 3) Don't overcook meat; 4) Use leftovers; 5) Save wheat in all other possible ways.

In the future was the possibility that a voluntary program of meatless days and a reduction in the size of bread loaves would be put into effect.

NEW FIGHT:

Recalls Yalta

In the U. N. another scarehead of possible failure and collapse of that organization arose as the U. S. and Russia plunged into a new skirmish.

The issue: Which nation shall succeed pro-Russian Poland on the security council. Poland has represented eastern Europe and the Slav bloc for two years. Russia wants the Ukraine, which, although an integral part of the Soviet Union, have a separate U. N. delegation. U. S. contention is that the Ukraine is not a sovereign nation, therefore does not rate a separate status.

In the background of the affair was the Stalin - Roosevelt Yalta agreement which gave the Soviet Union three votes in the United Nations. Russia proper, the Ukraine and White Russia each has one.

How the U.S.S.R. came to get three votes probably happened something like this: Both the Ukraine and White Russia, intensely nationalistic, did not like to lose their identities by being merged with greater Russia. The Communist politburo, therefore, as a sop to their nationalism, granted the two territories a sort of nominal independence.

At Yalta, then, Stalin told Roosevelt that he wanted the Ukraine and White Russia to be represented in the U. N. for "internal reasons." F.D.R., being an old politician and sympathetic with "internal" difficulties, agreed.

Thus, the stage was set for one of the most serious battles yet to develop within the United Nations.

Income Disparities

"Real income" of wage and salary earners continues to drop, while farmers' income still is rising, it has been revealed by a monthly Investors Syndicate survey of purchasing power. "Real income" is the relationship of revenue to the cost of living.

Wage and salary earners now have only about 96 cents of buying power for each dollar a year ago, while farmers have approximately $1.09.

At the same time, the biggest cause of the wage earners' problem is the sharp rise in the price of food. The average family now pays more than $1.31 for the same amount of food that a dollar bought a year ago. It also pays $1.06 for each dollar on rent, $1.18 to the 1946 dollar for clothing and $1.23 for miscellaneous expenses.

"This continued divergence between farm and city buying power," the survey pointed out, "indicates that a serious unbalance may threaten the stability of our economy. A close balance is essential."

RECOGNITION:

Playing Safe

Not as a gesture of approval, but rather as a means of keeping informed of internal developments did the United States grant full diplomatic recognition to the Communist-dominated government of Bulgaria.

Robert A. Lovett, U. S. acting secretary of state, said that the action meant neither that this country approved nor condoned "certain recent actions of the Bulgarian government."

Although he did not say so, Lovett obviously referred to Bulgaria's execution of Nikola Petkov, leader of the opposition to the Communists.

Previously, recognition of the Bulgarian government was withheld on the grounds that the pro-Soviet regime had been elected unfairly, but now the U. S. felt that it was more important to have an embassy in the country to protect American interests there.

LITTLE HOPE:

Less Coal

There is little or no hope springing in the collective breast of official Washington that the coal shortage this winter can be averted.

Current estimates place coal production as running several million tons a month behind exports and domestic consumption, principally because of the coal car shortage. This has resulted in winter stockpiles depreciating instead of growing, as they normally would.

It was hoped at first that some relief would come when winter weather stops or curtails road-building and construction, thus permitting diversion of sand and gravel cars to the coal fields. However, a railroad spokesman said the diversion of such cars would do nothing but offset a normal 10 per cent drop in railroad efficiency in winter.

SAME AS IN 500 A.D.

Pacific Journey Made on Raft

Dr. Thor Heyerdahl, 32-year-old Norwegian enthnologist and zoologist, had a theory that the first Polynesians were blue-eyed blondes who floated over to their Pacific islands from South America on rafts in about the year 500 A. D.

What he did about proving that theory now is history. He and a party of six men built themselves a primitive raft of bamboo and balsa wood, climbed aboard and set themselves adrift at Callao, Peru.

Exactly 101 days later the scientific group drifted ashore on their raft, the Kon-Tiki, at Raroia reef in the Tuamotu archipelago, center of their target. They had used no motors, oars or sails. Their only means of propulsion on the 4,300-mile trip had been the Humboldt and South Equatorial current.

That, said Dr. Heyerdahl as he landed in San Francisco en route to Norway, provided "indubitable proof" of the veracity of his theory.

"The fact that we made the journey demonstrates it could have been done around 500 A. D., when the Polynesians were first populated," he said. "Expert navigators said it couldn't be done, that the balsa wood would sink, that it was impossible; but it wasn't."

He related that the current and wind sometimes carried the raft as much as 71 miles a day, sometimes only 9 miles; but that "we always moved westward." The raft was 45 feet long and 18 feet wide—a virtually infinitesimal craft on which to cross the vast sweep of the Pacific.

With true scientific objectivity, the men ate a little of everything that came their way during the course of the journey—fish, small crabs that walked on the ocean, seaweed and plankton. Plankton, was described as a semi-microscopic sea life, both animal and vegetable, which was "like shrimp paste."

Cost of the expedition, estimated at $40,000, was financed by Dr. Heyerdahl through funds of his own and by borrowing money.

Sportlight by Grantland Rice

THE toughest job in sport isn't sinking a six-foot putt in a pinch—or emerging from a heel print in the sand. It isn't throwing a 40-yard pass—or pitching to a clutch hitter with the bases full. It isn't umpiring a baseball game.

If you care to hear the correct answer it is working as a football official. The baseball umpire has a setup in comparison. Hurry-up Yost of Michigan told me once that he doubted that any play was ever run off in football that was completely minus some form of penalty—off side, starting too quickly, holding, illegal interference, pass interference, illegal use of hands or other infractions.

Grantland Rice

Here you have 22 keen, active, overeager young men scattered over a good part of the field in a game that is packed with penalties. No four sets of eyes can follow every infraction, especially on the part of those who know how, when and where to slide by a rule.

I'd like to say here that no set of officials work harder, train harder or try harder than 90 per cent of all football officials. They are honest, intelligent, well-selected, and they usually take a deep pride in their work.

But they are up against an impossible job. Having worked five years as a football official in the South, before groping later for the older age of hazy reason, I have found it somewhat difficult to ride officials who have impossible jobs to handle.

There is holding, of one sort or another, on almost every play. Ask some of the players in the line—who have been jerked off balance by a quick hand, a movement that took less than a split second.

Or this matter of pass interference in the rush and jump for the ball—or the split second start of the backs—or the smart ones who know how to time and beat off side by half a stride.

It isn't too easy to say which penalties affect a play—and which don't. But this is where the smarter officials come in—where in other years, Ed and Tom Thorpe were supreme—two of the best football ever has known.

Certainly too much whistle and horn blowing can wreck any game, coming from too many over-conscientious callers, who now and then have the idea they are the afternoon's main attractions. But this doesn't happen often.

An official with sound, sane judgment in handling a game, where one close decision can make or break either team, is football's major asset. But don't let anyone tell you it isn't a tough assignment—the toughest one I know in sport.

The horn is certainly no instrument of merriment or melody.

All Bowled Over

Old King Cole now has more bowls than he ever dreamed about as he called for his Fiddlers Three and proceeded to get pie-eyed. But the two big money bowls are the Rose and the Sugar, where the two capacities are 93,000 and 73,000 at $4 a crack.

Not a bad financial goal for those lucky enough to crowd into the final picture, although this cash is scattered around as far as the Rose Bowl is concerned. Here, no one makes any big killing. Which is the way it should be. College football still has a long way to go in getting away from too much finance.

New Golf Champion

More than a few followers of the ancient and well-trapped green want to know more about Skee Riegel, the new amateur golf champion of the U. S.

Skee is much better known in the Far West than he is throughout the rest of our bunkered domain.

The impression seems to be that some rank outsider has taken over the amateur throne of golf. This idea is strictly incorrect. Only a fine golfer could have won over the Pebble Beach test, one of the toughest in golf.

What sort of a golfer and what brand of a fellow is the new champion—meaning Mr. Riegel?

We took this problem to Al Ciuci, one of the best golf instructors in the country, now in charge at Lakeville, Long Island.

"I can tell you this," Ciuci told me. "A worthy champion and a fine fellow now wears the crown. Craig Wood and I worked with Skee in 1941, when he had been playing golf only three years. He was then in the high 70s. He had come along in a hurry because he wanted to learn, and he was willing to practice all day.

"Here's an odd angle on Skee. They call Frank Stranahan 'Muscle' Stranahan or 'Mr. Muscle.' But in my opinion Riegel is much stronger than Stranahan. They ought to call Skee, 'Double Muscle.' I've never seen anyone close to his weight, 185 pounds, with such powerful upper and forearms. Skee is what I'd call a power hitter, or a smash hitter

Few Barred for Throwing Ball Game

Since major-league baseball was organized in 1876, no more than 15 of the 7,000 players connected with it have been permanently barred for throwing or attempting to throw a game or for concealing knowledge of such a plot. them were four members Louisville team in 1877, members of the Chicago Sox in 1919 and two mem the New York Giants in 19

Wonderful NEW IDEA!

MATCH YOUR *Kem-Tone* WALLS

with the exciting NEW COLORS in

ACME PAINTS

NOW I CAN CARRY MY KEM-TONE COLOR SCHEME ALL THE WAY—EVEN INTO THE KITCHEN!
The modern miracle wall finish
Kem-Tone
ENAMEL-KOTE
ACME QUALITY

Now you can extend your Kem-Tone color scheme throughout the house—from living room to nursery, from bedroom to bath. For ACME now makes paints in glorious colors specially designed to match, harmonize or contrast with your Kem-Tone walls. With the exciting new Acme colors for woodwork, furniture, floors and kitchen and bathroom walls, you can bring all your rooms into glorious color harmony. Acme White Lead & Color Works, Detroit 11, Michigan.

THESE ARE THE PAINTS!

WOODWORK & FURNITURE: Acme Enamel-Kote—Brilliant finish, easy to keep bright and gleaming.

WALLS & CEILINGS in kitchen and bathroom: Acme Semi-Gloss Finish—smooth, washable with *lasting luster*.

FLOORS: Acme Floor & Porch Enamel—gives new life to tired floors; resists water and wear.

NATURAL WOOD SURFACES: Acme Varno-Lac—stains and varnishes in one easy operation. Makes old wood look like new, new wood like a million.

Acme House Paint, too!
Gives longer-lasting beauty because it's especially made to fight action of wind, dust, rain and snow.
HOUSE PAINT

ACME PAINTS

One of America's Great Institutions Founded In 1864

Acme means high-quality paints, automobile finishes and insecticides. Largest maker in many fields, a leader in all.

TH SERVES . . . The spirit of service prevails as Camp Fire throughout the country extend a helping hand to those in need. cal example is the Camp Fire Girls camp at Dallas, Tex., where cases (shown above) are taught how to swim.

DS IN NEED AND DEED

ful Service Is Watchword Camp Fire Girls' Program

WNU Features.

"Youth must be served," say the oldsters. "Youth serves," the Camp Fire Girls. By spreading a spirit of friendli- by being more neighborly, Camp Fire Girls across the try are going forward extending the right hand of friend- to those in need.

In Sherman, Tex., an enviable record of service is being e by Camp Fire Girls, who are making four trips a month e Veterans' hospital in McKinney, Tex More than 63 girls wheeled ambulatory cases to pageants, picnics, baseball s, dances and camp shows. In ay these young people have ulated more than 947 service Each girl pays her own portation in an army bus to from the hospital. The older wheel the patients; others ide musical entertainment, set croquet, archery, dart boards ther sports equipment. Still groups prepare picnic lunches roast weiners over an open fire.

Brighten Invalid's Life.

ther example of friendly serv- illustrated in Portland, Ore., e Camp Fire Girls are active e "Chin-Uppers," an organiza- composed of people who, by n of physical disability, are d from many activities. The agal Horizon club (Camp senior group) has adopted "Chin-Upper" as its own l project. Club members pay regular visits, bringing gifts flowers, thus helping to make tedious hours of invalidism ter.

ng members of the Reading- county council of Camp Fire participate in a project to bring cheer to patients in ading, Pa., hospital. The girls ch tray favors which gladden Dimes at the institution.

Aid Polio Drive.

ring this year's financial cam- of the Silver Bow chapter of National Foundation for Infan- Paralysis, in Butte, Mont., Camp Girls in that city did their bit combat polio by addressing rch-of-Dimes folders.

When fire completely de- oyed the home of a Battle ek, Mich., veteran and his e, a few hours after the birth their child, the Camp Fire rls made a house-to-house vass in the community and llected $181.27 for the home- s family.

ring the Christmas season a received a helping hand from re, Calif., Camp Fire Girls, made puppets for the Chil- 's hospital in San Francisco. hundred puppets were made, gh for each patient in the hos- , and each gift was accom- ied by a personal greeting card the young puppet maker.

ertainment for shut-ins is on Camp Fire agenda too, as is n by a project of a Fargo, D., group. The girls visited the stown Crippled Children's e and put on a program of , dancing, readings and songs. group also presented the pa- ts with 63 baskets of candy and ration of $5 from the group urry.

ese are all real examples of third part of the Law of the p Fire Girls—"Give Service" d the results of the overall p Fire program which promotes peration, understanding and ac- ance of responsibility among e than 360,000 girls throughout country.

mp Fire's Membership March, ch opened in September, will con- e until November 30, and the or- ation invites girls of all races creeds, between the ages of 7 18, to "Be Friendly — Make eds — Join the Camp Fire !"

Man Waits 49 Years For First Pay Earned

WINFIELD, KANS.—Nearly half a century late, Ed Brant finally has received the first nickel he ever earned.

Back in September, 1898, Brant, then a pupil at the Akron, Kans., school, was paid a nickel by the teacher for sweeping out the room. In his excitement over receiving his first pay, Brant dropped the coin and it rolled through a crack in the floor. There it remained for nearly 50 years.

When the old school was torn down recently, the tarnished coin was recovered from the debris.

Financially, Brant figures he is the loser, explaining that the coin will not buy more than a fifth of what it would have back in 1898.

Single Inhabitant Now Lives in Once Rip-Roaring Town

HELENA, MONT.—Once a roaring boom town boasting 10,000 population and the center of a gold field dubbed "the richest acre on earth," Diamond City, Mont., would qualify as a ghost town if it weren't for a solitary house and a single individual.

The individual is E. B. Robison, who for nearly 30 years has lived in the former rip-roaring town a few miles southeast of Helena. For most of the time he has been the only inhabitant.

Robison's log house, once a drug store and later a stage coach office, is the only building remaining. Other buildings that once lined Confederate gulch have been moved away or buried. Roof-trees can be found 30 or 40 feet beneath the earth, washed down by hydraulic operations.

Memories still haunt the silent slopes of the gulch, where young trees have started to heal scars gouged by early prospectors. When Robison first went there in 1918 from Idaho, about 15 of the town's original miner-inhabitants still were conducting small-scale operations.

The community started about the time of the Civil War. Four southern soldiers made a strike—hence the name Confederate gulch. The rush that followed brought the city's population to some 10,000. Seven thousand voted in one election. There were 32 saloons.

Early-day miners declared Confederate gulch yielded $180 to the pan. But that record was forgotten when German, or Montana, bar yielded more than $1,000 per pan.

Robison declares $7,000,000 was removed from Montana bar

Two-Faced

ANNVILLE, PA.—A two-headed calf was born to a Holstein cow owned by Harvey Sweigart. The calf's head broadens in front of the ears to form two distinct faces. Although possessing the normal two ears, the animal has four eyes, two noses and two mouths.

eball Fan Builds Park for Youngsters

VERLAND PARK, KANS.—Be- e be "likes to watch the kids y ball," Christian G. Segner, 62, a ball field complete with , a grandstand seating 700 ms, dressing rooms and, as a rning touch for youth, a soda stand.

gner, who lives a block away the stadium, purchased seven and cleared them off. Total of the whole project, he reports, was about $15,000.

The park, which was opened in May, has been in operation every night except Saturday.

Always interested in youngsters, Segner explains that he "just wanted to give the kids a place to play." Occasionally he fills in as an umpire. But the high point comes when a youthful team manager gives him the nod to take over the pitcher's mound.

WITH THE COLUMNISTS

DREW PEARSON

Future Giants of Army

THE flight of a pilotless army plane across the Atlantic gave the first real hint that the air corps is quietly building a nucleus for the use of robot planes in every type of warfare. Officially this nucleus is known as the experimental guided missile group, a specialized unit whose activities are clouded in secrecy But in time of war, the tiny guided missile group may spring into the young giant of the army.

Located at Eglin Field, Fla., this unit has not only V-2 rockets, but also pilotless planes, under its scope. Its pilots and technicians can sit at the controls of a m plane and guide a squadron of bombers over a target several miles What is more, they actually can see the target—by television.

Chief problem now stumping the guided missile group is how to operate without a mother plane, or without radio navigation beacons in the country to which the plane is flying. The pilotless bomber that flew the Atlantic to England could not have landed in enemy territory. Radio guides in England helped it land.

Another difficulty is the electronic brain which now pilots the ships. It is too cumbersome.

All these problems are being mulled over behind locked doors at Eglin Field, which may become one of the most important air bases in the world.

In their spare time, the young scientists at Eglin Field have figured on paper that they could shoot a plane to the moon by packing a booster charge which would explode after it reached the ionosphere (100 to 150 miles up). They haven't yet figured how to bring the rocket back, or any practical reason for wasting millions of the taxpayers' dollars on the experiment.

WALTER SHEAD

It's the Cost of High Living

IT MIGHT very well be that what the country is suffering from most right now is the cost of high living instead of the high cost of living. There is no question but that in maintaining our high standard of living the American people are eating more and better than ever before. But the fact remains that we are fast using up our reserve of savings and approximately 25 per cent of the people this year are spending more than their income.

The federal reserve board has just issued figures showing that for the first half of 1947 savings in the nation amounted to only 6.8 per cent of income, or about 11 billion dollars, as compared to 17 per cent of income in 1945 amounting to 29 billion dollars.

With the highest national income in history, about 67 per cent of the farmers were able to save some money and 20 per cent put away more than $1,000 in 1946 But they paid off a lot of mortgages and other debts

Playing the Food Market

("So hectic were the changes in food prices that bidders followed quotations the way bullish spectators followed stock market prices in 1929.")—News item.

—•—

"What's American Barnyard Hen-Egg?" we asked our broker today.

"Well, you know about eggs, they can drop, in fact, they have to. The tendency of an egg is to come down rather than go up."

"Would you say we could put a egg away and forget it?" we asked

"Hardly," our broker admitted, "even with the best refrigeration."

—•—

"How's lamb doing in this market? A friend of mine gave me a tip on it."

"Lambs are fast movers," was the reply.

"I noticed that last night while trying to go to sleep," we said.

—•—

"How is milk acting?"

"We're cowish on milk, not bullish," our broker answered.

—•—

"What are hogs doing?"

"Very good. The Three Little Pigs reached a new high at the opening, and the Little Pig That Went to Market has been cornered."

PAUL MALLON

Tax Reduction Is Likely

A DEMOCRATIC senator back from the Rockies says people are not much interested in tax reduction. His vote for the Truman veto was not protested by his constituents. Other Democrats back this view. In fact, they back it so well as to suggest a concerted plan has been made to talk along this line

A Republican from the western farm belt found exactly the opposite situation, unsurprisingly, in his nearby state. He says people are alive to the needs of venture capital and tax reduction, and are not overconscious of the high public debt. Personally, I have found few taxpayers who were not interested in tax reduction.

The Republican reports mean a reduction bill, possibly stronger than last year, will be enacted early in the session before the primary elections, as Republican finance authorities in the house now are advertising.

They may revise income base rates almost entirely, may make no difference in capital gains, although excises may be cut in half (from 20 down to roughly 10 per cent). Any bill undoubtedly will be retroactive until next January 1. It will not get to Mr. Truman's desk until February or March, although Republicans are likely to make it the first order of business.

WRIGHT PATTERSON

Incentive Pay in Britain

PAYMENT of incentives to British miners as a means of producing more coal was recommended by Lewis H. Brown, chairman of the board of Johns-Manville corporation, after a two-month trip to Europe, made at request of Gen. Lucius D. Clay, commanding American occupation forces in Germany

In all probability this proposal would work, but can it be expected that a socialistic government will violate the basic and fundamental principle of socialism that provides for an equality of distribution of everything for everybody, regardless of individual effort or ability?

The BIBLE TODAY

International Uniform Sunday School Lesson

By LOIS D. NEWTON, B.D.

SCRIPTURE: James 1—2; Matthew 25:34-46.
DEVOTIONAL READING: Matthew 7:15-27.

Religion in Practice

Lesson for October 26, 1947

SUNDAY'S lesson takes us to one of the practical Christian preachers of the New Testament. Please open your Bible to the Epistle of James, and read especially the first two chapters. James was a man of great faith, but he realized, as we must realize, that faith is best expressed in works.

Dr. Newton

Then read Matthew 25: 34-46, and for the devotional lesson, read Matthew 7: 15-27.

When you shall have read these passages, you will then be ready for the consideration of religion in everyday life.

• • •

A Cup of Cold Water

WHAT, someone will be asking, can I do to show my desire to be of actual service, in the name of Jesus. Jesus tells us. He says that whosoever shall give a cup of cold water in His name is doing the will of God.

We live in a world that poignantly waits for a cup of cold water. I have just returned from another trip through Europe. I was there in 1946, and I felt then that life in Europe had reached the last possible expression of need. But this past summer I was startled to witness a still greater need.

The question that immediately came to mind as I observed conditions in Germany and England and other countries this past summer was this, What can we do to meet such need? And the answer was ready at hand—give them what you have, in the name of Jesus.

• • •

Doers of the Word

JAMES makes much of practical religion in everyday life. He tells us that we are to be doers of the word and not mere sayers of the word, or hearers of the word. And here he means the Word of God—the will of God.

Is there a misunderstood boy in your block? Is there a girl in your class at school who suffers from some bitter criticism? This lesson would suggest to every Christian boy and girl to go in sympathetic understanding to such neighbors and help them to overcome these handicaps. Thus we become doers of the will of God.

• • •

Living Our Religion

WHAT we are determines what people think of our religion, not what we say about our religious life James tells us in Sunday's lesson that faith without works is dead. It is that very truth that our generation so much needs to get hold upon.

We have many perplexing situations in our world. Racial differences, differences regarding capital and labor, and so forth and so on.

How are these problems to be solved? By resolutions? We know that many very pious resolutions have been adopted concerning these problems, but still the problems remain.

One Christian in any given community who applies the teaching of James to everyday life will start a train of events that will add up to the solution of any problem, social, economic or what not. We must translate our beliefs into action.

• • •

The More Excellent Way

JAMES goes on to assure us that when we undertake faithfully to live our religion, we may confidently claim the promise of God that if any man lack wisdom, let him ask of God who giveth liberally unto all men, and upbraideth not.

The conclusion of the whole matter, therefore, is to face life as we find it, taking into account the actual facts, and boldly and confidently tackling the job in the assurance that the grace of the Lord Jesus Christ is always sufficient for any and every situation.

The more excellent way of the Golden Rule is the answer to the whole matter. But the Golden Rule is impotent until it is translated into action.

And the best of it all is that it actually works. When someone asked Morrison what Christianity was doing for China, he replied: "Christianity is changing China into a community of God." That is precisely what this lesson will do for your community, if you apply its teachings to life as you find it.

SMITH—WADE

Marie Smith, daughter of Mr. and Mrs. Lloyd Moravets of Ames, became the bride of Russell Wade, son of James Wade of Clear Lake, Sunday, October 26th, 1947 at a fireside wedding in the home of the bride's cousins, Mr. and Mrs Lowell Craig at Ames, Iowa.

Rev. Wells of the Baptist Church of Ames, officiated at the double ring ceremony.

The bride wore a royal blue dress trimmed with silver sequins and wore a corsage of pink roses. Her attendant Pearl Wade, sister of the groom, wore an electric blue dress and wore a corsage of talisman roses.

The bride's mother wore a black dress with a corsage of talisman roses.

The color scheme was white and pink, a bouquet of white carnations hung over the fireplace and candles on either side. The two cakes were made and decorated by Mrs. Kinstrum of Ames and the bride's mother

After the ceremony refreshments were served to the guests. Mrs. Craig, cousin of the bride poured. The bride's mother and aunt, Mrs. Rose Hazelwood served.

Guests were Mr. and Mrs. Raymond Kerns and Mrs. Alpha Wade of Des Moines; Mr. and Mrs. Edd Kewell; Mr. and Mrs. Charles Hamme and daughter, Joyce, of Gilbert; James Wade; Mrs. Marjorie Sporra; Carl Wessel of Clear Lake; Pearl Wade of Garner; Mr. and Mrs. Lloyd Moravets and Miss June Kourvell of Ames.

The couple will be at home in Clear Lake.

FIRE DEPARTMENT CALLED TO PAVEY'S BLACKSMITH SHOP

The Klemme Fire Department was called to the Pavey blacksmith shop Monday evening at about 7:30 o'clock when Mr. Pavey noticed a blaze inside his shop.

Evidently a spark from the forge was the cause of the blaze which had just started but was creeping up the wall when the fire department extinguished the flames. The damage was small.

Hunters Show Limit

Klemme nimrods took advantage of the beautiful fall weather the first few days of the duck season and most of the hunters reported the bag limit. A few were able to bag the limit in mallards but most of the hunters had to be satisfied with teel.

Dale Rapp, Woden. Arrested Oct. 25th. Charge. Drinking intoxicating liquor on highway. Fined $10.00 and court costs

George Andrew Netland of Klemme. Arrested by Highway Patrol Oct. 25th. Charge: Intoxication. Fined $35.00 plus costs.

Willard Wentworth Sprecher, Scarville. Arrested by Highway Patrol Charge: Improper passing. Fined $25.00 and court costs.

Attend Synod Meeting At Elkader

Mr. and Mrs. Fred Becker, Rev. and Mrs. Calvin Grosshuesch, and Mrs. Erwin Haupt attended the Evangelical and Reformed Church Synod meeting held at Elkader on Wednesday and Thursday, October 15 and 16.

Delegates To Womens Guild

Mrs. Fred Becker and Mrs August Josten were delegates to an Evangelical and Reformed Womens Educational Guild meeting held October 20th at Lincoln, Iowa. Fred Becker took the ladies to the meeting in his car.

HERE ARE THE PRIZE WINNERS

Klemme Babies Selected By Lloyd's Studio, Des Moines

1 Lois, daughter of Mr. and Mrs Hugh Hummel.

2 Jimmy, son of Mr. and Mrs. Mitchel Bock.

3. Sue Ellen, daughter of Mr. and Mrs Frank Hougland.

4 Zelda, daughter of Mr. and Mrs. Carl Heginger.

HELLO, FOLKS!

Mr. and Mrs. Melvin Buseman are the proud parents of a baby girl, born Saturday, Oct. 25th. She tipped the scale at 8 and one half pounds, and will be called, Gwenlyn Kay. She has a little sister three years old, Marcia Marie.

Mr. and Mrs. Bill Mewes of Kanawha are the parents of a son born October 25th, tipping the scales at 8 lbs. 11 oz. He has been named Gary Lee. This honors Mr. and Mrs. George Albers, Sr as great grandparents.

Mr and Mrs. Alvin Lass are the parents of an 8 lb. 12½ oz baby girl born Sunday, October 12, 1947 at the Garner Nursing home. She has been named Donna Katherine.

We specialize in printing Wedding Announcements.

Verna Pringnitz Bride At Candlelight Ceremony In Liberty Methodist Church

At the Liberty Methodist Church, Miss Verna Pringnitz, daughter of Mr. and Mrs Emil Pringnitz of near Kanawha, became the bride of Donald Ott, son of Mr. and Mrs. Ralph Ott of Clear Lake, on Wednesday afternoon, October 22, 1947, with the Rev. Herschel E. Harvey officiating at a double ring candle light service.

Nuptical music was played by Mrs. J. L. Abele, who accompanied Le Roy Bredlow who sang "Always" before the ceremony and The Lord's Prayer as the couple knelt before the alter.

The church was beautifully decorated with lighted candelabra and baskets of large chrysanthemums.

The bride was dressed in an aqua blue street length dress, with brown accessories. She wore a corsage of talisman roses and a single strand of pearls, a gift from the groom.

Miss Noami Nieman, a close friend of the bride, acted as bridesmaid. She wore a pink dress made exactly like the brides, she also had brown accessories and wore a corsage of white roses.

Mrs. Emil Pringnitz, mother of the bride, wore a black dress with a corsage of red roses. Mrs. Ralph Ott, mother of the groom, wore a green dress and a corsage of yellow roses.

The groom wore a gray striped suit. Junior Pringnitz, a brother of the bride, who acted as best man wore a brown suit. Both men wore a white carnation boutonniere.

Ushers and candle lighters were Ronald Pringnitz, brother of the bride, and Ralph Ott, Jr., brother of the groom. They also wore white carnation boutonieres.

Following the ceremony a reception was held in the dining room of the church which had been decorated in yellow and white. A large four tier wedding cake served as a center-piece for the bride's table The wedding cake was baked and decorated by Mrs. Marvin Isvik of Klemme Lunch was served to about 80 guests. The waiters at the table of the bride were Wayne Schoenwetter and Miss Neva Kropp, other waiters were Ramonna Tanner, Loraine Bredlow, Charles Miller, Elsie Hill, Raymond Schoenwetter and Ben Nieman, Jr. Those who worked in the kitchen were Mr. and Mrs. Bernard Pringnitz, Mr. and Mrs. Kenneth Zwald, and Mr. and Mrs. Russell Hansen.

Mrs. Ott is a graduate of the Garner High School with the class of 1939, and has spent most of her time working at home and at Clear Lake.

The groom attended the Clear Lake High School and attended an electrical trade school in Chicago. He served in the U. S. Navy for 3½ years of which 3 years was spent in the Pacific. He is employed at the Zack Brothers Electrical Co. at Mason City. After a short wedding trip they will be at home in Clear Lake.

Annual Farm Bureau Meeting Set For Monday, Nov. 3

MISS STELLA THIEMANN IS BRIDE OF EARL BEIBER OF MARION, IOWA

Miss Stella Theimann of Marion, daughter of Mr. and Mrs. Geo. Thiemann of Klemme, and Mr. Earl Beiber of Marion, were united in marriage on Saturday, October 18, 1947 at 5:00 p. m. at the St. Paul's Lutheran Church Chapel at Iowa City, with the Rev. Choitz officiating. The couple were attended by Mr. and Mrs. Robison of Marion.

The bride wore a brown gaberdine suit with brown and frost-white accessories. She wore a corsage of talisman roses

Mrs. Robison wore a grey suit and a lavender pom-pom corsage.

The bride is a graduate of Thompson's Beauty School of Des Moines and for the past 2½ years has owned and operated a beauty shop at Marion. Mr. Beiber is employed at the Collins Radio Co. at Cedar Rapids. They will make their home at 714 10th Street at Marion, Ia.

Reception Held Sunday

Sunday afternoon a reception was held at the Klemme Community Hall in honor of the couple and was attended by about 165 relatives and friends. After a program the couple was presented with a variety of nice gifts after which lunch was served.

Stephen Dale Nettifee, year old son of Mr. and Mrs. Carl Nettifee of McAllen, Texas, formerly of Mason City and Klemme, was among the top winners in a baby contest sponsored by a McAllen studio. There were 105 in the contest. Mrs. Nettifee is the former Maxine Bachman of Klemme. Mr. Nettifee's home was formrly at 2116 Mass. S. E., Mason City.

JACK DETHMERS TO SPEAK AT ANNUAL MEETIN OF COUNTY FARM BUREAU

The situation in Europe will be discussed by Hancock County's Farm Bureau President Jack Dethmers, at the annual meeting Monday evening, Nov. 3 at the High School in Garner. Miss Jean Ingebritson of Crystal Lake will present vocal numbers. Wayne Kieth, president of the Kossuth County Farm Bureau will show colored slides of his trip to Europe with Jack Dethmers.

County Farm Bureau resolutions will be discussed and passed. County officers will be elected for 1948. In compliance with the food saving program no lunch will be served. The whole family will enjoy this program.

FUNERAL RITES FOR MRS. AUGUST SCHLAWIN ON THURSDAY, OCT. 23

Funeral rites were held on Thursday, Oct. 23, for Mrs. August Schlawin, who died Monday evening, Oct. 20, about 11:30 p m. Mrs. Schlawin had attained the age of 96 years, five months and 26 days. Services were held at the Otto Schlawin home in Garner at 1:30 p. m., and at the Klemme Evangelical and Reformed Church at 2 p. m. with the Rev. Calvin Grosshuesch in charge. Mrs. Schlawin was a member of the Klemme Church.

A quartette composed of Mrs. Edmund Josten, Mrs. Wm. Reinhart, Raymond Barz and Milvern Barz sang "Abide With Me," and "Take Thou My Hand".

Mrs. Schlawin had been in poor health for several years and was living with her son and daughter-in-law, Mr. and Mrs. Otto Schlawin, who had cared for her for a number of years.

Carolina Schlawin was born in Kukow Pommern, Germany, April 24, 1851, and grew to womanhood there. In 1890, Mrs. Schlawin, her husband and her family came to America and have lived in this community ever since. They lived on farms near to Garner and Klemme, and in 1912 they moved from the farm to Klemme later moving to Garner.

Her husband and four children preceded her in death. Mr. Schlawin died 23 years ago. The children preceding her were: Mrs. Gottlieb (Augusta) Goll, Mrs. Ralph (Ida) Brouwer, Will, and an infant son, Bernhart. Those who survive are two sons; Otto and Reinhold, and a daughter, Mrs. Lewis (Emma) Griffen; 28 grandchildren and 37 great grandchildren and one great, great grandchild.

Pallbearers were Werner Schlawin, Paul Goll, Arthur Brouwer, Kenneth Schlawin, Roger Schlawin and Fred Olthoff. Interment was made in the Klemme cemetery.

Mrs. Ray Jorgenson Hostess To Saturday Club

Mrs. Ray Jorgenson, Jr. entertained the Saturday Bridge Club at her home Saturday afternoon. Guests outside of the club were Mrs. Art Kudje, Mrs. Ed. Jacobs, Mrs. W. F. Missman and Mrs. R. A. Jorgenson.

High scores in bridge were made by Mrs. R. A. Jorgenson and Mrs. Art Kudje.

The hostess used Halloween decorations and served pumpkin pie and coffee.

Mrs. Beier Had Quilting Bee

Mrs. Emil Beier entertained eight ladies at a quilting bee at her home Friday afternoon. The ladies finished a quilt for the W. S. C. S.

Mrs. Beier served a nice lunch to the ladies.

Aspirants Hint for G.O.P. Bid in '48

Ike Reluctant; Taft Works Hard for Party Nomination

By BAUKHAGE
News Analyst and Commentator.

WASHINGTON.—Back before World War II started, I attended a party given by Mark Woods, (my present boss). One of the guests, with whom I had been associated on the Farm and Home Hour came to me and said: "I want you to meet my brother. He's a lieutenant colonel in the army, and I think he's going places."

So we went back and I shook hands with a pink-cheeked, personable soldier, exchanged a few words and drifted on. Shortly afterward (1939), I went to Europe, the war broke and the party was long forgotten.

Somewhat later, and often since, I have had occasion to remember the lieutenant colonel vividly.

I have just been looking at a graph drawn in 1945 by that same lieutenant colonel (after he was needled into it by a biographer) It shows his promotions from the time he was graduated from West Point in 1915.

Baukhage

In World War I, he reached a lieutenant colonelcy but after the armistice reverted to his "permanent" rank of captain. He soon was promoted to a major (boosts were slow in those days) and remained a major until 1936. From then until the time I met him at that party, he was a lieutenant colonel.

Two years passed and then things began to happen: Colonel in '41; upped to brigadier general the same year; major general in 1942; commanding general of the European theater of operation, then, in 1945, lieutenant general and commanding general, Allied forces in the European theater—now, president of Columbia university (or maybe something bigger) to be.

Milton Eisenhower was right when he said his brother was "going places." It is in the voluminous volume "My Three Years With Eisenhower" by Harry Butcher, his naval aide, that the chart appears. The graph shows at its peak the rank of four - star general. Butcher jokingly plotted the curve (down) after that point, to zero. Eisenhower immediately drew a fishing pole at the nadir, thus expressing his hopes.

Both were wrong. The government pinned a fifth star on him, and the fishing pole has been transmuted into a cap and gown, as symbol of his new rank when he switches bosses from Mars to Minerva.

But if certain boosters have their way, the line on the chart may move upward again.

I haven't heard what the general's deep-down plans are, but from what I hear, the fishing pole is still the final objective, and he doesn't necessarily mean fishing from a presidential yacht.

Meanwhile, brother Milton Eisenhower has "gone places," too. He's also a "president" — president of Kansas State college, and very happy there. It was rumored that if he should "choose" to take a post which had been suggested for him—back in the department of agriculture (as secretary this time), when and if Clinton Anderson moved elsewhere, and thus became a member of the Truman cabinet, it would mean that his brother was not considering a new job.

Senator Taft Personifies GOP

Of course, it is more fun generalizing about generals than it is to particularize about the prime contenders in the candidates' elephant race to come. But, no matter how much political dust some dark or even chestnut roan stirs up later, there are just two people the politicians have to consider now. They are Senator Taft of Ohio and Governor Dewey of New York.

I was standing with a group outside the executive offices of the White House, waiting for the presidential press and radio conference when a genial human cloud, much bigger than a man's hand, in fact almost twice as big as most men's bodies, appeared on the horizon. It was the politically astute and ardent Taftite, Rep. Clarence Brown of Ohio.

The boys ragged Brown a little about the Taft trip, but he wasn't a bit down-hearted. Said he: "We didn't expect to bring back a bunch of delegates. Taft made votes for the Republican party, and that means votes for Taft." (Despite Brown's optimism, some observers have felt that although Taft did make new friends, they weren't new votes, for they were already solid Republicans.)

Frankly, I don't understand Taft very well. There is no question about his intellect or his intellectual judgments. Nobody could ask for a greater demonstration of political skill on the legislative side than his record in the last congress reveals. But that isn't all.

One of Taft's critics, fully cognizant of the Republican policy leader's achievements, said that his intellectual judgments "ran ahead of his practical application" of them. I suppose the critic meant that for all Taft's powers of reasoning, scholarship and tremendous ability to acquire knowledge and weigh facts, he sometimes appears to allow his hereditary viewpoint rather than his acquired conclusions to guide his course Taft is naturally conservative—and sometimes, I am sure, he has been intellectually persuaded as to the validity of certain measures, but has been unable to support those measures fully because of this inborn conservatism.

To those who know Taft even more than casually, he is cool, rarely unbending, legalistic. He can prove himself, however, as even the least sympathetic newsmen on his recent trip admit, affable and approachable. Also, he has that on many occasions so useful acquisition, (especially when chaperoning a bob-tailed flush), the poker face. Even his smile, which if overworked, becomes a bit rubbery, doesn't always dispel this impression. Although he inherited from his father, William Howard Taft, a tremendous capacity for hard work and a conservative point of view, he lacks the robust geniality conveyed by the Elder Taft's smile and laugh.

Unfortunately, Robert Taft hasn't that risible faculty to relieve a certain aloof remoteness of manner and expression. He is by no means a glamour-boy, and he knows it. One time when Republicans and Democrats were gathered at some clambake in New England, and the raillery became a little personal, Taft challenged the Democrats to a beauty contest. Senator Pepper, who knows he has no claim to pulchritude himself, immediately jumped up to say: "I'm paired with the senator from Ohio."

Taft has some sense of humor, even if he isn't famous for it. Perhaps he absorbed it from his witty wife. He stands six feet tall and he isn't stout, although somehow or other you seem to think of him that way. He is still young—only 58. (I'm sure that's young because it's exactly my age.)

As Representative Brown intimated, Taft's speeches on his western tour, almost entirely devoted to the glorification of the Republican party's record in the first session of the 80th congress, helped strengthen the party. In fact, Taft generally is

SENATOR TAFT

accepted as the personification of the Republican party—and well he might be—considering the manner in which he dominated the last session, maintaining the respect of the Democratic leaders which he always has had—if not their love and admiration, which he never has had.

SPECIAL SESSION—OF SURGERY . . . In case you've never seen a surgery amphitheater, either as a patient or a spectator, take a look at this picture. Members of the U. S. chapter of the International College of Surgeons, which held its convention in Chicago, are shown here watching the removal of three-fourths of a man's stomach.

NEWS REVIEW

Food Plan Opens Shakily; Comintern Brings Jitters

SIX MONTHS

How Long No Meat?

Amid a certain amount of weeping and wailing and less gnashing of teeth than usual, President Truman's program involving meatless Tuesdays and eggless Thursdays lumbered tentatively through its first week.

Even the most ardent optimist could not call this phase of the food conservation drive to help Europe an instantaneous success; however, it might improve with time.

And it was in the handwriting on the wall that there would be considerable time, for administration experts predicted that the days of voluntary self-denial would last for at least six months.

President Truman himself has set the dates for the interim emergency aid to Europe campaign—from December 1 to March 31—although that time limit was imposed specifically for the raising of 580 million dollars in cash. Regarding the food conservation aspect, Charles Luckman, head of the citizens food committee, said "Our only idea is to do the job until it is done. No time schedule has been set."

Secretary of Agriculture Clinton Anderson was a little more definite. He pointed out that conservation to save grain might be necessary until the winter wheat crop, now being planted, begins to come in next June and July. Then he offered a faint hope with a hollow ring:

"Meatless days are not in the picture indefinitely," he said.

The Eating Public

Public opinion, it developed, was far from united on a solid front behind the food conservation plan.

Restaurant operators said their customers were grousing about meatless and eggless days.

Millions of Americans resented the suggestion of a voluntary meatless Tuesday since they already are going without meat four or five days a week because they can't afford to buy it oftener than that.

The poultry industry pointed out that if every one of the 140 million residents of the U. S. were to eat one less egg a week, the government would have to buy 600 million dozen eggs under the law requiring government support of parity prices; and the government already holds in storage several million cases of surplus eggs purchased to support farm prices.

SOLD GOLD:
Second Time

Badly bent economically, although not yet quite broke, Great Britain, in the latest phase of her desperate quest for dollars, has sold 120 million dollars worth of gold to the U. S. in exchange for an equal amount of ironmen.

It was the second such sale from Britain's now dwindling gold reserve. Early in September 80 million dollars worth of gold was sold to the U. S.

The September gold sale came after the 400-million-dollar balance of Britain's dollar loan from America was frozen by British-American agreement when Britain declared she no longer could honor the loan's convertibility clause requiring her to provide dollars in exchange for pounds sterling on demand to any nation she traded with.

SECURITY RISKS:
No Peace of Mind

Communism, particularly since the revival of the Comintern in nine European countries, is taking its toll in the U. S. by undermining the American peace of mind.

That obvious fact has been given added significance by the state department's disclosure that summary dismissal faces state department employes who are "habitual or close" associates of persons even "believed to be" Communists.

In plain language, that is a reversal of a fundamental principle of Anglo-American law—that a man is judged innocent until he is proved guilty beyond a reasonable doubt.

In fact, the state department, in a "security principles" document recently made public, says specifically that if there is a "reasonable doubt" about a worker's loyalty the "department will be given the benefit of the doubt and the person will be deemed a security risk."

While idealists could quibble at length about abridgment of "constitutional rights," few would deny that the state department simply was playing it safe in the face of a manifest danger.

? ? Current Events ? ?

Here are five questions based on recent happenings in the news. Five correct answers and you're eligible to appear on "Information Please"; four and you're still plenty good; three isn't half bad; two, better luck next time; one, subscribe to a newspaper.

1. Five nations recently were refused membership in the U. N. Name them.

2. At an international wireless congress, claims by the Soviet Union that a Russian named Popov invented the wireless were disputed. Who usually is credited as the inventor?

3. General MacArthur has ruled that Emperor Hirohito's crest shall not appear on postage stamps. After what flower is the crest designed?

4. In delaying a shipment of sugar from Verdun to Germany, one Communist French deputy said: "At Verdun, they shall not pass." On what occasion was that phrase first used?

5. Maj. Gen. Harry H. Vaughan has advocated that the two civilian components of the army merge with the army. What are those components?

ANSWERS

1. Italy, Finland, Hungary, Rumania and Bulgaria.
2. Guglielmo Marconi, an Italian.
3. The chrysanthemum.
4. It was used by Marshal Henri Petain in February, 1916, when the Germans were outside Verdun.
5. The Organized Reserves of the army and National Guard.

EDUCATION GOES HIGHER

Danger Seen in Rising Fees

That great old American institution of "working your way through college," which oftentimes is a critical ordeal for the serious student, is showing signs of vanishing completely, and many young seekers-after-truth soon may find it impossible to get through college if they are not blessed with higher-income families to help them out.

A director of the office of education has expressed the fear that the rising cost of a college education soon would keep large numbers of able students outside the campus gates.

Effects of steadily mounting fees in the country's institutions of higher learning already would have serious results for prospective enrollees, were it not for the help the taxpayer is extending students through the G.I. bill of rights.

Recent surveys have proved that universities are depending more and more on student fees while they are confronted with rising costs. Fees, which used to account for about one-third of a college's income, now provide more than one-half of the total college educational expenditures.

"The cost of going to college will be too high for many family budgets if student fees continue to go up and if no provision is made for increased financial support from other sources after the G.I. legislation expires," declares Dr. John D. Russell, director of the office of education's higher education division.

"More and more this trend will limit college education to children of higher-income families—a counter-democratic tendency," he said.

The rate of tuition charges to students, not including board and room, has been increasing steadily over a long period, but the rise has been particularly marked since 1939, according to the survey.

In publicly controlled colleges and universities, the average tuition fee for residents of the state has increased 21.4 per cent in the past seven years.

Sportlight by Grantland Rice

On to Next Year

IN THE wake of the world series, a collection of managers, old-timers and other experts were talking about next year. Last fall at this time the same discussion went on. The question then was — who can head off Boston and St. Louis, Red Sox and Cardinals?

At that time, no one could quite see any challenger in sight. The Red Sox had won in a canter. The Cardinals had overcome a seven-game deficit down the stretch. These were the two teams the world series crowds had to watch.

B. Southworth

It didn't quite work out that way. The Yankees wrecked the Red Sox, and the Dodgers left the Cardinals well behind.

What about next year, again? The majority of the experts once more are picking the two winners to repeat.

"For one thing," a veteran said, "both Yankees and Dodgers have too much reserve strength. This season, neither the Red Sox nor the Cardinals had any reserves to call on — especially in pitching, where they took the big flop.

"Next spring, the Dodgers can report with a young but well-seasoned club, once again fully protected by substitute material. The Dodgers have two or three veterans against a swarm of younger players. Their pitching staff will be, or should be, much more consistent."

"What about the Yankees?" someone asked.

"The same thing goes for them," he said. "They are not as young as the Dodgers are, but they are not too old. Joe DiMaggio still has some time to go. Johnson, Rizzuto and Stirnweiss are all under 30. Lindell and Henrich are not much over. Berra is only a kid. Shea and Raschi are both young. Newsom and McQuinn are close to the end of the road.

"Once again, the Yankees have a strong reserve infielder in Brown. They will need more help than the Dodgers will need. Both Tigers and Red Sox must strengthen a number of spots to get back in the running. They won't do it with the players they have now. Neither will Cleveland."

What About the Giants?

"What about the Giants?" was a natural question. "Two more high-grade pitchers are their first need," the veteran came back. "Walker Cooper and John Mize have time left. Cooper is only 32 while Mize is 34. They are not too young, but they still can hit with anybody. Lockman should be a big help next spring to an already strong outfield. The Giants need pitching more than anything else. They have a star in Jansen, who proved what a good pitcher could do with all that run-making power to help him along.

"Boston will be even tougher next year as Billy Southworth gradually is working his way to another pennant. Two pitchers such as Sain and Spahn can't be overlooked. Neither can Southworth. He still needs another top-ranking pitcher.

"The Reds will be better, but they have a long way to go. I can't see much hope for the other clubs. Most of them will have to be rebuilt around the three or four good ball players they have.

"Pittsburgh has shown how tough it is to get good ball players today. They are willing to pay any reasonable or even unreasonable price for someone who can help. But where can they find players, except from farms? With attendance what it is, no one is going to sell a good ball player today.

"The Cardinals have a lot of rebuilding to do. The regulars are getting older. Moore will be 36 and Slaughter will be 32 next spring. Marion is only 31. They still can be dangerous challengers, with one or two additions."

Last fall, it was the Red Sox and the Cardinals. Both took a hard beating. It may happen again, but for the moment at least, the Yankees and the Dodgers get the call.

• • •

Crowds and Stands

Only two teams can crash into a world series. This year it was the Yankees and Dodgers. In 1946 it happened to be the Red Sox and Cardinals. In neither case was there any possibility of accommodating the crowds that wanted to see these two events.

There are now only three sizable major league parks in baseball. They are Yankee stadium, Briggs stadium and the Polo grounds. They range from 72,000 to 55,000 and 54,000. Of the 16 major league clubs, at least 12 can pack in only something like 35,000.

The main point is that baseball interest has far outgrown the old-fashioned stands of past years. The main crime happens to be in Brooklyn. Here we have a 35,000 park, that day after day could play to some 45,000 to 70,000 customers.
